Prerequisites & Notes: PSY 302 with a C- or better and declared Psychology Major and PSY 210, 220, 230, 240, 250, each with C- or better; or PSY 301 with a C- or better and declared Behavioral Neuroscience Major.

Credits: 5

Grade Mode: Letter

PSY 310 - Sensation and Perception

The basic principles involved in seeing, hearing, touch, taste and smell will be presented. Ecological constraints on perceptual processes will be discussed in the context of illusions and other perceptual demonstrations as well as underlying physiological mechanisms.

Prerequisites & Notes: PSY 210; PSY 220; and PSY 301 or declared Behavioral Neuroscience Major and PSY 301.

Credits: 5

Grade Mode: Letter

PSY 311 - Human Memory

Reviews memory theories, empirical findings, and applications. Topics include encoding, storage, and retrieval from short- and long-term memory; implicit and explicit memory; autobiographical memory; eyewitness memory.

Prerequisites & Notes: PSY 210, PSY 301

Credits: 5

Grade Mode: Letter

PSY 318 - Language, Brain, and Mind

This course will address fundamental issues regarding human language: how the mind represents linguistic information; how language is acquired by children; how language is processed by adults; the relationship between language and thought; and the use of brain imaging methods to examine how language is represented and processed.

Prerequisites & Notes: PSY 210 and PSY 220 and PSY 301.

Credits: 5

Grade Mode: Letter

PSY 319 - Cognitive Neuroscience

Discussion of the brain systems underlying human cognition, with a focus on how inferences about brain systems are drawn from neuropathological, neuroimaging, and behavioral studies.

Prerequisites & Notes: PSY 210, PSY 220, and PSY 301 or declared Behavioral Neuroscience and PSY 301. Available to Sport Psychology students with instructor permission.

Credits: 5

Grade Mode: Letter

PSY 320 - Topics in Behavioral Neuroscience

Detailed examination of key areas of physiological psychology, emphasizing the anatomical, physiological and neurochemical bases of behavior.

Prerequisites & Notes: PSY 220; PSY 301 or comparable research course; instructor permission

Credits: 5

Grade Mode: Letter

PSY 321 - Learning

A survey of conditioning and learning.

Prerequisites & Notes: PSY 220 and PSY 301

Credits: 5

Grade Mode: Letter

PSY 322 - Motivation

Theoretical and empirical study of human and subhuman motivational process. Topics covered range from basic physiological drives to achievement motivation and conformity. Emphasis on both biological and social sources of motivation.

Prerequisites & Notes: PSY 220 and PSY 301.

Available to Sport Psychology students with instructor permission.

Credits: 5

Grade Mode: Letter

PSY 323 - Psychopharmacology

Introduction to behavioral pharmacology and the effects of therapeutic and recreational drugs on the function of the nervous system and behavior.

Prerequisites & Notes: PSY 220; PSY 301 or comparable research course and instructor permission. Available to Sport Psychology students with instructor permission.

Credits: 5

Grade Mode: Letter

PSY 324 - Comparative Psychology

A phylogenetic comparison of animal behavior, focusing on learning, motivation and sensory

processes in selected species of animals.

Prerequisites & Notes: PSY 210 or PSY 220; and PSY 301

Credits: 5

Grade Mode: Letter

PSY 327 - Cognitive Neuroscience Lab

Introduction to laboratory methods and techniques used in cognitive neuroscience. Concentration will be on large scale brain imaging of cognition using EEG. Students will collect and analyze data from participants undergoing a broad range of cognitive paradigms.

Prerequisites & Notes: PSY 220 and one of PSY 310, PSY 311, PSY 319, or PSY 320.

Credits: 4

Grade Mode: Letter

PSY 328 - Techniques in Behavioral Neuroscience

Introduction to laboratory methods and techniques used in behavioral neuroscience. Two hours lecture and four hours lab each week; students will be introduced to basic techniques in histology, neurophysiology, neurochemistry, molecular biology, or behavioral analyses. May require live animal research. Repeatable to a maximum of 8 credits.

Prerequisites & Notes: PSY 320 or PSY 323 or instructor permission.

Credits: 4

Grade Mode: Letter

PSY 330 - Child Development

In-depth coverage of social and cognitive development in children and adolescents. Emphasis on the implications and practical applications of research findings in these areas.

Prerequisites & Notes: PSY 230 and PSY 301

Credits: 5

Grade Mode: Letter

PSY 331 - Adult Development and Aging

Examines developmental processes that occur in later life, with a focus on theory, research and practical issues. Topics include a) theoretical and methodological issues, b) biological changes and health issues, c) changes in memory and intelligence, d) personality across adulthood and e) death and dying.

Prerequisites & Notes: PSY 230, PSY 301

Credits: 5

Grade Mode: Letter

PSY 332 - Adolescent Development

Examines adolescent cognitive, social, physiological and intrapsychic development from a variety of theoretical perspectives. Emphasis on current research findings in this area. Students cannot get credit for both PSY 332 and 373.

Prerequisites & Notes: PSY 230 and PSY 301.

Available to Sport Psychology students with permission of instructor.

Credits: 5

Grade Mode: Letter

PSY 333 - Infant Development

Examines social, emotional, cognitive, and physical development of infants and toddlers from diverse theoretical perspectives and methodological approaches. Emphasis on current research findings, application of research findings, and considering infant development in socio-cultural context.

Prerequisites & Notes: PSY 230 and PSY 301.

Credits: 5

Grade Mode: Letter

PSY 340 - Environmental Psychology

Theoretical, methodological and empirical problems and issues relating to behavior in constructed and natural environments.

Prerequisites & Notes: PSY 301 plus one from PSY 210-250

Credits: 5

Grade Mode: Letter

PSY 341 - Psychology and Culture

Cultural and ecological factors and their effect on perception, thinking, language, intelligence, sexuality and other psychological variables. An examination of the 'universality' of traditional Euro-American psychological theories.

Prerequisites & Notes: PSY 240 and PSY 301.

Available to Sport Psychology students with instructor permission.

Credits: 5

Grade Mode: Letter

GUR Attributes: SSC

PSY 342 - Social Cognition

Survey of theory and research investigating the cognitive processes that underlie social judgment and behavior.

Prerequisites & Notes: PSY 210, PSY 240, PSY 301

PSYCHOLOGY

Credits: 5
Grade Mode: Letter

PSY 343 - Social Processes

Examination of selected topics related to formation and functioning of groups, as well as intergroup relations.

Prerequisites & Notes: PSY 240, PSY 301
Credits: 5
Grade Mode: Letter

PSY 344 - Psychology and the Law

An examination of current issues in psychology and the law with an emphasis on the application of social psychological theories and research to the understanding of human behavior in a legal context.

Prerequisites & Notes: PSY 240, PSY 301
Credits: 5
Grade Mode: Letter

PSY 345 - Evolutionary Psychology

The application of evolutionary theory to understanding the characteristics of human functioning including emotion, thinking, and action.

Prerequisites & Notes: One course from PSY 210 to PSY 240; C- or better in PSY 301.
Credits: 5
Grade Mode: Letter

PSY 346 - Stereotyping, Prejudice, & Discrimination

This course will examine issues of and related to stereotyping, prejudice, and discrimination from a social psychological perspective with an emphasis on racism and sexism.

Prerequisites & Notes: PSY 240, PSY 301
Credits: 5
Grade Mode: Letter

PSY 351 - Abnormal Psychology and Interventions

Human behavior patterns culturally labeled as abnormalities, or as mental illness; their etiology, incidence, treatment and social attitudes toward such patterns. Historical review of the concepts used to explain such behavior and the research relating to the treatment of mental disorders.

Prerequisites & Notes: PSY 250, PSY 301
Credits: 5
Grade Mode: Letter

PSY 354 - Abnormal Child Psychology and Interventions

Child behavior patterns culturally labeled as abnormalities, or as mental illness; their etiology, incidence, treatment and social attitudes toward such patterns. Historical review of the concepts used to explain such behavior and the research relating to the treatment of child mental disorders.

Prerequisites & Notes: PSY 230, PSY 250 and PSY 301
Credits: 5
Grade Mode: Letter

PSY 359 - Introduction to School and Mental Health Counseling

Overview of professional counseling in schools, colleges and communities. Includes counselor roles, ethics, counseling theories and techniques, training and licensing, counseling minorities, outreach, use of paraprofessionals and research.

Prerequisites & Notes: PSY 250, PSY 301; major
Credits: 4
Grade Mode: Letter

PSY 370 - Psychology and the Arts

Concepts from a wide variety of areas in psychology are used to analyze issues in art. Specific works of art - which may include literature, music and visual arts - are considered through class discussion and written essay.

Prerequisites & Notes: PSY 101
Credits: 3
Grade Mode: Letter

PSY 375 - Health Psychology

The course examines health psychology with a focus on theory, research, and practical issues. Topics include (a) health behavior and prevention, (b) stress and coping, (c) the treatment setting, and (d) management of chronic and terminal illness.

Prerequisites & Notes: PSY 101 and PSY 301. Available to Sport Psychology students with instructor permission.
Credits: 5
Grade Mode: Letter

PSY 376 - Psychology of Romantic Relationships

An overview of the psychology of romantic relationships. Topics bridge social and abnormal psychology and include attraction, relationship formation, maintenance, and dissolution, and

theoretical approaches to the clinical treatment of couples' issues.

Prerequisites & Notes: PSY 240, PSY 250 and PSY 301.

Credits: 5

Grade Mode: Letter

PSY 377 - Positive Psychology

This course is a survey of the science of positive psychology which explores the study of human strengths and virtues. The focus of the course is on the unique characteristics of the human experience that contribute to the physical/psychological health and well-being.

Prerequisites & Notes: PSY 301. Available to Sport Psychology students with instructor permission.

Credits: 5

Grade Mode: Letter

PSY 378 - Personality Psychology

This course examines the fundamental issues and questions addressed by the field of personality psychology, considering evidence from several major theoretical approaches to personality (e.g., trait, social-cognitive, motivational, developmental, narrative), and situating personality within biological, social, and cultural contexts.

Prerequisites & Notes: PSY 230; PSY 240; PSY 301 or permission of instructor.

Credits: 5

Grade Mode: Letter

PSY 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

PSY 410 - Seminar in Cognitive Neuroscience

In-depth coverage of major issues and methods in the study of cognitive neuroscience. Library and laboratory or field research.

Prerequisites & Notes: For PSY majors: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303, and one of PSY 310, PSY 318, PSY 319, PSY 320 or PSY 322, all with a C- or better. For Behavioral Neuroscience majors: PSY 303 and one

of PSY 310, PSY 318, PSY 319, PSY 320, or PSY 322, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 411 - Seminar in Cognition

In-depth coverage of selected topics in memory, cognition, and higher order cognitive processing. Library and laboratory or field research.

Prerequisites & Notes: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303; and one of PSY 310, PSY 311, PSY 318, PSY 319 or PSY 320, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 420 - Seminar in Behavioral Neuroscience

A detailed examination of brain-behavior relations and the neural bases of behavior, based upon review and discussion of current literature in a variety of areas. Library and/or laboratory work.

Prerequisites & Notes: Prereq: For PSY majors: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303; one of PSY 310, PSY 319, PSY 320, PSY 321, PSY 322, PSY 323, or PSY 324 all with C- or better. For Behavioral Neuroscience majors: PSY 303 and one of PSY 310, PSY 319, PSY 320, PSY 321, PSY 322, PSY 323, or PSY 324, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 421 - Seminar in Learning

In-depth study of major theoretical and methodological approaches to the study of learning. Laboratory and field research exercises.

Prerequisites & Notes: For PSY majors: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303, PSY 321, all with a C- or better. For Behavioral Neuroscience majors: PSY 303, PSY 321, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 422 - Seminar in Motivation

In-depth coverage of determinants of behavior in humans and other animals. Students will examine primary research and will conduct research. Activities will also include class discussion, presentations, and a major integration paper.

Prerequisites & Notes: For PSY majors: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303, and PSY 322, all with a C- or better. For

PSYCHOLOGY

Behavioral Neuroscience majors: PSY 303 and PSY 322, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 424 - Seminar in Comparative Psychology

In-depth study of animal behavior where different species in different ecological niches is a major variable. Emphasis on the genetic determinants of behavior differences. Students will examine primary research and will conduct research. Activities will also include class discussion, presentations, and a major integration paper.

Prerequisites & Notes: For PSY majors: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303, PSY 324, all with a C- or better. For Behavioral Neuroscience majors: PSY 303 and PSY 324, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 428 - Advanced Techniques in Behavioral Neuroscience

Laboratory based study of integrated neural systems underlying behavior, based on advanced techniques in histology, neurophysiology, neurochemistry, molecular biology, or behavioral analyses. Two hours lecture and four hours lab each week; may require live animal research. Repeatable to a maximum of 8 credits.

Prerequisites & Notes: PSY 303 and PSY 328 or instructor permission.

Credits: 4

Grade Mode: Letter

PSY 430 - Seminar in Developmental Psychology

In-depth study of central themes of human development. Contemporary research questions addressed in professional literature and field investigations.

Prerequisites & Notes: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303; PSY 330 or PSY 331 or PSY 332 or PSY 333, all with C- or better.

Credits: 5

Grade Mode: Letter

PSY 431 - Seminar in Adult Development and Aging

In-depth study of central themes of adult development and aging. Contemporary research questions addressed in professional literature and field investigations.

Prerequisites & Notes: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303, PSY 331, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 440 - Seminar in Environmental Psychology

In-depth study of major issues and methods in the study of psychosocial adaptations to and of the physical environment. Library and laboratory or field research.

Prerequisites & Notes: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303, PSY 340, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 441 - Seminar in Cross-Cultural Psychology

In-depth study of contemporary issues, perspectives, and methods used in the study of how cultural and ethnic factors affect psychological processes. A basic examination of current topics that are receiving significant attention. Library and/or laboratory and field research.

Prerequisites & Notes: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303; and one of PSY 341, PSY 342, PSY 343, PSY 344, PSY 345, or PSY 346, all with C- or better.

Credits: 5

Grade Mode: Letter

PSY 442 - Seminar in Social Psychology

In-depth study of social psychological theory and research to explain patterns of thought and behavior.

Prerequisites & Notes: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303; and one of PSY 341, PSY 342, PSY 343, PSY 344, or PSY 345, PSY 346, all with C- or better.

Credits: 5

Grade Mode: Letter

PSY 451 - Seminar in Abnormal Psychology

Advanced study in major issues and research methods in abnormal psychology. Focus on research design and protocols with clinical populations.

Prerequisites & Notes: PSY 210, PSY 220, PSY 230, PSY 240, PSY 250, PSY 303, and one of PSY 351 or PSY 354, all with a C- or better.

Credits: 5

Grade Mode: Letter

PSY 470 - Psychological Issues in Substance Use

This class provides advanced information about psychological issues in substance use. In addition to surveying the most common substances of abuse and their effects, this course also addresses etiological theories, assessment and diagnosis, treatment, issues pertinent to diverse groups of individuals, and current controversies in the field. There is a substantial off-campus, service learning component to this course that may require evening or weekend availability.

Prerequisites & Notes: PSY 250 and PSY 351, or current enrollment in the graduate Mental Health Counseling or School Counselor Programs.

Credits: 5

Grade Mode: Letter

PSY 471 - Honors Thesis Seminar

In-depth investigation of a selected topic in psychology culminating in an honors thesis. Should be taken the quarter before the thesis is begun and while it is in progress. Repeatable to a maximum of 6 cr. S/U grading.

Prerequisites & Notes: instructor permission

Credits: 2

Grade Mode: S/U

PSY 478 - Understanding Healing Processes across Cultures

The course will overview systems of healing as they are utilized globally, identify common and uncommon elements of healing and relate these to psychotherapeutic processes.

Prerequisites & Notes: PSY 301 or equivalent; junior status.

Credits: 3

Grade Mode: Letter

PSY 481 - Seminar in History and Systems of Psychology

An historical perspective of the development of psychological systems and theories and their impact on contemporary psychology.

Prerequisites & Notes: C- or better in: PSY 210-250, PSY 302 plus completion of 45 credits in psychology.

Credits: 4

Grade Mode: Letter

PSY 482 - Seminar in Psychological Theory

A seminar examining the philosophical assumptions of science in general and psychology

in particular.

Prerequisites & Notes: C- or better in: PSY 210-250, PSY 302 plus completion of 45 credits in psychology.

Credits: 4

Grade Mode: Letter

PSY 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

PSY 501 - Behavioral Neuroscience

Examines the basic anatomy, physiology and chemistry of the vertebrate nervous system within the context of both abnormal and normal behaviors. Topics vary but include sensory and motor systems, reward pathways, substance abuse, neural correlates of major mental illness, and regeneration/recovery of function in the central nervous system.

Prerequisites & Notes: Admission to MS or MEd program in psychology or permission of instructor.

Credits: 5

Grade Mode: Letter

PSY 502 - Adult Psychopathology

Consideration of theories relevant for understanding adult psychopathology. Current research into classification, etiology, description, diagnosis and treatment of behavioral and mental disorders. Overall orientation is to seek integration of cultural, social, psychological and physiological processes into resultant patterns of personal, social and behavioral maladaptations. Course content selected on basis of greatest utility for preparation of Master's level counselors in training.

Prerequisites & Notes: admission to MS or MEd program in psychology or instructor permission

Credits: 5

Grade Mode: Letter

PSY 503 - Cognition

Provides an overview of theories, research and applications of cognitive psychology. Topics covered range from basic perception through higher mental processes.

PSYCHOLOGY

Prerequisites & Notes: Admission to MS or MEd program in psychology or permission of instructor.

Credits: 5

Grade Mode: Letter

PSY 504 - Lifespan Psychological Development

An overview of the major theories and principles in developmental psychology. Theories, issues and principles are highlighted through an analysis of various topics across the lifespan and as they affect the psychological development of the individual.

Prerequisites & Notes: Admission to MS or MEd program in psychology or permission of instructor.

Credits: 5

Grade Mode: Letter

PSY 505 - Social Psychology

Designed to provide a thorough background in social psychology and to motivate a continuing exploration of theoretical problems and issues in the field. Students will be exposed to historical and contemporary theories and methods in social psychology.

Prerequisites & Notes: Admission to MS or MEd program in psychology or permission of instructor.

Credits: 5

Grade Mode: Letter

PSY 512 - Correlation Methods and Data Analysis

Covers topics in bivariate and multivariate correlation and regression. Students learn to design correlation studies and to analyze correlational data involving one dependent variable and one or more independent variables. Topics covered include scale development and classical test theory, descriptive statistics, hypothesis testing, bivariate regression and correlation, multiple regression and correlation, dummy coding, moderation and mediation. Use of computer-based statistical software packages for data analysis and interpretation is stressed.

Prerequisites & Notes: Admission to MS program in psychology or permission of instructor.

Credits: 5

Grade Mode: Letter

PSY 513 - Experimental Methods and Data Analysis

Introduces ANOVA models as special cases of the General Linear Model using a model building approach. The equivalence of regression and ANOVA are emphasized. Course addresses basic

topics in experimental research design and data analysis, highlighting theoretical and mathematical issues of most importance in published research. Topics include within and between subjects oneway and factorial designs, post hoc and a priori comparisons among multiple group means, contrasts and effect sizes, best practices in handling missing data, examining assumptions, and reporting results. Use of computer-based statistical software packages for data analysis and interpretation is stressed.

Prerequisites & Notes: PSY 512

Credits: 5

Grade Mode: Letter

PSY 515 - Multivariate Analysis

Topics in advanced multivariate analysis including canonical analysis, discriminant functions analysis, cluster analysis and factor analysis. Logical and geometric properties of multivariate techniques and interpretation on research results are stressed.

Prerequisites & Notes: PSY 513

Credits: 3

Grade Mode: Letter

PSY 516 - Structural Equation Modeling

Topics in restricted latent variable analysis including path analysis and structural equation modeling. Course will cover theoretical bases and computations of these procedures as well as the use of statistical software packages, with emphasis on interpreting and reporting results.

Prerequisites & Notes: PSY 515 or instructor permission

Credits: 3

Grade Mode: Letter

PSY 517 - Advanced Multivariate Modeling

Topics in advanced multivariate modeling, including advanced multiple regression techniques, path analysis, factor analysis, multilevel modeling, and structural equation modeling. Course will cover theoretical bases and computations of these procedures as well as the use of statistical software packages, with emphasis on interpreting and reporting results.

Prerequisites & Notes: PSY 512 and PSY 513.

Credits: 5

Grade Mode: Letter

PSY 532 - Cross-Cultural Counseling

This seminar is a basic introduction to the cross-cultural perspective in psychology. History of the modern cross-cultural movement will be covered

along with a selection of a number of conceptual and methodological issues and problems. Topics include perception, cognition and emotion, developmental topics, social psychological variables, testing and measurement, personality and psychopathology, and virtually all areas of psychology mediated by culture and ethnicity. Some emphasis given to professional applications such as counseling.

Prerequisites & Notes: admission to MS or MEd program in psychology

Credits: 3

Grade Mode: Letter

PSY 542 - Developmental Psychopathology

Overall working model of mental disorders diathesis-stress model. Presentation of diverse theories (e.g., attachment, family systems, genetic/physiological, individual difference, social cognition). Review of current research literature on assessment, diagnosis and treatment of childhood mental disorders within a developmental framework. Ethical considerations in clinical research and therapy with children highlighted.

Prerequisites & Notes: Admission to MS or MEd program in Psychology and PSY 502 or permission of instructor.

Credits: 5

Grade Mode: Letter

PSY 550 - Research Methods in Counseling

Covers content and research methods relevant to psychological processes in counseling.

Prerequisites & Notes: Admission to MS Mental Health Counseling or MEd School Counselor program.

Credits: 3

Grade Mode: Letter

PSY 551 - Developmental School Counseling

A comprehensive overview of professional school counseling with particular emphasis upon recent advances in counseling program development, organization, evaluation and service delivery models.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program; general psychology program students with instructor permission

Credits: 4

Grade Mode: Letter

PSY 553 - Theories of Counseling and Psychotherapy

Basic orientation to counseling theories including the history and development of theories of counseling; comparison of the theories in terms of goals, process, methods; and evaluation and research in counseling; information about how to select between different theories or integrate them; meta-theoretical and trans-theoretical issues, and applying theories across diversity variables.

Prerequisites & Notes: Admission to MS Mental Health Counseling or MEd School Counselor programs; general curriculum students with instructor permission.

Credits: 5

Grade Mode: Letter

PSY 554 - Standardized Tests

Standardized group tests commonly used in the public schools; selection and administration of tests; interpretation of norms.

Prerequisites & Notes: Admission to MEd school counseling, MS mental health counseling, MS experimental psychology, or instructor permission.

Credits: 4

Grade Mode: Letter

PSY 555 - Occupations and Career Development

Critical examination of major theories of career development and vocational counseling. Sources of occupational materials and analysis of their use and distribution in counseling practice.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program; PSY 553

Credits: 3

Grade Mode: Letter

PSY 556 - The Role of the School Counselor

An advanced seminar in school counseling focusing on the professional roles and responsibilities of the counselor in elementary, middle/junior and high school settings. Particular emphasis placed upon a systems orientation to consultation services within the context of a developmental school counseling program.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program; PSY 531, PSY 555

Credits: 2

Grade Mode: Letter

PSY 557 - Testing and Appraisal in Counseling

The evaluation and use of various psychological

PSYCHOLOGY

tests, scales and inventories in the assessment of intelligence, personality, interests and other human dimensions. Some consideration of other modes of assessment (e.g., behavioral, projective and neurological). Emphasis is on the practical application of psychological assessment in counseling. Collection, evaluation, application and interpretation of case data.

Prerequisites & Notes: admission to MS mental health counseling curriculum and PSY 511, or MEd in school counseling program and PSY 554

Credits: 3

Grade Mode: Letter

PSY 558 - Family and Couple Counseling

A review of major theories, techniques and research in psychological counseling with families. Emphasis is on parent-child developmental problems and the role of interpersonal relationships within the total family. Students are involved in limited supervised family counseling experiences.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program and PSY 553, PSY 564

Credits: 3

Grade Mode: Letter

PSY 561 - Seminar: Professional, Legal and Cultural Issues

Consideration of the professional, cultural, ethical and legal issues and special problems in the application of psychological theories and research in educational settings, community clinics and private practice.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program

Credits: 3

Grade Mode: Letter

PSY 564 - Individual Counseling Techniques

Skill development in individual counseling, psychotherapy and behavior modification techniques using actual interviews, simulations, videotape and other laboratory procedures. Prerequisite to practicum in individual counseling and psychotherapy.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program

Credits: 5

Grade Mode: Letter

PSY 565 - Group Processes in Counseling

Current group counseling and psychotherapy techniques. Covers task-directed, encounter, decision-making and communication techniques. Repeatable up to 4 credits including original course.

Prerequisites & Notes: MS Mental Health Counseling program or MEd School Counseling program.

Credits: 2-4

Grade Mode: Letter

PSY 567 - Professional Practice of Counseling

A comprehensive overview of the history, philosophy, credentialing, and the development of the professional organizations in counseling. Professional roles and topics for counselors such as consultation, outreach, prevention, advocacy, program evaluation, medications, and economic considerations such as funding, managed care, and private practice will also be addressed.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program

Credits: 2

Grade Mode: Letter

PSY 568 - Crisis Interventions

This course is specifically designed to give the counselor a theoretical and practical background in crisis intervention in both school and community settings.

Prerequisites & Notes: Admission to MS mental health counseling curriculum or MEd school counseling program; general psychology program students with instructor permission.

Credits: 5

Grade Mode: Letter

PSY 570 - Practicum

Professional practice under assigned departmental supervision. Repeatable to a maximum of 15 cr. S/U grading.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program

Credits: 1-10

Grade Mode: S/U

PSY 581 - Practicum in College Teaching of Psychology

Repeatable to a maximum of 12 cr. S/U grading.

Prerequisites & Notes: instructor permission

Credits: 1-12
Grade Mode: S/U

PSY 582 - Practicum in Research in Psychology

Student initiates and conducts a project under faculty supervision. Repeatable to a maximum of 12 cr. S/U grading.

Prerequisites & Notes: instructor permission
Credits: 1-12
Grade Mode: S/U

PSY 584 - Research Design

This course focuses on psychological research methods and the logic of research design.

Prerequisites & Notes: Admission to MS or MEd program in psychology or permission of instructor.
Credits: 3
Grade Mode: Letter

PSY 585 - Scholarship & Communication 1: Presenting Research

This course focuses on verbal communication of student research, including organization, preparation, and delivery of scholarship for varying contexts.

Prerequisites & Notes: PSY 584
Credits: 3
Grade Mode: Letter

PSY 586 - Scholarship & Communication 2: Writing Research

This course emphasizes written communication of research by focusing on the discipline and style of scientific writing.

Prerequisites & Notes: PSY 585
Credits: 3
Grade Mode: Letter

PSY 661 - Advanced Seminar in Professional Issues in Counseling Practice

An advanced seminar in professional, cultural, ethical and legal issues in counseling. For MS or MEd counseling students or counselors who are seeking advanced certification in Washington State. Repeatable for credit with different topics with no maximum. S/U grading.

Prerequisites & Notes: Admission to MS mental health counseling program, MEd school counseling, certification in school counseling or instructor permission.

Credits: 1-4
Grade Mode: S/U

PSY 670 - Internship

An extension of PSY 570 with increasingly independent responsibilities for practice in a professional setting. Primary supervision is by appropriate staff in the cooperating agency. Repeatable to a maximum of 30 cr. S/U grading.

Prerequisites & Notes: admission to MS mental health counseling curriculum or MEd school counseling program
Credits: 1-12
Grade Mode: S/U

PSY 690 - Thesis

S/U grading.

Prerequisites & Notes: advancement to candidacy
Credits: 1-12

Sociology

Introduction

Sociologists examine topics encompassing a vast array of human behavior: crime and punishment, the formation and dissolution of families, bureaucracy in organizations, conflicts between classes, and global inequalities. Sociology is distinctive in its focus on the way individuals' lives are embedded within multiple social contexts that facilitate and constrain the range of possible actions. These contexts include generation, occupation, gender, religion, sexual orientation, family, health, nation, race and ethnicity, and many others. Sociologists utilize a variety of information sources in their work, including census data, historical documents, transcripts from interviews, survey results, and observations of group behavior.

The Department of Sociology at Western has designed a program of course work that provides our majors with multiple opportunities to gain 1) understanding of theoretical perspectives within sociology, 2) mastery of the methods of data collection and analysis, and 3) in-depth knowledge of particular subareas. The subareas include law, crime, and deviance; families; population studies; social psychology; and social inequality. Regardless of the particular set of courses that is chosen, sociology students will develop an aptitude for critical thinking, the ability to write effectively for a social scientific audience, and competence with statistical computing that will enhance their future career options. We also offer faculty-led study abroad programs and encourage our students to experience immersion in cultures outside the United States. Recent sociology graduates have obtained positions in a variety of fields, including criminal justice, corrections, education, social services, market research, business management, and many others. Graduates have found the skills acquired in our program have prepared them for further academic studies in sociology, demography, law, social work, marriage and family counseling, business and education.

The Sociology Department offers four distinct bachelor's degrees as well as a Sociology Minor. The department maintains a number of facilities and resources that undergraduate students may use to enhance their educational experience. The Center for Social Science Instruction contains U.S. Census Bureau publications and data, a collection of census maps for the local area, and a computer lab. The director of the center is also available to assist students in accessing and analyzing large survey and census databases. The department also has its own 30-station computer laboratory for student use. Faculty are engaged in a variety of

research activities, and frequently involve undergraduate students in their work.

Students who are interested in pursuing a sociology degree should carefully read the section labeled 'Admission to Sociology Major' and are encouraged to meet with the departmental program coordinator to establish a study plan as soon as possible.

Faculty

MICK CUNNINGHAM (1999) Chair and Professor. BA, Pacific Lutheran University; MA, PhD, University of Michigan.

KRISTIN ANDERSON (2001) Professor. BA, University of Northern Iowa; PhD, University of Texas-Austin.

KAREN BRADLEY (1992) Professor. BA, Providence College; MA, Boston College, Stanford University; PhD, Stanford University.

RICHARD BULCROFT (1999) Associate Professor. BA, University of New Hampshire; PhD, University of Minnesota.

SETH FEINBERG (2005) Associate Professor. BA, Tufts University; PhD, Ohio State University.

PAT GILLHAM (2015) Assistant Professor. BA, Eastern College; PhD, University of Colorado.

RONALD HELMS (2000) Professor. BA, California State University-Chico; PhD, University of Oregon.

JENNIFER LOIS (2000) Professor. BA, Dartmouth College; PhD, University of Colorado.

BAOZHEN LUO (2010) Assistant Professor. BA, Nanjing University, China; MA, PhD, Georgia State University

LIZ MOGFORD (2007) Associate Professor. BA, St. John's College; MA, MPH, PhD, University of Washington.

JAY D. TEACHMAN (1998) Professor. BA, Western Washington University; MA, PhD, University of Chicago.

GLENN TSUNOKAI (2003) Professor. BA, PhD, University of California-Riverside.

Admission to Sociology Major

The number of students admitted to the major is limited as a result of the structure of the sociology curriculum and departmental staffing capabilities.

All students wishing to become Sociology majors should meet the following criteria:

- Completion of at least 45 college-level credits
- Completion of at least 5 credits in Sociology with a grade of C- or better

If the preceding criteria are met, students should complete the Sociology Major Admission form.

There are two paths to becoming a Sociology major.

Path 1 (Immediate Declaration): Students with a cumulative GPA of 2.85 or higher may submit their admission form at any time to the Sociology Department Program Coordinator for approval and admission to the major.

Path 2 (Application Review): Students with a cumulative GPA lower than 2.85 should submit their admission form to the Sociology Program Coordinator on or before Friday of the 2nd week of fall, winter, spring, or summer quarter. These applications will be reviewed and admission to the

major will be based on a combination of overall GPA, Sociology GPA, and space available in the program. Students will receive notification regarding their admission status during the fourth week of classes.

Other Departmental Information

Minors

Access to courses for minors is limited as a result of space constraints. See registration policy for additional information.

Bachelor of Arts

Sociology, BA

Department of Sociology, College of Humanities and Social Sciences

65 credits

Introduction

Sociologists examine topics encompassing a vast array of human behavior: crime and punishment, the formation and dissolution of families, bureaucracy in organizations, conflicts between classes, and global inequalities. Sociology is distinctive in its focus on the way individuals' lives are embedded within multiple social contexts that facilitate and constrain the range of possible actions. These contexts include generation, occupation, gender, religion, sexual orientation, family, health, nation, race and ethnicity, and many others.

Why Consider a Sociology Major?

Sociology students develop an aptitude for critical thinking, improve their writing ability, and gain competence with statistical computing that will enhance their future career options. Sociology students also have the opportunity to participate in faculty-led study abroad programs. Many Sociology graduates enter professions such as law, education, social services and criminal justice work.

How to Declare (Admission and Declaration Process):

The number of students admitted to the major is limited as a result of the structure of the sociology curriculum and departmental staffing capabilities.

All students wishing to become Sociology majors should meet the following criteria:

SOCIOLOGY

- Completion of at least 45 college-level credits
- Completion of at least 5 credits in Sociology with a grade of C- or better
- If the preceding criteria are met, students should complete the Sociology Major Admission form. There are two paths to becoming a Sociology major.
- Path 1 (Immediate Declaration): Students with a cumulative GPA of 2.85 or higher may submit their admission form at any time to the Sociology Program Coordinator for approval and admission to the major.
- Path 2 (Application Review): Students with a cumulative GPA lower than 2.85 should submit their admission form to the Sociology Program Coordinator on or before Friday of the 2nd week of fall, winter, spring, or summer quarter. These applications will be reviewed and admission to the major will be based on a combination of overall GPA, Sociology GPA, and space available in the program. Students will receive notification regarding their admission status during the fourth week of classes.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- Any ONE of the following introductory courses:
 - SOC 221 - Introduction to Population Issues
 - SOC 234 - Special Topics in Sociology
 - SOC 251 - Sociology of Deviant Behavior
 - SOC 255 - Social Organization of Criminal Justice
 - SOC 260 - The Family in Society
 - SOC 268 - Gender and Society
 - SOC 269 - Race and Ethnic Relations
- Core requirements:
 - SOC 302 - Classical Sociological Theory
 - SOC 304 - Statistics for Sociology
 - SOC 306 - Sociological Research Methods
- One course from the following list of capstone seminars:
 - SOC 426 - Advanced Topics in Demography
 - SOC 430 - Field Research Methods
 - SOC 435 - Population Health Advocacy
 - SOC 440 - Globalization
 - SOC 450 - Sociology of Law
 - SOC 452 - Advanced Criminology
 - SOC 456 - Seminar in Policing
 - SOC 460 - Advanced Topics in Family
 - SOC 461 - Advanced Sociology of Education
 - SOC 469 - Advanced Topics in Race and Ethnicity
 - SOC 492 - Senior Thesis
- Electives under departmental advisement to bring the total to a minimum of 65 credits; select from any 200-level introductory course or from any 300/400-level courses in sociology.
 - A maximum of 10 credits of 100-level or 200-level sociology coursework may be applied to the major.
 - A maximum of 10 credits combined from SOC 371, SOC 400, SOC 481 may be applied to the 65 credits required for the major.
 - Note:** SOC 480 (TA) may not be applied toward the major; however SOC 480 applies as a university elective toward the total 180 credits required for graduation.

Sociology/Social Studies, BA

Department of Sociology, College of Humanities and Social Sciences

81-85 credits

Introduction

Sociologists examine topics encompassing a vast array of human behavior: crime and punishment, the formation and dissolution of families, bureaucracy in organizations, conflicts between classes, and global inequalities. Sociology is distinctive in its focus on the way individuals' lives are embedded within multiple social contexts that facilitate and constrain the range of possible actions. These contexts include generation, occupation, gender, religion, sexual orientation, family, health, nation, race and ethnicity, and many others.

Completion of the BA Sociology/Social Studies leads to an endorsement in social studies. To receive a recommendation for state of Washington certification for secondary education, students must complete the teacher certification program, including the content methods course SEC 426, which is offered by the Department of Secondary Education as 1) a part of the undergraduate BA degree, or 2) as a post-baccalaureate program, or 3) as part of the Master's in Education degree.

See the Secondary Education section of this catalog for program admission, completion, and teacher certification requirements.

Why Consider a Sociology/Social Studies Major?

Sociology students develop an aptitude for critical thinking, improve their writing ability, and gain competence with statistical computing that will enhance their future career options. Sociology students also have the opportunity to participate in faculty-led study abroad programs.

A specialization in Sociology/Social Studies provides an excellent base of knowledge for individuals interested in becoming secondary-level social studies teachers.

Additional Requirements

Elementary Education Professional Program Requirements (100-103 credits)

Department of Elementary Education, Woodring College of Education

Introduction

Students seeking a bachelor's degree with teacher certification and an endorsement in elementary education must complete the GURs, an approved academic major, and the professional education course work listed below.

Admission and Declaration Process

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Professional Studies Core (22 credits)

- ELED 303 - Educational Psychology - Development and Learning
- ELED 310 - Education, Culture, and Equity
- ELED 370 - Introduction to Teaching
- I T 344 - Foundations of Technology in Teaching and Learning
- I T 442 - Digital Decisions: Technology for Educators
- SPED 364 - Teaching Each Student

Elementary Program — Methods, Curriculum Content, and Field Experiences (78-81 credits)

- One course from:
 - ART 398 - Integrated Arts for Elementary Educators
 - DNC 398 - Integrated Arts for Elementary Educators
 - MUS 398 - Integrated Arts for Elementary Educators
 - THTR 398 - Integrated Arts for Elementary Educators
- One course from:
 - ART 380 - Art Educating the Child
 - DNC 433 - Creative Movement for Educators With Lab
 - MUS 361 - Music for Elementary Teachers
 - THTR 350 - Theatre for Youth
 - THTR 351 - Creative Pedagogy
- ELED 425 - Social Studies for the Elementary School
- ELED 470 - Developing Teaching
- ELED 471 - Documenting Teaching
- ELED 480 - Literacy: Beginning Communicators
- ELED 481 - Literacy: Fluent Communicators

SOCIOLOGY

- ❑ ELED 491 - September Experience
- ❑ ELED 492 - Practicum: Experience in Literacy Methods
- ❑ ELED 494 - Internship - Elementary
- ❑ HLED 455 - Health Education Grades K-8
- ❑ MATH 381 - Teaching K-8 Mathematics I
- ❑ MATH 382 - Teaching K-8 Mathematics II
- ❑ MATH 383 - Teaching K-8 Mathematics III
- ❑ MATH 491 - Internship Seminar - Teaching K-8 Mathematics
- ❑ PE 345 - Physical Education for Elementary School

- ❑ SCED 490 - Laboratory/Field Experience in Elementary Science

Bachelor of Science

Sociology, BS

Sociology, College of Humanities and Social Sciences

69 credits

Introduction

Sociologists examine topics encompassing a vast array of human behavior: crime and punishment, the formation and dissolution of families, bureaucracy in organizations, conflicts between classes, and global inequalities. Sociology is distinctive in its focus on the way individuals' lives are embedded within multiple social contexts that facilitate and constrain the range of possible actions. These contexts include generation, occupation, gender, religion, sexual orientation, family, health, nation, race and ethnicity, and many others.

Why Consider a Sociology Major?

Students pursuing the B.S. in Sociology are required to complete a math-intensive course of study. They will also develop an aptitude for critical thinking and improve their writing ability. Students will obtain substantial experience with statistical computing, including programming and data analysis. Majors with a B.S. degree are well positioned to enter graduate school, to become government data analysts, or to conduct market research.

Minor

Sociology Minor

Department of Sociology, College of Humanities and Social Sciences

25 credits

Introduction

Sociologists examine topics encompassing a vast array of human behavior: crime and punishment, the formation and dissolution of families, bureaucracy in organizations, conflicts between classes, and global inequalities. Sociology is distinctive in its focus on the way individuals' lives are embedded within multiple social contexts that facilitate and constrain the range of possible actions. These contexts include generation, occupation, gender, religion, sexual orientation, family, health, nation, race and ethnicity, and many others.

SOCIOLOGY

Why Consider a Sociology Minor?

A Minor in Sociology is likely to benefit students across a wide range of majors. Students entering professions such as education, business, journalism, law enforcement, and human services are likely to gain skills and knowledge that will allow them to better understand clients, co-workers, and work-related processes.

How to Declare (Admission and Declaration Process):

A Minor Declaration Card is available from the Sociology Program Coordinator.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- One or two from:
 - SOC 221 - Introduction to Population Issues
 - SOC 234 - Special Topics in Sociology
 - SOC 251 - Sociology of Deviant Behavior
 - SOC 255 - Social Organization of Criminal Justice
 - SOC 260 - The Family in Society
 - SOC 268 - Gender and Society
 - SOC 269 - Race and Ethnic Relations
- A maximum of 10 credits of 100-level or 200-level sociology coursework may be applied to the minor.
- Electives under departmental advisement (from 300- or 400-level sociology courses with prerequisites completed; not to include SOC 371, SOC 400, SOC 480 or SOC 492)

Sociology Courses

SOC 221 - Introduction to Population Issues

Processes determining population growth - fertility, mortality and migration - and their influence on economic development in the more- and less-developed countries of the world; population policies in various countries and their implications for population growth and future development.

Credits: 5
Grade Mode: Letter
GUR Attributes: SSC

SOC 234 - Special Topics in Sociology

This course investigates a range of sociological issues by focusing on a specific topic over the course of one term. Topics may be offered A) based on unique areas of faculty expertise and/or B) in order to address emerging social issues in a

timely fashion that are not covered by courses in the current catalog. Students' learning will include exposure to theoretical perspectives in the discipline, discussion of various methodological approaches to social inquiry, and the opportunity to apply key concepts. Repeatable with different topics to a maximum of 10 credits, including original course. May be taken only once for GUR credit.

Credits: 5
Grade Mode: Letter
GUR Attributes: SSC

SOC 251 - Sociology of Deviant Behavior

A broad overview of concepts, issues and research findings in the sociological study of deviant behavior; how deviance is defined, reacted to and punished in American society. Emphasis on contemporary theoretical perspectives, along with current issues in deviance.

Credits: 5
Grade Mode: Letter
GUR Attributes: SSC

SOC 255 - Social Organization of Criminal Justice

A survey of basic concepts, problems and issues in the sociological study of social organizations applied to the criminal justice system.

Credits: 5
Grade Mode: Letter
GUR Attributes: SSC

SOC 260 - The Family in Society

Introduction to the study of family as a social institution in society. Overview of social theories on the family and methodological underpinnings of the field of family study. Emphasis on the family as agent of stratification in society, changing roles of men and women in the context of the American family, contemporary issues relating to family social policy today, and the interplay between family and society across time and cultures.

Credits: 5
Grade Mode: Letter
GUR Attributes: SSC

SOC 268 - Gender and Society

Introduction to major concepts, issues and research findings regarding the relationship between gender and social structures. Aspects of society examined include education, work, family, law, government and the media. Discussion includes interrelationship between gender, race, class and age. Focus on the U.S., with some cross-national material.

Credits: 5
Grade Mode: Letter
GUR Attributes: BCGM

SOC 269 - Race and Ethnic Relations

Introduces students to the sociology of race and ethnic relations in the United States. Surveys racial and ethnic minority groups and provides a historical context for their relative positions in the United States by considering the dynamics of the political and economic climate, racial/ethnic attitudes, interminority relations, and social policy.

Credits: 5
Grade Mode: Letter
GUR Attributes: BCGM

SOC 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SOC 302 - Classical Sociological Theory

The emergence of sociology: sociology as response to the Industrial Revolution and as an attempt to develop a scientific understanding of social organization, behavior and change; the development of social thought; Comte, Spencer, Marx, Durkheim and Weber.

Prerequisites & Notes: Any one from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268, SOC 269.

Credits: 5
Grade Mode: Letter

SOC 304 - Statistics for Sociology

An applied statistics course that introduces students to two important aspects of statistics: (1) graphical and numerical procedures for describing and summarizing data; and (2) quantitative analysis of data to make decisions and predictions and draw inferences. This course also involves the use of computers for statistical analysis and introduces students to the most common statistics used by sociologists.

Prerequisites & Notes: MATH 107 or MATH 112 or equivalent; And any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269. Major restricted.

Credits: 5
Grade Mode: Letter
GUR Attributes: QSR

SOC 306 - Sociological Research Methods

Focuses on applying research methods used by sociologists. Examines the principles of research design, the nature of empirical observations, sampling and measurement techniques, and applied narrative and statistical analysis. Engages students in the steps of the research process and examines effective social science writing techniques.

Prerequisites & Notes: Any one from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268, SOC 269.

Credits: 5
Grade Mode: Letter

SOCIOLOGY

SOC 320 - Computer Applications for Social Science Data

Designed to integrate fundamental statistical knowledge with direct computer applications for the organization and analysis of data sets encountered in social science research. Training in the use of library statistical routines (e.g., SPSS) central to research in the social sciences is emphasized.

Prerequisites & Notes: SOC 304 or equivalent; and any one from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268, SOC 269.

Credits: 5

Grade Mode: Letter

SOC 321 - Demography

Systematic introduction to the study of human populations. Designed for students interested in the subject regardless of their major discipline. Examines social, economic and biological factors associated with fertility, mortality and migrations.

Prerequisites & Notes: SOC 304 or equivalent; and any one course from SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 326 - American Family and Household Demography

Description and explanation of trends in family behavior and family policy, with an emphasis on the influence of demographic factors. Topics include childhood, independent living, cohabitation, marriage, divorce, work and family, household structure, and aging.

Prerequisites & Notes: Any one from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268, SOC 269.

Credits: 5

Grade Mode: Letter

SOC 330 - The Self, Emotions, and Society

Examines the relationship between the self and society, including topics such as the nature of the self, the development of self-concept, the social construction of emotions and their impact on sense of self, and the social organization of identity. Emphasizes the theoretical perspective of symbolic interaction and its relationship to qualitative research.

Prerequisites & Notes: Any one from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 332 - The Sociology of Human Relationships

A social psychological examination of liking, loving and relating. Emphasis on dyadic relationships such as marriage, friendship and parent-child relationships. Topics include socialization into romance and love, historical linkages between industrialization and the 'feminization' of love, sociological perspectives on liking and loving, and research methods used in the study of dyadic relationships.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 333 - Aging and Societies

Basic theories, methods and concepts in the field of social gerontology highlighting demographic trends in aging locally, nationally, and globally, the effects of population aging in developing and developed countries, individual accommodations to the aging process in different societies, the social construction of old age across cultures, and social policy in relation to the stratification of the aged and an increasingly elderly population from a comparative perspective.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 334 - Contemporary Chinese Society

This course provides an overview of various aspects of contemporary Chinese society since the establishment of the People's Republic of China in 1949. Students will gain basic literacy in the historical, social, cultural, and political domains within contemporary China. In particular, the course will focus on on-going social changes in Reform-era China (1978 - present) related to the party-state regime, civil society, population growth and urbanization, environmental issues, family, kinship, marriage, sexuality, and related topics.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268, or SOC 269.

Credits: 5

Grade Mode: Letter

GUR Attributes: ACGM

SOC 338 - Sociology of Sexual Behavior

Human sexuality, with an emphasis on Western cultures and the United States in particular, is studied from a scientific perspective. Emphasis on both description and explanation of patterns and diversity in sexuality. While focusing on the social dimensions of sexuality, the historical, biological and psychological aspects of sexuality are integrated into a comprehensive overview.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 340 - Sociology of Organizations

Introduction to major theoretical perspectives and research on public and private organizations, such as corporations, schools and health-care facilities. Formal and informal structures, the relationship between organizations and their environments, leadership, decision-making and labor markets.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 341 - Sociology of Social Movements

This class will explore sociological understandings of social movements, starting with the collective behavior theories of the 1950s and continuing to contemporary, constructivist understandings. Over the course of the class, students will learn how sociologists understand collective action undertaken to bring about social change, examine various theories and models, explore some of the history of social movements in our country, and simulate social movement participation.

Prerequisites & Notes: One course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268, or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 342 - Sociology of Religion

Explores the sociological perspective on religion. Focuses on religion's persistent relevance to societies and to smaller groups and the effects of secularization. Assesses the social patterns of religious participation, by race, class, immigrant status, age, gender. Investigates the connections between religion and other social institutions such as the economic, educational and political systems.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

GUR Attributes: SSC

SOC 345 - Contemporary American Families

Applies a sociological perspective to the study of contemporary families. Investigates current patterns of sexuality, relationship formation, parenting, the gendered division of labor, migration, and other key dimensions of family life. Focuses on understanding sources of difference in family forms across important social divisions such as race, class, and age.

Prerequisites & Notes: One course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 348 - Global Health

Introduces students to the main concepts of global health, with a particular emphasis on sociological determinants of health. Focuses on the demographic and epidemiological transitions, gender and reproductive health, human rights, and the global burden of disease. Evaluates the role of international institutions, such as the World Bank and non-governmental organizations, in the organization and delivery of health services in underdeveloped countries. Understanding the root causes of health disparities and strategies for the achievement of health equity is central to the course. Please note: this course includes an engaging group project that requires students to hold several out-of-class meetings. Please take this into consideration before you enroll.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

GUR Attributes: ACGM

SOC 352 - Criminology

The study of adult crime, defined as violation of legal norms. Focuses on problems of measurement and attempts to explain crime as a social phenomenon and a cultural product. Includes in-depth analysis of various forms and classes of crimes and their victims.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

SOCIOLOGY

Credits: 5

Grade Mode: Letter

SOC 354 - Domestic Violence and the Criminal Justice System

A survey of sociological research on domestic violence and the criminal justice system. Examines the historical and cultural changes that contributed to the classification of domestic violence as a crime, the characteristics of domestic assault, and the variety of criminal justice interventions into domestic violence.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 355 - Criminal Justice System

Overview of the social organization of the criminal justice system in the United States. Examination of the organizations that create and enforce the criminal law as well as major issues currently confronting this system (plea bargaining, discrimination, limitations on due process).

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, 268, or SOC 269. SOC 255 preferred.

Credits: 5

Grade Mode: Letter

SOC 356 - Law Enforcement and Society

Review of research on the organization of law enforcement. Topics include impact of legal and organizational controls on police behavior, police use of deadly force, minorities and policing, and community policing.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 360 - Marital and Family Interaction

Examines systems and interactional perspectives on marriage and family dynamics. The focus of this course is on family adaptation as a function of system processes and interactional patterns.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 361 - Sociology of Education

Analysis of the historical origins and spread of public education, the internal organization of schools and classrooms and the social impact of education. Schooling as a major form of socialization and status placement; political and legal bases of education; non-formal schooling; education and nation-state formation.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 363 - Law and Social Stratification

Examination of current sociological research on the ways in which the creation and application of law are conditioned by class, racial, gender, and ethnic inequalities in society. Applies several general sociological theories of stratification to a range of cases in both civil and criminal law.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 364 - Social Stratification

Social causes and consequences of inequality in America. Social distribution of wealth, power and status; emphasis on poverty and racial social inequality.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 365 - Gender, Bodies, and Sports

Applies sociological perspectives to study the relationship between gender, bodies, and sports in the U.S. society. Focuses on contemporary sociological theories of gender and bodies and their application to sport as a social institution.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

GUR Attributes: BCGM

SOC 366 - Colonialism, Slavery, and Links to Contemporary Racism

A seminar course to analyze the precursors of contemporary racism using a sociological perspective of racial inequality in the United States and in western, eastern, and southern Africa. There is a specific examination of the historical record of colonialism, slavery, and interethnic rivalry with a particular emphasis on the lasting effects of slavery for people of color in many parts of Africa and the United States.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

GUR Attributes: ACGM

SOC 367 - Sociology of Work and Occupations

Sociological and social-psychological significance of work; factors affecting contemporary career patterns/life cycle changes; sex, race, ethnic and social class differences; structural characteristics of selected occupational areas.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 368 - Gender and Education

Examines the relationship between gender and education within the U.S. context and internationally. We will consider girls and boys, women and men, in various levels of schooling. The ways in which race and class interact with gender in educational attainment and achievement also will be examined.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269; SOC 268 preferred or course with equivalent gender content.

Credits: 5

Grade Mode: Letter

GUR Attributes: BCGM

SOC 369 - Sociology of Race and Ethnicity

Provides a review of historical, theoretical and empirical work in the sociology of race and ethnicity. Emphasis on primary material in the areas of ethnic assimilation, racial attitudes, and racial and ethnic inequality in the United States.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269; SOC 269 or minority relations course preferred.

Credits: 5

Grade Mode: Letter

SOC 371 - Directed Internship

Application of sociological concepts and methods to better understand social issues and problems while engaged in on-site work experiences in approved settings. All interns work at least 10 hours per week at the internship site, in the type of work specified in the contract. In addition, students complete several written assignments, including a research paper. Repeatable to a maximum of 10 credits.

Prerequisites & Notes: SOC 302 and SOC 306

Credits: 5

Grade Mode: Letter

SOC 376 - Research and Policy in Criminal Justice Organizations

Examines the sociological studies of criminal justice policy formation and change. Outlines connections between criminal justice policy planning, program design, organizational structure and process considerations, and various methods used to assess change processes and to evaluate program outcomes.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 378 - Military Sociology

This course draws on philosophical works as well as theoretical and applied research to assess the current status of the U.S. military and its relations with civilian government and society since the Vietnam War and Cold War experiences. Emphasis is placed on emerging threats to U.S. national security and the military's national defense mission under the changing conditions associated with the era of globalism.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 380 - Sociology of Youth

Sex and age status definitions and role-taking; historical, institutional and social process aspects of maturation, with special emphasis on Western industrial society from the 18th century to the present.

SOCIOLOGY

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 388 - Sociology of Jails

This course emphasizes sociological analysis of local jail operations, including populations, funding, management, legal, and regulatory aspects and roles of various professions operating in the jail environment.

Prerequisites & Notes: Any one course from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

SOC 390 - Globalization and Families

An examination of the phenomenon of globalization and a review of the literature on how globalization is affecting families around the world. Included is a consideration of impacts on relationship formation, marriage, parenting, childhood and later life families.

Prerequisites & Notes: Any one from: SOC 221, SOC 234, SOC 251, SOC 255, SOC 260, SOC 268 or SOC 269.

Credits: 5

Grade Mode: Letter

GUR Attributes: ACGM

SOC 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SOC 426 - Advanced Topics in Demography

Analysis of fertility or mortality issues in both developed and developing countries; proximate determinants of fertility; birth-spacing and family limitation practices; infant and child mortality; life expectancy.

Prerequisites & Notes: SOC 302; SOC 304 or PSY 302 or SOC 215; SOC 306 or PSY 301 or SOC 210; and SOC 320.

Credits: 5

Grade Mode: Letter

SOC 430 - Field Research Methods

Presents skills to conduct qualitative sociological research. Emphasizes ethnographic techniques such as direct observation, participant observation, intensive interviewing, data analysis, literature review, and report writing. Each student conducts original sociological research by entering a specific social setting, collecting and analyzing data within that setting, and producing a comprehensive paper on the findings.

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210; SOC 330 highly recommended.

Credits: 5

Grade Mode: Letter

SOC 435 - Population Health Advocacy

The goals of this capstone course are to understand population health dynamics and health equity through research-based advocacy. In addition to studying the literature and theories of population health, the social determinants of health, and health promotion, you will complete a community-based research project. Each year the research topic varies, depending on the needs of the community partner organization or on the particular research objectives. Typically, the research will be conducted as a team, so students will gain leadership and management skills and be required to collaborate closely with other classmates. Depending on the specific project, quantitative or qualitative methods may be used.

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210; and SOC 348.

Credits: 5

Grade Mode: Letter

SOC 440 - Globalization

Examines the economic, cultural and political components of globalization. Special topics include the new forms of inequality that have emerged with global interdependence and debates concerning the benefits and dangers associated with globalization.

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210.

Credits: 5

Grade Mode: Letter

SOC 450 - Sociology of Law

A capstone research seminar in which students develop an individual project, write a review of previous research, and conduct an analysis using

secondary data sources to study the effects of laws on society (e.g., consequences of no-fault divorce laws) and the social bases of legal change (e.g., factors influencing state adoption of sentencing guidelines).

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210.

Credits: 5

Grade Mode: Letter

SOC 452 - Advanced Criminology

An in-depth examination of selected areas in sociological criminology.

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210; and SOC 352.

Credits: 5

Grade Mode: Letter

SOC 456 - Seminar in Policing

An in-depth review of research on the organization of law enforcement. Advanced topics include impact of legal and organizational controls on police behavior, police use of deadly force, minorities and policing, and community policing.

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210.

Credits: 5

Grade Mode: Letter

SOC 460 - Advanced Topics in Family

Focus varies, depending on instructor. Emphasis on current research in family sociology. Topics may include family violence, demographic analysis of family structures, family life course development, family and the economy, parent-child interaction, family and social policy, and others.

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210.

Credits: 5

Grade Mode: Letter

SOC 461 - Advanced Sociology of Education

Focus varies, depending on instructor. Topics may include the organization of educational systems within the United States and cross-nationally, school/classroom organization and their effects on student learning and educational attainment; examination of special topics on-site in specific school settings.

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210.

Credits: 5

Grade Mode: Letter

SOC 469 - Advanced Topics in Race and Ethnicity

An in-depth examination on current issues surrounding race and ethnic relations (e.g., interracial dating, prejudice and discrimination, and hate group involvement).

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210; and SOC 369 or permission of instructor.

Credits: 5

Grade Mode: Letter

SOC 480 - Learning and Teaching Sociology

The teaching assistantship is intended to provide students with practical experience in the teaching of sociology at the undergraduate level. To that end, students will get hands-on experience in the various activities associated with teaching a particular course in the department. TA duties may include leading discussion groups, assisting the instructor in preparing lecture material, and assisting students in the class with understanding course material. A more detailed list of sample activities may be obtained from the academic advisor. Actual duties will vary by course and instructor. Credit is determined by the instructor depending on the actual duties of the teaching assistant. Repeatable to a maximum of 5 credits. S/U grading.

Prerequisites & Notes: Permission of instructor.

Credits: 2-5

Grade Mode: S/U

SOC 481 - Research Assistantship

Course is structured consistent with the apprenticeship model. Students will work closely with one faculty member, assisting in sociological research. Actual activities will vary depending upon the nature and stage of the research project. Responsibilities may include data set construction and/or analysis, interviewing and interview transcription, and library searches. Students are required to submit a report or project journal to the supervising instructor in a format to be mutually agreed upon at the start of the assistantship. Repeatable to a maximum of 10 cr.

Credits: 2-5

Grade Mode: Letter

SOCIOLOGY

SOC 492 - Senior Thesis

The student is required to complete the senior thesis contract in consultation with his/her senior thesis faculty advisor prior to taking the SOC 400/492 sequence.

Prerequisites & Notes: SOC 302; and SOC 304 or PSY 302 or SOC 215; and SOC 306 or PSY 301 or SOC 210. 5 credits of SOC 400 taken with student's senior thesis faculty advisor before and in preparation for senior thesis.

Credits: 5

Grade Mode: Letter

Women, Gender, and Sexuality Studies

chss.wvu.edu/wgss

The Women, Gender, and Sexuality Studies program offers students an interdisciplinary approach to the study of the formation of sex, gender, and sexuality as they intersect with structures of power including, but not limited to, race, class, ethnicity, nationality, religion, age, and ability. Courses in the program address three basic areas: women, gender, and sexuality in history and politics; women, gender, and sexuality in science and society; and women, gender, and sexuality in language and the arts.

The minor includes core courses and additional electives for a total of 30 credits. Students are required to earn at least a C+ in courses counting toward the minor.

Students may design a student/faculty-designed major through the College of Humanities and Social Sciences. Procedures are available from the Department of Liberal Studies at chss.wvu.edu/liberal-studies. Close advisement is recommended, as new courses may apply to this minor.

Students who wish to declare a minor in Women, Gender, and Sexuality Studies are required to register with the Director or Program Manager. For program advisement, contact Vicki Hsueh, Director, Arntzen Hall 405 (Mail Stop 9082), 360-650-2649, or Kim Kolb Ayre, Program Manager, Environmental Studies 603, (Mail Stop 9099), 360-650-3763.

Minor

Women, Gender, and Sexuality Studies Minor

Women, Gender, and Sexuality Studies program, College of Humanities and Social Sciences

30 credits

Introduction

Western Washington University's Women, Gender, and Sexuality Studies program draws on interdisciplinary research and teaching to analyze the formation of sex, gender, and sexuality as they intersect with structures of power including, but not limited to, race, class, ethnicity, nationality, religion, age, and ability.

Women, Gender, and Sexuality Studies is committed to the project of social justice. We examine and challenge systems of oppression, inequality, and privilege from a variety of perspectives. Our program encourages theory and praxis that critically considers global and local communities in efforts to revise, re-envision, and reimagine social change.

The curriculum provides students with skills to critically and actively engage with the world around them. Many of our courses connect academia to the material world by investigating the relationship between theory and practice - a central commitment of much feminist, gender, and queer scholarship. Our courses are characterized by rigorous and sustained critical thinking, inquiry, and analysis: skills central to the task of enhancing equality, dignity, and empowerment.

Why Consider a Women, Gender, and Sexuality Studies Minor?

Drawing on the rich pool of academic expertise at Western, the program emphasizes theories and practices derived from feminist, queer, postcolonial, multiracial, and multicultural contexts. Our curriculum emphasizes scholarly engagement with a wide range of disciplines, including: history, fine and performing art, literature, creative writing, political science, communication studies, anthropology, sociology, psychology, environmental studies, visual culture, journalism, education, and science.

Students enjoy small class sizes and close faculty interaction. Our community is intellectually challenging, supportive, and creative. Our diverse faculty encourages scholarship that is interdisciplinary and intersectional. Individual concentrations and senior projects evolve along with students' intellectual and experiential growth and academic expertise.

Sample Careers

The Women, Gender, and Sexuality Studies program prepares students with a solid foundation to pursue careers in fields such as law, social service, counseling, public policy, health care, teaching, and the arts. We also give students a strong foundation for pursuing graduate work in women and gender studies, as well as in such disciplines as political science, communication studies, literature, journalism, history, cultural studies, law, education, policy, and social welfare.

Major/Career Resources

WOMEN, GENDER, AND SEXUALITY STUDIES

How to Declare (Admission and Declaration Process):

Students who wish to declare a minor in Women, Gender, and Sexuality Studies are required to register with the Women, Gender, and Sexuality Studies office. For program advisement, contact Professor Hsueh, Arntzen Hall 405, 360-650-2649, Vicki.Hsueh@wwu.edu or Program Manager, Kim Kolb Ayre, Environmental Studies 603, 360-650-3377, KimKolb.Ayre@wwu.edu.

Grade Requirements

Students are required to earn at least a C+ in courses counting towards the minor.

Core Requirements (8-10 credits)

- WGSS 211 - Introduction to Women Studies ****
- WGSS 411 - Senior Project

One Course From Each of the Following Areas (20-22 credits)

Women, Gender, and Sexuality in History and Politics:

- FAIR 311C - Alternatives in Education
- FAIR 312E - Transgender Identities and Histories
- FAIR 313E - Queer Issues in Education **
- FAIR 362F - We're Not for Sale: History of Asian Women in America
- FAIR 363B - Suzie Wong to Miss Saigon: Asian Presence in Hollywood
- HIST 265 - Lesbian, Gay, Bisexual, and Transgender Experiences in U.S. History
- HIST 365 - History of Sexuality in the United States
- HIST 367 - US Women to 1865
- HIST 368 - US Women from 1865
- HIST 369 - Women, Gender, & Sexuality in African History
- HIST 421 - Gender in Early Modern Europe
- HIST 484 - Women in Japanese History
- HNRS 218 - Colloquium in Women, Gender, and Sexuality Studies ***
- PLSC 321 - Queer and Lesbian Gay Bisexual Transgender Politics
- PLSC 345 - Women and Politics
- PLSC 469 - Feminist Political Theory
- PLSC 493 - Issues in Political Theory *
- WGSS 311 - American Women Studies: 1620-1850
- WGSS 313 - American Women Studies: 1850-Present
- WGSS 320 - Topics in Women, Gender, and Sexuality Studies ***

Women, Gender, and Sexuality in Science and Society:

- AMST 203 - The Hispano/a-American Experience
- AMST 204 - The African-American Experience
- AMST 205 - The Asian-American Experience
- AMST 242 - The Lesbian, Gay, Bisexual, Transgendered Experience
- AMST 301 - Comparative Cultural Studies
- AMST 314 - Contemporary Latino/A Issues
- AMST 315 - Contemporary American Indian Issues
- AMST 316 - Contemporary African American Issues
- ANTH 353 - Sex and Gender in Culture
- ANTH 424 - Medical Anthropology
- ANTH 453 - Women of the Global South
- ANTH 490 - Senior Seminar in Anthropology *
- FAIR 313E - Queer Issues in Education **
- FAIR 314E - Critical Pedagogy
- FAIR 338P - Cultural and Biological Perspectives on Pregnancy and Childbirth
- FAIR 341T - Awareness Through the Body II
- FAIR 342U - The Body Speaks: Culture and Eating Disorders

WOMEN, GENDER, AND SEXUALITY STUDIES

FAIR 448T - Risk and Resilience in Adolescent Girls: Development, Culture and Identity
FAIR 451X - Resistance Art of the Indigena
HNRS 218 - Colloquium in Women, Gender, and Sexuality Studies ***
PSY 116 - Human Sexuality
PSY 119 - Psychology of Gender
SOC 268 - Gender and Society
SOC 338 - Sociology of Sexual Behavior
SOC 354 - Domestic Violence and the Criminal Justice System
SOC 360 - Marital and Family Interaction
SOC 365 - Gender, Bodies, and Sports
SOC 368 - Gender and Education
WGSS 314 - Global Women
WGSS 320 - Topics in Women, Gender, and Sexuality Studies ***

Women, Gender, and Sexuality in Language and the Arts:

A/HI 438 - Art and Feminism
COMM 230 - Rhetorical and Social Change *
COMM 240 - Media Studies
COMM 260 - Communication, Identity and Difference
COMM 360 - Communicating Masculinities
COMM 416 - Topics in Communication *
COMM 440 - Issues in Media Studies
ENG 227 - Gay, Lesbian, Bisexual and Transgender Literature
ENG 309 - Seminar in Literature & Culture: The Long 18th Century *
ENG 310 - Seminar in Literature & Culture: The Long 19th Century *
ENG 311 - Seminar in Literature & Culture: The 20-21st Century *
ENG 331 - Studies in Gender Theory
ENG 338 - Women and Literature in North America and Europe
ENG 408 - Cultural Studies *
(Additional English courses in literature, film, media, and theory with a primary focus on women, gender, and/or sexuality may be used as an elective. Please consult with program advisor.)
FREN 410 - Ecriture Feminine Francophone
HNRS 218 - Colloquium in Women, Gender, and Sexuality Studies ***
JOUR 375 - Diversity, Mass Media and Social Change
THTR 428 - Topics in Theatrical Performance *
WGSS 212 - Feminist Theory and Expression
WGSS 320 - Topics in Women, Gender, and Sexuality Studies ***
WGSS 331 - Studies in Gender Theory

Electives: 4 or more credits from any of the above areas

* Topics in these courses are subject to change and may not in certain quarters be applicable to the Women, Gender, and Sexuality Studies minor. Please consult with the program director for advisement.
** FAIR 313E may only meet the requirement in one area.
*** Application of this course to the three minor areas depends on course content. Please consult with the program director for advisement.
**** HNRS 218 - 2nd Year Colloquium in Women, Gender, and Sexuality Studies can be substituted for WGSS 211 with program director permission.

Additional information

Each academic year the women studies office compiles a list of all courses with a women, gender, and sexuality studies focus. Detailed descriptions of the above courses can be found in their respective department listings.

Women, Gender, and Sexuality Studies Courses

WGSS 211 - Introduction to Women Studies

Introduction to the issues, questions, conceptual frameworks and methods basic to a study of human societies, their institutions and cultural artifacts from a perspective that comprehends women's experience.

Credits: 4

Grade Mode: Letter

GUR Attributes: BCGM

WGSS 212 - Feminist Theory and Expression

This course will engage students in critical thinking, reading and writing about multicultural and global perspectives that women have developed from a feminist consciousness. Class material may include oral, written, and visual texts.

Prerequisites & Notes: ENG 101; 30 credits.

Credits: 4

Grade Mode: Letter

GUR Attributes: CCOM

WGSS 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

WGSS 311 - American Women Studies: 1620-1850

Women's role in American society from colonial times to the mid-19th century, with attention to differences of race and class. Emphasis on changing sex roles for both women and men as a result of changes in the structure of the family, immigration, urbanization, expansion of the frontier, education, religion, development of the nation and industrialization.

Prerequisites & Notes: HIST 103 or 104 or ENG 216 or other WGSS course.

Credits: 5

Grade Mode: Letter

WGSS 313 - American Women Studies: 1850-Present

Factors influencing the female gender role as it changed in the last century and a half from the 'Cult of True Womanhood' to the 'New Woman' to the 'Feminine Mystique' to the 'Liberated Woman.' Emphasis on the impact of changing modes of American capitalism; women's efforts for equal rights and social reform; changing patterns of fertility; women's increased participation in the work force; changes in women's role in the domestic sphere.

Prerequisites & Notes: HIST 103 or 104 or ENG 216 or other WGSS course.

Credits: 5

Grade Mode: Letter

WGSS 314 - Global Women

Introduces the concepts of transnational feminism. Examines the experiences of women in a global economy, explores the strategies women develop to resist global patriarchal structures, and to organize and mobilize globally.

Prerequisites & Notes: WGSS 211 or four credits of 300-level Women, Gender, and Sexuality Studies.

Credits: 4

Grade Mode: Letter

GUR Attributes: ACGM

WGSS 315 - Issues of Women's Movement

Prerequisites & Notes: PLSC 101, SOC 101 or permission of instructor.

Credits: 3

Grade Mode: Letter

WGSS 320 - Topics in Women, Gender, and Sexuality Studies

Focus on special topics in women, gender, and sexuality studies. Readings and/or topic area to be determined by instructor. Repeatable up to 10 credits with different topics, including original course. May be taken only once for GUR credit.

Prerequisites & Notes: WGSS 211 or instructor permission

Credits: 3-5

Grade Mode: Letter

GUR Attributes: BCGM

WGSS 331 - Studies in Gender Theory

This course will examine gender theory, with varying emphases, including but not limited to feminist, queer, trans, intersectional and critical race theory. Repeatable with different topics up to

10 credits including original course. Also offered as ENG 331.

Prerequisites & Notes: ENG 202 or WGSS 211

Credits: 5

Grade Mode: Letter

WGSS 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

WGSS 411 - Senior Project

Projects serve as a capstone experience for minors and majors in which students demonstrate their ability to apply knowledge of subject matter and methodology. Students are encouraged to develop interdisciplinary research or field projects that gives them opportunity to put into practice the theories and skills they have been learning during the course of their study. Students are encouraged to develop project internships with women's community organizations. Repeatable to a maximum of 15 cr.

Prerequisites & Notes: Completion of Women, Gender, and Sexuality Studies core.

Credits: 1-6

Grade Mode: Letter

WGSS 453 - Women of the Global South

Explores women's economic, religious, political and familial roles through topics such as development and globalization, violence, and women's movements. Student contributions to course topics emphasized through individual papers and group panel work. Also offered as ANTH 453.

Prerequisites & Notes: Fifteen credits of 300-level Anthropology or related discipline; WGSS 211; ANTH 353 highly recommended; or permission of instructor.

Credits: 5

Grade Mode: Letter

College of Science and Engineering

Introduction

Dr. Catherine D. Clark, Dean

The College of Science and Engineering consists of seven academic departments: biology, chemistry, computer science, engineering technology, geology, mathematics, and physics/astronomy. In addition to the academic departments, the college is home to Western's Science, Mathematics, and Technology Education (SMATE) program and the Advanced Materials Science and Engineering Center (AMSEC). SMATE is dedicated to the enrichment and education of K-12 pre-service teachers and education reform. AMSEC's mission is to educate students and promote interdisciplinary research in materials science and to assist regional companies solve their materials related challenges. The college is committed to excellence in teaching, fostering interdisciplinary research and study opportunities, enhancing diversity, enhancing the quality of science, mathematics and technology K-12 teaching, and the development of critical thinking. Western has extensively invested in new facilities for the sciences in recent years (biology, chemistry, engineering technology, and SMATE). Additionally, the communications facility opened in the spring of 2004 and houses both the computer science department and the physics/astronomy department. Thus, students in the college are

engaged in high-quality classroom experiences that, when combined with laboratory experiences, foster a basic understanding of the scientific method and research methodologies. Students in the college are encouraged to participate in individual or team research projects with faculty members.

All the departments within the college are dedicated to providing a high-quality education for students by incorporating undergraduate research and practical laboratory-based experiences to stimulate intellectual curiosity, critical thinking abilities and application of the scientific method. Graduates from the college pursue graduate degrees, a wide variety of jobs in industry or governmental organizations, or become teachers. All of the graduates are expected to be excellent communicators and be vigorous throughout their lives in the active pursuit of knowledge.

Within the college, students will find a wide variety of majors and minors from which to choose, including many interdisciplinary majors or minors. Both bachelor's and master's degrees are offered. Graduates from many majors also seek certification in education. The College of Science and Engineering partners with the College of Humanities and Social Sciences to provide students with a liberal education. Graduates from the College of Science and Engineering are uniquely positioned, therefore, to contribute leading roles in their scientific, professional and technical lives in our increasingly complex world.

 Dr. Bernard Housen, Geology
 Dr. Tjalling Ypma, Mathematics
 Dr. Andreas Riemann, Physics/Astronomy

Majors and Minors

In addition to the General University Requirements (GURs) and other common degree requirements of the University, the candidate for a Bachelor of Arts or Bachelor of Science degree must complete a major area emphasis which is usually accompanied by supporting courses. A minor is optional. A few concentrations are offered which encompass both a major and a minor. Students will confer with appropriate departmental advisors to plan study programs. Transfer students are expected to complete at least a portion of their work in the major and minor fields in this institution.

College Admission and Advisement

As the student completes the freshman year, which usually consists largely of courses that also meet the GURs, he or she is referred to the academic departments for continued personalized advisement in planning and selecting courses of study. Faculty within each department share responsibility for counseling students electing concentrations in their area. Faculty members may recommend to the department chair the waiving of certain course prerequisites (when it has been demonstrated that the student already has these competencies). Students who are undecided about a major may seek advisement through the Academic Advising Center in Old Main.

Other College Information

Departments, Courses and Programs

Courses listed in this catalog constitute a record of the total academic program of the University. For an exact scheduling of courses at Western,

students should consult the annual online Timetable of Classes, and Extended Education bulletins.

Interdisciplinary Sciences, Technology and Mathematics (ISTM)

Courses containing scientific, technological and/or mathematical topics without focusing on a particular discipline are offered under the Interdisciplinary Science(s), Technology and Mathematics designation. Courses are designed for both science and non-science students. Faculty will come from across the College of Science and Engineering, and will offer a wide range of perspectives on the institutions, tools and practice of science, technology and mathematics. A new course on scientific literacy is an example of the type of course that will be offered with this new designation.

Biology

Introduction

Department website: cse.wvu.edu/biology

The Biology Department offers a broad-based curriculum with the opportunity for undergraduates to explore specific areas of biology in depth through rigorous upper-division courses and participation in research, internships and independent study options. The department offers both Bachelor of Arts (BA) and Bachelor of Science (BS) degree programs and students may choose to become generalists or to specialize in one of 7 different emphases ranging from molecular biology to ecosystem ecology. Additionally, the biology department has developed several interdisciplinary program options in collaboration with the departments of Anthropology, Chemistry and Mathematics.

Faculty

MERRILL A. PETERSON (1997) Chair and Professor. BS, University of Washington; PhD, Cornell University.

DAVID S. LEAF (1991) Associate Chair and Professor. BS, University of Washington; PhD, Indiana University.

ALEJANDRO ACEVEDO-GUTIÉRREZ (2002) Professor. BSc, Universidad Autónoma de Baja California Sur, Mexico; PhD, Texas A&M University.

ROGER A. ANDERSON (1994) Professor. BS, University of Minnesota; MA, University of California-Riverside; PhD, University of California-Los Angeles.

MARION BRODHAGEN (2006) Associate Professor. BS, University of Wisconsin; MS, PhD, Oregon State University.

CAROLINE DAHLBERG (2014) Assistant Professor. BS, Haverford College; PhD, University of Washington.

ERIC DECHaine (2006) Associate Professor. BA, University of California-San Diego; MS, University of Hawaii-Manoa; PhD, University of Colorado-Boulder.

DEBORAH A. DONOVAN (1998) Professor. BSc, MSc, University of California-Davis; PhD, University of British Columbia.

DAVID U. HOOPER (1998) Professor. BA, Middlebury College; PhD, Stanford University.

ROBIN KODNER (2012) Assistant Professor. BS, University of Wisconsin; PhD, Harvard University

SUZANNE LEE (2015) Assistant Professor. BA, Wellesley College; PhD, University of California Berkeley.

BENJAMIN MINER (2006) Associate Professor. BA, University of Florida; PhD, University of California-Santa Cruz.

CRAIG L. MOYER (1997) Professor. BS, MS, Oregon State University; PhD, University of Hawaii.

LYNN J. PILLITTERI (2008) Assistant Professor. BS, State University of New York at Binghamton; MS, PhD, University of California, Riverside.

DANIEL POLLARD (2015) Assistant Professor. BA, Bowdoin College; PhD, University of California Berkeley.

SANDRA SCHULZE (2006) Associate Professor. BS, University of British Columbia; PhD, Simon Fraser University.

DIETMAR SCHWARZ (2008) Assistant Professor. Diplom Biology, Christian-Albrechts Universität, Kiel, Germany; PhD Pennsylvania State University.

ANU SINGH-CUNDY (1996) Associate Professor. BSc, MSc, Delhi University, Delhi, India; PhD, Cornell University.

CAROL TRENT (1989) Professor. BS, Indiana University; PhD, Massachusetts Institute of Technology.

JEFF C. YOUNG (1999) Professor. BA, PhD, Ohio State University.

Affiliated Teaching Faculty

GEORGIANNE CONNELL (2004) Senior Instructor. BA, Seattle Pacific University; MS, Western Washington University.

JANICE LAPSANSKY (1985) Senior Instructor. BS, Seattle University; MS, Western Washington University.

CARRIE SCHWARZ (2008) Senior Instructor. BS, University of Maryland; MS, PhD, Pennsylvania State University.

JOSÉ SERRANO-MORENO (2007) Senior Instructor. BS, Universidad Central de Venezuela; MS, Venezuelan Institute of Scientific Research; PhD, Case Western Reserve University.

Research Associates

DAVID L. ALLES BS, University of Colorado; MS, Western Washington University.

JUDE APPLE BS, Tufts University; MS, University of NC Wilmington; PhD, University of MD College Park.

SHAWN ARELLANO BS, University of Kansas; PhD, Oregon Institute of Marine Biology.

JOHN BOWER BS, PhD, Cornell University.

MELISSA MINER BS, University Of California-Santa Cruz; MS, University of California, Moss Landing Marine Lab.

M BRADY OLSON BS, University of Idaho; MS, Western Washington University; PhD, University of Washington.

JENNIFER PURCELL BS, MS, Stanford University; PhD, University of California-Santa Barbara.

FREDERICK M. RHOADES BA, Swarthmore; MS, Oregon State University; PhD, University of Oregon.

SUZANNE STROM BA, Middlebury College; MA,

Harvard University; PhD, University of Washington.
JENNIFER TENNESSEN BS, MS, University of Wisconsin Madison; PhD, Penn State University.
KATHRYN L. VAN ALSTYNE BS, University of Rhode Island; PhD, University of Washington.
BARRY WENDLING BS, MS, Western Washington University.

Departmental Mission

In support of Western Washington University and the College of Science and Engineering, the mission of the Biology Department is to provide an outstanding learning environment that integrates education, scholarship, and service in order to actively engage students in the biological sciences and to foster their development as lifelong learners. Successful graduates of our Department will understand fundamental biological principles in depth, will have laboratory and field skills to address biological questions, will have enhanced critical thinking and quantitative skills, will be able to communicate precisely and analytically in written and oral forms, and will be able to engage both independently and collaboratively as thoughtful and productive contributors to society.

We accomplish this mission by:

- Offering a broad-based, rigorous, and integrative curriculum
- Providing diverse upper-division courses that foster critical thinking and quantitative reasoning skills
- Offering opportunities for undergraduate research and writing
- Providing for timely completion of degree

Other Departmental Information

Facilities and Resources

The 82,000 square-foot Biology Building features teaching labs, research labs, environmental control rooms, a seawater lab, image analysis labs, and multimedia lecture halls. The department also maintains two greenhouses on campus that supports teaching and research activities. The beautiful, nearby Cascade and Olympic mountains support a rich diversity of aquatic and terrestrial habitats that are frequently utilized for course and individual projects that focus on organismal or ecological aspects of biology. Additionally, our marine biology program is enriched through our affiliation with Western's Shannon Point Marine Center near Anacortes, Wash.

Undergraduate Programs

Our Bachelor of Science curriculum is designed to (1) prepare undergraduates for graduate studies in diverse areas of biology; (2) prepare students for advanced study in the health professions [e.g., medicine, veterinary medicine, dentistry]; and (3) provide a broad exposure to biology for students who want a general science education as biologists and/or teachers. The Bachelor of Arts degree options in general biology and biology/anthropology are specifically designed to provide students with a foundation in biology that may be combined with another discipline.

- BA Biology
- BS Biology - General Emphasis
- BS Biology - Ecology, Evolution and Organismal Biology Emphasis
- BS Biology - Marine Emphasis
- BS Biology - Molecular and Cell Emphasis
- BS Biology - Secondary Teaching Emphasis
- BS Biology/Anthropology
- BA Biology/Anthropology
- BS Biology/Mathematics
- BAE Chemistry/Biology

Declaration Process

To declare, students must contract the Biology Department and submit a major declaration request. For combined degree programs in biology/math and biology/anthropology, students must declare through the Biology Department.

The Biology Department has a two-step process for admission into our degree programs. Phase I students are those who have declared their intent to major in biology, and are in the process of completing the introductory courses in general chemistry and biology. Admission to Phase II is based on academic performance in the introductory courses (CHEM 121, 122, 123 and BIOL 204, 205, 206). Students must achieve an average GPA of 2.9 or higher in their introductory biology and general chemistry courses before they can advance to Phase II and begin taking upper-division coursework. Students are encouraged to visit our website for more detailed information about the declaration process and the GPA requirement.

Departmental Policies

All Biology courses (except independent study, research, teaching practicum, and graduate-level courses) will be part of Western's automatic waitlist system. The Biology Department does not actively manage waitlists for 100-level, and most

BIOLOGY

200-level courses. Students who are on a waitlist will be offered seats on a "first in, first out" basis. Given the variability of enrollment needs across courses within our department, we reserve the right to manage course waitlists as summarized below. Application of this policy may change your position on the waitlist without advance notice. It is the student's responsibility to check their position on a course waitlist in order to make timely registration decisions.

BIOL 204, 205 and 206 – Students (regardless of their major) who have been on the waitlist for the same course for two consecutive quarters will be given priority. Waitlists in these courses will be evaluated during registration and reprioritized without advance notice.

Upper Division (300 and 400) Level Courses – In courses where waitlist management is necessary, prioritization will be done primarily to expedite time to degree completion to accommodate students who are close to graduation. Students who have formally applied for graduation and who require a specific course as part of their degree plan, will be given the highest priority. It is the responsibility of the student to approach the Department as soon as possible for assistance if they are unable to get into a required course as specified on their approved graduation checklist. Additionally, students on the waitlist may be prioritized based on one or more of the following considerations: number of credits completed, declared major/degree requirements, and/or enrollment in the course for the first time.

BIOL 348 – Due to unprecedented enrollment pressure, waitlists for BIOL 348 are heavily managed each quarter and qualified students are prioritized based on number of credits, (proximity to graduation). Further, students who are enrolled in the course but have completed BIOL 348 or its transfer equivalent with a C– or higher may be required to withdraw from the course in order to accommodate students who are enrolling for the first time AND who need the course to satisfy their major requirements.

Failed Prerequisite Policy

Bachelor of Arts

Anthropology/Biology, BA (see Anthropology Department)

Anthropology/Biology, BA (see Anthropology Department)

The Biology Department enforces Western's campus-wide prerequisite policy. Students who are enrolled in a course but have failed to pass the prerequisite course with a C – or higher will be required to withdraw from the course immediately. Students who have failed prerequisites will be notified via email within a week after final grades are posted.

Registration and Access to Biology Courses

Most lower-level biology courses are open to all students who have successfully met the prerequisites. All 300- and 400-level courses are major restricted and the restrictions vary widely by course. It is important to review the department's detailed registration information each quarter to fully understand the major restrictions that will be enforced and when it is appropriate to request an instructor override. For more information, students should review our Registration tab on our website (cse.wvu.edu/biology/registration).

Teaching Careers in Biology

Students wishing to teach at the high school-level in the Washington State public schools need to seek advisement prior to or at the beginning of their third year of college. A Biology Endorsement is earned by completion of the courses in the Biology BS-Secondary Teaching Emphasis and the certification program in Woodring College of Education (www.wce.wvu.edu/Resources/Certification/).

A Science Endorsement may be completed by taking the additional courses of GEOL 211, GEOL 212; and ASTR 315. All courses for the state teaching endorsement must be completed with a C (2.0) or higher. Students who wish to teach at the college-level complete a Biology BS or BA degree and continue graduate work leading to a master's or doctoral degree.

Graduate Study

For concentrations leading to the Master of Education or the Master of Science degrees, see the Graduate School section of this catalog.

Biology, BA

Department of Biology, College of Science and Engineering

75-77 credits

Introduction

Biology is the study of living organisms. As scientists, biologists have three prime motivations: (1) intellectual curiosity about biological systems, (2) the philosophy that creating and disseminating reliable knowledge has intrinsic worth and (3) the confidence that research into the history of life on earth and how biological systems work can be used to solve problems faced by our society today. Thus, we intend for our intensive academic program to stimulate our students' curiosity and appetite for life-long learning about biology.

The B.A. in Biology is designed for students who want to make biology the focus of a liberal arts education and are not directly interested in post-graduate study or professional careers in biology or teaching. The number of required courses in the B.A. Biology degree has been kept low to permit you to add other areas of study and courses suited to your needs and interests.

If you would like to pursue a Bachelor of Arts degree, you may wish to combine your interest in Biology with a focus of course work in areas such as History or Political Science. Other disciplines such as Art, English, Journalism, Sociology, Economics, Philosophy, Business, Physical Education, Psychology or Speech are also beneficial to you if pursuing a Bachelor of Arts in Biology.).

Why Consider a Biology Major?

Are you interested in Biology but do not want a career in biology? Do you want a liberal arts education with a focus on Biology? Do you want to know all about the life that you see, hear, touch, taste and smell and how this affects us? Do you have interests in other scholastic areas as well? Consider a Bachelors of Arts in Biology!

How to Declare (Admission and Declaration Process):

The Biology Department has a two-step process for admission into our degree programs. Phase I students are students who have declared their intent to major in biology and are in the process of completing the introductory biology (BIOL 204, 205, 206) and general chemistry (CHEM 121, 122, 123) series. Admission to Phase II is based on academic performance in the introductory courses. Students must achieve an average grade of 2.9 or higher in their introductory biology and general chemistry courses before they can advance to Phase II and begin taking upper-division coursework.

Biology Phase II status required for admission into 300- and 400-level biology courses for biology majors.

Grade Requirements

A grade of C- or better is required for a student's major courses.

BIOLOGY

Requirements

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 206 - Introduction to Organismal Biology
- BIOL 321 - Genetics
- BIOL 323 - Cell and Molecular Biology
- BIOL 325 - Ecology
- BIOL 432 - Evolutionary Biology
- Choose one of the following series:
 - CHEM 121 - General Chemistry I
 - CHEM 122 - General Chemistry II
 - CHEM 123 - General Chemistry III
 - OR
 - CHEM 125 - General Chemistry I, Honors
 - CHEM 126 - General Chemistry II, Honors
 - CHEM 225 - General Chemistry III, Honors
- CHEM 251 - Elementary Organic Chemistry
- MATH 240 - Introduction to Statistics or equivalent
- One course from:
 - PHYS 101 - Physics Analysis
 - OR
 - PHYS 114 - Principles of Physics I
- 18 credits of upper-division biology courses approved by a faculty advisor.

Bachelor of Arts in Education

Chemistry/Biology — Secondary, BAE (see Chemistry Department)

Chemistry/Biology - Secondary, BAE (see Chemistry Department)

Bachelor of Science

Biology — Ecology, Evolution, and Organismal Biology (EEO) Emphasis, BS

Department of Biology, College of Science and Engineering

96-97 credits

Introduction

Biology is the study of living organisms. As scientists, biologists have three prime motivations: (1) intellectual curiosity about biological systems, (2) the philosophy that creating and disseminating reliable knowledge has intrinsic worth and (3) the confidence that research into the history of life on earth and how biological systems work can be used to solve problems faced by our society today. Thus, we intend for our intensive academic program to stimulate our students' curiosity and appetite for life-long learning about biology.

The biology curriculum provides an effective combination of knowledge in areas that students can apply to many careers. The supporting courses for the Biology major in math, physics, and chemistry, along with the biology core curriculum at the 200-level and 300-level, plus one 400-level course in evolution, fulfill the goals of a liberal arts education. Students select 300-level and 400-level specialty courses that focus on ecology, evolution, plant or animal biology. In these courses students not only pursue their interests more specifically, but begin to integrate and apply knowledge, and develop the skills and abilities to pursue careers of their choosing.

The integrated conceptual foundation in biology, the critical thinking skills, quantitative problem-solving abilities, leadership with team-building skills, and scientific research skills students obtain from lecture and

laboratory courses in the B.S. Biology curriculum ultimately are critical for post-baccalaureate studies and future job performance. We expect that students who graduate with a B.S. or B.A. in Biology can apply their education to a variety of jobs across careers.

Why Consider an Ecology, Evolution, and Organismal Biology Emphasis in the Biology Major?

This degree program focuses on the structure, function, ecology and evolution of organisms, with an emphasis on plants and animals. A diploma granted under this major will indicate "Bachelor of Science"; official transcripts will indicate Biology – Ecology, Evolution and Organismal Biology Emphasis.

The Biology Department has a two-step process for admission into our degree programs. Phase I students are students who have declared their intent to major in biology and are in the process of completing the introductory biology (BIOL 204, 205, 206) and general chemistry (CHEM 121, 122, 123) series. Admission to Phase II is based on academic performance in the introductory courses. Students must have achieved an average grade of 2.9 or higher in their introductory biology and general chemistry courses before they can advance to Phase II and begin taking upper-division coursework.

Biology Phase II status is required for admission into 300- and 400-level biology courses for biology majors.

Grade Requirements

A grade of C- or better is required for a student's major courses.

Requirements

Basic Requirements:

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 206 - Introduction to Organismal Biology
- BIOL 321 - Genetics
- BIOL 323 - Cell and Molecular Biology
- BIOL 325 - Ecology
- BIOL 340 - Biometrics
- BIOL 432 - Evolutionary Biology
- Choose one of the following series:
 - CHEM 121 - General Chemistry I
 - CHEM 122 - General Chemistry II
 - CHEM 123 - General Chemistry III
 - OR
 - CHEM 125 - General Chemistry I, Honors
 - CHEM 126 - General Chemistry II, Honors
 - CHEM 225 - General Chemistry III, Honors
- CHEM 351 - Organic Chemistry

BIOLOGY

- CHEM 352 - Organic Chemistry
- One course from:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 134 - Calculus I Honors
- Choose one of the following series:
 - PHYS 114 - Principles of Physics I
 - PHYS 115 - Principles of Physics II
 - PHYS 116 - Principles of Physics IIIOR
 - PHYS 161 - Physics with Calculus I
 - PHYS 162 - Physics with Calculus II
 - PHYS 163 - Physics with Calculus III

Depth Requirements:

- One of the Following:
 - BIOL 322 - Genetics Lab
 - BIOL 324 - Methods in Molecular Biology
 - BIOL 326 - Ecology Laboratory
- Two additional upper-division lab (or lecture and lab) courses, including at least one 400-level course from the list of courses below. An additional lab course from these categories can be used to complete the lab requirements.
- Three courses (including required lecture and lab courses) chosen from the categories below, with at least one course from each category.

Ecological and Evolutionary Processes:

- BIOL 403 - Physiological Ecology of Animals
 - BIOL 405 - Microbial Ecology
 - BIOL 407 - Marine Ecology
 - BIOL 408 - Ecological Methods
 - BIOL 409 - Research Reptile Ecology
 - BIOL 410 - Animal Behavior
 - BIOL 416 - Ecosystem Ecology and Global Change
 - BIOL 424 - Applied Molecular Ecology
 - BIOL 433 - Quaternary Biogeography
 - BIOL 436 - Molecular Phylogeny and Microbial Diversity
 - BIOL 437B - Tropical Marine Ecology
 - BIOL 450 - Plant Anatomy
 - BIOL 467 - Comparative Vertebrate Physiology
 - BIOL 468 - Comparative Vertebrate Physiology Laboratory
 - BIOL 482 - Developmental Biology of Animals
- #### Taxon Diversity and Organismal Biology:
- BIOL 405 - Microbial Ecology
 - BIOL 436 - Molecular Phylogeny and Microbial Diversity
 - BIOL 437A - Tropical Marine Organismal Biology
 - BIOL 452 - Systematic Botany
 - BIOL 456 - Algae
 - BIOL 460 - Invertebrate Zoology
 - BIOL 462 - Entomology
 - BIOL 464 - Biology of Marine Mammals
 - BIOL 465 - Vertebrate Zoology
 - BIOL 467 - Comparative Vertebrate Physiology

Electives:

0-4 credits to make 96-97 total. No more than 3 credit hours combined in BIOL 395, 496 and 498 can be applied to this category. Additional biology elective credits can be taken to fulfill University graduation requirements:

- Any 300 or 400-level biology course under advisement, including BIOL 300, 400, 444 and 497.
- ESCI courses under advisement.

Biology — General Emphasis, BS

Department of Biology, College of Science and Engineering

96-97 credits

Introduction

Biology is the study of living organisms. As scientists, biologists have three prime motivations: (1) intellectual curiosity about biological systems, (2) the philosophy that creating and disseminating reliable knowledge has intrinsic worth and (3) the confidence that research into the history of life on earth and how biological systems work can be used to solve problems faced by our society today. Thus, we intend for our intensive academic program to stimulate our students' curiosity and appetite for life-long learning about biology.

The biology curriculum provides an effective combination of knowledge in areas that students can apply to many careers. The supporting courses for the Biology major in math, physics, and chemistry, along with the biology core curriculum at the 200-level and 300-level, plus one 400-level course in evolution, fulfill the goals of a liberal arts education. In 400-level courses students not only pursue interests more specifically, but begin to integrate and apply knowledge, and develop the skills and abilities to pursue careers of their choosing.

The integrated conceptual foundation in biology, the critical thinking skills, quantitative problem-solving abilities, leadership with team-building skills, and scientific research skills students obtain from lecture and laboratory courses in the B.S. Biology curriculum ultimately are critical for post-baccalaureate studies and future job performance. We expect that students who graduate with a B.S. or B.A. in Biology can apply their education to a variety of jobs across careers.

Why Consider a General Emphasis in the Biology Major?

This degree program allows students to develop an upper-division curriculum tailored to meet their educational needs with the help of their faculty advisor. A diploma granted under this major will indicate "Bachelor of Science"; official transcripts will indicate Biology – General Emphasis.

 - BIOL 468 - Comparative Vertebrate Physiology Laboratory

BIOL 479 - Plant Physiology
 BIOL 484 - Cell Biology Laboratory
 CHEM 474 - Biochemistry Laboratory

10 credit hours in selected 400-level courses excluding:

BIOL 432 - Evolutionary Biology
 BIOL 494 - Biology Research
 BIOL 495 - Research Communication
 BIOL 496 - Professional Work Experience in Biology
 BIOL 498 - Teaching Practicum

Electives:

4-7 credits to make 96-97. No more than 3 credit hours combined in BIOL 395, 496 and 498 and no more than 4 credit hours combined in BIOL 494 and 495 can be applied to this category. Additional biology elective credits can be taken to fulfill University graduation requirements:

Any 300 or 400-level biology course under advisement.

Biology — Marine Emphasis, BS

Department of Biology, College of Science and Engineering

100-101 Credits

Introduction

Biology is the study of living organisms. As scientists, biologists have three prime motivations: (1) intellectual curiosity about biological systems, (2) the philosophy that creating and disseminating reliable knowledge has intrinsic worth and (3) the confidence that research into the history of life on earth and how biological systems work can be used to solve problems faced by our society today. Thus, we intend for our intensive academic program to stimulate our students' curiosity and appetite for life-long learning about biology.

The B.S. Biology – Marine Emphasis provides a thorough introduction to the basic areas of biology and supporting sciences while allowing specialization in marine biology. The supporting courses for the major in math, physics, and chemistry, along with the biology core curriculum at the 200-level and 300-level, plus one 400-level course in evolution, fulfill the goals of a liberal arts education. Students select 300-level and 400-level specialty courses that focus on marine biology. In these courses students not only pursue their interests more specifically, but begin to integrate and apply knowledge, and develop the skills and abilities to pursue careers of their choosing.

The integrated conceptual foundation in biology, the critical thinking skills, quantitative problem-solving abilities, leadership with team-building skills, and scientific research skills students obtain from lecture and laboratory courses in the B.S. Biology curriculum ultimately are critical for post-baccalaureate studies and future job performance. We expect that students who graduate with a B.S. or B.A. in Biology can apply their education to a variety of jobs across careers.

Why Consider a Marine Emphasis in the Biology Major?

Marine biology is the study of the structure and function of marine organisms and their relationship with the environment. This degree provides students with a solid foundation in all of the major sub-disciplines of biology with an emphasis on the biology of marine organisms and their environments. A diploma granted under this major will indicate "Bachelor of Science"; official transcripts will indicate Biology – Marine Emphasis.

One lecture and lab course from the list of courses below

One additional 300- or 400-level lab (or lecture and lab) course

□ 13-15 credits from the following courses (includes the required lecture and lab courses chosen from this category):

- BIOL 324 - Methods in Molecular Biology
- BIOL 403 - Physiological Ecology of Animals
- BIOL 405 - Microbial Ecology
- BIOL 407 - Marine Ecology
- BIOL 437A - Tropical Marine Organismal Biology
- BIOL 437B - Tropical Marine Ecology
- BIOL 456 - Algae
- BIOL 460 - Invertebrate Zoology
- BIOL 464 - Biology of Marine Mammals

Electives:

1-3 credits to make 100-101 total.

Additional biology elective credits can be taken to fulfill University graduation requirements.

Biology — Molecular and Cell Biology Emphasis, BS

Department of Biology, College of Science and Engineering

100-106 credits

Introduction

Biology is the study of living organisms. As scientists, biologists have three prime motivations: (1) intellectual curiosity about biological systems, (2) the philosophy that creating and disseminating reliable knowledge has intrinsic worth and (3) the confidence that research into the history of life on earth and how biological systems work can be used to solve problems faced by our society today. Thus, we intend for our intensive academic program to stimulate our students' curiosity and appetite for life-long learning about biology.

The B.S. degree in Molecular and Cell Biology places emphasis on the molecular biology and biochemistry of cell functions. The curriculum provides an effective combination of knowledge in areas that students can apply to many careers. Supporting courses in math, physics, and chemistry, along with the core biology curriculum at the 200-level and 300-levels fulfill the goals of a liberal arts education. In upper-level cell and molecular biology courses students pursue topics in more depth and develop the skills and abilities to pursue careers of their choosing.

The integrated conceptual foundation in biology, the critical thinking skills, quantitative problem-solving abilities, leadership with team-building skills, and scientific research skills students obtain from lecture and laboratory courses in the Molecular and Cell Biology B.S. curriculum ultimately are critical for post-baccalaureate studies and for future job performance.

Why Consider a Molecular and Cell Emphasis in the Biology Major?

Cell biology is the study of the structure of cells, the organelles they contain, physiological functions, life cycle, division and death, often studied at the biochemical or molecular level. Molecular biology investigates the interactions among DNA, RNA and protein synthesis within cells as well as understanding how these interactions are regulated using the tools and principles of genetics and bioinformatics gained from prokaryotic and eukaryotic model organisms. Molecular Biology is among the most rapidly growing fields within Biology with recent accomplishments such as the sequencing of the entire human genome.

 - BIOL 482 - Developmental Biology of Animals
 - One of:
 - BIOL 486 - Topics in Molecular Mechanisms of Neurodevelopment (BIOL 486 cannot be combined with BIOL 482)
 - BIOL 497 - Offerings will vary from year to year; faculty advisor must approve selection of specific BIOL 497 course relevant to molecular and cell discipline.

Electives:

3 credits to make 100-106 total. Additional biology elective credits can be taken to fulfill University graduation requirements:

BIOL 325 - Ecology
 BIOL 424 - Applied Molecular Ecology
 BIOL 486 - Topics in Molecular Mechanisms of Neurodevelopment
 BIOL 395, 444, 494, 495, 496, 497, 498, and any other 400-level course listed under depth options
 CHEM 425I - Immunology
 CHEM 425T - Virology
 CHEM 472 - Biochemistry II
 Any 400-level chemistry course

Biology — Secondary Teaching Emphasis, BS

Department of Biology, College of Science and Engineering

97-100 credits

Introduction

Biology is the study of living organisms. As scientists, biologists have three prime motivations: (1) intellectual curiosity about biological systems, (2) the philosophy that creating and disseminating reliable knowledge has intrinsic worth and (3) the confidence that research into the history of life on earth and how biological systems work can be used to solve problems faced by our society today. Thus, we intend for our intensive academic program to stimulate our students' curiosity and appetite for life-long learning about biology.

BIOLOGY

The broad biology curriculum for this major prepares students for a teaching endorsement in biology. The supporting courses for the major in math, physics, and chemistry, along with the biology core curriculum at the 200-level and 300-level, plus one 400-level course in evolution, fulfill the goals of a liberal arts education. The depth courses for this major provide students with a broad background in biology that includes laboratory courses in genetics, molecular and organismal biology as well as a course that examines the relationship between science and society.

A diploma granted under this major will indicate "Bachelor of Science"; official transcripts will indicate Biology and the area of emphasis.

Major requirements include 75-77 credits of foundational courses in biology, chemistry, physics and math, and 22-23 upper-division biology depth and elective credits. Biology Phase II status required for admission into 300- and 400-level biology courses for biology majors.

To receive a recommendation for state of Washington certification, students must complete a professional preparation program in secondary education. See the Secondary Education section of this catalog for program admission, completion and teacher certification requirements for Woodring College of Education.

A Biology endorsement with a teaching certification will require taking SCED 481 and 491 after being admitted to Woodring College of Education. Students who elect to complete certification as an undergraduate while completing a Biology Bachelor of Science degree can count these two courses as electives for the BS. To receive a Science endorsement, take GEOL 211 and 212, and ASTR 315 in addition to the courses listed for the Biology endorsement.

Why Consider a Secondary Teaching Emphasis in Biology Major?

The B.S. Biology – Secondary Teaching Emphasis will allow a student to become a secondary school teacher while giving her or him the flexibility to pursue any other career in biology or continue to post-baccalaureate studies. A diploma granted under this major will indicate "Bachelor of Science"; official transcripts will indicate Biology – Secondary Teaching Emphasis.

Sample Careers

Biology Teacher

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

The Biology Department has a two-step process for admission into our degree programs. Phase I students are students who have declared their intent to major in biology and are in the process of completing the introductory biology (BIOL 204, 205, 206) and general chemistry (CHEM 121, 122, 123) series. Admission to Phase II is based on academic performance in the introductory courses. Students must achieve an average grade of 2.9 or higher in their introductory biology and general chemistry courses before they can advance to Phase II and begin taking upper-division coursework.

Grade Requirements

A grade of C- or better is required for a student's major courses. Science courses required for state teaching endorsements must be completed with a grade of C (2.0) or better.

Requirements

Basic Requirements:

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 206 - Introduction to Organismal Biology
- BIOL 321 - Genetics
- BIOL 323 - Cell and Molecular Biology
- BIOL 325 - Ecology
- BIOL 432 - Evolutionary Biology
- One course from:
 - BIOL 340 - Biometrics
 - MATH 240 - Introduction to Statistics
- Choose one of the following series:
 - CHEM 121 - General Chemistry I
 - CHEM 122 - General Chemistry II
 - CHEM 123 - General Chemistry III
 - OR
 - CHEM 125 - General Chemistry I, Honors
 - CHEM 126 - General Chemistry II, Honors
 - CHEM 225 - General Chemistry III, Honors
- CHEM 351 - Organic Chemistry
- CHEM 352 - Organic Chemistry
- One course from:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 134 - Calculus I Honors
- Choose one of the following series:
 - PHYS 114 - Principles of Physics I
 - PHYS 115 - Principles of Physics II
 - PHYS 116 - Principles of Physics III
 - OR
 - PHYS 161 - Physics with Calculus I
 - PHYS 162 - Physics with Calculus II
 - PHYS 163 - Physics with Calculus III

Depth Requirements:

- BIOL 326 - Ecology Laboratory
- One course from:
 - BIOL 322 - Genetics Lab
 - BIOL 324 - Methods in Molecular Biology
- One of the following:
 - BIOL 460 - Invertebrate Zoology
 - BIOL 465 - Vertebrate Zoology
 - BIOL 467 - Comparative Vertebrate Physiology AND
 - BIOL 468 - Comparative Vertebrate Physiology Laboratory
 - BIOL 482 - Developmental Biology of Animals AND
 - BIOL 484 - Cell Biology Laboratory
- One of the following:
 - BIOL 450 - Plant Anatomy
 - BIOL 451 - Developmental Biology of Plants
 - BIOL 452 - Systematic Botany
 - BIOL 479 - Plant Physiology
- SCED 370 - Science and Society

BIOLOGY

Electives:

0-2 credits to make 97-100 total (75-77 credits of basic requirements plus 22-23 upper-division biology depth and elective credits). Additional elective credits can be taken to fulfill University graduation requirements.

- Upper-division courses under advisement, including:
 - SCED 481 - Fundamentals of Teaching Science
 - SCED 491 - Methods in Secondary Education for Science Teachers (see comments above)

Biology/Anthropology, BS

Combined major offered by the Department of Biology, College of Science and Engineering and the Department of Anthropology, College of Humanities and Social Sciences.

103-106 Credits

Introduction

Biological or Physical Anthropology is the study of both present and past human variation relative to local ecologies and cultures. Biological Anthropologists specialize in human or primate anatomy, disease ecology, growth and development, forensic anthropology and osteology, medical anthropology, primate behavior, and paleoanthropology.

Biology, the scientific study of living things, includes a broad spectrum of fascinating fields. Cell and molecular biology, developmental genetics, systematics and evolution, botany, zoology, marine biology, microbial ecology, plant and animal ecology, physiological and behavioral ecology and science education are some of the specialties of study that students can pursue with the Biology faculty at Western.

Why Consider a Biology/Anthropology Major?

The Biology/Anthropology major concentrates on human biology and behavioral science. This major is most useful for those continuing on in applied health careers such as: Medicine, Osteopathy, Optometry, Dentistry, etc. It is also useful for Epidemiology, public health and graduate programs in Human Biology and Biological Anthropology.

Depth requirements:

- BIOL 348 - Human Anatomy and Physiology
- One course from:
 - BIOL 349 - Human Physiology

BIOLOGY

BIOL 467 - Comparative Vertebrate Physiology

One of the following:

ANTH 308 - Hunter-Gatherer Societies in World Prehistory

ANTH 422 - Nutritional Anthropology

ANTH 424 - Medical Anthropology

BIOL 410 - Animal Behavior

Completion requirement:

ANTH 496 - Portfolio Assembly

Electives:

3-12 credits to make 103-106 total.

One course from:

BIOL 322 - Genetics Lab

BIOL 324 - Methods in Molecular Biology

BIOL 323 - Cell and Molecular Biology

BIOL 345 - Fundamentals of Microbiology

BIOL 410 - Animal Behavior

BIOL 465 - Vertebrate Zoology

BIOL 467 - Comparative Vertebrate Physiology

ANTH 308 - Hunter-Gatherer Societies in World Prehistory

ANTH 422 - Nutritional Anthropology

ANTH 424 - Medical Anthropology

Other electives under advisement

Biology/Mathematics, BS

Combined major offered by the Department of Biology, College of Science and Engineering and the Department of Mathematics, College of Science and Engineering.

111-112 credits

Introduction

Biology is the study of living organisms. As scientists, biologists have three prime motivations: (1) intellectual curiosity about biological systems, (2) the philosophy that creating and disseminating reliable knowledge has intrinsic worth and (3) the confidence that research into the history of life on earth and how biological systems work can be used to solve problems faced by our society today. Thus, we intend for our intensive academic program to stimulate our students' curiosity and appetite for life-long learning about biology.

The biology curriculum provides an effective combination of knowledge in areas that students can apply to many careers. The supporting courses for the Biology major in math, physics, and chemistry, along with the biology core curriculum at the 200-level and 300-level, plus one 400-level course in evolution, fulfill the goals of a liberal arts education. In 400-level courses students not only pursue interests more specifically, but begin to integrate and apply knowledge, and develop the skills and abilities to pursue careers of their choosing.

"Mathematics reveals hidden patterns that help us understand the world around us. Now much more than arithmetic and geometry, mathematics today is a diverse discipline that deals with data, measurements, and observations from science; with inference, deduction, and proof; and with mathematical models of natural phenomena, of human behavior, and of social systems.

As a practical matter, Mathematics is a science of pattern and order. Its domain is not molecules or cells, but numbers, chance, form, algorithms, and change. As a science of abstract objects, Mathematics relies on logic rather than on observation as its standard of truth, yet employs observation, simulation, and even experimentation as means of discovering truth." -From Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences.

Why Consider a Biology/Mathematics Major?

Biology is an increasingly quantitative discipline, requiring mathematical models to understand complex biological phenomena, and computationally-intensive algorithms to analyze the massive datasets generated by genomics. More than ever, employers in fields such as bioengineering, theoretical biology, ecology, and molecular biology are seeking to hire people equipped to handle the quantitative rigors of modern biology. The Biology/Mathematics B.S. degree enables students to develop a strong background in biology along with a broadly applicable understanding of quantitative and computational approaches to problem-solving, giving graduates from this program a unique and highly sought set of skills.

Master of Science

Biology, Marine and Estuarine Science, Thesis, MS

Department of Biology, College of Science and Engineering

Graduate Faculty

Acevedo-Gutierrez, Alejandro, PhD, marine vertebrate ecology.
Anderson, Roger A., PhD, vertebrate behavioral and physiological ecology.
Donovan, Deborah A., PhD, marine invertebrate physiological ecology.
Kodner, Robin, PhD, quantitative marine biology
Miner, Benjamin G., PhD, marine invertebrate ecology and evolution.
Moyer, Craig L., PhD, evolutionary molecular microbiology.

Program Advisor: Dr. Benjamin Miner

Curriculum Coordinators: Dr. Brian Bingham and Dr. John Rybczyk, Huxley College of the Environment; Dr. Benjamin Miner and Dr. Deb Donovan, Department of Biology.

For a complete list of participating faculty and their research interests, and for additional information, visit the MESP website.

The Marine and Estuarine Science option is a joint offering of the Department of Biology, Huxley College, and Shannon Point Marine Center. Students graduating from the program will have an understanding of coastal marine and estuarine environments, biota and topical management issues, and fundamental biological and chemical oceanographic processes.

Goals

To offer a first-class research experience for our students that will provide them with the background and skills to enter a variety of professional careers in biology. We aim to provide a stimulating intellectual environment with rigorous scholarship that facilitates multiple opportunities for graduate students.

Prerequisites

A bachelor's degree and departmental permission. Deficiencies in undergraduate courses or those subsequently revealed to the Biology Graduate Committee or to the student's program committee must be corrected prior to advancement to candidacy. Applicants are directed to the current requirements of the basic BS degree in biology for a summary of expected preparation for graduate work. All students should have completed upper-division courses in genetics, cell biology, ecology and biometrics, and supporting introductory course work in organismal biology.

Application Information

Admit Quarter: Fall quarter only; spring quarter by petition.

Deadline: The deadline for priority consideration is February 1 for fall quarter. See Graduate School deadlines for other quarters.

TA Deadline: The deadline for applying for a teaching assistantship is February 1.

Required Test: Graduate Record Exam, General Test or REVISED General Test beginning August 2011.

Supporting Materials: Application with \$100 fee; three recent letters of reference; one set of transcripts from every college/university attended; written description of background and research interests, including an indication of three potential faculty advisors.

Program Requirements

At least 45 total combined credits from the following areas:

Requirements in Specialization

- BIOL 501 - Fundamentals of Biological Research (3 credits)
- BIOL 505 - Current Research in Science (1-2 credits)
- BIOL 525 - Research Mentorship (4 credits)
- BIOL 598 - Essentials of Biology Graduate Studies (2 credits)
- BIOL 690 - Thesis Research (12-36 credits)

Electives

- Courses selected under advisement from 400- and 500-level courses in biology and supporting disciplines. No more than 10 credits may come from 400-level courses. All elective courses must be approved by the student's program committee (14-23).

Thesis and Examination

Degree candidates will submit a thesis based on independent and original research on a problem approved by the student's thesis committee. A final oral exam will be conducted by the advisory committee. Degree candidates will present a department seminar based on the results of the thesis research.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Students must be eligible for Phase II status before they may declare a minor in biology. Admission to Phase II requires that a student have a minimum gpa of 2.9 in the introductory chemistry and biology courses (CHEM 121, 122, 123 and BIOL 204, 205 and 206). To declare, please see the declaration process section above or visit the department's website.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

BIOLOGY

Requirements

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 206 - Introduction to Organismal Biology
- Choose one of the following series:
 - CHEM 121 - General Chemistry I
 - CHEM 122 - General Chemistry II
 - CHEM 123 - General Chemistry IIIOr
 - CHEM 125 - General Chemistry I, Honors
 - CHEM 126 - General Chemistry II, Honors
 - CHEM 225 - General Chemistry III, Honors
- 15 credits of upper-level courses
 - Any upper-level biology course, with the exception of BIOL 348, 349, 395, 444, 494, 495, 496 or 498, can be used to fulfill this requirement.
 - Up to 6 upper-division credits may overlap and be applied to both the biology minor and the student's major degree requirements.

Biology Courses

BIOL 101 - Introduction to Biology

Major ideas and processes of modern biological science at molecular, cellular, organismic and community levels; stressing qualitative and quantitative dimensions of the discipline in lecture, laboratory, field and discussion settings. Lab included. Intended for non-science majors.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

BIOL 102 - Biological Diversity: Evolution and Systems

A consideration of biodiversity; adaptations and life cycles of plants and animals; organismal biology; science as a way of knowing; the relevance of the above-mentioned topics for the educated citizen. Lecture, discussion, field and lab included.

Prerequisites & Notes: BIOL 101

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

BIOL 110 - Marine Habitat Diversity

Exploration of the biological and physical properties of the diverse marine habitats characteristic of Salish Sea environments, including eelgrass and other soft-sediment sites, the rocky intertidal, the plankton and deep-sea sites. Habitats will be studied with respect to their physical properties, the impacts on them of factors such as tides and exposure, typical biota, and oceanographic processes that characterize them. Instruction will include lectures, laboratory

exercises, field trips and group projects.

Prerequisites & Notes: Admission to the Marine Science Scholars Program.

Credits: 4

Grade Mode: Letter

BIOL 111 - Current Topics in Marine Science I

Current topics in marine science assigned by instructor each quarter. Typical topics may include harmful algal blooms, invasive species, ocean acidification, climate change, and fisheries or mariculture. Repeatable with different topics up to a maximum of 2 credits, including original course.

Prerequisites & Notes: Admission to the Marine Science Scholars Program.

Credits: 1

Grade Mode: Letter

BIOL 112 - Current Topics in Marine Science II

Current topics in marine science assigned by instructor each quarter. Typical topics may include harmful algal blooms, invasive species, ocean acidification, climate change, and fisheries or mariculture. Repeatable with different topics up to a maximum of 3 credits, including original course.

Prerequisites & Notes: Admission to the Marine Science Scholars Program.

Credits: 1

Grade Mode: Letter

BIOL 140 - The Ecology and Economics of Salmon Recovery

Focus on the 4 causes of salmon decline (Habitat, Hydropower, Harvest, and Hatcheries) to investigate the interactions between ecology and

economics through lectures, reading and independent projects. Also offered as ECON 140.

Prerequisites & Notes: MATH 112 or equivalent General Math Placement test score.

Credits: 4

Grade Mode: Letter

GUR Attributes: SCI

BIOL 195 - Introduction to Marine Biology

A field-based introduction to marine biology for entering first-year students. S/U grading.

Credits: 2

Grade Mode: S/U

BIOL 204 - Introduction to Evolution, Ecology and Biodiversity

Introduction to evolutionary and ecological processes involved in the generation of our planet's biodiversity, including review of patterns and processes that influence the origin, evolution, distribution, and abundance of living things. Includes lab.

Prerequisites & Notes: CHEM 121 or CHEM 125 or concurrent.

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

BIOL 205 - Introduction to Cellular and Molecular Biology

Structure and function of biomolecules and cells, membrane structure and function, photosynthesis and respiration, molecular origin of life, phylogenetic and metabolic diversity of prokaryotes, molecular genetics and genomics. Includes lab.

Prerequisites & Notes: BIOL 204; CHEM 121 or CHEM 125; CHEM 122 or CHEM 126 or concurrent.

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

BIOL 206 - Introduction to Organismal Biology

Study of the many ways that eukaryotic organisms perform basic functions and cope with varying environmental conditions. Phylogenetic organismal diversity and organ system structural and functional diversity will be studied in lecture and laboratory.

Prerequisites & Notes: BIOL 205; CHEM 122 or CHEM 126; CHEM 123 or CHEM 225 or concurrent.

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

BIOL 245 - Microbiology for Health Sciences

General microbiology with an emphasis on health related issues. Students will learn aseptic technique in lab and the characteristics of microbes that affect human health. Credits earned in this course cannot be applied towards a Biology degree.

Prerequisites & Notes: BIOL 101, or BIOL 204 and BIOL 205

Credits: 5

Grade Mode: Letter

BIOL 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

BIOL 321 - Genetics

Survey of classical genetics, molecular genetics and genomics in prokaryotic and eukaryotic organisms.

Prerequisites & Notes: BIOL 204, BIOL 205, BIOL 206

Credits: 4

Grade Mode: Letter

BIOL 322 - Genetics Lab

Uses prokaryotic and eukaryotic model organisms to explore the fundamentals of genetics and the use of genetics as a tool for basic research. Includes lecture.

Prerequisites & Notes: BIOL 321.

Credits: 4

Grade Mode: Letter

BIOL 323 - Cell and Molecular Biology

Cell structure and function. Topics include: protein structure and function, gene regulation, cell cycle, signal transduction, and organelle assembly and function.

Prerequisites & Notes: CHEM 351 and CHEM 352 (may be taken concurrently); OR CHEM 251.

BIOLOGY

Credits: 4

Grade Mode: Letter

BIOL 324 - Methods in Molecular Biology

An introduction to widely used molecular biology techniques and laboratory skills.

Prerequisites & Notes: BIOL 321 or BIOL 323

Credits: 3

Grade Mode: Letter

BIOL 325 - Ecology

Organismal-environmental relationships in marine, fresh water and terrestrial habitats. Functions and development of ecosystems.

Prerequisites & Notes: BIOL 204, BIOL 205, BIOL 206

Credits: 3

Grade Mode: Letter

BIOL 326 - Ecology Laboratory

Introduction to ecological research, culminating in student-designed research projects. Written and oral presentation of projects.

Prerequisites & Notes: BIOL 325 or concurrent; or ESCI 325.

Credits: 3

Grade Mode: Letter

BIOL 340 - Biometrics

The design of biological experiments and appropriate statistical analysis of experimental data.

Prerequisites & Notes: BIOL 204, BIOL 205, BIOL 206; or instructor permission.

Credits: 5

Grade Mode: Letter

BIOL 345 - Fundamentals of Microbiology

Cell structure, metabolism, evolution and ecology of prokaryotes.

Prerequisites & Notes: BIOL 205, CHEM 251 or CHEM 351

Credits: 3

Grade Mode: Letter

BIOL 346 - Microbiology Lab

Techniques of general microbiology, including isolation, culture, enumeration and identification of prokaryotes.

Prerequisites & Notes: BIOL 205; CHEM 351 or

CHEM 251; BIOL 345 or concurrent.

Credits: 2

Grade Mode: Letter

BIOL 348 - Human Anatomy and Physiology

Macroscopic and histological examination of human anatomical systems, and study of general neuromuscular and cardiopulmonary functions. Includes lab. Credits earned in this course cannot be applied towards a BA or BS in Biology, except for the BA and BS in Biology/Anthropology.

Prerequisites & Notes: BIOL 101 or BIOL 205

Credits: 5

Grade Mode: Letter

BIOL 349 - Human Physiology

A comprehensive introduction to the study of integrated functions of cells, organs and organ systems in humans.

Prerequisites & Notes: BIOL 348 or BIOL 206; CHEM 121 or CHEM 125

Credits: 5

Grade Mode: Letter

BIOL 395 - Biology Research Participation

Participation in biology research under the direction of a biology professor. The experience may include assisting in the maintenance of experimental setup, data collection, data entry, literature searches, and developing graphics. Repeatable up to 6 credits, including original course.

Prerequisites & Notes: Permission of instructor.

Credits: 1-4

Grade Mode: S/U

BIOL 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

BIOL 402 - Wetland Identification and Delineation

This course introduces materials and methods used to identify and delineate jurisdictional wetlands under the Army Corps of Engineers (Corps) 1987 Wetlands Delineation Manual and Corps Regional

Supplements and is intended for anyone who is interested in wetland delineation such as biology or environmental science majors, land use planners, civil and environmental engineers, and biological/environmental consultants. Students learn how to identify and delineate jurisdictional wetlands and understand and identify field indicators of hydrophytic vegetation, hydric soils, and wetland hydrology, as well as methods for disturbed and atypical wetlands, and recognizing difficult wetland situations as defined by the Corps, through lectures and "hands-on" field instruction. Skills learned in this course are applicable nationwide and satisfy requirements for basic wetland training as specified by the Corps

Prerequisites & Notes: BIOL 325 or ESCI 325.

Credits: 4

Grade Mode: Letter

BIOL 403 - Physiological Ecology of Animals

Physiological and biochemical adaptations of animals to environmental factors. Marine environments are emphasized, but adaptations to fresh water and terrestrial conditions also are considered. Laboratories introduce research techniques which are then applied in student-designed independent research projects.

Prerequisites & Notes: BIOL 206; and BIOL 325 or ESCI 325; or instructor permission

Credits: 5

Grade Mode: Letter

BIOL 404 - Plant Ecology

Ecology of plant communities, interpretation of vegetation patterns, and plant ecophysiology.

Prerequisites & Notes: BIOL 206, BIOL 325, BIOL 326

Credits: 5

Grade Mode: Letter

BIOL 405 - Microbial Ecology

Study of microbial communities in aquatic and terrestrial environments, with emphasis on the functional role of microbes in energy flow, nutrient cycling and element transformation. Overview of microbial interactions with eukaryotic hosts. Discussion of structure, genetics, and community on microbial communities. Offered in alternate years.

Prerequisites & Notes: BIOL 325 and BIOL 345 or instructor permission.

Credits: 4

Grade Mode: Letter

BIOL 407 - Marine Ecology

The structure and function of marine ecosystems with an emphasis on processes in shallow-water and benthic habitats. Investigative field and laboratory studies of local marine and estuarine systems.

Prerequisites & Notes: BIOL 325; BIOL 326; BIOL 340 or concurrent OR ESCI 340 or concurrent; ESCI 321 or concurrent or instructor permission.

Credits: 5

Grade Mode: Letter

BIOL 408 - Ecological Methods

Students will learn instrumentation and methodology for field research, and practice it in a field setting. Specifically, students will perform comparative investigations of three meso-habitats by measuring ecologically relevant parameters, such as spatiotemporal variation in microclimate or vegetation, and terrestrial invertebrate abundance and diversity.

Prerequisites & Notes: BIOL 325 or ESCI 325; Co-requisite BIOL 409

Credits: 6

Grade Mode: Letter

BIOL 409 - Research Reptile Ecology

Field research will focus on developing knowledge and understanding of the population, behavioral, and physiological ecology of reptiles.

Observational-comparative and experimental methods will be learned. Data collected in BIOL 408 will be analyzed, interpreted, and prepared for publication.

Prerequisites & Notes: BIOL 325 or ESCI 325. Co-requisite BIOL 408.

Credits: 6

Grade Mode: Letter

BIOL 410 - Animal Behavior

Investigation of the component processes and adaptive functions of animal behavior in an ecological and evolutionary context, and an introduction to the questions asked, hypotheses proposed and methods used in the study of animal behavior. Offered in alternate years.

Prerequisites & Notes: BIOL 206; BIOL 325 or ESCI 325; or instructor permission.

Credits: 4

Grade Mode: Letter

BIOL 416 - Ecosystem Ecology and Global Change

Investigation of the factors controlling whole

BIOLOGY

ecosystem processes such as productivity, decomposition, and nutrient cycling. Application of these concepts to current issues in global change, including the carbon cycle and global warming, land use change, nitrogen-loading, and biodiversity and ecosystem function. Lectures and textbook reading are integrated with discussion of papers from the primary literature.

Prerequisites & Notes: BIOL 325 or ESCI 325; BIOL 326 recommended.
Credits: 4
Grade Mode: Letter

BIOL 424 - Applied Molecular Ecology

This class provides a practical introduction to how genetic methods can be used to address problems in ecology and evolution. As an applied course this class will stress general concepts of population genetics, phylogenetics, and comparative genomics via the use of quantitative tools in practical exercises while putting less emphasis on the theoretical details underlying these tools.

Prerequisites & Notes: BIOL 321
Credits: 3
Grade Mode: Letter

BIOL 432 - Evolutionary Biology

Principles, patterns, processes and mechanisms of evolution.

Prerequisites & Notes: BIOL 321
Credits: 4
Grade Mode: Letter

BIOL 433 - Quaternary Biogeography

This course examines the impact that climatic changes during the past 2 million years had on the distribution of biological diversity, with an emphasis on the flora and fauna of the Pacific Northwest.

Prerequisites & Notes: BIOL 325 or ESCI 325.
Credits: 3
Grade Mode: Letter

BIOL 436 - Molecular Phylogeny and Microbial Diversity

Explore the ramifications of the recent revolutionary discoveries in microbial diversity, the reconstruction of evolutionary discoveries in history at both molecular and organismal levels and the implications of the origins of life on prokaryotic evolution. Emphasis on applications of phylogenetic theories and methods to the understanding and 'modeling' of the evolutionary progression of life. Multiple phylogenetic

reconstruction algorithms will be closely examined and scrutinized. Offered alternate years.

Prerequisites & Notes: BIOL 345, BIOL 346
Credits: 5
Grade Mode: Letter

BIOL 444 - Seminar Series Participation

The Biology Department Seminar Series provides opportunities for undergraduate students to learn about the latest developments in key fields of biological research. Students will be required to attend seminars and provide a written synopsis of each presentation.

Prerequisites & Notes: BIOL 204, BIOL 205, BIOL 206
Credits: 1
Grade Mode: S/U

BIOL 450 - Plant Anatomy

Structure of the plant body, from cellular to whole plant level, including developmental and ecological aspects. Offered alternate years.

Prerequisites & Notes: BIOL 206
Credits: 5
Grade Mode: Letter

BIOL 451 - Developmental Biology of Plants

An examination of the molecular basis of plant development and the applied uses of recent discoveries on crop improvement strategies. Emphasis on discussion of primary literature. Offered alternate years.

Prerequisites & Notes: BIOL 323
Credits: 3
Grade Mode: Letter

BIOL 452 - Systematic Botany

Taxonomy of higher plants with emphasis on the characteristics and phylogeny of flowering plant families; collection and identification of local species.

Prerequisites & Notes: BIOL 206
Credits: 5
Grade Mode: Letter

BIOL 456 - Algae

Physiology and ecology of macroalgae and phytoplankton including identification, collection and culture of major algal groups. Laboratory focus on research techniques which are then applied in student independent projects.

Prerequisites & Notes: BIOL 206; 5 credits of 300 level science coursework or instructor permission.

Credits: 5

Grade Mode: Letter

BIOL 460 - Invertebrate Zoology

Evolutionary relationships of invertebrate animals, including anatomy, physiology, classification, development and ecology.

Prerequisites & Notes: BIOL 204, BIOL 205, BIOL 206

Credits: 5

Grade Mode: Letter

BIOL 462 - Entomology

The biology of insects, emphasizing their ecology and evolution, as well as comparative anatomy, physiology, and development. Laboratory exercises will focus on community studies and insect identification.

Prerequisites & Notes: BIOL 206

Credits: 5

Grade Mode: Letter

BIOL 464 - Biology of Marine Mammals

Examination of the evolution, physiology, ecology and conservation of marine mammals through critical thinking and discussion of the primary literature. Offered in alternate years.

Prerequisites & Notes: BIOL 204, BIOL 205, BIOL 206. Recommended: ESCI 321.

Credits: 4

Grade Mode: Letter

BIOL 465 - Vertebrate Zoology

Investigations of vertebrate phylogenies; analyses of the biogeographic and ecological patterns of spatiotemporal distribution of many vertebrate taxa; examinations of the principal adaptive features that uniquely define each major vertebrate taxon. Offered alternate years.

Prerequisites & Notes: BIOL 206; and BIOL 325 or ESCI 325; or instructor permission

Credits: 5

Grade Mode: Letter

BIOL 467 - Comparative Vertebrate Physiology

Examination of the physiological functions of organ systems in each of the major vertebrate classes, with systems of taxa compared in evolutionary and ecological contexts.

Prerequisites & Notes: BIOL 206

Credits: 3

Grade Mode: Letter

BIOL 468 - Comparative Vertebrate Physiology Laboratory

Design and implement laboratory research on some aspect of whole-animal performance physiology.

Prerequisites & Notes: BIOL 206; BIOL 467 or concurrent.

Credits: 3

Grade Mode: Letter

BIOL 470 - Functional Genomics

Examines the development and application of genome-based experimental approaches in biology.

Prerequisites & Notes: BIOL 321, BIOL 323

Credits: 3

Grade Mode: Letter

BIOL 473 - Molecular Biology

An examination of the structure, replication and expression of genetic information. Also offered as CHEM 473.

Prerequisites & Notes: BIOL 321 or BIOL 323; CHEM 471.

Credits: 3

Grade Mode: Letter

BIOL 476 - Structure and Physiology of Membrane Transport Proteins

Examination of the structure of membrane transport proteins and their role in physiological processes through presentation and critical discussion of primary literature. Offered in alternate years.

Prerequisites & Notes: BIOL 323; CHEM 471 recommended.

Credits: 3

Grade Mode: Letter

BIOL 479 - Plant Physiology

Basic principles of physiology including cell structure and function, plant-soil-water relationships, absorption and translocation of materials, transpiration, photosynthesis, respiration, mineral nutrition, growth and development, hormonal regulation.

Prerequisites & Notes: BIOL 206; CHEM 351 and CHEM 352, or CHEM 251

BIOLOGY

Credits: 5

Grade Mode: Letter

BIOL 482 - Developmental Biology of Animals

An examination of the molecular, cellular and genetic aspects of developmental biology in invertebrate and vertebrate model systems: fruitflies, nematodes, sea urchins, frogs and mammals.

Prerequisites & Notes: BIOL 321 and BIOL 323

Credits: 4

Grade Mode: Letter

BIOL 484 - Cell Biology Laboratory

Laboratory investigations of cellular and developmental processes. Tissue culture methods and microscopy techniques, including immunofluorescence. Lectures will focus on optics and image processing.

Prerequisites & Notes: BIOL 323

Credits: 5

Grade Mode: Letter

BIOL 486 - Topics in Molecular Mechanisms of Neurodevelopment

Molecular analysis of developmental processes controlling the formation of functional neural circuits. Emphasis placed on critical evaluation and discussion of primary literature.

Prerequisites & Notes: BIOL 321 and BIOL 323.

Credits: 3

Grade Mode: Letter

BIOL 494 - Biology Research

Individual or collaborative research, including design and implementation of a research project, working under the tutelage of a biology professor. Repeatable to a maximum of 8 credits including original course.

Prerequisites & Notes: Phase II in biology and permission of instructor; completion of department course agreement form.

Credits: 1-5

Grade Mode: Letter

BIOL 495 - Research Communication

Analysis and written and/or oral presentation of results of individual scientific research. Communication can be in the form of a full scientific paper, a poster, or an oral presentation. Number of credits is dependent on the form of communication. Repeatable to a maximum of 6 credits including original course.

Prerequisites & Notes: BIOL 494; phase II in Biology and permission of instructor.

Credits: 1-4

Grade Mode: Letter

BIOL 496 - Professional Work Experience in Biology

Full- or part-time work with a cooperating agency or firm. Written reports required. Repeatable to a maximum of 8 cr. S/U grading.

Prerequisites & Notes: Phase II in Biology and permission of instructor.

Credits: 1-5

Grade Mode: S/U

BIOL 498 - Teaching Practicum

Classroom experience in biology teaching. Students will assist faculty in the laboratory and lecture settings. Repeatable to a maximum of 4 cr. S/U grading.

Prerequisites & Notes: Phase II in Biology and permission of instructor.

Credits: 1-4

Grade Mode: S/U

BIOL 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

BIOL 501 - Fundamentals of Biological Research

Introduction to developing and writing research proposals, obtaining funding, and conducting research in the Biological Sciences.

Prerequisites & Notes: Graduate status in Biology or permission of instructor.

Credits: 3

Grade Mode: Letter

BIOL 505 - Current Research in Science

Presentation and discussion of research expertise of University faculty participating in science graduate programs. Repeatable to a maximum of 2 cr. S/U grading.

Prerequisites & Notes: Permission of instructor.

Credits: 1
Grade Mode: S/U

BIOL 508 - Advanced Topics in Marine Biology

Analysis and discussion of current literature on selected topics in marine and estuarine biology. Examples of topics include symbiosis, intertidal community dynamics and marine microbiology. Repeatable with different topics.

Prerequisites & Notes: 25 credits in biology and permission of instructor.

Credits: 4
Grade Mode: Letter

BIOL 513 - Physiological Ecology of Animals

Physiological and biochemical adaptations of animals to environmental factors. Emphasizes marine environments, but adaptations to freshwater and terrestrial environments conditions are also considered. Labs introduce research techniques which are applied in student-designed independent research projects.

Prerequisites & Notes: BIOL 206, BIOL 325; or introductory courses in zoology and ecology.

Credits: 5
Grade Mode: Letter

BIOL 516 - Advanced Ecosystem Ecology and Global Change

Investigates the factors controlling whole ecosystem processes. Application of these concepts to current issues in global change, including the carbon cycle and global warming, land-use change, nitrogen load, and biodiversity and ecosystem functioning.

Prerequisites & Notes: BIOL 325 or ESCI 325 or equivalent; BIOL 326 recommended

Credits: 4
Grade Mode: Letter

BIOL 524 - Applied Molecular Ecology

This class provides a practical introduction to how genetic methods can be used to address problems in ecology and evolution. As an applied course this class will stress general concepts of population genetics, phylogenetics, and comparative genomics via the use of qualitative tools in practical exercises while putting less emphasis on the theoretical details underlying these tools.

Prerequisites & Notes: Background in genetics and ecology.

Credits: 3
Grade Mode: Letter

BIOL 525 - Research Mentorship

Part of the core curriculum for all Biology MS students. This course provides an overview of research methods in biology and guidance for developing a research program. Through this seminar-style course, students will discuss research methods and how to trouble shoot research problems across the discipline. Offered Winter and Spring only, required of 1st and 2nd year students in each quarter, for 4 credits total. S/U grading.

Prerequisites & Notes: Admission to MS program in biology or interdisciplinary graduate program involving biology.

Credits: 1
Grade Mode: S/U

BIOL 533 - Advanced Quaternary Biogeography

This course examines the impact that climatic changes during the past 2 million years had on the distribution of biological diversity, with an emphasis on the flora and fauna of the Pacific Northwest.

Prerequisites & Notes: Background in Ecology.

Credits: 3
Grade Mode: Letter

BIOL 551 - Developmental Biol Plants

An examination of the molecular basis of plant development and the applied uses of recent discoveries on crop improvement strategies. Emphasis on discussion of primary literature. Offered alternate years.

Prerequisites & Notes: Background in cellular and molecular biology.

Credits: 3
Grade Mode: Letter

BIOL 576 - Structural Basis of Membrane Transport Proteins

This course will examine the general structural basis of membrane transport proteins; studying their mechanistic information, examining the actual body plans and structure of these proteins and evaluating the structure-function relationship that permits them to perform their task. The overall goal of this course is to acquire a unifying view of membrane transport mechanisms. Offered in alternate years.

Prerequisites & Notes: Graduate status. BIOL 323 or equivalent; background in biochemistry recommended.

BIOLOGY

Credits: 3

Grade Mode: Letter

BIOL 586 - Topics in Molecular Mechanisms of Neurodevelopment

Molecular analysis of developmental processes controlling the formation of functional neural circuits. Emphasis placed on critical evaluation and discussion of primary literature.

Prerequisites & Notes: Graduate standing; BIOL 321 and BIOL 323; or background in cell biology and genetics.

Credits: 3

Grade Mode: Letter

BIOL 594 - Cell Biology Laboratory

Laboratory investigations of cellular processes. Tissue culture methods and microscopy techniques, including immunofluorescence. Lectures will focus on optics and image processing.

Prerequisites & Notes: Graduate standing and permission of instructor; BIOL 323 or equivalent.

Credits: 4

Grade Mode: Letter

BIOL 595 - Developmental Biology

An examination of the molecular, cellular and genetic aspects of developmental biology in invertebrate and vertebrate model systems: fruitflies, nematodes, sea urchins, frogs and mammals.

Prerequisites & Notes: 25 credits in biology and permission of instructor.

Credits: 5

Grade Mode: Letter

BIOL 598 - Essentials of Biology Graduate Studies

An overview of departmental resources, guidelines for navigating the Biology MS in a timely fashion, with workshops for developing skills in teaching and giving presentations in the biological sciences. Fall quarter of the first year only. Required of all first-year Biology MS students. Not repeatable. S/U grading.

Prerequisites & Notes: Permission of instructor.

Credits: 2

Grade Mode: S/U

BIOL 599 - Ecological Morphology

Selected problems in biology, with emphasis on current literature. Repeatable.

Prerequisites & Notes: 40 credits in biology

Credits: 2

Grade Mode: Letter

BIOL 690 - Thesis Research

Research contributing to a graduate degree program. Graded 'K' until thesis completed. Repeatable up to 36 credits. S/U grading.

Prerequisites & Notes: Permission of thesis advisor.

Credits: 1-12

Grade Mode: S/U

Chemistry

Introduction

cse.wvu.edu/chemistry

The Department of Chemistry offers undergraduate degree programs in chemistry and biochemistry. American Chemical Society certification is available to BS graduates in chemistry. The WWU chemistry and biochemistry program is recognized as one of the finest in the country and is focused on supporting our students and ensuring their success in their chosen careers. The Department of Chemistry — in addition to its core of fundamental studies in analytical, biochemistry, inorganic, organic, and physical chemistry — has added a variety of elective courses that offer diversity in training, study and research at both the undergraduate and graduate levels. Within the department, faculty members are active in many research areas, including biofuels, protein engineering, computer modeling, catalysis, nanomaterials, materials for solar cells, electrochemistry, polymers, thin films, protein structural analysis by nuclear magnetic resonance and x-ray crystallography, and organic synthesis. Detailed explanations of the current research areas of the faculty can be found on the department website (cse.wvu.edu/chemistry).

Every effort is made to continually update and modernize course work and teaching methods. The department maintains state-of-the-art instrumentation for both teaching and research activities. Students gain experience in modern analytical methods through hands-on use of the instrumentation. Faculty members have authored successful textbooks and computer-assisted instructional materials that have found wide usage at major universities. Western's graduates have a long and enviable record of success in PhD programs at major research universities and in a variety of medical, dental and pharmacy programs.

Faculty

Department faculty all hold the PhD degree, and most have had postdoctoral experience before coming to Western. The department supports an active undergraduate research program, and students are encouraged to undertake a research project early in their studies.

There is a high degree of personal contact between faculty and students in the department. Supporting students is a core mission of the department, and faculty and department staff members assist with academic and career counseling.

SPENCER J. ANTHONY-CAHILL (1997) Chair and Professor. BA, Whitman College; PhD, University of California-Berkeley.

JOHN ANTOS (2012) Assistant Professor. BS, Ohio State University; PhD, University of California

ROBERT BERGER (2013) Assistant Professor. A.B. Chemistry, Princeton University; PhD, Cornell University.

EMILY J. BORDA (2005) Associate Professor. BS, Gonzaga University; MEd, PhD, University of Washington.

MARK E. BUSSELL (1990) Professor. BA, Reed College; PhD, University of California-Berkeley.

STEVEN R. EMORY (2001) Associate Professor. BS, California Lutheran University; PhD, Indiana University.

JOHN D. GILBERTSON (2008) Associate Professor. BA, Augustana College; MS, PhD, University of Oregon.

TIM KOWALCZYK (2014) Assistant Professor. BS, University of Southern California; PhD, Massachusetts Institute of Technology.

JANELLE LEGER (2009) Associate Professor. BS, University of California at Davis; PhD, University of California at Santa Cruz.

MARC MUNIZ (2015) Assistant Professor. BS, Montclair State University; PhD, North Carolina State University.

AMANDA MURPHY (2010) Assistant Professor. BS and BA, Western Washington University; PhD, University of California-Berkeley.

GREGORY W. O'NEIL (2008) Associate Professor. BS, Boston College; PhD University of Colorado-Boulder.

DAVID L. PATRICK (1996) Professor. BS, University of California-Davis; PhD, University of Utah.

GERRY A. PRODY (1984) Associate Professor. BS, PhD, University of California-Davis.

DAVID RIDER (2010) Assistant Professor. BS, Simon Fraser University, PhD, University of Toronto.

MARGARET SCHEUERMANN (2015) Assistant Professor. BA, Scripps College; MS, PhD, University of Washington.

SERGE SMIRNOV (2008) Associate Professor. BS, MS, Moscow Institute of Physics & Technology; PhD, State University of New York at Stony Brook.

P. CLINT SPIEGEL (2007) Associate Professor. BS, Oregon State University; PhD, University of Washington.

JAMES R. VYVYAN (1997) Professor. BS, University of Wisconsin-Eau Claire; PhD, University of Minnesota

Departmental Honors

A chemistry department major who wishes to graduate with honors in chemistry must complete a one-year program of research, culminating in CHEM 498. The student must also maintain a 3.50 cumulative grade point average, submit a senior

CHEMISTRY

thesis and present a public seminar describing the research topic and results. Criteria for candidacy for departmental honors are 1) a minimum grade point average of 3.50 at the conclusion of the penultimate year and 2) acceptance for admission to the program by the chemistry department. Students who are in the University Honors Program must also satisfy these departmental requirements.

Other Departmental Information

Programs and Career Opportunities

The programs of study offered by the chemistry department are diverse and challenging, and provide the following benefits to the student:

- A wide variety of programs, designed to meet diverse career goals
- A faculty committed to excellence in undergraduate education and research
- Close student-faculty contact and relatively small classes
- Direct access to modern laboratory equipment and instrumentation
- Opportunity for research under the direction of a faculty advisor

The chemistry department offers three basic degree programs: Bachelor of Science, Bachelor of Arts and Bachelor of Arts in Education. All three programs have a common core of study:

- One year of general chemistry and one year of college-level calculus
- One year of organic chemistry, one year of college physics and one quarter of analytical chemistry
- One year of physical chemistry

This provides the foundation for elective courses in the student's area of interest. Through choice of degree programs and electives, the student can prepare for careers in industry or government, teaching at the secondary level or further study at the graduate level.

Bachelor of Arts

Chemistry, BA

Department of Chemistry, College of Science and Engineering

81-94 credits

Introduction

Students planning to major in chemistry or biochemistry or to begin university transfer programs involving chemistry courses are advised to consult the department during the first year to arrange for the proper sequence of courses.

Students planning to transfer to Western after completing two years of college study elsewhere should complete the following program requirements prior to transfer in order to avoid delays in degree work completion. Please be advised, at least 50 percent of required major credits must be obtained at WWU:

- One year of general chemistry
- One year of college-level calculus
- One year of calculus-based college-level physics

Bachelor of Science. The department offers BS programs in chemistry and biochemistry. These are specifically designed for students interested in graduate study or careers in industry and government as laboratory scientists.

Bachelor of Arts. This program provides less intensive training in chemistry but, when combined with a minor in a related area, prepares students for health professions, including medical school, and a variety of career opportunities in fields such as chemical sales and marketing, computational science, science writing (journalism), environmental sciences, or secondary school teaching.

Bachelor of Arts in Education. This program provides several program emphases (chemistry-biology, chemistry-mathematics, and chemistry-physics). Although requirements within these options differ in detail, the three programs are similar enough that the prospective teacher need not choose among them until the sophomore or junior year. Successful graduates are qualified to teach in their areas of concentration at the middle school or high school level. Prospective teachers with qualifications in more than one area will have a distinct advantage in seeking such positions. Detailed descriptions of each of these degree programs and course descriptions are given below.

The Department of Chemistry, in addition to its core of fundamental studies in Analytical, Biochemistry, Inorganic, Organic and Physical chemistry, has added a variety of elective courses that offer diversity in training, study and research at the undergraduate level. Within the Department, faculty members are active in many research areas including biofuels, protein engineering, computer modeling, catalysis, nanomaterials, materials for solar cells, electrochemistry, polymers, thin films, protein structural analysis by nuclear magnetic resonance and x-ray crystallography, and organic synthesis.

Why Consider a Chemistry Major?

The programs of study within the Chemistry major provide many benefits to students. There are a wide variety of programs that are designed to meet diverse career goals. There is close student-faculty contact and relatively small classes. The students have direct access to modern laboratory equipment and instrumentation, and there are opportunities for research work under the direction of a faculty advisor.

Sample Careers

Chemical/Pharmaceutical Sales | Physician | Crime Lab Analyst | High School Teacher | Industrial Chemist | Technical Writing | Forensic Scientist | Quality Assurance Specialist | Research Scientist | Occupational Safety Specialist | Science Lab Technician | Biotechnology Scientist | College Professor | Environmental Scientist/Consultant

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Admission to the Bachelor of Arts major in chemistry is selective and based upon preparation and prior academic performance. Application may be made through the chemistry department, Chemistry Building 270. Admission to the BA-Chemistry major will be in two phases. Students will be designated Phase I majors until they have completed CHEM 121, CHEM 122, CHEM 123, CHEM 351 and CHEM 352. Students will then be considered for advancement to Phase II based on their performance in Phase I. Students with a grade point average of 2.5 or higher in the Phase I courses will be given preferential admission to Phase II. Students with a grade point average below 2.5 will be considered on a case by case basis for remaining spaces in the major. Note that neither completion of the prerequisites nor attainment of any specific GPA guarantees admission to Phase II. See the department's website for more details.

Students planning on careers as high school teachers must take SCED 370, SCED 481 and SCED 491 to earn an endorsement in chemistry, plus the secondary education program in addition to the Bachelor of Arts degree. See the Secondary Education section of this catalog for program admission, completion, and teacher certification requirements. Because certification to teach high school now requires more than four years, advisement prior to the beginning of the third year is absolutely necessary to avoid lengthening the program. Students also are strongly advised to complete requirements for a broad area science endorsement by taking BIOL 204, BIOL 205, BIOL 206 and GEOL 211, GEOL 212 and ASTR 103 or ASTR 315.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors. Courses required for a state teaching endorsement must be completed with a grade of C (2.0) or above.

Requirements

- CHEM 351 - Organic Chemistry
- CHEM 352 - Organic Chemistry
- CHEM 353 - Organic Chemistry
- CHEM 354 - Organic Chemistry Laboratory I

CHEMISTRY

- CHEM 355 - Organic Chemistry Laboratory II
- CHEM 434 - Instrumental Analysis
- CHEM 436 - Instrumental Analysis Lab
- CHEM 441 - Advanced Inorganic Chemistry
- CHEM 461 - Physical Chemistry
- CHEM 462 - Physical Chemistry
- CHEM 463 - Physical Chemistry
- MATH 224 - Multivariable Calculus and Geometry I
- PHYS 161 - Physics with Calculus I
- PHYS 162 - Physics with Calculus II
- PHYS 163 - Physics with Calculus III
- Choose either:
 - CHEM 121 - General Chemistry I
 - CHEM 122 - General Chemistry II
 - CHEM 123 - General Chemistry III
 - CHEM 333 - Analytical ChemistryOR
 - CHEM 125 - General Chemistry I, Honors
 - CHEM 126 - General Chemistry II, Honors
 - CHEM 225 - General Chemistry III, Honors
- Choose either:
 - CHEM 375 - Elements of BiochemistryOR
 - CHEM 471 - Biochemistry I
 - CHEM 472 - Biochemistry II
- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 125 - Calculus and Analytic Geometry IIOR
 - MATH 134 - Calculus I Honors
 - MATH 135 - Calculus II HonorsOR
 - MATH 138 - Accelerated Calculus

Bachelor of Arts in Education

Chemistry/Biology — Secondary, BAE

Combined major offered by the Department of Biology, College of Science and Engineering and the Department of Chemistry, College of Science and Engineering

104-109 credits

Introduction

The Department of Chemistry, in addition to its core of fundamental studies in Analytical, Biochemistry, Inorganic, Organic and Physical chemistry, has added a variety of elective courses that offer diversity in training, study and research at the undergraduate level. Within the Department, faculty members are active in many research areas including biofuels, protein engineering, computer modeling, catalysis, nanomaterials, materials for solar cells, electrochemistry, polymers, thin films, protein structural analysis by nuclear magnetic resonance and x-ray crystallography, and organic synthesis.

This major must be accompanied by the professional preparation program in secondary education offered through Woodring College of Education. Courses required for a state teaching endorsement must be completed with a grade of C (2.0) or better.

Why Consider a Chemistry/Biology-Secondary Major?

The programs of study within the Chemistry major provide many benefits to students. There are a wide variety of programs that are designed to meet diverse career goals. There is close student-faculty contact and relatively small classes. The students have direct access to modern laboratory equipment and instrumentation, and there are opportunities for research work under the direction of a faculty advisor.

High School Chemistry/Biology Teacher

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

The Biology Department has a two-step process for admission into our degree programs. Phase I students are students who have declared their intent to major in biology, and are in the process of completing the introductory biology (BIOL 204, 205, 206) and general chemistry (CHEM 121, 122, 123) series. Admission to Phase II is based on academic performance in the introductory courses. Students must achieve an average grade of 2.9 or higher in their introductory biology and general chemistry courses before they can advance to Phase II and begin taking upper-division coursework.

This major must be accompanied by the professional preparation program in secondary education. See the Secondary Education section of this catalog for program admission, completion, and teacher certification requirements.

As certification to teach high school now requires more than four years of study, advisement prior to or at the beginning of the third year is absolutely necessary to avoid lengthening the program.

Grade Requirements

Recommendation for teaching endorsement normally requires completion of the major with a grade point of 2.50 or better in the required major courses. Students must earn a grade of C (2.0) or better in the secondary education professional program and in all courses required for the endorsement.

Requirements

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 206 - Introduction to Organismal Biology
- BIOL 321 - Genetics
- BIOL 323 - Cell and Molecular Biology
- BIOL 325 - Ecology
- BIOL 326 - Ecology Laboratory
- BIOL 432 - Evolutionary Biology
- CHEM 351 - Organic Chemistry
- CHEM 352 - Organic Chemistry

CHEMISTRY

- CHEM 353 - Organic Chemistry
- CHEM 354 - Organic Chemistry Laboratory I
- SCED 370 - Science and Society
- SCED 481 - Fundamentals of Teaching Science
- SCED 491 - Methods in Secondary Education for Science Teachers
- CHEM 471 - Biochemistry I
- CHEM 472 - Biochemistry II
- CHEM 474 - Biochemistry Laboratory
- One course from:
 - BIOL 322 - Genetics Lab
 - BIOL 324 - Methods in Molecular Biology
- Choose one of the following series:
 - CHEM 121 - General Chemistry I
 - CHEM 122 - General Chemistry II
 - CHEM 123 - General Chemistry III
 - CHEM 333 - Analytical ChemistryOR
 - CHEM 125 - General Chemistry I, Honors
 - CHEM 126 - General Chemistry II, Honors
 - CHEM 225 - General Chemistry III, Honors
- Choose one of the following series:
 - PHYS 114 - Principles of Physics I
 - PHYS 115 - Principles of Physics II
 - PHYS 116 - Principles of Physics IIIOR
 - PHYS 161 - Physics with Calculus I
 - PHYS 162 - Physics with Calculus II
 - PHYS 163 - Physics with Calculus III
- One course from:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 134 - Calculus I Honors

Additional Requirements

Secondary Education Undergraduate and Post-Baccalaureate Professional Program (58 credits)

- SEC 303 - Teaching Adolescents: Development and Identity
- SEC 310 - Education, Culture, and Equity
- SEC 410 - Dynamics of Teaching
- SEC 411 - Philosophical Foundations of Education
- SEC 425 - Developmental Reading, Writing and Learning in Secondary Schools
- SEC 430 - Secondary School Methods I - Instructional Strategies, Daily Planning, and Standards
- SEC 431 - Secondary School Methods II-Assessment and Long Term Planning
- SEC 432 - Secondary School Methods III - Management, Motivation and Discipline
- SEC 433 - Teaching and Learning Laboratory
- SEC 435 - Secondary Practicum I
- SEC 436 - Secondary Practicum II
- I T 444 - Classroom Use of Instructional Technology (Secondary)
- SEC 495 - Internship - Secondary
- SPED 363 - Secondary Students With Special Needs

Chemistry/Mathematics — Secondary, BAE

Combined major offered by the Department of Chemistry, College of Science and Engineering and the Department of Mathematics, College of Science and Engineering

103-121 credits plus supporting courses in physics

Introduction

The program of study for the chemistry/mathematics majors provides many benefits to students, such as close student-faculty contact and relatively small classes. The students have direct access to modern laboratory equipment and instrumentation, and there are opportunities for research work under the direction of a faculty advisor.

As a practical matter, Mathematics is a science of pattern and order. Its domain is not molecules or cells, but numbers, chance, form, algorithms, and change. As a science of abstract objects, Mathematics relies on logic rather than on observation as its standard of truth, yet employs observation, simulation, and even experimentation as means of discovering truth." From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences.

This major must be accompanied by the professional preparation program in secondary education offered through Woodring College of Education. Courses required for a state teaching endorsement must be completed with a grade of C (2.0) or better.

Why Consider a Mathematics-Secondary in Chemistry Major?

Teaching mathematics and chemistry is a challenge, a responsibility, and an opportunity. Learning to teach mathematics and chemistry occurs through a variety of means: the study of a wide variety of mathematics and chemistry, pedagogical preparation within a mathematical and science context, formal clinical preparation in education, an extended internship, and continual experiences as a student, learner, and problem solver in mathematics and chemistry.

Everyone aspiring to be a mathematics and chemistry teacher is aware of the demand for qualified teachers at the secondary level, but there is an even greater need for quality mathematics and chemistry teachers—teachers who care about students, mathematics and chemistry teachers who have a broad and deep understanding of mathematics and chemistry and teachers who are thoroughly professional. The responsibilities are great, but the rewards are even greater.

As a prospective teacher you need to focus on expanding your personal understanding of mathematics and chemistry and capitalizing on opportunities to work with pre-college students as a tutor, as a classroom assistant, as a practicum student, and as a novice teacher in your internship.

Chemistry/Physics – Secondary, BAE

Combined major offered by the Department of Chemistry, College of Science and Engineering and the Department of Physics, College of Science and Engineering

94-114 credits

Introduction

The Chemistry major provides many benefits to students. There is close student-faculty contact and relatively small classes. The students have direct access to modern laboratory equipment and instrumentation, and there are opportunities for research work under the direction of a faculty advisor.

Physics is the fundamental science. It is the study of matter and energy and of the interaction between the two. Astronomy, Biology, Chemistry, Geology and Engineering apply the principles of Physics to specific problems. Almost all areas of modern technology involve applications of Physics.

This major must be accompanied by the professional preparation program in secondary education offered through Woodring College of Education. Courses required for a state teaching endorsement must be completed with a grade of C (2.0) or better.

CHEMISTRY

Why Consider a Chemistry/Physics-Secondary Major?

The Department of Chemistry, in addition to its core of fundamental studies in Analytical, Biochemistry, Inorganic, Organic and Physical chemistry, has added a variety of elective courses that offer diversity in training, study and research at the undergraduate level.

The study of Physics provides an excellent liberal arts foundation and can open a variety of doors for jobs, including Secondary Education.

Bachelor of Science

Biochemistry, BS

Department of Chemistry, College of Science and Engineering

110 credits

Introduction

This major is part of an interdisciplinary program between the biology and chemistry departments at Western. The BS degree in biochemistry (with greater emphasis on the physical chemical theory behind biological chemistry) is offered via the chemistry department, whereas a BS degree in cellular and molecular biology (with a different emphasis) is offered via the biology department. The requirements for the BS in biochemistry are listed below. For the cellular and molecular biology degree program, see the biology department section of this catalog.

Why Consider a Biochemistry Major?

The Biochemistry major provides many benefits to students through coursework and research opportunities, and is designed to meet diverse career goals. There is close student-faculty contact and relatively small classes. The students have direct access to modern laboratory equipment and instrumentation, and there are opportunities for research work under the direction of a faculty advisor.

This major is part of an interdisciplinary program between the Biology and Chemistry Departments. The B.S. degree in Biochemistry places a greater emphasis on the physical chemical theory behind biological chemistry. This program is specifically designed for students who seek graduate study or employment in biochemistry or molecular biology.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Admission to the Bachelor of Science major in biochemistry is selective and based upon preparation and prior academic performance. Application may be made through the chemistry department, Chemistry Building 270. Admission to the biochemistry major will be in two phases. Students will be designated Phase I majors until they have completed CHEM 121, CHEM 122, CHEM 123, CHEM 351 and CHEM 352 and BIOL 205. Students will be admitted to Phase II based on their performance in Phase I. Students with a grade point average of 3.0 or higher in the Phase I courses will be given preferential admission to Phase II. Students with a grade point average below 3.0 will be considered on a case by case basis for remaining spaces in the major. Note that neither completion of the prerequisites nor attainment of any specific GPA guarantees admission to Phase II. See the department's website for more details.

A typical four-year program leading to a Bachelor of Science degree in biochemistry is described on the department's website.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 321 - Genetics
- BIOL 323 - Cell and Molecular Biology
- BIOL 324 - Methods in Molecular Biology

Antos, John, PhD

Berger, Robert, PhD

Borda, Emily J., PhD, investigation of college students' development of epistemological beliefs about science.

Bussell, Mark E., PhD, surface and materials chemistry of catalytic and environmental processes.

Emory, Steven R., PhD, analytical chemistry, spectroscopy, nanomaterials.

Gilbertson, John D., PhD, inorganic synthesis, small molecule activation, nanoparticle catalysis.

Kowalczyk, Tim, PhD

Leger, Janelle, PhD

Muniz, Marc, PhD, investigation of college students' development of epistemological beliefs about science.

Murphy, Amanda., PhD, organic synthesis, polymer and materials chemistry.

O'Neil, Gregory W., PhD, natural products chemistry, organic synthesis.

Patrick, David L., PhD, analytical and computational chemistry of condensed phases.

Prody, Gerry A., PhD, biochemistry and molecular biology of plant viruses, plant pollen tubes, marine biochemistry, environmental biochemistry.

Rider, David, PhD

Scheuermann, Margaret, PhD, inorganic synthesis, small molecule activation, nanoparticle catalysis.

Smirnov, Serge, PhD, structure, dynamics, function and engineering of modular proteins.

CHEMISTRY

Spiegel, P. Clint, PhD, RNA and protein biochemistry, ribosome structure and function.
Vyvyan, James R., PhD, organic synthesis, natural products, asymmetric catalysis.

Program Advisor: P. Clint Spiegel

Goals

This program prepares students for technical careers in industry, or for further study toward a more advanced degree.

Prerequisites

A bachelor's degree and departmental approval. Applicants with an undergraduate chemistry degree are expected to have completed the following courses (or their equivalent) with a grade of B or better: CHEM 333, CHEM 434, CHEM 351, 352,353, CHEM 461, 462, 463, and CHEM 441 or CHEM 375 or CHEM 471, 472, 473. A student with lower than B may be required to repeat that course as determined under advisement with the graduate program advisor. Students with a bachelor's degree in another science field will choose an appropriate set of chemistry courses, in consultation with the Department's Graduate Committee, to provide a chemistry foundation for graduate study.

Application Information

Specific Test Requirements: Graduate Record Exam, General Test.

Supporting Materials: A statement of research interests and future goals, including identification of up to three potential faculty research advisors, must accompany application.

Industrial Internship Option, Non-Thesis

Students interested in pursuing a career in industry can obtain practical experience by participating in the industrial internship option as part of their MS program. Students choosing this option will normally earn a master's degree via the non-thesis option. However, in those instances where the research problem undertaken in the industrial setting can be coordinated with on-campus research, the student may exercise the thesis option, with approval of the graduate advisor.

Students spend one or two quarters as an intern with a company which has been selected in advance. This internship will normally take place during the second year of graduate study. Students interested in pursuing an industrial internship should notify the program advisor as early as possible during the first year of graduate study. The department cannot guarantee that an internship opening will be available for all interested students.

In addition to the internship, students exercising this option will be expected to submit a comprehensive report, using an approved format, describing the work accomplished during the internship. A seminar presentation describing the work is required. Additionally, the student will be expected to pursue a limited research problem on campus advised by Department faculty. This research problem will normally require the equivalent of one quarter's work, although it may be extended over more than one quarter.

Course Work Requirements (48 credits)

- CHEM 501 - Research Project in Chemistry
- CHEM 595 - Seminar
- CHEM 596 - Seminar in Current Chemistry and Biochemistry
- CHEM 694 - Industrial Internship in Chemistry
- plus 31 credits under advisement

Chemistry, Thesis, MS

Goals

This program prepares students for technical careers in industry, or for further study toward a more advanced degree.

Prerequisites

A bachelor's degree and departmental approval. Applicants with an undergraduate chemistry degree are expected to have completed the following courses (or their equivalent) with a grade of B or better: CHEM 333, CHEM 434, CHEM 351, 352,353, CHEM 461, 462, 463, and CHEM 441 or CHEM 471, 472, 473. A student with lower than B may be required to repeat that course as determined under advisement with the graduate program advisor. Students with a bachelor's degree in another science field will choose an appropriate set of chemistry courses, in consultation with the Department's Graduate Committee, to provide a chemistry foundation for graduate study.

Application Information

Specific Test Requirements: Graduate Record Exam, General Test.

Supporting Materials: A statement of research interests and future goals, including identification of up to three potential faculty research advisors, must accompany application.

Course Work Requirements

- ☐ Thesis option: (minimum 45 credits)
 - CHEM 595 - Seminar (2)
 - CHEM 596 - Seminar in Current Chemistry and Biochemistry (3)
 - CHEM 690 - Thesis (12)
 - plus 28 credits under advisement

Thesis Option

The Master of Science thesis demonstrates that you are capable of pursuing a program of original and independent research, that you can formulate and carry out a research project, and that you can report on the project in a proper scientific manner. The thesis option prepares students for technical careers in industry, or

CHEMISTRY

for further study toward a more advanced degree. This option requires advanced course work in chemistry, biochemistry, or environmental chemistry, and research, with the latter culminating in a MS thesis. Shortly after entering the program students select a faculty advisor based on their research interests and agree on a research problem. Under the guidance of their faculty advisor, students carry out the research program, and write and defend the thesis in a final oral exam.

Minor

Chemistry Minor

Department of Chemistry, College of Science and Engineering

29-30 credits

Introduction

The Department of Chemistry, in addition to its core of fundamental studies in Analytical, Biochemistry, Inorganic, Organic and Physical chemistry has a variety of elective courses that offer diversity in training, study and research at the undergraduate level. Within the department, faculty members are active in many research areas including biofuels, protein engineering, computer modeling, catalysis, nanomaterials, materials for solar cells, electrochemistry, polymers, thin films, protein structural analysis by nuclear magnetic resonance and x-ray crystallography, and organic synthesis.

Why Consider a Chemistry Minor?

A minor in chemistry provides additional depth and laboratory experience beyond the chemistry required for another major program, including direct access to modern laboratory equipment and instrumentation. Major fields that are especially complemented by a minor in chemistry include Environmental Studies, Environmental Science, Psychology, Behavioral Neuroscience, and some pre-health careers.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- Choose one of the following series:
 - CHEM 121 - General Chemistry I
 - CHEM 122 - General Chemistry II
 - CHEM 123 - General Chemistry III
 - Or
 - CHEM 125 - General Chemistry I, Honors
 - CHEM 126 - General Chemistry II, Honors
 - CHEM 225 - General Chemistry III, Honors
- 15 credits of upper-division chemistry courses
 - Up to 6 upper-division credits may overlap and be applied to both the chemistry minor and the student's major degree requirements.

Chemistry Courses

CHEM 100 - Introduction to Chemistry

An introductory course in chemistry designed for freshmen students intending to enroll in the General Chemistry sequence (CHEM 121, 122, 123). Instruction in dimensional analysis, atomic structure, basic laboratory technique, and chemical bonding. Includes lab. S/U grading.

Prerequisites & Notes: MATH 114 or suitable General Math Placement Test score.

Credits: 2

Grade Mode: S/U

CHEM 101 - Chemical Concepts

A course for non-science students. Emphasizes the process of building scientific models for how matter behaves through the collection and interpretation of evidence. Applications to important societal issues will also be discussed. Lab included.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

CHEM 121 - General Chemistry I

Stoichiometry atomic and molecular structure, states of matter, solutions, thermodynamics, chemical equilibrium, kinetics, electrochemistry. Lab included.

Prerequisites & Notes: MATH 114 or suitable General Math Placement Test score.

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

CHEM 122 - General Chemistry II

Stoichiometry atomic and molecular structure, states of matter, solutions, thermodynamics, chemical equilibrium, kinetics, electrochemistry. Lab included.

Prerequisites & Notes: CHEM 121

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

CHEM 123 - General Chemistry III

Stoichiometry atomic and molecular structure, states of matter, solutions, thermodynamics, chemical equilibrium, kinetics, electrochemistry. Lab included.

Prerequisites & Notes: CHEM 122

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

CHEM 125 - General Chemistry I, Honors

An accelerated survey of fundamental chemical principles, including atomic and molecular structure, bonding, chemical thermodynamics, equilibria, kinetics, solution chemistry, nuclear chemistry, and analytical methods. Lab included.

Prerequisites & Notes: One year of high school chemistry or equivalent; MATH 114 or suitable General Math Placement Test score.

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

CHEM 126 - General Chemistry II, Honors

An accelerated survey of fundamental chemical principles, including atomic and molecular structure, bonding, chemical thermodynamics, equilibria, kinetics, solution chemistry, nuclear chemistry, and analytical methods. Lab included.

Prerequisites & Notes: CHEM 125

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

CHEM 201 - Independent Research

Undergraduate research under supervision. Written report required.

Prerequisites & Notes: CHEM 351 or concurrent and permission of instructor.

Credits: 1-3

Grade Mode: S/U

CHEM 225 - General Chemistry III, Honors

An accelerated survey of fundamental chemical principles, including atomic and molecular structure, bonding, chemical thermodynamics, equilibria, kinetics, solution chemistry, nuclear chemistry, and analytical methods. Lab included.

Prerequisites & Notes: CHEM 126

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

CHEM 251 - Elementary Organic Chemistry

Reactions, nomenclature and uses of carbon compounds; an abbreviated course in organic chemistry primarily for persons not requiring the CHEM 351-354 series.

CHEMISTRY

Prerequisites & Notes: CHEM 121 or CHEM 125

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

CHEM 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

CHEM 301 - Independent Research

Undergraduate research under supervision. Written report required. Repeatable to a maximum of 9 cr over three quarters. S/U grading.

Prerequisites & Notes: 30 credits of chemistry

Credits: 1-3

Grade Mode: S/U

CHEM 308 - Introduction to Polymer Chemistry

Types of polymers, methods of polymerization, and preparation of important commercial thermoplastic and thermosetting plastics. Addition and condensation polymers are prepared in the laboratory.

Prerequisites & Notes: CHEM 121 or CHEM 125; CHEM 251; PCE 371.

Credits: 3

Grade Mode: Letter

CHEM 333 - Analytical Chemistry

Theory and practice of gravimetric, volumetric, potentiometric and spectrophotometric methods of analysis. Selected analytical topics such as ion exchange resins, non-aqueous solvents, chelates, extractions, chromatography.

Prerequisites & Notes: CHEM 123

Credits: 5

Grade Mode: Letter

CHEM 351 - Organic Chemistry

Chemistry of carbon compounds with emphasis on structural theory, reactions and mechanisms.

Prerequisites & Notes: CHEM 123 or CHEM 225 or concurrent

Credits: 4

Grade Mode: Letter

CHEM 352 - Organic Chemistry

Chemistry of carbon compounds with emphasis on structural theory, reactions and mechanisms.

Prerequisites & Notes: CHEM 351

Credits: 4

Grade Mode: Letter

CHEM 353 - Organic Chemistry

Chemistry of carbon compounds with emphasis on structural theory, reactions and mechanisms.

Prerequisites & Notes: CHEM 352

Credits: 3

Grade Mode: Letter

CHEM 354 - Organic Chemistry Laboratory I

Techniques of organic chemistry: reactions, separations and syntheses of organic compounds.

Prerequisites & Notes: CHEM 352 or concurrent

Credits: 3

Grade Mode: Letter

CHEM 355 - Organic Chemistry Laboratory II

Techniques of organic chemistry: reactions, separations; multi-step syntheses and introduction to practical spectroscopy. Includes online and hardcopy literature searching, use of chemical drawing software, and writing journal-style reports. This course is intended for students planning to major in Chemistry.

Prerequisites & Notes: CHEM 354, CHEM 353 or concurrent

Credits: 3

Grade Mode: Letter

CHEM 356 - Organic Chemistry Laboratory II for Life Sciences

Techniques of organic chemistry: reactions, separations; syntheses and introduction to practical spectroscopy. This course is specifically designed to meet the requirements of students in Life Sciences, Biochemistry, and/or Pre-Healthcare Professions programs.

Prerequisites & Notes: CHEM 353 or concurrent; and CHEM 354

Credits: 2

Grade Mode: Letter

CHEM 375 - Elements of Biochemistry

Introduction to the structure and function of proteins, nucleic acid, lipids, and carbohydrates. Enzyme chemistry. Replication, transcription, and translation of genetic information. Metabolism of carbohydrates, the citric acid cycle, electron transport, and oxidation phosphorylation. This course is not intended for students in the bachelor of science-biochemistry program.

Prerequisites & Notes: CHEM 251 (or CHEM 351, CHEM 352, CHEM 353)

Credits: 4

Grade Mode: Letter

CHEM 381 - Biofuels

An examination of current and emerging biofuel technologies including an understanding of the processes for biomass conversion to fuel and other factors associated with commercial biofuel production. Also offered as ENRG 381.

Prerequisites & Notes: CHEM 251 or CHEM 351.

Credits: 3

Grade Mode: Letter

CHEM 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

CHEM 401 - Independent Research

Undergraduate research under supervision. Written report required. Repeatable to a maximum of 9 cr over three quarters. S/U grading.

Prerequisites & Notes: CHEM 461 or concurrent and permission of instructor.

Credits: 1-3

Grade Mode: S/U

CHEM 405 - Intensive Writing in Chemistry or Biochemistry

Concentrated study of a topic associated with chemistry or biochemistry. Students are required to write a substantial expository paper. Writing proficiency course.

Prerequisites & Notes: CHEM 401, CHEM 425, CHEM 471, CHEM 494 or CHEM 498 or concurrent; and permission of instructor.

Credits: 1

Grade Mode: Letter

CHEM 425A - Natural Products Chemistry.

Prerequisites & Notes: CHEM 353; instructor permission

Credits: 3

Grade Mode: Letter

CHEM 425B - Organic Reactions.

Prerequisites & Notes: CHEM 353; instructor permission

Credits: 3

Grade Mode: Letter

CHEM 425C - Medicinal Chemistry.

Prerequisites & Notes: CHEM 353 or instructor permission; CHEM 471 recommended

Credits: 3

Grade Mode: Letter

CHEM 425D - Group Theory and Spectroscopy.

Prerequisites & Notes: CHEM 463; instructor permission

Credits: 3

Grade Mode: Letter

CHEM 425H - Enzyme Chemistry.

Prerequisites & Notes: CHEM 463 or CHEM 468; CHEM 471; instructor permission

Credits: 3

Grade Mode: Letter

CHEM 425I - Immunology

Prerequisites & Notes: CHEM 473/BIOL 473; instructor permission

Credits: 3

Grade Mode: Letter

CHEM 425K - Bioanalytical Instrumentation

The analysis of biomolecules, substances of significant biological interest, and substances in biological matrices using advanced instrumental methods.

Prerequisites & Notes: CHEM 333 or instructor permission

Credits: 3

Grade Mode: Letter

CHEM 425M - Organometallic Chemistry.

Prerequisites & Notes: CHEM 441; instructor permission

CHEMISTRY

Credits: 3
Grade Mode: Letter

CHEM 425P - Computers in Chemistry.

Prerequisites & Notes: CHEM 461 or CHEM 467 or PHYS 331 or concurrent, or instructor permission

Credits: 3
Grade Mode: Letter

CHEM 425R - Surface Chemistry

Prerequisites & Notes: CHEM 461; instructor permission

Credits: 3
Grade Mode: Letter

CHEM 425S - Protein Engineering.

Prerequisites & Notes: CHEM 471; instructor permission

Credits: 3
Grade Mode: Letter

CHEM 425T - Virology

Prerequisites & Notes: CHEM 473/BIOL 473; instructor permission

Credits: 3
Grade Mode: Letter

CHEM 425U - Advanced Topics in Chemistry: Bioinorganic Chemistry

Examining binding sites and reactivity of biologically important metal ions, and the physical methods used to probe these sites.

Prerequisites & Notes: CHEM 461 or concurrent.
Credits: 3
Grade Mode: Letter

CHEM 425V - Chemistry of Renewable Energy

The role of chemistry in energy production, distribution, storage and usage, with a focus on chemical, photochemical, and electrochemical transformations. Applications to existing and emerging energy technologies.

Prerequisites & Notes: A passing grade (C- or better) in each of the following courses: CHEM 123 and PHYS 163; and a passing grade in one of the following courses: MSCI 330, PCE 371, CHEM 351, or PHYS 335.
Credits: 3
Grade Mode: Letter

CHEM 434 - Instrumental Analysis

Theory or modern optical, electrical and other

physical measurements applied to chemical analysis.

Prerequisites & Notes: CHEM 333 or CHEM 225; CHEM 461 or concurrent

Credits: 3
Grade Mode: Letter

CHEM 436 - Instrumental Analysis Lab

Application of modern instrumental methods of chemical analysis including optical, electrical and other physical measurements.

Prerequisites & Notes: CHEM 434 or concurrent.
Credits: 2

Grade Mode: Letter

CHEM 441 - Advanced Inorganic Chemistry

Bonding, structure and reactivity of inorganic molecules; transition metal and organometallic chemistry; chemistry of the nonmetallic elements.

Prerequisites & Notes: CHEM 462 or concurrent

Credits: 4
Grade Mode: Letter

CHEM 454 - Organic Spectroscopy

Identification of organic compounds by spectroscopic methods: infrared, nuclear magnetic resonance, ultraviolet and mass spectroscopy. Laboratory work includes application of spectroscopy in identifying unknowns with confirmation by chemical methods.

Prerequisites & Notes: CHEM 123 or CHEM 225; CHEM 353, CHEM 355

Credits: 5
Grade Mode: Letter

CHEM 455 - Advanced NMR Techniques

A lecture/lab course in advanced techniques in nuclear magnetic resonance, including Fourier transformation, multiple pulse sequences, relaxation time measurements, gated decoupling, polarization transfer, pulse sequences and two-dimensional NMR experiments.

Prerequisites & Notes: CHEM 454

Credits: 3
Grade Mode: Letter

CHEM 461 - Physical Chemistry

Atomic and molecular structure, states of matter, solutions, chemical thermodynamics and equilibria, chemical kinetics and electrochemistry.

Prerequisites & Notes: CHEM 123 or CHEM 225;

MATH 224, and PHYS 161, PHYS 162, PHYS 163.

Credits: 4

Grade Mode: Letter

CHEM 462 - Physical Chemistry

Atomic and molecular structure, states of matter, solutions, chemical thermodynamics and equilibria, chemical kinetics and electrochemistry.

Prerequisites & Notes: CHEM 461

Credits: 4

Grade Mode: Letter

CHEM 463 - Physical Chemistry

Atomic and molecular structure, states of matter, solutions, chemical thermodynamics and equilibria, chemical kinetics and electrochemistry.

Prerequisites & Notes: CHEM 462

Credits: 3

Grade Mode: Letter

CHEM 464 - Physical/Inorganic Chemistry Laboratory I

An integrated approach to inorganic synthesis and physical measurement. Includes formal report writing.

Prerequisites & Notes: CHEM 333 or CHEM 225; CHEM 441 or concurrent; CHEM 461; CHEM 462 or concurrent.

Credits: 3

Grade Mode: Letter

CHEM 465 - Physical/Inorganic Chemistry Laboratory II

An integrated approach to inorganic synthesis and physical measurement. Includes formal report writing.

Prerequisites & Notes: CHEM 463 or concurrent and CHEM 464.

Credits: 3

Grade Mode: Letter

CHEM 466 - Biophysical Chemistry

Biophysical experimental methods and theory, including classical and quantum mechanics, bonding, spectroscopy, crystallography, ligand binding, protein/enzyme function, structural biophysics.

Prerequisites & Notes: MATH 224; PHYS 161, PHYS 162, PHYS 163; CHEM 471 (taken before or concurrently per instructor's permission)

Credits: 4

Grade Mode: Letter

CHEM 467 - Biophysical Chemistry

Biophysical experimental methods and theory, including classical and statistical thermodynamics, bonding, ligand binding, spectroscopy, transport processes, enzyme kinetics, and X-ray diffraction.

Prerequisites & Notes: MATH 224; one year of college physics; CHEM 471/BIOL 471

Credits: 3

Grade Mode: Letter

CHEM 468 - Biophysical Chemistry

Biophysical experimental methods and theory, including classical and statistical thermodynamics, bonding, ligand binding, spectroscopy, transport processes, enzyme kinetics, and X-ray diffraction.

Prerequisites & Notes: CHEM 467, CHEM 461

Credits: 4

Grade Mode: Letter

CHEM 471 - Biochemistry I

A consideration of the structure and function of biological macromolecules; intermediary metabolism; membrane structure and function; bioenergetics. Also offered as BIOL 471.

Prerequisites & Notes: CHEM 123 or 225; CHEM 353 or concurrent; and BIOL 205; CHEM 333 recommended; also offered as BIOL 471.

Credits: 4

Grade Mode: Letter

CHEM 472 - Biochemistry II

A consideration of the structure and function of biological macromolecules; intermediary metabolism; membrane structure and function; bioenergetics. Also offered as BIOL 472.

Prerequisites & Notes: CHEM 471

Credits: 4

Grade Mode: Letter

CHEM 473 - Molecular Biology

An examination of the structure, replication and expression of genetic information. Also offered as BIOL 473.

Prerequisites & Notes: CHEM 471; BIOL 321 or BIOL 323.

Credits: 3

Grade Mode: Letter

CHEM 474 - Biochemistry Laboratory

Modern methods of isolation and characterization of biological macromolecules, especially enzymes

CHEMISTRY

and other proteins. Also offered as BIOL 474.

Prerequisites & Notes: CHEM 123 or CHEM 225; CHEM 354 or BIOL 324; CHEM 471 (or concurrent) OR BIOL 471 (or concurrent).

Credits: 3

Grade Mode: Letter

CHEM 494 - Industrial Work Experience

Academic credit awarded for chemical employment in industry or government in areas such as research, development or quality control. Written report and an oral or poster presentation describing the work are required.

Prerequisites & Notes: 30 credits of chemistry including CHEM 333 and permission of department.

Credits: 3

Grade Mode: S/U

CHEM 498 - Honors Research in Chemistry

Oral presentation and honors thesis required.

Prerequisites & Notes: Six credits of Chemistry research courses, advancement to departmental honors candidacy (application required).

Credits: 3

Grade Mode: Letter

CHEM 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

CHEM 501 - Research Project in Chemistry

Advanced individual laboratory projects under supervision. Repeatable to a maximum of 15 credits including original course.

Prerequisites & Notes: Permission of instructor.

Credits: 1-6

Grade Mode: Letter

CHEM 502 - Teaching Practicum

Curriculum and instructional support for teaching the general chemistry laboratory sequence. Repeatable to a maximum of 3 cr. S/U grading.

Prerequisites & Notes: Permission of instructor.

Credits: 1

Grade Mode: S/U

CHEM 510 - Special Topics

Specialized lectures on a conference basis for a particular area of interest. Repeatable to a maximum of 12 credits including original course.

Prerequisites & Notes: Permission of instructor.

Credits: 1-6

Grade Mode: Letter

CHEM 511 - Advanced Laboratory Methods

Specialized laboratory on a conference basis for a particular area of interest. Repeatable to a maximum of 12 credits including original course.

Prerequisites & Notes: CHEM 463

Credits: 1-6

Grade Mode: Letter

CHEM 534 - Instrumental Analysis

Principles of chromatographic, spectrochemical and electrochemical methods of analysis.

Prerequisites & Notes: CHEM 333 or CHEM 225; CHEM 461 or concurrent; permission of instructor.

Credits: 3

Grade Mode: Letter

CHEM 535 - Bioanalytical Instrumentation

The analysis of biomolecules, substances of significant biological interest, and substances in biological matrices using advanced instrumental methods.

Prerequisites & Notes: CHEM 333 or instructor permission

Credits: 3

Grade Mode: Letter

CHEM 536 - Instrumental Analysis Laboratory

Advanced techniques of modern instrumental analysis including optical, electrical, and other physical measurements, including analysis of materials.

Prerequisites & Notes: CHEM 534 or concurrent.

Credits: 2

Grade Mode: Letter

CHEM 539 - Bioinorganic Chemistry

Examining binding sites and reactivity of biologically important metal ions, and the physical methods used to probe these sites.

Prerequisites & Notes: CHEM 461 or concurrent

Credits: 3

Grade Mode: Letter

CHEM 540 - Organometallic Chemistry

Classes of organometallic compounds; structure, bonding, general patterns of reactivity; reactions; industrial homogeneous catalysis.

Prerequisites & Notes: CHEM 441

Credits: 3

Grade Mode: Letter

CHEM 552 - Chemistry of Natural Products

Isolation, structure, synthesis, biosynthesis and photochemistry of selected classes of natural products.

Prerequisites & Notes: CHEM 353 or instructor permission

Credits: 3

Grade Mode: Letter

CHEM 553 - Organic Reactions

Organic chemical reactions as applied to problems in organic synthesis.

Prerequisites & Notes: CHEM 353 or instructor permission

Credits: 3

Grade Mode: Letter

CHEM 554 - Organic Spectroscopy

Identification of organic compounds by spectroscopic methods: infrared, nuclear magnetic resonance, ultraviolet and mass spectroscopy. Lab included.

Prerequisites & Notes: CHEM 123, CHEM 353, CHEM 355

Credits: 5

Grade Mode: Letter

CHEM 555 - Advanced NMR Techniques

A lecture/lab course in advanced techniques in nuclear magnetic resonance, including Fourier transformation, multiple pulse sequences, relaxation time measurements, gated decoupling, polarization transfer and two-dimensional NMR experiments.

Prerequisites & Notes: CHEM 454 or CHEM 554

Credits: 3

Grade Mode: Letter

CHEM 556 - Medicinal Chemistry

The chemistry of drug discovery, design, development, and action.

Prerequisites & Notes: CHEM 353 or instructor permission; CHEM 471 recommended

Credits: 3

Grade Mode: Letter

CHEM 562 - Group Theory and Spectroscopy

Correlation of mathematical group theory with molecular symmetry and application of symmetry groups to the interpretation of molecular spectra. Principle applications will be to infrared and Raman vibrational spectra.

Prerequisites & Notes: CHEM 463

Credits: 3

Grade Mode: Letter

CHEM 563 - Computers in Chemistry

Use of computers in chemistry and biochemistry, including chemistry on the Internet, molecular modeling, visualization, simulation, and the control of laboratory experiments.

Prerequisites & Notes: CHEM 461 or CHEM 467 or PHYS 331 or concurrent, or instructor permission.

Credits: 3

Grade Mode: Letter

CHEM 565 - Surface Chemistry

Physical chemistry of solid surfaces. Examples drawn from heterogeneous catalysis and environmental chemistry.

Prerequisites & Notes: CHEM 461

Credits: 3

Grade Mode: Letter

CHEM 573 - Enzyme Chemistry

Preparation and measurement of activities of enzymes; mechanism of enzyme reactions; properties of individual enzymes and coenzymes.

Prerequisites & Notes: CHEM 463 or CHEM 468, CHEM 471

Credits: 3

Grade Mode: Letter

CHEM 575 - Immunology

Biochemistry of the immune response, antibody structure and function, origin of antibody diversity, cell-mediated immunity.

Prerequisites & Notes: CHEM 473; instructor permission

CHEMISTRY

Credits: 3

Grade Mode: Letter

CHEM 578 - Protein Engineering

Analysis of protein structure and protein-ligand interactions, protein design considerations, and design of small molecule and protein-based therapeutic agents.

Prerequisites & Notes: CHEM 471

Credits: 3

Grade Mode: Letter

CHEM 579 - Virology

Overview of viruses - their structures, life cycles and control. Bacterial, plant and animal viruses will be discussed.

Prerequisites & Notes: CHEM 473 or BIOL 473

Credits: 3

Grade Mode: Letter

CHEM 595 - Seminar

Presentation of contemporary subjects in chemistry. Repeatable to a maximum of 2 cr. S/U grading.

Credits: 1

Grade Mode: S/U

CHEM 596 - Seminar in Current Chemistry and Biochemistry

Introduction to current research problems in chemistry and biochemistry. Repeatable to a maximum of 6 cr. S/U grading.

Credits: 1

Grade Mode: S/U

CHEM 690 - Thesis

Research in chemistry under faculty direction terminating in a master's thesis. Repeatable to a maximum of 12 cr. S/U grading.

Credits: 1-6

Grade Mode: S/U

CHEM 694 - Industrial Internship in Chemistry

A supervised technical field experience in chemical laboratory practice. The experience may be in an industrial or government laboratory setting in such areas as research and development, chemical sales, manufacturing, process development, clinical chemistry, analytical chemistry, quality control or environmental control. A project report

following an approved format is required.

Repeatable to a maximum of 12 cr. S/U grading.

Prerequisites & Notes: advancement to candidacy; graduate advisor permission

Credits: 1-6

Grade Mode: S/U

Computer Science

Introduction

The proliferation of desktop computers, laptop computers, mobile devices and networks is transforming the world rapidly and irreversibly. Search engines and social networking sites have provided information to and forged connections between people worldwide. Advances in areas such as the World Wide Web, robotics, video games, multicore computing, artificial intelligence and cyber security are obviously central to the discipline of computer science. However, other fields such as genetics, atomic physics, renewable energy, and health care depend upon computers for advancement as well. The increasing use of and reliance on computers in our modern technological society makes the study of computer science an exciting and challenging one.

Computer science at Western is composed of core classes organized around the study of design and analysis techniques used to write software in various application domains along with details about the internal workings of computers and networks. Elective classes in areas such as artificial intelligence, mobile device programming, robotics, graphics, web programming, bioinformatics, computer security, and video game programming allow students to explore areas of individual interest.

Faculty research interests span diverse areas of computer science including robotics, natural language processing, multiprocessing, cyber security, information retrieval, graphics, optimization algorithms, video games, bioinformatics, computer networks, and formal methods. Members of the department are involved in collaborative projects with government agencies, local industry and other academic units at Western

Faculty

PERRY FIZZANO (2007) Chair and Associate Professor. BS, Widener University; PhD, Dartmouth College.

DAVID C. BOVER (2002) Associate Dean and Professor. BS, Monash University; PhD, Australian National University.

ARAN CLAUSON (2014) Instructor. BS, MS, Western Washington University; PhD, University of Oregon.

MARTIN GRANIER (1997) Senior Instructor and Director, Internet Studies Center. BS, Middle Tennessee State University; MS, University of Southwestern Louisiana; PhD, University of Oregon.

JAMES W. HEARNE (1986) Professor. BA, MA, PhD, University of California.

BRIAN HUTCHINSON (2013) Assistant Professor, BS, MS Western Washington University, PhD University of Washington

JAMES L. JOHNSON (1981) Professor. BS, University of Louisville; MS, PhD, University of Minnesota.

DEBRA S. JUSAK (1988) Associate Professor. BA, State University of New York at Potsdam; MS, University of Connecticut; PhD, University of California-Irvine.

JOHN D. LAWSON (2006) Associate Professor. BS, MS, PhD, University of Oregon.

YUDONG LIU (2013) Assistant Professor. BS, MS, Jilin University; PhD, Simon Fraser University.

GEOFFREY B. MATTHEWS (1985) Professor. BA, University of California; MA, PhD, Indiana University.

MICHAEL MEEHAN (1996) Professor. BS, Birmingham-Southern College; MS, PhD, University of Alabama-Huntsville.

PHILIP A. NELSON (1987) Associate Professor. BS, Pacific Union College; MS, University of California-Davis; PhD, University of Washington.

CHRISTOPHER REEDY (2004) Senior Instructor. BS, MS, Massachusetts Institute of Technology; PhD, University of California-San Diego.

JEFFREY WOODCOCK (2013) Instructor. BS, MS, California State University - Fullerton.

JIANNA ZHANG (2002) Associate Professor. BS, MS, PhD, University of Regina.

Programs

The Computer Science Department offers a Bachelor of Science in Computer Science which is accredited by the Computing Accreditation Commission of ABET, www.abet.org. Alternatively, the Computer Science Department cooperates with the Department of Mathematics to offer a combined major, Mathematics/Computer Science, BS. The department also offers two minors – one in Computer Science and one in Computer Systems. At the graduate level, the department offers a Master of Science in Computer Science.

Furthermore, a student could pursue an interdisciplinary minor in Internet Resource Creation and Management, and three certificate programs: Web Content Development, Web Programming, and E-commerce. This minor and the certificate programs are designed so that computer science majors, as well as non-computer science majors, may gain the technical and communication background necessary for developing, maintaining, and managing websites and resources.

Declaring a Computer Science Major

COMPUTER SCIENCE

Admission to the Computer Science major is based on students' academic performance in CSCI 241, CSCI 247 and CSCI 301. Students with a cumulative GPA of 2.7 or above in CSCI 241, CSCI 247 and CSCI 301 will be given preferential admission to the major. Students with a cumulative GPA below 2.7 will be considered for admission on a case by case basis.

The application to the computer science major includes an application form and a major declaration card. Students may declare a major by contacting the Program Coordinator for Advising in CF 459. Students should apply to the major by the 5th week of the quarter in which they will complete the pre-major courses. Upon being admitted to the major students will be assigned an academic advisor from the computer science faculty.

Career Opportunities

The United States Bureau of Labor Statistics projects that job growth in the coming decade for computer science is larger than all other areas of science combined. Graduates of Western's Computer Science Department are employed by industry giants such as Microsoft, Boeing, Google, Amazon and Adobe while others have gone on to work for small start-ups, government research labs, and several have started their own company. Our alumni create a rich network of contacts which current students often utilize to land paid internships and lucrative, challenging jobs right out of college. There is no shortage of exciting career opportunities available to graduates of Western's Computer Science Department.

Internet Studies Center

The Internet Studies Center (ISC) provides an adjunct program to a regular degree program. The center offers courses in website development and management that enable students to apply their major field in the world of web-based communications and enterprise. Students completing a sequence of these courses are eligible for certification. The courses follow three different tracks. Students from a wide variety of liberal arts and science majors pursue the Web Content Development track. This certifies that students have sufficient technical knowledge and skill to work effectively as web content producers in a development team where they must work with programmers and project managers to produce a professional website. The Web Programming certification track provides a deeper technical program for CS majors to master programming skills pertinent to content delivery in large, dynamic websites. Finally, the E-commerce certification track, offered in conjunction with the Finance, Marketing and Decision Sciences department of the College of Business and

Economics, provides students with in-depth knowledge of large website management for e-commerce and other enterprise applications.

Those students interested in Web development but not seeking certification may take a set of courses that leads to a minor in internet resource creation and management. This minor complements degrees in disciplines outside computing, providing students with the ability to publish and maintain material on the World Wide Web. This minor will enhance students standing in applications to entry-level positions and helps increase the marketability of their major degree. The curriculum for this minor and all of the ISC-sponsored courses adapt to changes in internet technology as the internet evolves.

Facilities

The department has a number of laboratories that support the computer science program. The general purpose labs are used to support the teaching of first year classes and beyond. These labs contain modern dual-monitor desktop workstations running Windows and Linux and have specialized software installed that is available nowhere else on campus. Additionally, there are special purpose labs and equipment dedicated to support education and research in robotics, computer graphics, video games, real-time and embedded systems, multi-processor computing, computer security, data mining and information retrieval.

Advice to Freshman

The core curriculum for the BS in Computer Science is arranged such that early courses are required as prerequisites for later courses. Thus, it is important to start the core computer science sequence and supporting mathematics and science courses as early as possible, since any substantial delay will result in the student needing more than four years to complete the degree.

Mid-Program Checkpoint

The first two years of the computer science BS is based on the following courses:

CSCI 141, CSCI 145, CSCI 241, CSCI 247, MATH 124, MATH 125, MATH 204 and a supporting science sequence.

If these courses and all General University Requirements (GURs) are completed during the first two years, a student can complete the computer science BS in two additional year

Advice to Transfer Students

Transfer students are very welcome to join the computer science program at Western. The following courses are not required of transfer students; however, if a student wants to complete the computer science degree in two additional years then the following courses should be taken before arriving at Western:

- All General University Requirements
- MATH 124, MATH 125, MATH 204
- Two programming courses in a high-level language (such as Python, C#, Java, or C++)
- A year sequence chosen from BIOL 204, BIOL 205, BIOL 206; CHEM 121, CHEM 122, CHEM 123; PHYS 161, PHYS 162, PHYS 163; GEOL 211, GEOL 212, and one of GEOL 308, GEOL 309, GEOL 314, GEOL 315, GEOL 316, GEOL 340

Students should be aware that like-named 200-level community college courses may not transfer as equivalent.

Contact Information

Department of Computer Science, Communication Facility 495, Western Washington University, Bellingham, WA 98225- 9165. Please direct questions to the departmental office: The phone is 360-650-3805, or correspond by e-mail to cs.dept@wwu.edu.

Bachelor of Science

Computer and Information Systems Security, BS

Department of Computer Science, College of Science and Engineering

59 credits

Introduction

This is a joint academic program between Western Washington University (WWU) and Whatcom Community College (WCC), culminating in a baccalaureate degree in computer and information systems security. Students complete the first two years of the program at WCC, earning an Associate in Applied Science - Transfer Degree in Cybersecurity. The final two years of the program at WWU enables them to complete the requirements for BS in Computer and Information Systems Security (CISS).

Why Consider a Computer and Information Systems Security Major?

The rise of cyber-attacks and a heightened awareness of network vulnerability, coupled with a shortage of trained cybersecurity professionals, is creating serious consequences for individuals, corporations and government agencies seeking to protect sensitive information. In response to the emerging demand, Whatcom Community College (WCC) and Western Washington University's (WWU) College of Sciences and Technology are working together in one of the nation's few community college-to-university cybersecurity collaborations. As a result, students may enroll at Whatcom to begin a pathway to a Bachelor's degree in Computer and Information Systems Security (CISS) from Western.

This new applied program is designed to provide students and IT professionals the opportunity to continue their education to the bachelor's degree level in the emergent field of computer information security. The CISS degree will prepare graduates for high-demand professional roles such as network specialist, network administrator, network security administrator, secure software development specialist or digital forensic practitioner.

This new two-year Associate in Applied Science – Transfer degree in Cybersecurity will allow graduates to apply to Western for the CISS degree, and transfer up to 91 credits. WCC graduates will have mastered the technical knowledge of today's information systems. The benefit to continuing through to the bachelor's degree is they will have the technical skills and the additional education requirements of the majority of potential employers; specifically larger businesses and local, state and federal government positions.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingmajor.shtml

How to Declare (Admission and Declaration Process):

- Completion of Associate in Applied Science Degree in Computer Information Systems from Whatcom Community College
- Completion of at least 91 quarter-system credits including the following courses: CIS 106, CIS 110, CIS 116, CIS 205, CIS 214, CIS 215, CIS 216, CIS 227, CIS 228, CIS 229, CS 140, CS 145, MATH 141, MATH 142, MATH 151, ENGL 101, PHYS 221, PHIL 130 and electives of 0-7 credits of any transferable college level courses numbered 100 or above
- Minimum GPA of 2.50

Application Process

Priority consideration for admission will be given to applicants submitting all of the following requirements by the priority deadline:

- WWU Transfer Application submitted by the application deadline and \$55 non-refundable application fee: admissions.wwu.edu/transfer
- Official transcripts from Whatcom Community College

Major Declaration Process

Students will be declared majors upon admission acceptance. For more information, please contact David Bover, David.Bover@wwu.edu, 360-650-3798.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Required (24 credits)

- CISS 247 - Computer Systems I
- CISS 301 - Formal Languages and Functional Programming
- CISS 349 - Computer System Administration
- CISS 360 - Operating System Concepts
- CISS 461 - Computer Security
- CISS 495 - Computer Security Project

Support Courses (19 credits)

- ENG 302 - Introduction to Technical and Professional Writing
- MATH 125 - Calculus and Analytic Geometry II
- MATH 341 - Probability and Statistical Inference
- PHYS 162 - Physics with Calculus II

CISS Electives (16 credits)

- ❑ Select 4 courses from the following elective topics:
 - CISS 346 - Secure Software Development
 - CISS 421 - Computer Forensics
 - CISS 422 - Dynamic Analysis of Software
 - CISS 423 - Software Reverse Engineering
 - CISS 464 - Penetration Testing
 - CISS 469 - Advanced Network System Security
 - CISS 478 - Cryptographic Techniques

Computer Science, BS

Department of Computer Science, College of Science and Engineering

94 credits from computer science and mathematics

Introduction

The proliferation of desktop computers, laptop computers, mobile devices and networks is transforming the world rapidly and irreversibly. Search engines and social networking sites have provided information to and forged connections between people worldwide. Advances in areas such as the World Wide Web, robotics, video games, multicore computing, artificial intelligence and cyber security are obviously central to the discipline of computer science. However, other fields such as genetics, atomic physics, renewable energy, and health care depend upon computers for advancement as well. The increasing use of and reliance on computers in our modern technological society makes the study of computer science an exciting and challenging one.

Computer Science at Western is composed of core classes organized around the study of design and analysis techniques used to write software in various application domains along with details about the internal workings of computers and networks. Elective classes in areas such as artificial intelligence, mobile device programming, robotics, graphics, web programming, bioinformatics, computer security, and video game programming allow students to explore areas of individual interest.

Why Consider a Computer Science Major?

Computer science is an exciting, growing, challenging field that is critical to many aspects of everyday life. As a computer scientist you can make an impact on the advancement of medicine, clean energy, entertainment, communication for the disabled, climate research, and automotive technologies to name a few. For some, the most motivational aspect of being a computer scientist is being involved in creating the next great technology that will help people the world over.

Apart from the compelling work you can do is the fact that computer scientists are highly sought after and can attain lucrative jobs directly out of college.

Anyone who enjoys abstract thinking and problem solving would most certainly appreciate computer science because the discipline is not just about programming. It is about the ways we organize data, solve problems, discover applications, and build devices and associated software that are effective and easy to use.

How to Declare (Admission and Declaration Process):

Admission to the Computer Science BS major is a two-phase process. Students are classified as pre-majors until they have completed CSCI 141, CSCI 145, CSCI 241, CSCI 247 and CSCI 301 as well as MATH 124. Students are advised to declare a pre-major as soon as possible, ideally during the first year or immediately upon transfer to Western. Students may obtain pre-major status by contacting the Program Coordinator for Advising in CF 459 and completing the pre-major application.

Admission to the Computer Science major is based on students' academic performance in CSCI 241, CSCI 247 and CSCI 301. Students with a cumulative GPA of 2.7 or above in CSCI 241, CSCI 247 and CSCI 301 will be given preferential admission to the major. Students with a cumulative GPA below 2.7 will be considered for admission on a case by case basis.

The application to the computer science major includes an application form and a major declaration card. Students may declare a major by contacting the Program Coordinator for Advising in CF 459. Students should apply to the major by the 5th week of the quarter in which they will complete the pre-major courses. Upon being admitted to the major students will be assigned an academic advisor from the computer science faculty.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- CSCI 141 - Computer Programming I
- CSCI 145 - Computer Programming and Linear Data Structures
- CSCI 241 - Data Structures
- CSCI 247 - Computer Systems I
- CSCI 301 - Formal Languages and Functional Programming
- CSCI 305 - Analysis of Algorithms and Data Structures I
- CSCI 322 - Principles of Concurrent Programming
- CSCI 330 - Database Systems
- CSCI 345 - Object Oriented Design
- CSCI 352 - Unix Software Development
- CSCI 367 - Computer Networks I
- CSCI 405 - Analysis of Algorithms and Data Structures II
- CSCI 491 - Senior Project 1
- CSCI 492 - Senior Project 2
- CSCI 493 - Senior Project 3
- CSCI 495 - Capstone Seminar
- MATH 124 - Calculus and Analytic Geometry I
- MATH 125 - Calculus and Analytic Geometry II
- MATH 204 - Elementary Linear Algebra
- MATH 341 - Probability and Statistical Inference
- 16 credits chosen from the following, of which a maximum of 4 credits may be from CSCI 400 projects:
 - CISS 346 - Secure Software Development
 - CISS 421 - Computer Forensics
 - CSCI 321 - Game Programming
 - CSCI 342 - Web Scripting
 - CSCI 343 - Programming Workshop
 - CSCI 347 - Computer Organization II
 - CSCI 351 - Windows Software Development
 - CSCI 372 - Robotics: Applications of Artificial Intelligence
 - CSCI 380 - Numerical Computations
 - CSCI 397 - Special Topics

CSCI 400 - Directed Independent Study
 CSCI 401 - Automata and Formal Language Theory
 CSCI 402 - Artificial Intelligence
 CSCI 404 - Natural Language Processing
 CSCI 410 - Programming Languages
 CSCI 412 - Mobile Device Programming
 CSCI 415 - Parallel Computation
 CSCI 424 - Social Network Analysis
 CSCI 430 - Database Theory
 CSCI 442 - Advanced Web Programming in Java
 CSCI 450 - Compiler Theory and Design
 CSCI 460 - Operating Systems
 CSCI 461 - Computer Security
 CSCI 462 - OS Device Drivers
 CSCI 463 - Cyber Defense
 CSCI 467 - Computer Networks II
 CSCI 474 - Bioinformatics
 CSCI 477 - Data Mining
 CSCI 479 - Spoken Language Processing
 CSCI 480 - Computer Graphics
 CSCI 497 - Special Topics
 CSCI 515 - Parallel Computation
 CSCI 520 - Advanced Compiler Design
 CSCI 525 - Advanced Topics in Operating Systems
 CSCI 530 - Advanced Database Theory
 CSCI 571 - Machine Learning Algorithms
 CSCI 572 - Robotics
 CSCI 573 - Computational Linguistics
 CSCI 575 - Information Retrieval
 CSCI 577 - Data Mining
 CSCI 578 - Cryptography
 CSCI 580 - Advanced Computer Graphics
 CSCI 584 - Scientific Visualization
 CSCI 585 - Image Processing
 M/CS 335 - Linear Optimization
 M/CS 375 - Numerical Computation
 M/CS 435 - Nonlinear Optimization
 M/CS 475 - Numerical Analysis

NOTE: Undergraduate students may take 500-level courses only if they have a GPA of at least 3.0 and instructor permission

□ A science sequence chosen from:

BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
 BIOL 205 - Introduction to Cellular and Molecular Biology
 BIOL 206 - Introduction to Organismal Biology
 OR
 CHEM 121 - General Chemistry I
 CHEM 122 - General Chemistry II
 CHEM 123 - General Chemistry III
 OR
 GEOL 211 - Physical Geology

Zhang, Jianna J., PhD, AI, machine learning, robotics, natural language processing.

Program Advisor: Philip A. Nelson

Send e-mail related to the graduate program in computer science to gradinfo.cs@wwu.edu. For further information concerning the program, consult the departmental website at cse.wwu.edu/computer-science.

Goals

- To graduate students with a strong, in-depth background in computer science.
- To prepare students for PhD programs.
- To engage students in high quality research-oriented projects.

Objectives

- ❑ To educate students in core concepts in computer science.
- ❑ To provide students with in depth knowledge, skills, and experiences in computer science.
- ❑ To focus on the applied aspects of computer science, especially real-world projects that use core concepts and expert knowledge of computer science.
- ❑ To provide students and faculty opportunities to engage in research in computer science.

Prerequisites

Students who have completed an undergraduate degree and who meet the requirements of the Graduate School and who show evidence of superior scholarship are invited to apply for admission to the graduate program in computer science. Students may be admitted into the computer science master's degree program in one of three ways: full admit, full admit with prerequisite course work, and provisional admit. Students who have a sufficient background in computer science, i.e. an undergraduate degree in Computer Science, and who meet the general requirements of the Graduate School can be given a "full admit." Due to the nature of this field of study, it is often the case that students with an undergraduate degree in an area other than computer science seek admission to the graduate program in computer science. Such students usually require a number of prerequisite undergraduate courses before they can embark on their graduate studies. If they meet the other requirements of the Graduate School, such students can usually be given a "full admit with prerequisite course work." The student is admitted into the graduate program but is required to complete a number of undergraduate prerequisite courses. Other constraints may be placed on such admissions, such as a minimum acceptable grade(s) for the prerequisites and perhaps a time frame for completion of the prerequisites. The exact nature of the composition of the prerequisite course work will be determined on a case by case basis. In rare cases, students who do not meet the general requirements of the graduate school, for example do not have the required minimum GPA, can be given a "provisional admit" provided their background is such that it indicates a high probability of success in the program. In case of provisional admission, the program advisor may interview the candidate individually and consider the following factors:

1. Related background knowledge and work experience
2. Classes taken since graduation
3. Reference letters
4. GRE scores

Application Information

Admission Deadlines: **Fall**, April 15; **Winter**, October 1; **Spring**, February 1.

TA Deadlines: Same as admission deadlines. Application requirements and forms are available from the Graduate School website.

Test scores: GRE General Test. An applicant with an advanced degree need not submit test scores. A statement of purpose is recommended.

Program Requirements (58 credits)

Core Curriculum

The core curriculum consists of four courses of 4 credits each.

- ❑ CSCI 509 - Operating System Internals
 - ❑ CSCI 510 - Automata and Formal Language Theory
 - ❑ CSCI 511 - Analysis of Algorithms
 - ❑ CSCI 512 - Design and Implementation of Computer Programming Languages
- These courses must be taken by all students in the MS in computer science program. These four courses should be scheduled during the first three terms the student is enrolled in the MS program or the first three terms following the completion of assigned prerequisite courses.

The following course must be taken by all students for a total of 6 credit hours.

COMPUTER SCIENCE

- ❑ CSCI 590 - Graduate Seminar

Qualifying Examination

A qualifying exam covering CSCI 509, 510, 511, and 512 will be given to the student after completion of those courses. To be advanced to candidacy in the MS program in computer science the student must pass the qualifying exam. The student is responsible for requesting of the faculty that the qualifying exam be administered when the conditions have been met.

Advancement to Candidacy

Students are advanced to candidacy when they have demonstrated a reasonable likelihood of completing their program of study. The student must have completed the core curriculum courses with a B or better GPA and must have passed the qualifying exam. Students are recommended for candidacy by the Graduate Committee.

Elective Courses

If possible, the student should take elective courses in support of their area of research.

Research Experience

In addition to the four core courses and six elective courses, all students in the MS in computer science program are required to take three research experience courses. The student should register for one of these courses each of the last three terms of study in the MS program. The three research experience courses are tied to one of a number of ongoing projects in the computer science department. Effectively, the student is joining that research team effort by registering for these courses. As such, the student should discuss their intentions with the faculty members involved in that project prior to registering for these courses. The research experience courses are numbers CSCI 601, CSCI 602 and CSCI 603. The student must take the qualifying exam no later than the quarter in which the student is registered for CSCI 601. To receive credit for CSCI 603, the student must write a research paper that is submitted to a refereed conference or journal with advisor approval.

Total Credit Hours Required for the MS Degree in Computer Science

Core Courses: 4 courses x 4 credits = 16 credits Graduate Seminar: Variable, 3 to 6 credit hours Elective Courses: 6 courses x 4 credits = 24 credits Research Experience Courses: 3 courses x 4 credits = 12 credits Total: 58 credits

Additional Information

Five-Year BS And MS Fast Track Program

For students who complete their undergraduate study in computer science at WWU there is an option by which at the end of only one additional year of study past the BS degree they will have completed all requirements for the MS degree. To participate in this program, a student must request enrollment in the undergraduate honors program in computer science. To be admitted to this program, the student must have an overall GPA of 3.0 and a GPA of 3.0 in all undergraduate computer science classes. Students should apply for admission into the undergraduate honors program during the junior year of study. Once admitted to this program, the student will take CSCI 509-512 while an undergraduate. These courses will substitute for four senior-level courses the student would normally take as an undergraduate. The course substitutions are: CSCI 509 replaces CSCI 460, CSCI 510 replaces CSCI 401, CSCI 511 replaces CSCI 405, CSCI 512 replaces CSCI 410. A student must maintain an overall GPA of 3.0 in these courses.

After students graduate with the BS degree in the computer science honors program, they then will complete 6 graduate electives, 3 credit hours of CSCI 590, and CSCI 601, CSCI 602 and CSCI 603.

Registering for three courses per term, it is possible to complete all MS requirements in only one additional year. When a student enters the MS program via this path, the qualifying exam will be given during their first term as a graduate student.

Total Credit Hours Required for the Fast Track MS Degree in Computer Science

Elective Courses: 6 courses x 4 credits = 24 credits Graduate Seminar: 3 credit hours Research Experience Courses: 3 courses x 4 credits = 12 credits Total: 39 credit

Minor

Computer Science Minor

Department of Computer Science, College of Science and Engineering

34-35 credits

Why Consider a Computer Science Minor?

Computer Science is transforming the world we live in and having an impact in every industry worldwide. The CS minor gives a solid introductory foundation in computer science theory, applications, and systems software. Having a basic understanding of computer science and computer programming improves employment rates for all other majors.

How to Declare (Admission and Declaration Process):

Application forms are available through the Computer Science department.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- CSCI 141 - Computer Programming I
- CSCI 145 - Computer Programming and Linear Data Structures
- CSCI 241 - Data Structures
- CSCI 247 - Computer Systems I
- CSCI 301 - Formal Languages and Functional Programming
- CSCI 330 - Database Systems
- One course from:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 157 - Calculus With Applications to Business and Economics
- One upper-division computer science or math/computer science course of at least 4 credit hours

Computer Systems Minor

Department of Computer Science, College of Science and Engineering

29 credits

COMPUTER SCIENCE

Why Consider a Computer Systems Minor?

This minor is intended for electrical engineering students to give them more experience in computer science and software engineering.

Contact Information

Program Coordinator

Sample Careers

Computer systems engineer

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Application forms are available through the Computer Science department.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- CSCI 145 - Computer Programming and Linear Data Structures
- CSCI 241 - Data Structures
- CSCI 247 - Computer Systems I
- CSCI 322 - Principles of Concurrent Programming
- CSCI 345 - Object Oriented Design
- CSCI 347 - Computer Organization II
- CSCI 352 - Unix Software Development
- CSCI 367 - Computer Networks I

Internet Resource Creation and Management Minor

Department of Computer Science, College of Science and Engineering

28-29 credits

Introduction

The Internet Studies Center (ISC) provides a number of courses leading to a minor in web development called the Internet Resource Creation and Management Minor. Students in any field of study can learn or advance their skills in web development through this minor.

Why Consider an Internet Resource and Creation Management Minor?

The Internet Resource and Creation Management Minor is designed to teach students how to create websites using current tools and technology. The minor also includes required coursework from the Communications and English or Journalism departments to help students develop their technical writing abilities. The minor will complement courses taken in a regular degree program.

Participation in a professional internship will provide an opportunity to enhance project management, web development and team communication skills. With the minor from the Internet Studies Center and a four-year

degree, students will have knowledge needed to contribute and adapt to today's rapidly changing technical environment.

James.Hearne@wwu.edu

Sample Careers

Web content provider | Web content writers | CSS developer | Web design director | Web designer | Front end developer | Information architect | Interaction designer | SEO professionals | UI designer | UX designer | Web animation creator | Web designer | And a number of other jobs related to providing content on web pages.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Application forms are available through the Computer Science Department Advising Office, CF 459.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- CSCI 102 - Computer-Mediated Communications
- CSCI 202 - Dynamic Web Pages
- CSCI 403 - Internship in Internet Studies
- MIS 314 - Fundamentals of Web Site Development and Management
- COMM 318 - Professional Communication
- Choose Either:
 - ENG 302 - Introduction to Technical and Professional Writing
 - ENG 402 - Advanced Technical and Professional Writing
 - or
 - JOUR 207 - Newswriting
 - JOUR 309 – Editing

User Experience (UX) Design Minor (see Engineering and Design Department)

User Experience (UX) Design Minor (see Engineering and Design Department)

WWU Certificate (Non-Degree)

Content Development Certificate

Department of Computer Science, College of Science and Engineering

22-27 credits

Introduction

The most important component of a web page is its content, and if the technology behind a web page does not help delivering relevant content, the reader will leave the page. Through the Web Content Development

COMPUTER SCIENCE

curriculum, students will learn how to create relevant information and present it effectively to the Web page readers.

Why Consider a Certificate in Content Development?

The Web Content Development Certification is a good choice for students with a major that naturally lends itself to content creation such as Communications, Design, English, Journalism or Marketing. In addition to four Internet Studies Center (ISC) core courses, content developers must take two or three other courses depending upon their academic major.

Program Director

Martin Granier
Communications Facility 487
360-650-6879
Martin.Granier@wwu.edu

Sample Careers

Art director | Content strategist | Content writers | CSS developer | Design director | Freelance web designer | Front end developer | Information architect | Interaction designer | SEO professionals | UI designer | UX designer | Web animation creator | Web designer | and a number of other jobs related to providing content on web pages

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

After completion of CSCI 202 and MIS 314, students can apply to earn ISC certificates. Applications are available through the Computer Science department.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Program Requirements

Students interested in receiving a Content Development Certificate must take the following four core courses plus a minimum of eight credits of content-oriented courses depending on their academic major, as shown below:

Core Requirements

- CSCI 102 - Computer-Mediated Communications
- CSCI 202 - Dynamic Web Pages
- CSCI 403 - Internship in Internet Studies
- MIS 314 - Fundamentals of Web Site Development and Management

Content Oriented Requirements

Communication Studies Major

- COMM 244 - Advocacy Through Media
- COMM 318 - Professional Communication

Design Major

- DSGN 360 - Digital Media Design I
- DSGN 361 - Digital Media Design II

English Major

- ENG 302 - Introduction to Technical and Professional Writing
- ENG 402 - Advanced Technical and Professional Writing

Journalism Major

- JOUR 305 - Photojournalism
- JOUR 309 - Editing
- JOUR 330 - Principles of Public Relations

Marketing Major

- MKTG 476 - Digital Marketing
- MKTG 483 - Integrated Marketing Communications

Other majors - please contact the Internet Studies Center (ISC) director

E-Commerce Developer Certificate

Department of Computer Science, College of Science and Engineering

22 credits**Introduction**

The study of E-commerce covers the many technologies involved with conducting business over the Internet. For example, it includes working with shopping carts and Web services and developing E-commerce sites. It also involves learning various ways to conduct business online and to manage the technical issues associated with constructing an e-commerce Web site.

Why Consider a Certificate in E-Commerce?

This Internet Studies Center (ISC) certificate is designed to teach students how to build and manage data-driven web sites, through specialized courses offered by the Management Information Systems program in the College of Business and Economics. The E-commerce certificate provides students with the knowledge, context and necessary skills to prepare them for conducting business using information technology and the Internet.

- MIS 324 - Intermediate Web Site Development and Management
- MIS 424 - E-Commerce Systems Management

Web Programming Certificate

Department of Computer Science, College of Science and Engineering

22 credits

Introduction

Web programming refers to all the tasks involved in Web development, including the creation of Web content and the necessary coding of Web clients and Web servers.

The client side deals with the needs for the user to access data and provide relevant information while the server side is concerned about data retrieval, security and performance. To achieve those tasks, Web programmers work with a variety of scripting tools and database technology.

Why Consider a Certificate in Web Programming?

The Web Programming Certification provides the skills necessary for Web content delivery, including database analysis and design, as well as client and server-side scripting methods and languages.

An Internet Studies Center (ISC) certificate in Web Programming documents the fact that a student is knowledgeable in a variety of technologies currently used in Web development. Students who complete the required courses for the Web Programming certificate will be able to create and manage both client applications and server side programs including databases. This certificate is primarily targeted at computer science majors.

Sample Careers

Web developer | Web programmer | Web application developer | Database programmer | Full stack developer and a number of other web-related programming jobs

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

After completion of CSCI 202 and MIS 314, students can apply to earn ISC certificates. Applications are available through the Computer Science department.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Program Requirements

- CSCI 102 - Computer-Mediated Communications
- CSCI 202 - Dynamic Web Pages
- CSCI 342 - Web Scripting
- CSCI 403 - Internship in Internet Studies
- CSCI 442 - Advanced Web Programming in Java
- MIS 314 - Fundamentals of Web Site Development and Management

Computer Science Courses

CSCI 101 - Computers and Applications

Study of computers, computer systems, and computer applications. Computer hardware and software fundamentals. Networking, telecommunications, and the Internet. Hands-on experience with a variety of standard computer applications. Computer-related social and ethical issues. Lab.

Credits: 4
Grade Mode: Letter

CSCI 102 - Computer-Mediated Communications

Internet skills, with an emphasis on the Internet as a medium of political and business communication, research, cultural exchange and worldwide collaboration. Basic principles of effective website organization and design. Topics include copyright, netiquette, network protocols, HTML, CSS, graphics, website design and electronic commerce. Lab.

Prerequisites & Notes: Basic computer literacy.
Credits: 3
Grade Mode: Letter
GUR Attributes: BCOM

CSCI 103 - Introduction to Computer Game Development

An introduction to computer game development for students with no programming background. Students use game development software to develop games of varying complexity, including graphics and sound, and extend to more complex games through the use of scripts.

Prerequisites & Notes: basic computer literacy, use of keyboard and mouse

Credits: 4
Grade Mode: Letter
GUR Attributes: QSR

CSCI 104 - Software Installation, Operation and Configuration of Personal Computer Systems

Overview of computer hardware components. Installing and configuring Windows operating system. Installing and configuring the Linux operating system. Open source software installation. Each student will receive a licensed copy of the current MS Windows operating system and all Microsoft Development Tools (language compilers etc.) which may be used on their own personal computer.

Credits: 4
Grade Mode: Letter

CSCI 120 - Exploring Computer Science

Course exposes students to a variety of computer science problems and applications in a novel, fun, interesting and challenging fashion. Elementary programming skills, problem solving ability, and communications skills will be developed. Excellent course for those who have an interest in the field but no previous background.

Prerequisites & Notes: Permission of instructor.
Credits: 3
Grade Mode: Letter

CSCI 138 - Programming Fundamentals in Visual Basic

Intended for students wishing to acquire programming skills in connection with natural science or technology. Basic concepts of computer programming using the Visual Basic programming language. Topics include introduction to development environment, introduction to computer architecture, and language elements such as control structures, functions, basic I/O, one-dimensional and parallel arrays, text file I/O,

COMPUTER SCIENCE

and user-interface design. Emphasis on algorithm development, program solving, and software engineering. Programming is required in implementation of concepts. Lab.

Prerequisites & Notes: Math 112 or instructor permission.

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

CSCI 140 - Programming Fundamentals in C++

Intended for students wishing to acquire programming skills in connection with a natural science or technology. Basic concepts of computer programming using the C++ programming language. Topics covered: introduction to computer architecture, and elements of a language such as control structures, functions, basic I/O, one dimensional and parallel arrays, text file I/O. Algorithm development, problem solving and software engineering are emphasized. Programming is required in implementation of concepts. Lab.

Prerequisites & Notes: MATH 112 or instructor permission.

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

CSCI 141 - Computer Programming I

Intended for students majoring in computer science. Basic concepts of computer programming using an object oriented programming language. Topics covered: introduction to the development environment, introduction to algorithms, elements of a programming language, including data types, packages, control structures, procedures and functions, basic input and output, arrays and records, text files, strings, variant records. Algorithm development, problem solving and software engineering are emphasized. Programming is required in implementation of concepts. Lab.

Prerequisites & Notes: One of: MATH 112, MATH 114, MATH 115, MATH 118, MATH 124, MATH 125, MATH 134, MATH 138, MATH 156.

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

CSCI 145 - Computer Programming and Linear Data Structures

Abstract data types, generics, access or pointer types, dynamic memory allocation, recursion, concurrent programming and linear data

structures, including stacks, lists and queues. Programming is required in implementation of concepts. Lab.

Prerequisites & Notes: CSCI 141 or equivalent; any of : MATH 115, MATH 118, MATH 124

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

CSCI 172 - Introduction to Robotics

This course provides an introduction to robotics for students with no programming background. Lego Mindstorms Team Challenge Set is used to build the robots. Students will learn to construct, control and program these robots. Students will gain first-hand experience in quantitative and symbolic reasoning through the course of learning.

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

CSCI 202 - Dynamic Web Pages

Principles and technologies required to produce and distribute Internet (World Wide Web) content, with a focus on site architecture and client-side dynamic pages; an introduction to server-side processing.

Prerequisites & Notes: CSCI 102 or permission of instructor.

Credits: 4

Grade Mode: Letter

CSCI 241 - Data Structures

Design and implementation of hash tables, general trees, search trees, balanced trees and graphs. Comparison of sorting algorithms. Demonstration of the use of data structures in various applications. Evaluation of the best data structure for a particular task. Programming is required in implementation of concepts.

Prerequisites & Notes: CSCI 145; MATH 124 or MATH 157.

Credits: 4

Grade Mode: Letter

CSCI 247 - Computer Systems I

An overview of basic computer organization and design. Introduction to C programming. Topics covered include data representation, boolean algebra, machine language, instruction sets, processor architecture, multi-processors, system-level I/O, pipelining, and the memory hierarchy. Includes lab.

Prerequisites & Notes: CSCI 145.

Credits: 5

Grade Mode: Letter

CSCI 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

CSCI 301 - Formal Languages and Functional Programming

Introduction to discrete structures important to computer science, including sets, trees, functions, and relations. Proof techniques. Introduction to the formal language classes and their machines, including regular languages and finite automata, context free languages and pushdown automata. Turing machines and computability will be introduced. Programming using a functional language is required in the implementation of concepts. Includes lab.

Prerequisites & Notes: CSCI 145.

Credits: 5

Grade Mode: Letter

CSCI 302 - Adv Internet Resources w/lab

Introduction to discrete structures important to computer science, including sets, trees, functions, and relations. Proof techniques. Introduction to the formal language classes and their machines, including regular languages and finite automata, context free languages and pushdown automata. Turing machines and computability will be introduced. Programming using a functional language is required in the implementation of concepts. Includes lab.

Prerequisites & Notes: CSCI 202 or equivalent

Credits: 4

Grade Mode: Letter

CSCI 305 - Analysis of Algorithms and Data Structures I

Introduction to the analysis of algorithms and data structures in a mathematically rigorous fashion. Mathematical fundamentals, counting, discrete probability, asymptotic notation, recurrences, loop invariants. Worst-case, probabilistic and amortized analysis techniques applied to sorting algorithms and classic data structures such as heaps, trees

and hash tables. Design techniques such as branch and bound, divide and conquer, will be introduced as will correctness proofs for algorithms.

Prerequisites & Notes: CSCI 241; CSCI 301.

Credits: 4

Grade Mode: Letter

CSCI 321 - Game Programming

Introduction to the basics of game design and implementation. Game worlds, storytelling, character development and the user experience. Programming audio, 2D and 3D graphics basics. Networking basics. Game artificial intelligence. Game genres: action, strategy, role-playing, sports, vehicles, simulations, adventure.

Prerequisites & Notes: CSCI 241.

Credits: 4

Grade Mode: Letter

CSCI 322 - Principles of Concurrent Programming

Principles of concurrent programming. Algorithms for mutual exclusion. Synchronization and communication techniques: semaphores; monitors; rendezvous; conditional critical regions. Multi-process and multi-threaded programming. Concurrent programming facilities in HLL's.

Prerequisites & Notes: CSCI 247.

Credits: 4

Grade Mode: Letter

CSCI 330 - Database Systems

An introduction to the underlying data models and theory of database systems and the design, implementation and manipulation of relational databases.

Prerequisites & Notes: CSCI 241

Credits: 4

Grade Mode: Letter

CSCI 342 - Web Scripting

For CSCI majors and nonmajors seeking Web programmer certification from the Internet Studies Center. Development of dynamic Web applications. Study of various server-side scripting languages (PHP, Perl, Python, Ruby on Rails) for creating dynamic Web pages and querying and manipulating Databases on the Web.

Prerequisites & Notes: CSCI 330.

Credits: 4

Grade Mode: Letter

CSCI 343 - Programming Workshop

COMPUTER SCIENCE

A review of standard algorithmic techniques and practice in their rapid application to information processing problems, especially in a team setting. Preparation for participation in regional and national programming competition. May be repeated once for credit.

Prerequisites & Notes: CSCI 345.

Credits: 1

Grade Mode: Letter

CSCI 345 - Object Oriented Design

Introduction to Object-Oriented Software Design, including concepts of encapsulation, modularity, coupling and cohesion. Use of Unified Modeling Language (UML) in design documentation. Introduction to the concept of design patterns and exposure to some commonly used design patterns.

Prerequisites & Notes: CSCI 241

Credits: 4

Grade Mode: Letter

CSCI 347 - Computer Organization II

Pentium assembly language programming, interfacing assembly language programs to high-level languages, memory design, cache memory, virtual memory, I/O interfacing and communication, interrupts.

Prerequisites & Notes: CSCI 227 or ETEC 273; CSCI 241

Credits: 3

Grade Mode: Letter

CSCI 351 - Windows Software Development

The design and development of event driven programming using Visual C#.NET. Use of .NET Framework libraries. Creation of Windows based applications using forms, controls, and GDI+. Design of graphical user interfaces and Visual Studio development tools. Working with LINQ and Windows Presentation Foundation (WPF). Programming using XAML. Study of XML Schema Documents, Extensible Stylesheet Language and XSL Transformations.

Prerequisites & Notes: CSCI 345

Credits: 4

Grade Mode: Letter

CSCI 352 - Unix Software Development

The design and development of systems and programs in the Unix environment. Unix operating system fundamental concepts. Unix standards and implementations. System data files. Environment of a Unix process. Unix programming at the system call level. File and terminal I/O, processes,

interprocesses communication and signals.

Introduction to shell programming, standard Unix development tools and system utilities: awk, m4, cc, lint, make, sed, grep, and others.

Prerequisites & Notes: CSCI 241 and CSCI 247

Credits: 4

Grade Mode: Letter

CSCI 367 - Computer Networks I

Introduction to computer networks; network architecture and design; protocols, management, physical networks; implementation of network protocols, programming projects in protocol usage and applications.

Prerequisites & Notes: CSCI 241 and CSCI 247

Credits: 4

Grade Mode: Letter

CSCI 372 - Robotics: Applications of Artificial Intelligence

Basic robot design, RobotC programming, reinforcement learning, genetic algorithms, and artificial neural network concepts will be covered. Course is designed for undergraduate students who are interested in robotics and artificial intelligence applications. Students who have previous robotics and/or programming experience are encouraged to take this course.

Prerequisites & Notes: Permission of Instructor.

Credits: 4

Grade Mode: Letter

CSCI 380 - Numerical Computations

Computer arithmetic and error analysis, roots of nonlinear equations, solution of system of linear and nonlinear equations, numerical differentiation, numerical quadrature, approximation theory, initial and boundary value problems.

Prerequisites & Notes: CSCI 241, MATH 204

Credits: 4

Grade Mode: Letter

CSCI 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

CSCI 401 - Automata and Formal Language Theory

Introduction to advanced topics in formal language and automata theory. Turing machines and other language classes including context-sensitive grammars and unrestricted grammars. Practical applications of formal languages will be introduced.

Prerequisites & Notes: CSCI 301.

Credits: 4

Grade Mode: Letter

CSCI 402 - Artificial Intelligence

Introduction to knowledge representation and search. Possible application areas include natural language, perception, learning and expert systems.

Prerequisites & Notes: CSCI 301

Credits: 4

Grade Mode: Letter

CSCI 403 - Internship in Internet Studies

Supervised and fully documented Web-based project with an approved business, government agency or not-for-profit organization.

Prerequisites & Notes: Only for ISC minors, or students seeking ISC certification. CSCI 202, MIS 314, senior status and permission of instructor; minimum GPA of 2.7.

Credits: 3

Grade Mode: Letter

CSCI 404 - Natural Language Processing

Fundamental concepts and ideas in natural language processing (NLP), and current research in the area; algorithms available for the processing of linguistic information and the underlying computational properties of natural languages. Word level, syntactic, and semantic processing from both a linguistic and an algorithmic perspective are considered. The focus is on modern quantitative techniques in NLP: using large corpora, including the web, statistical models for acquisition, disambiguation, and parsing.

Prerequisites & Notes: CSCI 301 or Junior status in Linguistics

Credits: 4

Grade Mode: Letter

CSCI 405 - Analysis of Algorithms and Data Structures II

Derivation of time and space complexity of algorithms. Typical algorithms investigated include minimum spanning tree, shortest path, network flow and string matching. Advanced treatment of

dynamic programming, greedy algorithms and randomized algorithms. Discussion of NP-Completeness. Correctness proofs of algorithms.

Prerequisites & Notes: CSCI 305

Credits: 4

Grade Mode: Letter

CSCI 410 - Programming Languages

Introduction to the structure of programming languages; syntax and semantics; properties of algorithmic languages; special purpose languages.

Prerequisites & Notes: CSCI 301.

Credits: 4

Grade Mode: Letter

CSCI 412 - Mobile Device Programming

Design and development of applications for the mobile environment. Android platform, tools for Android development, UI design, mobile application distribution systems.

Prerequisites & Notes: CSCI 330 and CSCI 367

Credits: 4

Grade Mode: Letter

CSCI 415 - Parallel Computation

Parallel Computation Architectures; Parallel Algorithm Design and Analysis; Parallel Computing Languages. Projects requiring the implementation of several parallel algorithms will be required.

Prerequisites & Notes: CSCI 305, CSCI 322, CSCI 352 and CSCI 367

Credits: 4

Grade Mode: Letter

CSCI 424 - Social Network Analysis

Mapping and measuring of relationships and flows between people, groups, organizations, computers, URLs, and other connected information/knowledge entities.

Prerequisites & Notes: MATH 204, MATH 341 and CSCI 241

Credits: 4

Grade Mode: Letter

CSCI 430 - Database Theory

Data models and their access languages. Design issues: ER diagrams, functional dependency analysis and normalization. Database programming.

Prerequisites & Notes: CSCI 301 and CSCI 330.

COMPUTER SCIENCE

Credits: 4

Grade Mode: Letter

CSCI 442 - Advanced Web Programming in Java

For CSCI majors and nonmajors seeking Web programming certification from the Internet Studies Center. Advanced network, applet, and server applications in Java. GUIs, Web spiders and Web search algorithms, security, remote method invocation and Java Beans.

Prerequisites & Notes: CSCI 342; CSCI 351 recommended.

Credits: 4

Grade Mode: Letter

CSCI 450 - Compiler Theory and Design

Theory and practice of compiler design. Emphasis is on basic theory and methods necessary to design and implement a functional syntax directed compiler.

Prerequisites & Notes: CSCI 301

Credits: 4

Grade Mode: Letter

CSCI 460 - Operating Systems

Principles of operating systems; concurrent processes; resource management; process management; file systems; protection.

Prerequisites & Notes: CSCI 322 and CSCI 352

Credits: 4

Grade Mode: Letter

CSCI 461 - Computer Security

An overview of computer security and detailed study of the theoretical foundations and practical implementations of some aspects of security, including policy specification, the role of cryptography, policy implementation and assurance, security threats and counter-measures.

Prerequisites & Notes: CSCI 301; CSCI 367 is recommended.

Credits: 4

Grade Mode: Letter

CSCI 462 - OS Device Drivers

Operating System kernel programming, system call mechanisms, system call processing, file system internals, device drivers, interrupt processing, methods for controlling hardware from software. Includes study and augmentation of real Operating Systems, both open-source and closed-source.

Prerequisites & Notes: CSCI 460.

Credits: 4

Grade Mode: Letter

CSCI 463 - Cyber Defense

Seminars and practical exercises to prepare students for the Collegiate Cyber Defense Competition. Repeatable up to 3 credits.

Prerequisites & Notes: Permission of instructor.

Credits: 1

Grade Mode: S/U

CSCI 467 - Computer Networks II

Advanced computer networks. Applications including Internet and distributed computing.

Prerequisites & Notes: CSCI 367

Credits: 4

Grade Mode: Letter

CSCI 474 - Bioinformatics

Interdisciplinary view of Bioinformatics is presented in a seminar style. Sequence alignment, scripting languages, databases, phylogenetics, genomics, proteomics and select advanced topics are covered from a variety of disciplinary perspectives. Students give presentations and participate in a significant group project. Intended for juniors and seniors in CSCI, BIOL, MATH, CHEM who have some relevant course experience and interest in this emerging discipline.

Prerequisites & Notes: Permission of Instructor.

Credits: 4

Grade Mode: Letter

CSCI 477 - Data Mining

Techniques for extracting useful information from large data sets; attribute-value learning techniques (decision trees, association rules); relational mining techniques (inductive logic programming, efficient search of relational spaces); probabilistic techniques (Bayesian networks, conditional independence); statistical techniques; sampling strategies; applications in bioinformatics, personalization, information retrieval, web modeling, filtering, and text processing.

Prerequisites & Notes: MATH 204, MATH 341 and CSCI 241

Credits: 4

Grade Mode: Letter

CSCI 479 - Spoken Language Processing

Introduction to the automatic processing of spoken language. Fundamental theory and algorithms in

speech processing, including speech analysis, recognition and synthesis, as well as the linguistic and mathematical theory on which spoken language processing systems rely. Implementation of spoken language processing systems is required.

Prerequisites & Notes: CSCI 301 or instructor permission; MATH 341 or instructor permission; CSCI 305 or instructor permission with concurrency.

Credits: 4

Grade Mode: Letter

CSCI 480 - Computer Graphics

Overview of the hardware, software, and techniques used in computer graphics; raster display devices; input devices; display files, 2D and 3D transformations; windowing, clipping; simple surface rendering.

Prerequisites & Notes: CSCI 241 and MATH 204

Credits: 4

Grade Mode: Letter

CSCI 491 - Senior Project 1

Students work in teams on a software project or research project under the guidance of faculty and possibly industry sponsors. Lecture/discussion topics may include: software development life-cycle, project management, software design, software testing, research methodologies.

Prerequisites & Notes: Department permission

Credits: 3

Grade Mode: Letter

CSCI 492 - Senior Project 2

Students work in teams on a software project or research project under the guidance of faculty and possibly industry sponsors. Lecture/discussion topics may include: software development life-cycle, project management, software design, software testing, research methodologies.

Prerequisites & Notes: CSCI 491

Credits: 3

Grade Mode: Letter

CSCI 493 - Senior Project 3

Students work in teams on a software project or research project under the guidance of faculty and possibly industry sponsors. Lecture/discussion topics may include: software development life-cycle, project management, software design, software testing, research methodologies.

Prerequisites & Notes: CSCI 492

Credits: 3

Grade Mode: Letter

CSCI 494 - Professional Work Experience

Academic credit awarded for employment in industry. Students are required to keep a journal and to submit a written report. See Department of Computer Science for information. S/U grading.

Prerequisites & Notes: 30 credits in CSCI; minimum 2.7 GPA; department permission.

Credits: 4

Grade Mode: S/U

CSCI 495 - Capstone Seminar

This course consists of a ten week review of the required undergraduate program in Computer Science, culminating in the Major Field Test which is required of all Computer Science Majors.

Prerequisites & Notes: Final quarter in the Computer Science major.

Credits: 1

Grade Mode: Letter

CSCI 496 - Undergraduate Research

Student will work on an undergraduate research project under the supervision of a permanent faculty member.

Prerequisites & Notes: Instructor permission.

Credits: 1-4

Grade Mode: S/U

CSCI 498 - Teaching Practicum

Classroom experience in computer science teaching. Students will assist faculty in laboratory settings. Repeatable for a maximum of 4 cr.

Prerequisites & Notes: Senior status and permission of department.

Credits: 2

Grade Mode: Letter

CSCI 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

CSCI 509 - Operating System Internals

COMPUTER SCIENCE

An intensive study of operating systems through examination of and experimentation with kernel source code for a modern open-source operating system. Aspects of operating systems to be investigated include process management, resource management, memory allocation, file systems and kernel services.

Prerequisites & Notes: CSCI 322, CSCI 352, CSCI 367
Credits: 4
Grade Mode: Letter

CSCI 510 - Automata and Formal Language Theory

Advanced treatment of formal languages and automata; finite state machines; stack machines and Turing Machines; the Chomsky hierarchy; regular, context free, context sensitive languages, recursively enumerable languages.

Prerequisites & Notes: CSCI 301 or equivalent
Credits: 4
Grade Mode: Letter

CSCI 511 - Analysis of Algorithms

Systematic study of algorithms and their complexity, searching and sorting, pattern matching, geometric and graph algorithms, NP-complete and intractable problems.

Prerequisites & Notes: CSCI 305
Credits: 4
Grade Mode: Letter

CSCI 512 - Design and Implementation of Computer Programming Languages

Evaluation of programming language features, classification of programming languages in terms of expressiveness, complexity, uniformity and orthogonality. Cost of implementing and using programming language in view of compilation and run-time environments. Mapping of programming language features onto computer architectures. Alternative programming methodologies: functional paradigm, imperative programming, logic programming, data flow programming, explicit and implicit concurrency models.

Prerequisites & Notes: CSCI 510.
Credits: 4
Grade Mode: Letter

CSCI 513 - Systems Programming and Operating Systems Internals

Systems software such as linkers, loaders, system utility software and operating system internals. Investigation of real operating systems,

augmentation or modification of the operating system source code. Process creation and management; interprocess communication; process scheduling; I/O hardware and software; memory management; file system design and implementation; security and protection mechanisms.

Prerequisites & Notes: CSCI 352 or CSCI 460.
Credits: 4
Grade Mode: Letter

CSCI 514 - Research Methodology in Computer Science

Research methodology topics identified as appropriate, emphasizing basic and applied research skills. This course will have research as its primary focus and will be taught by persons with research competencies and interests. Course content includes preparation of research studies, reports, and papers. Students are expected to generate a research or survey paper on their own research topic as a final project.

Prerequisites & Notes: Graduate Status.
Credits: 4
Grade Mode: Letter

CSCI 515 - Parallel Computation

Topics in concurrent and parallel computation. Possible areas include formal specification methods for parallel systems, semantics and verification of parallel language programs, and analysis and implementation of parallel algorithms.

Prerequisites & Notes: CSCI 510.
Credits: 4
Grade Mode: Letter

CSCI 520 - Advanced Compiler Design

Theory and practice of compiler design. Detailed consideration of efficient parsing techniques; organization of semantic analysis and code generation phases; machine dependent and independent optimization techniques; organization of run time environment.

Prerequisites & Notes: CSCI 510.
Credits: 4
Grade Mode: Letter

CSCI 525 - Advanced Topics in Operating Systems

Various topics as they relate to distributed operating systems. Case study using a distributed operating system to perform experiments in class laboratory.

Prerequisites & Notes: CSCI 460 or CSCI 513.

Credits: 4

Grade Mode: Letter

CSCI 527 - Embedded Systems

Design and development of embedded microprocessors in instrumentation, controls, and user appliances.

Prerequisites & Notes: CSCI 509

Credits: 4

Grade Mode: Letter

CSCI 530 - Advanced Database Theory

Advanced topics in database systems. Possible areas include transaction processing, concurrency control, recovery, security, query optimization, distributed systems, and logic-based systems.

Prerequisites & Notes: CSCI 430 or equivalent

Credits: 4

Grade Mode: Letter

CSCI 570 - Artificial Intelligence

Advanced topics in artificial intelligence. Possible areas include knowledge representation, LISP or PROLOG, search strategies, heuristics, goal refinement, theorem proving, and symbolic problem solving.

Prerequisites & Notes: Graduate student status or instructor permission.

Credits: 4

Grade Mode: Letter

CSCI 571 - Machine Learning Algorithms

Covers important machine learning research areas such as artificial neural nets, Bayesian learning, data mining, decision tree learning, evolutionary computation, reinforcement learning, version space learning, rough sets, and computational learning theory. Algorithms from these research areas will be analyzed. Each student will select one of the learned algorithms and apply it to the term project.

Prerequisites & Notes: Graduate status.

Credits: 4

Grade Mode: Letter

CSCI 572 - Robotics

The materials of this class cover from hardware to software according to students' need and available instructors. Each offer of the class will select one of the two (hardware and software) research areas or a combination of them. The syllabus includes, but is not limited to, architectures, navigation, and

motion planning, control, vision, synthesizing, and algorithm design. Students will gain firsthand experience by working on a small robot. They will design algorithms or manipulate the hardware to make the robot do or learn a certain task.

Prerequisites & Notes: Graduate status.

Credits: 4

Grade Mode: Letter

CSCI 573 - Computational Linguistics

Formal and computational models of the syntax, semantics and pragmatics of natural languages; rival approaches to semantic and pragmatic representation; applications to database queries and machine translation.

Prerequisites & Notes: CSCI 401 or CSCI 510.

Credits: 4

Grade Mode: Letter

CSCI 575 - Information Retrieval

Index construction, vector space model, evaluation of relevance in IR systems, text classification, clustering, machine learning approaches to IR, applications to web search, current research topics.

Prerequisites & Notes: CSCI 511

Credits: 4

Grade Mode: Letter

CSCI 577 - Data Mining

Techniques for extracting useful information from large data sets; attribute-value learning techniques (decision trees, association rules); relational mining techniques (inductive logic programming, efficient search of relational spaces); probabilistic techniques (Bayesian networks, conditional independence); statistical techniques; sampling strategies; applications in bioinformatics, personalization, information retrieval, web modeling, filtering, and text processing.

Prerequisites & Notes: CSCI 510, CSCI 511

Credits: 4

Grade Mode: Letter

CSCI 578 - Cryptography

Selected topics from number theory; simple, homophonic, polyalphabetic substitution ciphers; product ciphers, DES; exponentiation ciphers; knapsack ciphers; key management.

Prerequisites & Notes: CSCI 509.

Credits: 4

Grade Mode: Letter

COMPUTER SCIENCE

CSCI 579 - Spoken Language Processing

Introduction to the automatic processing of spoken language. Fundamental theory and algorithms in speech processing, including speech analysis, recognition and synthesis, as well as the linguistic and mathematical theory on which spoken language processing systems rely. Implementation of spoken language processing systems is required.

Prerequisites & Notes: CSCI 510, MATH 341 and CSCI 511 or concurrent; or instructor permission.

Credits: 4

Grade Mode: Letter

CSCI 580 - Advanced Computer Graphics

Three-dimensional concepts, shading techniques, curves and surfaces, ray tracing, radiosity, texture mapping, fractals.

Prerequisites & Notes: CSCI 480 or equivalent

Credits: 4

Grade Mode: Letter

CSCI 584 - Scientific Visualization

Introduction to the computer display of scientific datasets. Topics include visualizing 2D and 3D scalar and vector fields, visualizing nonlinear relationships, and user interface design.

Prerequisites & Notes: CSCI 480 or equivalent

Credits: 4

Grade Mode: Letter

CSCI 585 - Image Processing

Digital image fundamentals, image transforms, image enhancements, image restoration, image encoding, representation and description, color image processing, morphological operations.

Prerequisites & Notes: CSCI 480.

Credits: 4

Grade Mode: Letter

CSCI 590 - Graduate Seminar

Students are expected to present and discuss state-of-the-art computer science research papers in various topics. All graduate students must present their MS research in this class before graduation. External speakers may be invited. The objectives are to expose students to a wide range of state-of-the-art research topics and to provide opportunities for students to share research experiences. Repeatable to a maximum of 6 credits.

Prerequisites & Notes: Graduate student status.

Credits: 1

Grade Mode: S/U

CSCI 601 - Area of Specialization Research Experience I

Work on ongoing research project. Credit given when CS 601, 602 and 603 completed. S/U grading.

Credits: 4

Grade Mode: S/U

CSCI 602 - Area of Specialization Research Experience II

Work on ongoing research project. Credit given when CS 601, 602 and 603 completed. S/U grading.

Prerequisites & Notes: CSCI 601

Credits: 4

Grade Mode: S/U

CSCI 603 - Area of Specialization Research Experience III

Work on ongoing research project. S/U grading.

Prerequisites & Notes: CSCI 601, CSCI 602

Credits: 4

Grade Mode: S/U

Computer & Information Systems Security Courses

CISS 247 - Computer Systems I

An overview of basic computer organization and design. Introduction to C programming. Topics covered include data representation, boolean algebra, machine language, instruction sets, processor architecture, multi-processors, system-level I/O, pipelining, and the memory hierarchy. Includes lab.

Prerequisites & Notes: CSCI 145

Credits: 5

Grade Mode: Letter

CISS 301 - Formal Languages and Functional Programming

Introduction to discrete structures important to computer science, including sets, trees, functions, and relations. Proof techniques. Introduction to the formal language classes and their machines, including regular languages and finite automata, context free languages and pushdown automata. Turing machines and computability will be

introduced. Programming using a functional language is required in the implementation of concepts. Includes lab.

Prerequisites & Notes: CSCI 145

Credits: 5

Grade Mode: Letter

CISS 346 - Secure Software Development

Techniques, methodologies and processes for development of robust, secure software. Security development process, threat modeling, common software vulnerabilities, web site vulnerabilities, defensive coding practices, security testing.

Prerequisites & Notes: CISS 247

Credits: 4

Grade Mode: Letter

CISS 349 - Computer System Administration

A study of the tasks, tools and techniques involved in the configuration and administration of heterogeneous networks of Windows and UNIX/Linux computers, with particular emphasis on system hardening, protection against attack, system monitoring and recovery.

Prerequisites & Notes: CISS 247

Credits: 4

Grade Mode: Letter

CISS 360 - Operating System Concepts

A study of the principles and techniques employed in modern computer operating systems. The emphasis is on process and thread creation, management and scheduling; system calls; memory management, virtual memory and paging; file system implementation, input/output systems and device management.

Prerequisites & Notes: CISS 247

Credits: 3

Grade Mode: Letter

CISS 421 - Computer Forensics

Computer security incident response. Investigation of security breaches of computer network, identification of causes and vulnerabilities. Recovery of data from memory dumps. Recovery of damaged file systems.

Prerequisites & Notes: CISS 461

Credits: 4

Grade Mode: Letter

CISS 422 - Dynamic Analysis of Software

Tools and techniques for the investigation of

suspect software by running it and watching its effect. Establishing a safe work environment, monitoring system behavior, network monitoring, file system monitoring, event reconstruction.

Prerequisites & Notes: CISS 247

Credits: 4

Grade Mode: Letter

CISS 423 - Software Reverse Engineering

Tools and techniques for the static analysis of software by disassembly of executable code. De-obfuscation and decoding techniques.

Prerequisites & Notes: CISS 247

Credits: 4

Grade Mode: Letter

CISS 461 - Computer Security

An overview of computer security and detailed study of the theoretical foundations and practical implementations of some aspects of security, including policy specification, the role of cryptography, policy implementation and assurance, security threats and counter-measures.

Prerequisites & Notes: CISS 301

Credits: 4

Grade Mode: Letter

CISS 464 - Penetration Testing

Tools and techniques for penetration testing of application software and computer systems, with the aim of identifying vulnerabilities for remedial action. Understanding common vulnerabilities, selection and trial of exploits, shellcode. Wireless penetration techniques.

Prerequisites & Notes: CISS 461

Credits: 4

Grade Mode: Letter

CISS 469 - Advanced Network System Security

Discussion of current topics security aspects of industrial control, SCADA systems, cloud computing, mobile devices.

Prerequisites & Notes: CISS 360

Credits: 4

Grade Mode: Letter

CISS 478 - Cryptographic Techniques

A study of the cryptographic techniques and tools commonly used in support of security for computer systems and networks.

COMPUTER SCIENCE

Prerequisites & Notes: CISS 301

Credits: 4

Grade Mode: Letter

CISS 495 - Computer Security Project

A capstone team-based project to enable students to apply the skills and knowledge attained during the program to real, significant industry-based applications.

Prerequisites & Notes: CISS 461

Credits: 3

Grade Mode: Letter

Engineering and Design

Introduction

The Department of Engineering and Design offers Bachelor of Science degree programs that prepare graduates for technical and professional careers in industry. Each program offers a unique mix of theoretical course work and laboratory exercises where students apply theory to solve practical problems in engineering and design. Creativity is encouraged and emphasized. In addition, Western's General University Requirements (GURs) provide graduates with a solid foundation in communication skills and contribute to a broad-based education.

The programs are:

- Electrical Engineering (Electronics concentration)
- Electrical Engineering (Energy concentration)
- Manufacturing Engineering
- Plastics and Composites Engineering
- Industrial Design
- Industrial Technology - Vehicle Design

Engineering and Design includes professions in which knowledge of mathematics and natural sciences, technical experience and practice are used to plan, design, create and enhance technologies that benefit humanity. Graduates are employed by major technology companies, such as Boeing, PACCAR, Alpha Technologies, Cypress Semiconductor, Nike, and Microsoft, and by firms such as TEAGUE and Ziba Design, although career opportunities range across the spectrum due to the broad nature of the programs.

Students planning to major in any Engineering and Design program should have a solid foundation in mathematics, chemistry, and physics. Students planning to major in Industrial Design should also have a sound background in art and design.

Faculty

JEFFREY L. NEWCOMER (1998) Chair and Professor. BS, MEng, MS, PhD (Mechanical Engineering), Rensselaer Polytechnic Institute.

SURA K. AL-QUDAH (2014) Assistant Professor. BS (Electronics Engineering), Yarmouk University; MS, PhD (Industrial and Systems Engineering), State University of New York at Binghamton.

APRIL BRYAN (2014) Assistant Professor. BS (Aerospace Science Engineering), Tuskegee University; MS, PhD (Mechanical Engineering), University of Michigan.

TANVEER CHAWLA (2013) Assistant Professor. BE, Gulbarga University; MS (Mechanical Engineering), Wayne State University; PhD (Mechanical Engineering), University of North Dakota.

DAVID D. GILL (2014) Assistant Professor. BS (Mechanical Engineering), Texas Tech University; MS (Mechanical Engineering), Purdue University; PhD (Mechanical Engineering), North Carolina State University.

NICOLE HOEKSTRA (1998) Professor. BS (Mechanical Engineering), MS (Mechanical Engineering), University of Minnesota, Institute of Technology.

KATHLEEN L. KITTO (1988) Professor, Vice Provost for Research and Dean of the Graduate School. BS, MS (Metallurgical Engineering), Montana College of Mineral Science and Technology.

ANDREW G. KLEIN (2014) Associate Professor. BS (Electrical Engineering), Cornell University; MS (Electrical Engineering and Computer Science), University of California - Berkeley; PhD (Electrical & Computer Engineering) Cornell University.

NICOLE M. LARSON (2005) Professor. BS (Mechanical Engineering), Bradley University; MS (Mechanical Engineering), University of Washington.

ERIC C. LEONHARDT (2002) Associate Professor. BA, Whitman College; BS (Industrial Technology-Vehicle Design), Western Washington University; MS (Automotive Systems Engineering), University of Michigan.

YING LIN (2010) Associate Professor. BS, MS (Electrical Engineering), Harbin Institute of Technology; MS (Applied Statistics), PhD (Electrical Engineering), Syracuse University.

JOHN LUND (2013) Assistant Professor. BS, Washington State University; MS, PhD (Electrical Engineering), University of Washington.

JOHN MISASI (2015) Assistant Professor. BS (Plastics Engineering Technology), Western Washington University; PhD (Polymer Science and Engineering), University of Southern Mississippi.

JASON A. MORRIS (2004) Professor. BS (Mechanical Engineering), West Virginia University; Master's of Industrial Design, Pratt Institute.

TODD MORTON (1988) Professor. BS, MS (Electrical Engineering), University of Washington.

ARUNAS P. OSLAPAS (1991) Professor. BFA, Montana State University; MFA, University of Illinois.

MARK PEYRON (2014) Assistant Professor. BS (Chemical Engineering), University of Idaho; PhD (Chemical Engineering), University of Washington.

DAVID RIDER (2010) Assistant Professor. BS (Chemistry), Simon Fraser University; PhD (Chemistry), University of Toronto. Joint appointment with Chemistry Dept.

DEREK M. YIP-HOI (2007) Associate Professor. BS (Mechanical Engineering), University of the West Indies; MS (Mechanical Engineering), State

ENGINEERING AND DESIGN

University of New York-Buffalo; PhD (Mechanical Engineering), University of Michigan.

Instructors

PAUL D. KEARSLEY (2012). BS (Industrial Design), Western Washington University.

INDLE G. KING (1987) BA, MA, University of Washington.

STEPHEN R. SAMMS (2013) BS, MS, PhD (Chemical Engineering), Case Western Reserve University.

STEPHEN D. SANDELIN (2012) BS (Electrical Engineering), Washington State University.

NATHAN SLESINGER (2012) BS (Plastics Engineering Technology), Western Washington University; MS (Materials Engineering), The University of British Columbia.

JERIMIAH G. WELCH (2012). BS (Industrial Design), Western Washington University.

Other Departmental Information

Advising and Declaration of Major

Students who intend to complete one of the majors should immediately obtain advisement from the department program coordinator/pre-major advisor to declare their pre-major and plan a program of study. Because Engineering & Design programs require long course sequences with strong prerequisite structures, both freshmen and transfer students should begin their studies within the department in their first year at Western. Students should start immediately fulfilling the math and science requirements of the program. The pre-major advisor/program coordinator for this department is located in ET 204, 360-650-4132.

Vehicle Design Post-Baccalaureate

A post-baccalaureate professional development certificate program in vehicle design is offered for

students who already have an undergraduate degree in engineering. The three quarter lockstep program begins fall quarter, is self-supporting and has a different tuition rate. Students interested in the post-baccalaureate program need to be referred by the program director of the Industrial Technology - Vehicle Design program. Upon referral, students should complete the Extension Undergraduate Application. Extension admission and registration information is available from Extended Education, 360-650-3308.

Academic Standards

Students are required to follow all prerequisite requirements for courses and seek early departmental advisement. A grade of C- or higher is required to pass all engineering and design program requirements and all prerequisites for those courses. Students are required to drop any major class if they receive a K grade or a D+ or lower grade in the prerequisite class.

Students may request a program course exception (any grade lower than a C- in a required program course is always considered a program exception). To make a request, a student must submit an Exception Request Form for consideration by the Engineering and Design Curriculum Committee. The form can be found in the student resources section of the Engineering and Design Department website cse.wvu.edu/engd. In the exception request, a student must clearly and thoroughly state their request and provide a detailed explanation why the exception is being requested and why it is appropriate. The form is then submitted to their department faculty advisor who must add their comments and recommendation before forwarding the form to the committee. Students should expect that the Curriculum Committee will need ample time to consider the request; deadlines are listed on the form.

Bachelor of Science

Electrical Engineering, BS

Department of Engineering and Design, College of Science and Engineering

144-150 credits

Introduction

The Electrical Engineering program offers a B.S. degree in electrical engineering.

The program serves current students, industry, the University, and the citizens of the state of Washington by preparing students to find pragmatic engineering solutions to problems, while understanding the impact of

their solutions in a global, economic, environmental, and societal context.

The educational experience we provide emphasizes lab based experiential learning, teamwork, communication, and critical thinking, while the program curriculum provides current, practical engineering knowledge built on a sound mathematical and science background.

The student begins the major in the second quarter of their freshman year with an orientation course and is generally enrolled in one or more major courses each quarter until graduation. The many laboratory courses provide a combination of practical experience with design and ultimately lead to a culminating project that spans the senior year.

The students may choose a concentration in either Electronics or Energy. Both concentrations include a common electrical engineering core.

Electronics courses involve the development, design and application of circuits, devices, and firmware for embedded systems. Content includes digital and analog electronics, embedded microcontrollers, communications, controls, and digital signal processing.

Energy courses include a combination of advanced electrical engineering courses and interdisciplinary courses in the sciences, economics, policy, and the environment. Topics deal with the sources, generation, control and utilization of electric power, energy conversion and storage, and smart power topics such as system analysis, protection and stability, solid state motor control, and industrial process control systems. Projects are normally interdisciplinary in collaboration with faculty in the Institute for Energy Studies.

Why Consider an Electrical Engineering Major?

Electrical and electronics engineers conduct research, and design, develop, test, and oversee the development of electronic systems and the manufacture of electrical and electronic equipment and devices. This includes a broad range of applications and specializations that generally involve both hardware and software - areas such as power systems, communications, analog and digital signal processing, embedded systems, and control systems. Products developed by electrical engineers can have significant impacts on society. Recent examples include portable smart devices, medical instrumentation, electric and smart vehicles, sensor networks, and renewable and smart energy systems.

<http://www.careercornerstone.org/eleceng/eleceng.htm>

<http://www.tryengineering.org/become-an-engineer/electrical-engineering>

How to Declare (Admission and Declaration Process):

Program Admissions: Admission to the Electrical Engineering major is a two-phase process. When students initially declare, they are designated as pre-majors. Students must complete the courses listed below in order to apply to the major. Admission to full major status is determined by academic performance as a pre-major and other factors. Admission to the major is competitive. Neither completion of the prerequisites nor attainment of any specific GPA guarantees admission.

Major Prerequisite courses: MATH 124, MATH 125, MATH 204, PHYS 161, PHYS 162, CSCI 140, EE 110 (ETEC 270), and EE 111 (ETEC 271). Students must obtain at least a C- in the above courses and an overall GPA in them of 2.0 or higher to be considered. AP scores are converted to GPA as follows: 5 = A; 4 = B; 3 =

ENGINEERING AND DESIGN

C. Decisions are based primarily on cumulative GPA in the prerequisite courses, but successful completion of other required Major courses, GPA in the Major, and overall GPA are also considerations.

Applications for admittance into Fall quarter are evaluated two times:

Spring Quarter: Applications are due by noon on the Friday before Dead Week to ET 204. Only complete, on-time applications will be considered. Applicants will be notified by the end of the week following finals week. Students who are accepted must register for Fall quarter EE courses before the end of Phase I registration. Students who do not register by the end of Phase I registration may lose their major status.

Fall Quarter: Applications are also accepted at the beginning of Fall quarter on a space available basis. In order to be considered, applications are due to ET 204 by noon on the Friday before the start of classes. Accepted students will be notified by the start of Phase III registration.

Transfer Students: A transfer student that will be transferring into Fall quarter, Year 2, will be designated as a pre-major and will need to follow the standard application process above except for EE110, which must be taken at the first opportunity on-campus. A transfer student that has previous coursework that can be transferred to EE core courses and will be entering the program sequence after Fall quarter, Year 2, may apply at any time. Acceptance will be based on space availability and academic performance. Transfer students who are interested in pursuing the EE program should meet with an advisor to discuss their options.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

All students must complete the supporting courses, the EE core courses, and one of the concentrations.

Supporting Courses (56 credits)

- CHEM 121 - General Chemistry I
- CSCI 140 - Programming Fundamentals in C++
- ENG 302 - Introduction to Technical and Professional Writing
- MATH 124 - Calculus and Analytic Geometry I
- MATH 125 - Calculus and Analytic Geometry II
- MATH 204 - Elementary Linear Algebra
- MATH 224 - Multivariable Calculus and Geometry I
- MATH 331 - Ordinary Differential Equations
- MATH 345 - Statistics for Engineering
- PHYS 161 - Physics with Calculus I
- PHYS 162 - Physics with Calculus II
- PHYS 163 - Physics with Calculus III

EE Core Courses (54 credits)

- EE 110 - Introduction to Electrical Engineering
- EE 111 - Circuit Analysis I
- EE 210 - Circuit Analysis II
- EE 220 - Electronics I
- EE 233 - Digital Electronics
- EE 244 - Embedded Microcontrollers I
- EE 310 - Continuous Systems
- EE 320 - Electronics II
- EE 344 - Embedded Microcontrollers II
- EE 360 - Communication Systems
- EE 361 - Signal Propagation

- EE 372 - Electrical Power and Electromechanical Devices
- EE 444 - Embedded Systems
- EE 480 - Control Systems

EE Electronics Concentration Courses (36-40 credits)

- EE 311 - Discrete Systems
- EE 321 - Electronic Systems
- EE 333 - Digital System Design
- EE 433 - Digital Signal Processing
- EE 460 - Digital Communication Systems
- EE 491 - Project Proposal
- EE 492 - Project Hardware Design
- EE 493 - Project Software and System Implementation
- Technical Elective Courses (6 to 10 credits) as approved by the program advisor.

EE Energy Concentration Courses (34-38 credits)

- EE 374 - Energy Processing
- EE 378 - Smart and Renewable Power
- EE 471 - Energy Project Proposal
- EE 472 - Energy Project Research and Development
- EE 473 - Energy Project Implementation
- ENRG 270 - Energy Science I
- ECON 386 - The Economics of Electricity Markets
- ESCI 380 - Energy and Environment
- Technical Elective Courses (6 to 10 credits) as approved by the program advisor.

Industrial Design, BS

Department of Engineering and Design, College of Science and Engineering

140-141 credits

Introduction

Industrial Design students learn problem-solving methodologies, product research, drawing skills (both by hand and by computer), three dimensional model making techniques, materials, manufacturing processes, ergonomics, design theory, and marketing principles. These skills are applied in the design of many new and innovative products which eventually comprise the student's portfolio.

Why Consider an Industrial Design Major?

The Bachelor of Science Degree program in Industrial Design prepares graduates to begin work as practicing designers in corporate, consulting, or entrepreneurial positions. Industrial Design is a professional service of creating and developing concepts and specifications that optimize function, value, and appearance of products and systems for the mutual benefit of both the user and the manufacturer.

The Industrial Design degree program is accredited by the National Association of Schools of Art and Design (NASAD), 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190; phone (703) 437-0700.

Sample Careers

Staff Designer for a corporation that manufactures, electronics, furniture, outdoor gear, etc. | Design Consultant working in a small design firm that consults to a variety of manufacturers | Entrepreneur developing new products and creating businesses.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Declaration of Major

Entrance Portfolio Requirement

Declaration of a pre-major in the Industrial Design program at Western Washington University requires the submission of a portfolio which, in the judgment of the faculty, offers evidence of a candidate's potential for success within the program.

A portfolio is a collection of an applicant's best work, revealing the applicant's interests and presented as professionally as possible. Applicants should submit work from high school/university courses, professional work, or self-initiated projects. For more information on design portfolios, please refer to the Industrial Design program website, www.wwu.edu/id/.

Portfolios are reviewed by an industrial design committee three times per year prior to the quarter of acceptance into the pre-major. Submission deadlines are posted on the Industrial Design program website. If applicants do not qualify for acceptance one quarter, they may apply for a following quarter after improving the content of their portfolio.

Since the sophomore series of design courses begins in the fall and the courses are sequential, it is highly recommended that transfer students begin studies in the fall quarter. Most Industrial Design courses are only offered one quarter per year and serve as prerequisites for the subsequent courses, so it is important to begin the sequence in September.

Entrance Portfolio Submission Format

To apply for admission to the pre-major, an individual must submit a portfolio according to the format and content guidelines listed on the Industrial Design website. Application materials will not be returned unless a self-addressed, stamped envelope is provided or the applicant may pick up the portfolio in person from the Engineering and Design main office, Engineering Technology 204.

Sophomore Portfolio Review

The sophomore portfolio review is held once a year during the second week in June and takes place after the first two years of studies (freshman and sophomore courses) have been successfully completed. Students will be selectively admitted as Industrial Design majors into the junior professional practice series based on their performance as pre-majors.

The requirements for this second portfolio review include successful completion of the following classes: MATH 115 or MATH 118; PHYS 115; ENGR 104; ID 110 or ART 110 or DSGN 220; ID 120 or ART 120; ID 130; ID 210; ID 220; ID 230; ID 310; ID 320; one Art History course (ART 109 recommended); a maximum of 90 credits remaining to graduate; and a portfolio.

More information on the second portfolio review is available on the Western Washington University Industrial Design Website. Early advisement is essential.

The Industrial Design program is accredited by the National Association of Schools of Art and Design (NASAD), 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190, phone 703-437-0700.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Major -- Industrial Design (140-141 credits)

Industrial Design Core: 53 credits

- ENGR 104 - Introduction to Engineering and Design
- MFGE 261 - Introduction to Computer-Aided Design
- ID 110 - Industrial Design Foundation 1
- ID 120 - Industrial Design Foundation 2
- ID 130 - History of Industrial Design
- ID 210 - Sophomore Industrial Design 1
- ID 220 - Sophomore Industrial Design 2
- ID 230 - Sophomore Industrial Design 3
- MFGE 231 - Introduction to Metal Manufacturing Processes
- ID 310 - Perspective and Rendering 1
- ID 320 - Industrial Design CAD Skills
- ID 340 - Perspective and Rendering II
- ID 380 - Materials for Design

Professional Practice Series: 30 credits

- ID 350 - Junior Industrial Design I
- ID 360 - Junior Industrial Design II
- ID 370 - Junior Industrial Design III
- ID 410 - Senior Industrial Design I
- ID 420 - Senior Industrial Design II
- ID 430 - Senior Industrial Design III

Supporting Courses: 57-58 credits

- ART 109 - Visual Dialogue
- ART 203 - Foundation Drawing II
- Two-Dimensional Art - one course from:
 - ART 304 - Figure Drawing and Issues of the Body
 - ART 305 - Experimental Drawing
 - ART 306 - Mixed Media on Paper
 - ART 320 - Painting I
 - ART 322 - Painting II
 - ART 324 - Figure Painting
 - ART 350 - Printmaking I
- Three-Dimensional Art - one course from:
 - ART 230 - 3-Dimensional Art
 - ART 331 - Sculpture-Wood
 - ART 332 - Sculpture - Metals
 - ART 340 - Ceramics I
- Art History - four courses from:
 - A/HI 210 - History of Architecture
 - A/HI 220 - Visual Culture in Ancient Greece and Rome
 - A/HI 221 - Visual Culture in Medieval Europe
 - A/HI 230 - Visual Culture in 15th and 16th Century Europe
 - A/HI 231 - Visual Culture in 17th and 18th Century Europe
 - A/HI 240 - Visual Culture in Western Europe in the 19th Century
 - A/HI 241 - Visual Culture in Western Europe and America in the 20th Century
 - A/HI 250 - African Visual Culture from Prehistory to Present

ENGINEERING AND DESIGN

A/HI 270 - Visual Culture in South and Southeast Asia

A/HI 271 - Visual Culture in East Asia

A/HI 301 - Modern Art and Modernism

LBRL 273 - Art and Society in China and Japan

DSGN 111 - Design View

DSGN 211 - Foundations of Visual Communication

- DSGN 249 - Graphic Design Concepts
- Math - one course from:
 - MATH 115 - Precalculus II
 - MATH 118 - Accelerated Precalculus
- PHYS 114 - Principles of Physics I
- PHYS 115 - Principles of Physics II
- MGMT 271 - Law and the Business Environment
- MKTG 380 - Principles of Marketing

Industrial Technology — Vehicle Design, BS

Department of Engineering and Design, College of Science and Engineering

124 credits

Introduction

The Bachelor of Science degree program in Industrial Technology-Vehicle Design prepares graduates for design, product development and manufacturing positions in the automotive, marine, aerospace, composites, and alternative fuel industry. The program uses vehicle research, design and development projects to educate students. Through the Vehicle Research Institute, over 50 vehicles have been built since 1972. Since 1989, developing hybrid electrical and natural gas/biomethane vehicle technology has been a focus of the program. The student teams have set records around Indianapolis Motor Speedway, up Pike's Peak and across the Australian Outback with a class win in the 1990 World Solar Challenge. A recent team was the only U.S. university-based team in the finals of the Progressive Automotive X Prize - a \$10 million prize to build a 100 mile per hour gallon car. Graduates have entered a wide range of industry sectors including: automotive, automotive racing, aerospace, marine, heavy duty vehicle, composites, prototype design and manufacturing, computer numerically controlled machining and biofuels. Students gain an understanding of the tools, materials and processes used in industry.

Why Consider an Industrial Technology - Vehicle Design Major?

The Bachelor of Science Degree program in Industrial Technology-Vehicle Design prepares graduates for the above listed fields.

Sample Careers

Jobs obtained by Western students vary widely depending on the individual student's abilities and the portfolio of work they create while in the program. Graduates of this program have held positions in most major automotive manufacturers and custom car building companies, including positions as stylists. Graduates also work in marine, aerospace, composites and trucking industries.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Admission to the Industrial Technology-Vehicle Design program is a two-phase process. When students initially declare, they are designated as pre-majors. Students must complete the courses listed below in order to apply to the major. Admission to full major status is determined by academic performance as a pre-major and other factors. Admission to the major is competitive. Neither completion of the prerequisites nor attainment of any specific GPA guarantees admission.

Major prerequisite courses: MATH 124, MATH 125, PHYS 161, ENGR 104, ENGR 170, ENGR 214, and VHCL 260. Students may be currently enrolled in no more than two of the above courses when they apply for major admission. A final decision on applications may be delayed until receipt of final grades for in-progress courses. Students must obtain at least a C- in the above courses and an overall GPA in them of 2.0 or higher to be considered. AP scores are converted to GPA as follows: 5 = A; 4 = B; 3 = C. Decisions are based on the portfolio and cumulative GPA in the prerequisite courses, but successful completion of other required Major courses, GPA in the Major, and overall GPA are also considerations.

Application: In addition to academic performance as described above, acceptance decisions will also be based on an essay (500 words or less) explaining why you want a degree in vehicle design and a portfolio of your work including pictures and description of up to three pages. The portfolio should show examples of projects or products/parts that you have designed, fabricated, assembled or produced.

Applications are due by **noon on the first Friday in February** to ET 204. Only complete, on-time applications will be considered. Applicants will be notified by the end of the following week. Students who are accepted must register for MFGE 231, MFGE 261, VHCL 261 and ENGR 225 spring quarter before the end of Phase II registration, unless already taken. Students who do not register by the end of Phase II registration may lose their major status. Students need to have a plan to complete PHYS 162 by fall quarter junior year and PHYS 163 by winter quarter junior year.

Other quarters: If additional spaces become available, all pre-Majors will be notified by email that applications are being accepted, including the application deadline.

Transfer Students: A student that will be transferring to Western Washington University will be designated as a pre-major and will need to apply to the major. Transfer students who are interested in pursuing the IT-VD program should meet with an advisor to discuss their options.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Core Courses: 70 credits

- ENGR 104 - Introduction to Engineering and Design
- ENGR 170 - Introduction to Materials Science and Engineering
- ENGR 214 - Statics
- ENGR 225 - Mechanics of Materials
- MFGE 231 - Introduction to Metal Manufacturing Processes
- MFGE 261 - Introduction to Computer-Aided Design
- PCE 371 - Introduction to Plastics Materials and Processes
- PCE 372 - Introduction to Composite Materials and Processes
- VHCL 260 - Vehicle Systems I
- VHCL 261 - Vehicle Systems II
- VHCL 320 - Vehicle Electronics
- VHCL 360 - Vehicle Design I
- VHCL 361 - Vehicle Design II
- VHCL 491 - Capstone 1: Powertrain and Project Definition
- VHCL 492 - Capstone 2: Emissions, Alternative Fuels and Project Fabrication

ENGINEERING AND DESIGN

- VHCL 493 - Capstone 3: Project Implementation and Documentation

Supporting courses: 54 credits

- CHEM 121 - General Chemistry I
 - ENG 101 - Writing and Critical Inquiry
 - One course from:
 - COMM 101 - Fundamentals of Speech
 - COMM 235 - Exposition and Argumentation
 - One course from:
 - CSCI 138 - Programming Fundamentals in Visual Basic
 - CSCI 140 - Programming Fundamentals in C++
 - CSCI 141 - Computer Programming I
 - One course from:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 134 - Calculus I Honors
 - One course from:
 - MATH 125 - Calculus and Analytic Geometry II
 - MATH 135 - Calculus II Honors
 - MATH 345 - Statistics for Engineering
 - PHYS 161 - Physics with Calculus I
 - PHYS 162 - Physics with Calculus II
 - PHYS 163 - Physics with Calculus III
 - PHYS 350 - Engineering Thermodynamics
 - One course from:
 - MGMT 311 - Introduction to Management and Organizational Behavior
 - MFGE 341 - Quality Assurance
 - MFGE 381 - Manufacturing Process Planning
 - OPS 360 - Operations Management
- Recommended electives to fulfill 60 credit upper division course requirement:
- ID 310 - Perspective and Rendering 1
 - MFGE 332 - Introduction to CAM and CNC
 - MFGE 362 - CAD Modeling and Analysis Using Surfaces
 - MFGE 434 - Advanced CAM and CNC
 - MFGE 464 - Modeling and Analysis of Mechanisms
 - MFGE 491 - Project Research, Planning and Ethics
 - PCE 472 - Advanced Composites
 - VHCL 400 - Directed Independent Study
 - VHCL 495 - Directed Research in Vehicle Technology

Manufacturing Engineering, BS

Department of Engineering and Design, College of Science and Engineering

149-153 credits

Introduction

Manufacturing organizations are responsible for creating the vast array of products used in our modern world. These can range from highly personalized products such as a prosthetic device, to complex transportation systems such as a jet airliner. The process of creating these products starts with the identification of a need. This is followed by a systematic sequence of engineering activities that includes the design of the product, the manufacturing processes, the equipment and tooling, and the production systems necessary to produce the final product in sufficient quantities, and with a quality that will be profitable to the organization.

Manufacturing engineers are responsible for conducting this design effort and for implementing, operating, managing and continuously improving the facilities and processes necessary for an organization's success. They need to be both critical thinkers and applications or "hands-on" oriented. Familiarity with a broad range of technologies in areas such as metals fabrication, polymer processing, CAD/CAM, CNC, machine and tooling design, automation and controls, robotics and quality control is essential.

Manufacturing Engineers must also be able to work in and lead teams comprised of other engineers, technologists, scientists and technicians. They must be comfortable functioning in a global setting where the operations of an organization are increasingly dispersed geographically. This program develops these skills with the help of intensive laboratory components spread throughout its courses. Through these experiences, students learn to apply theoretical knowledge learned in the classroom to solve practical, application-based problems in manufacturing.

Why Consider a Manufacturing Engineering Major?

Manufacturing Engineers need to be both critical thinkers and applications or "hands-on" oriented. They can be employed in any company that creates a product, and may be involved at any point in product development from design to plant operations, maintenance, and management. Competency in a broad range of technologies in areas such as metals fabrication, polymer processing, CAD/CAM, CNC, machine and tooling design, automation and controls, robotics, quality control, and Lean Manufacturing provides great flexibility in career choice. The ability to work in and lead teams comprised of other engineers, technologists, scientists, and technicians, allows for career advancement in management. Manufacturing Engineers are also capable of innovation in design and manufacturing that can lead to patenting and start-up companies.

How to Declare (Admission and Declaration Process):

Program Admissions: Admission to the Manufacturing Engineering major is a two-phase process. When students initially declare, they are designated as pre-majors. Students must complete the courses listed below in order to apply to the major. Admission to full major status is determined by academic performance as a pre-major and other factors. Admission to the major is competitive. Neither completion of the prerequisites nor attainment of any specific GPA guarantees admission.

Major Prerequisite courses: MATH 124, MATH 125, MATH 224, CHEM 121, PHYS 161, ENGR 104, ENGR 170, and ENGR 214. Students may be currently enrolled in no more than three of the above courses when they apply for major admission. A final decision on applications may be delayed until receipt of final grades for in-progress courses. Students must obtain at least a C- in the above courses and an overall GPA in them of 2.0 or higher to be considered. AP scores are converted to GPA as follows: 5 = A; 4 = B; 3 = C. While decisions are based primarily on cumulative GPA in the prerequisite courses, successful completion of other required Major courses, GPA in the Major, and overall GPA are also considerations. The program will also take under consideration your rationale for pursuing a degree in Manufacturing Engineering, as explained in an essay (500 words or less) that is to be submitted as part of your application.

Major Application: In addition to the academic performance described above, acceptance will also be based on an essay (500 words or less) explaining why you want to pursue a degree in Manufacturing

ENGINEERING AND DESIGN

Engineering. Applications are due by **noon on the first Friday in February** to ET 204. Only complete, on-time applications will be considered. Applicants will be notified by the end of the following week. Students who are accepted must register for MFGE 231, MFGE 261 and MATH 345 (or MATH 341) spring quarter before the end of Phase II registration. Students who do not register by the end of Phase II registration may lose their major status. Students need to have no more than two of the following courses or equivalencies outstanding at the beginning of Fall quarter of year three: PHYS 162, PHYS 163, MATH 204, MATH 331, ENGR 225 and CSCI 140.

Other quarters: If additional spaces become available, all pre-Majors will be notified by email that applications are being accepted, including the application deadline.

Transfer Students: A student that will be transferring to Western Washington University will be designated as a pre-major and will need to apply to the major. Transfer students who believe they are ready to apply to the MFGE major should contact the department program coordinator for advising the quarter before they intend to start at Western.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Math and General Science (47 credits)

- CHEM 121 - General Chemistry I
- MATH 124 - Calculus and Analytic Geometry I
- MATH 125 - Calculus and Analytic Geometry II
- MATH 204 - Elementary Linear Algebra
- MATH 224 - Multivariable Calculus and Geometry I
- MATH 331 - Ordinary Differential Equations
- MATH 345 - Statistics for Engineering
- PHYS 161 - Physics with Calculus I
- PHYS 162 - Physics with Calculus II
- PHYS 163 - Physics with Calculus III

Engineering and Applied Science (20 credits)

- CSCI 140 - Programming Fundamentals in C++
- ENGR 104 - Introduction to Engineering and Design
- ENGR 170 - Introduction to Materials Science and Engineering
- ENGR 214 - Statics
- ENGR 225 - Mechanics of Materials

Manufacturing Engineering Core (82-86 credits)

- EE 351 - Electronics for Engineering
- EE 352 - Introduction to Automation and Control
- MFGE 231 - Introduction to Metal Manufacturing Processes
- MFGE 261 - Introduction to Computer-Aided Design
- MFGE 332 - Introduction to CAM and CNC
- MFGE 333 - Design for Manufacture
- MFGE 341 - Quality Assurance
- MFGE 342 - Data Analysis and Design of Experiments
- MFGE 362 - CAD Modeling and Analysis Using Surfaces
- MFGE 381 - Manufacturing Process Planning
- MFGE 463 - Design of Tooling
- MFGE 465 - Machine Design

- ❑ MFGE 491 - Project Research, Planning and Ethics
- ❑ MFGE 492 - Manufacturing Project Proposal
- ❑ MFGE 493 - Manufacturing Project Implementation
- ❑ PCE 371 - Introduction to Plastics Materials and Processes
- ❑ PCE 372 - Introduction to Composite Materials and Processes
- ❑ OPS 460 - Designing and Improving Lean Operations
- ❑ Select one from the following two courses:
 - MFGE 434 - Advanced CAM and CNC
 - MFGE 453 - Industrial Robotics
- ❑ Technical Electives: Two courses (6-10) credits as approved by the program advisor.

Plastics and Composites Engineering, BS

Department of Engineering and Design, College of Science and Engineering

186 (148+ program credits)

Introduction

Students enrolled in Western's Plastics & Composites Engineering (PCE) program study the relationship between molecular structure, processing, and properties of polymers and composites. The PCE curriculum prepares graduates who understand and apply established scientific and engineering knowledge to support engineering activities in manufacturing environments. The technical curriculum is built upon a firm base of mathematics, physics, chemistry, and materials science. Practical experience in design, materials, processing, economics, testing, characterization, and analysis is a crucial part of the hands-on curriculum that is provided in the program's extensive and well-equipped laboratory facilities.

Why Consider a Plastics and Composites Engineering Major?

A plastics and composites engineer can be involved in the development, design analysis, planning, supervision, or construction of the materials, methods, and equipment for the production of industrial or consumer goods in the plastics or composites industry. The PCE graduate will help to solve the complex problems associated with plastics or composites manufacturing operations. PCE graduates work in teams with engineers, scientists, and technicians to solve manufacturing-related problems.

- PHYS 163 - Physics with Calculus III

Minor

Embedded Systems Minor

Department of Engineering and Design, College of Science and Engineering

24 credits

Introduction

The Embedded Systems minor focuses on the parts of Electrical Engineering that embed computing capability into electronic systems through the application of digital systems and embedded microcontroller hardware and software.

It starts with fundamental electrical circuits and then advances to digital systems and embedded microcontrollers. Hardware includes modern microcontroller cores, memories, and IO resources, and FPGA's. Software includes VHDL/Verilog, Assembly and C programming, and real-time multitasking including the application of an RTOS.

Why Consider an Embedded Systems Minor?

The embedded systems minor is primarily intended to complement computer science or engineering curriculum for students interested in the low-level hardware and software implementation of these systems.

How to Declare (Admission and Declaration Process):

Contact the ITVD program director or department program coordinator, as course offerings have changed.

Students must obtain at least a C- in the MATH 124, MATH 125, PHYS 161, and CHEM 121 prerequisite courses and an overall GPA in them of 2.0 or higher to be considered. AP scores are converted to GPA as follows: 5 = A; 4 = B; 3 = C. Decisions are based on the portfolio and cumulative GPA in the prerequisite courses, but successful completion of other required Minor courses, GPA in the Minor, and overall GPA are also considerations. Applications decisions will also be based upon the available space for students within the Engineering and Design Department.

Acceptance decisions will also be based on an essay (500 words or less) explaining why you want a minor in vehicle design and a portfolio of your work including pictures and description of up to three pages. The portfolio should show examples of projects or products/parts that you have designed, fabricated, assembled or produced. A design or analysis of a vehicle or vehicle related process, such as biofuel production, may be

substituted for physical components produced. This is to facilitate a diverse student body who may apply for the minor.

Applications are due by noon on the Friday during the first week of fall quarter school to Ross ET 204. Only complete, on-time applications will be considered. Applicants will be notified by the end of the following week. Applications decisions will also be based upon the available space for students within the Engineering and Design Department.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Sustainable Design Minor (see Environmental Studies Department)

Sustainable Design Minor (see Environmental Studies Department)

User Experience (UX) Design Minor

Combined minor offered by the Department of Engineering and Design, College of Science and Engineering and the Department of Design, College of Fine and Performing Arts and Department of Psychology, College of Humanities and Social Sciences and Department of Computer Science, College of Science and Engineering

28-31 credits depending on major (7-8 courses)

Introduction

User Experience Design is a holistic, multidisciplinary approach to the design of user interfaces for digital products, defining their form, behavior, and content. User experience design integrates interaction design, industrial design, information architecture, information design, visual interface design, user assistance design, and user-centered design, ensuring coherence and consistency across all of these design dimensions.

User experience design is a multidisciplinary profession that is still evolving and yet is in high demand. It is a combination of graphic design, industrial design, psychology, computer science and business. It requires big picture, strategic design skills, and the ability to design the very detailed interactions in interface. As such, good UX designers are in very short supply. This minor is intended only for industrial design, psychology, marketing, design and computer science majors only.

ENGINEERING AND DESIGN

http://www.wvu.edu/careers/students_choosingamajor.shtml

How to Declare (Admissions and Declaration Process):

The predicted demand for this minor is high, so a cap may be necessary to limit enrollment. 16-20 minors would be accepted per year. Selection occurs two times per year. Once in the Fall and once in the Spring due on the seventh Friday of the quarter. The selection committee comprises of representatives from each of the five programs (Industrial Design, Design, Business Administration (Marketing Concentration), Psychology and Computer Science). Application is available at www.wvu.edu/id/.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

For Industrial Design majors (28 credits)

- ID 460 - UX Design Capstone
- PSY 101 - Introduction to Psychology
- PSY 210 - Cognition
- Choose three from:
 - CSCI 102 - Computer-Mediated Communications
 - CSCI 103 - Introduction to Computer Game Development
 - CSCI 141 - Computer Programming I
 - CSCI 202 - Dynamic Web Pages
- Choose one from:
 - DSGN 111 - Design View
 - DSGN 211 - Foundations of Visual Communication
 - DSGN 390 - Topics in Design

For Computer Science majors (28 credits)

- DSGN 111 - Design View
- DSGN 249 - Graphic Design Concepts
- ID 460 - UX Design Capstone
- PSY 101 - Introduction to Psychology
- PSY 210 - Cognition
- Choose one from:
 - DSGN 211 - Foundations of Visual Communication
 - DSGN 390 - Topics in Design
 - ID 130 - History of Industrial Design
- Choose one from:
 - ID 110 - Industrial Design Foundation 1
 - ID 320 - Industrial Design CAD Skills

For Psychology and Business Administration - Marketing concentration majors (28 credits)

- DSGN 111 - Design View
- DSGN 249 - Graphic Design Concepts
- ID 460 - UX Design Capstone
- Choose three from:
 - CSCI 102 - Computer-Mediated Communications
 - CSCI 103 - Introduction to Computer Game Development
 - CSCI 141 - Computer Programming I
 - CSCI 202 - Dynamic Web Pages
- Choose one from:

DSGN 211 - Foundations of Visual Communication
 DSGN 390 - Topics in Design
 ID 130 - History of Industrial Design

Choose one from:

ID 110 - Industrial Design Foundation 1
 ID 320 - Industrial Design CAD Skills

For Design majors (30 credits)

- ID 460 - UX Design Capstone
- PSY 101 - Introduction to Psychology
- PSY 210 - Cognition
- CSCI 103 - Introduction to Computer Game Development
- CSCI 141 - Computer Programming I
- CSCI 202 - Dynamic Web Pages
- Choose one from:
 - ID 110 - Industrial Design Foundation 1
 - ID 320 - Industrial Design CAD Skills

WWU Certificate (Non-Degree)

Vehicle Design Post-Baccalaureate Certificate Program

Department of Engineering and Design, College of Science and Engineering

54 credits*

Introduction

This certificate is designed for students with a prior engineering or related degree such as electrical engineering, mechanical engineering or chemical engineering who want additional design, engineering and testing experience within the vehicle and alternative fuel domain. Past students have obtained positions in formula one racing, aerospace manufacturing, automotive industry consulting and the alternative fuels industry.

How to Declare (Admission and Declaration Process):

Please talk with the program director or departmental program coordinator, as course offerings have changed. Thank you for your interest in the program.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- MFGE 231 - Introduction to Metal Manufacturing Processes

ENGINEERING AND DESIGN

- ❑ MFGE 261 - Introduction to Computer-Aided Design
- ❑ PCE 371 - Introduction to Plastics Materials and Processes
- ❑ PCE 372 - Introduction to Composite Materials and Processes
- ❑ VHCL 260 - Vehicle Systems I
- ❑ VHCL 261 - Vehicle Systems II
- ❑ VHCL 320 - Vehicle Electronics
- ❑ VHCL 360 - Vehicle Design I
- ❑ VHCL 361 - Vehicle Design II
- ❑ VHCL 491 - Capstone 1: Powertrain and Project Definition
- ❑ VHCL 492 - Capstone 2: Emissions, Alternative Fuels and Project Fabrication
- ❑ VHCL 493 - Capstone 3: Project Implementation and Documentation

*Some course requirements, such as computer aided design courses, may be waived based on the applicants prior degree and course history. Additional courses may be added to fulfill prerequisite requirements.

Electrical Engineering Courses

EE 110 - Introduction to Electrical Engineering

General overview of the field of electrical engineering and the electrical engineering program curriculum. Introduction to common lab instruments and software tools through basic project design and testing.

Prerequisites & Notes: PHYS 162 or concurrent
Credits: 2
Grade Mode: Letter

EE 111 - Circuit Analysis I

Introduction to basic circuit analysis. Resistive circuits, RC and RL circuits, and network theorems.

Prerequisites & Notes: MATH 125; PHYS 162
Credits: 4
Grade Mode: Letter

EE 210 - Circuit Analysis II

Continuation of basic circuit analysis. Op-amp circuits, AC circuits analysis, AC power, frequency response including Bode plots.

Prerequisites & Notes: EE 111; MATH 204.
Credits: 4
Grade Mode: Letter

EE 220 - Electronics I

A first course in electronic devices and circuits. Fundamental properties of semiconductor devices and their behavior in electronic circuits.

Prerequisites & Notes: EE 210
Credits: 4
Grade Mode: Letter

EE 233 - Digital Electronics

Introductory digital electronics with emphasis on basic digital concepts, Boolean algebra, digital devices, interfacing, and the major functional units from building block approach. Laboratory with applications, constructing, testing and troubleshooting of digital circuits.

Prerequisites & Notes: CSCI 140; EE 111
Credits: 4
Grade Mode: Letter

EE 244 - Embedded Microcontrollers I

Introduction to microcomputers, microcontrollers, and programming concepts. Study of assembly instruction sets, structured programming using assembly language, and basic embedded debugging techniques.

Prerequisites & Notes: EE 233
Credits: 4
Grade Mode: Letter

EE 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

EE 310 - Continuous Systems

Introduction to continuous-time signals and systems. Analysis of linear time-invariant (LTI) systems. Laplace transforms, Fourier transforms, and their applications to LTI system analysis.

Prerequisites & Notes: MATH 331; EE 210.

Credits: 4
Grade Mode: Letter

EE 311 - Discrete Systems

Introduction to discrete-time signals and systems. Z-transform, discrete Fourier transform, introduction to sampling theorem.

Prerequisites & Notes: EE 310
Credits: 4
Grade Mode: Letter

EE 320 - Electronics II

A course in the analysis and design of electronic systems including amplifier building blocks, frequency response, and an introduction to switch-mode power supply and control circuits.

Prerequisites & Notes: EE 220
Credits: 4
Grade Mode: Letter

EE 321 - Electronic Systems

Upper division treatment of active linear and nonlinear electronic circuits. Analysis, design and testing of electronic circuits and subsystems with primary emphasis on the application of integrated circuit components and modules including active filters, instrumentation amplifiers, oscillators and data converters. Laboratory testing of designed circuits and formal report writing.

Prerequisites & Notes: EE 310; EE 320
Credits: 4
Grade Mode: Letter

EE 333 - Digital System Design

An upper-division course in digital system analysis and design including the study of sequential/state machine design techniques and applications with an emphasis on VHDL and ASIC devices.

Prerequisites & Notes: EE 233
Credits: 4
Grade Mode: Letter

EE 344 - Embedded Microcontrollers II

Upper-division study of analysis and design of electronic systems using embedded microcontrollers. This course focuses on using the C programming language for embedded microcontrollers, real-time programming techniques, and on-chip resources. Various hardware resources and interfacing techniques will be introduced and applied in laboratory design problems.

Prerequisites & Notes: EE 244
Credits: 4
Grade Mode: Letter

EE 351 - Electronics for Engineering

Analysis of basic electric circuits, design of simple analog and digital circuits including power supplies, transistor amplifiers, timers and logic device. Laboratory reinforces the circuit concepts presented in the classroom and promotes competent use of basic electronic instruments. Cannot be taken for credit by EE majors.

Prerequisites & Notes: MATH 125; PHYS 162
Credits: 4
Grade Mode: Letter

EE 352 - Introduction to Automation and Control

Design and analysis of electronic automation and control systems. Emphasis on design using digital and analog circuits, microcontrollers, and PLCs. Laboratory design implementation. Cannot be taken for credit by EE majors.

Prerequisites & Notes: EE 351; MATH 331; CSCI 140.
Credits: 4
Grade Mode: Letter

EE 360 - Communication Systems

This course introduces analog and digital communication systems with an emphasis on system level concepts. Fundamental principles underlying communication systems will be studied, including modulation and demodulation, radio architectures and receiver structures, bandwidth requirements, SNR, pulse shaping, and synchronization.

Prerequisites & Notes: MATH 345; EE 310
Credits: 4
Grade Mode: Letter

EE 361 - Signal Propagation

Signal transmission through both guided and unguided media. Distributed-circuit concepts, transmission line theory, and RF impedance matching. RF signal propagation, wireless channel modeling, and basic concepts in antenna theory. Emphasis on applications to communication systems.

Prerequisites & Notes: MATH 224; PHYS 163.
Credits: 4
Grade Mode: Letter

ENGINEERING AND DESIGN

EE 372 - Electrical Power and Electromechanical Devices

A study of electrical power concepts and electromechanical devices' theory, operation and analysis. Topics covered include circuit analysis review, basic electromagnetic theory, three phase power systems, dc machines, synchronous generators, power transformers and induction machines. Also offered as ENRG 372.

Prerequisites & Notes: EE 210
Credits: 4
Grade Mode: Letter

EE 374 - Energy Processing

A study of power electronics devices and circuits applied to power conditioning. Topics covered include switching characteristics of power semiconductor devices, power converter topologies, control techniques in power converters and practical applications of power electronics converters in motor drives. Also offered as ENRG 374.

Prerequisites & Notes: EE 372 or ENRG 372; and EE 320.
Credits: 4
Grade Mode: Letter

EE 378 - Smart and Renewable Power

A study of smart grid and renewable energy technologies. Topics covered include basics of power system operation, smart grid objectives and main features, alternative energy technologies and interface to utility grid, storage systems technology, Plug-in Hybrid Electric vehicle technology, demand response and demand side management and smart grid monitoring. Also offered as ENRG 378.

Prerequisites & Notes: EE 374 or ENRG 374; ENRG 270; and EE 360.
Credits: 4
Grade Mode: Letter

EE 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

EE 433 - Digital Signal Processing

Introduction to the fundamentals of digital signal processing (DSP) and digital filtering. Topics include design and analysis of FIR filters and IIR filters, and practical applications of DSP. Students will gain both software simulation and hardware hands-on experience in implementing DSP algorithms.

Prerequisites & Notes: EE 311; EE 444
Credits: 4
Grade Mode: Letter

EE 444 - Embedded Systems

The advanced study of real-time embedded systems hardware and software analysis and design. Includes real-time kernels, kernel services, and networking in a variety of hardware and software applications.

Prerequisites & Notes: EE 344
Credits: 4
Grade Mode: Letter

EE 460 - Digital Communication Systems

This course focuses on advanced digital communication system design, analysis, and implementation. Random processes will be used to model communication systems and analyze their performance in noise. Advanced communication techniques will be studied, such as: multicarrier systems, spread spectrum, equalization, channel coding, and modern wireless protocols and standards.

Prerequisites & Notes: EE 360; EE 433
Credits: 4
Grade Mode: Letter

EE 471 - Energy Project Proposal

This is the first of three courses for the interdisciplinary culminating project in the electrical engineering – energy option. Students define objectives, perform research, and prepare project proposals for EE 472 and EE 473. Also offered as ENRG 471.

Prerequisites & Notes: EE 378; EE 480 or concurrent.
Credits: 2
Grade Mode: Letter

EE 472 - Energy Project Research and Development

This is the second of three courses for the interdisciplinary energy project. Students complete the research and develop design concepts based on the constraints defined in EE 471. Also offered as ENRG 472.

Prerequisites & Notes: EE 471

Credits: 4

Grade Mode: Letter

EE 473 - Energy Project Implementation

This is the third of three courses for the interdisciplinary energy project. Students complete the implementation of an energy related project as defined in EE 471 and EE 472. Also offered as ENRG 473.

Prerequisites & Notes: EE 471; EE 472

Credits: 4

Grade Mode: Letter

EE 480 - Control Systems

A study of analog control systems and techniques using operational mathematics, Laplace transforms, transfer functions, second-order systems, stability criteria, frequency response analysis, PID compensation. Laboratory investigation of control systems and computer modeling.

Prerequisites & Notes: EE 310

Credits: 4

Grade Mode: Letter

EE 491 - Project Proposal

This is the first of three courses for the culminating project. Students define objectives, perform research, and prepare project proposals for EE 492 and EE 493.

Prerequisites & Notes: EE 321; EE 480 or concurrent; EE 460 or concurrent; EE 372 or concurrent.

Credits: 2

Grade Mode: Letter

EE 492 - Project Hardware Design

Second of three project courses. Design and fabrication of PCB-based capstone project hardware with special attention to modern commercial manufacturing techniques.

Prerequisites & Notes: EE 491

Credits: 4

Grade Mode: Letter

EE 493 - Project Software and System Implementation

This is the third of three courses for the culminating project. Students complete the design and verification of software and software/hardware integration for the final project implementation based on the constraints defined in EE 491.

Prerequisites & Notes: EE 491; EE 492

Credits: 4

Grade Mode: Letter

EE 495 - Directed Research in Electrical Engineering

Advanced study in problems chosen and conducted under supervision. Repeatable 3 times to a maximum 9 credits.

Credits: 1-3

Grade Mode: Letter

Engineering Courses

ENGR 104 - Introduction to Engineering and Design

Introduces students to the field of engineering, the design process and communication of ideas with graphics. Includes team design projects, drawing instruction and assignments, role of CAD, introduction to the engineering disciplines, engineering history, ethics and case studies of engineering feats and failures, and how things are made.

Credits: 3

Grade Mode: Letter

ENGR 170 - Introduction to Materials Science and Engineering

The relationship between structure, properties, processing, and performance of materials; introduction to physical and mechanical properties of materials, including metals, polymers, ceramics, composites; and materials selection based on engineering design criteria. Processing includes: strengthening, deformation, phase equilibrium, and thermal treatments.

Prerequisites & Notes: CHEM 121 or CHEM 125; (MATH 124 and PHYS 161, or concurrent) or (MATH 157 and PHYS 114, or concurrent)

Credits: 4

Grade Mode: Letter

ENGR 214 - Statics

Principles and basic concepts of statics including: vector analysis applied to equilibrium of rigid body systems and subsystems, force and moment resultants, free body diagrams, internal forces and friction. Analysis of basic structural and machine systems and components. Shear and moment diagrams. Use of linear algebra to solve simultaneous systems of equations.

Prerequisites & Notes: MATH 124; MATH 125 or

ENGINEERING AND DESIGN

concurrent; MATH 204 recommended; and PHYS 161

Credits: 4

Grade Mode: Letter

ENGR 225 - Mechanics of Materials

Principles and basic concepts of structural analysis including: internal forces, stress, strain, axial loading, torsion, bending, combined loads, and buckling. Introduction to stress transformation, failure analysis, and finite element analysis.

Prerequisites & Notes: ENGR 104; ENGR 170; ENGR 214; MATH 125

Credits: 5

Grade Mode: Letter

Industrial Design Courses

ID 110 - Industrial Design Foundation 1

This studio course covers foundational drawing and visual skills pertaining to industrial design. The process of drawing is analytical, communicative and inventive. Classical drawing technique, drawing from life, objects, machines, architecture, human form, observation of light and shadow and composition are taught and practiced.

Prerequisites & Notes: ID Pre-majors during Phase I registration; Non-majors Phase II registration.

Credits: 4

Grade Mode: Letter

ID 120 - Industrial Design Foundation 2

This studio course teaches color and three dimensional form theory and application as it relates to the practice of industrial design. Two-dimensional form, color structure, and composition are investigated here through various assignments and principles. The basic abstract components of form - line, plane, mass and space - are examined and explored through assignments and research.

Prerequisites & Notes: ID Pre-major during Phase I registration; Non-majors Phase II registration.

Credits: 4

Grade Mode: Letter

ID 130 - History of Industrial Design

A historical overview of mass-produced products, the designers who created them, and their influence on our culture and society. International perspective covering significant events from the Industrial Revolution to the present.

Credits: 3

Grade Mode: Letter

ID 210 - Sophomore Industrial Design 1

Industrial design model making using wood and other materials. Proper and safe use of tools. Craftsmanship, joining, shaping and finishing of finished design models, prototypes and finished objects.

Prerequisites & Notes: ENGR 104 or concurrent; ID Pre-major Phase I registration.

Credits: 4

Grade Mode: Letter

ID 220 - Sophomore Industrial Design 2

Industrial design studio course explores the use of different media and techniques to create innovative solutions for two- and three-dimensional design problems. Emphasis on fundamental design principles, ability to express new ideas, and awareness of the consumer market.

Prerequisites & Notes: ID 120 and ID 210.

Credits: 5

Grade Mode: Letter

ID 230 - Sophomore Industrial Design 3

Industrial design studio course explores the use of different media and techniques to create innovative solutions for two- and three-dimensional design problems. Emphasis on fundamental design principles, ability to express new ideas, and awareness of the consumer market.

Prerequisites & Notes: ID 220

Credits: 5

Grade Mode: Letter

ID 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ID 310 - Perspective and Rendering 1

First half of course explores perspective systems, shadow construction, reflections and other aspects of technical drawing as they apply to industrial

design. Second half applies perspective skills to realistic marker rendering of materials and products as well as rapid visualization as an informal means of expressing new ideas quickly.

Prerequisites & Notes: ID 110 or ART 110 or permission of instructor.

Credits: 4

Grade Mode: Letter

ID 320 - Industrial Design CAD Skills

Computer-intensive course focusing on solid modeling, advanced rendering techniques, vector-based drawing and raster-based image editing relevant to industrial design that will enable students to present and communicate product design concepts skillfully.

Prerequisites & Notes: ID 110 or ID 310 or DSGN 220.

Credits: 4

Grade Mode: Letter

ID 340 - Perspective and Rendering II

Advanced applications of perspective and rendering will include further exploration in various media including the use of computers in generating product images.

Prerequisites & Notes: ID 310 and acceptance into Industrial Design Program.

Credits: 4

Grade Mode: Letter

ID 350 - Junior Industrial Design I

Studio course work emphasizing a comprehensive design methodology which includes market research, problem identification, idea generation, implementation and presentation. Additional focus on a team approach.

Prerequisites & Notes: Acceptance into Industrial Design Program.

Credits: 5

Grade Mode: Letter

ID 360 - Junior Industrial Design II

Studio course work focusing on the development of a concept from the research phase to a three-dimensional model that is submitted to a national competition. Emphasis on concise project explanation, descriptive drawings and quality photo-documentation of model.

Prerequisites & Notes: ID 350

Credits: 5

Grade Mode: Letter

ID 370 - Junior Industrial Design III

Studio course work focusing on a collaborative project with industry. Assignments are jointly directed by the instructor and industry. Students are expected to relate to the industry sponsor as their client and perform their work professionally.

Prerequisites & Notes: ID 360

Credits: 5

Grade Mode: Letter

ID 380 - Materials for Design

Fundamentals of materials technology for industrial design majors. Properties and processing of materials with an emphasis on plastics.

Prerequisites & Notes: ENGR 104 and acceptance into the Industrial Design Program.

Credits: 5

Grade Mode: Letter

ID 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ID 410 - Senior Industrial Design I

Studio course work with a strong focus on art and craftsmanship. Through the design of various products, a validation of artistic expression and technical skills will be realized.

Prerequisites & Notes: ID 370

Credits: 5

Grade Mode: Letter

ID 420 - Senior Industrial Design II

Studio course work with a strong focus on the functional and engineering aspects of industrial design. Emphasis on manufacturability of products with importance placed on materials and processes.

Prerequisites & Notes: ID 410

Credits: 5

Grade Mode: Letter

ID 430 - Senior Industrial Design III

Studio course work with a strong focus on

ENGINEERING AND DESIGN

entrepreneurialism. Business aspects of industrial design are explored and applied in the design projects.

Prerequisites & Notes: ID 420

Credits: 5

Grade Mode: Letter

ID 440 - Industrial Design Internship

Faculty-supervised industrial design internship with an approved firm, manufacturer or design consultancy. The internship requires a total of 10 weeks (may be more than one internship) of practical application of industrial design skills in a business, public or industrial setting. Repeatable up to 12 credits, including original course.

Prerequisites & Notes: ID 370 or permission of instructor.

Credits: 4

Grade Mode: Letter

ID 450 - Industrial Design Internship Presentation

A formal presentation of a recently completed industrial design internship which includes a visual presentation and report. Repeatable up to 3 credits, including original course.

Prerequisites & Notes: ID 440

Credits: 1

Grade Mode: Letter

ID 460 - UX Design Capstone

This course is the culminating multidisciplinary design project class for the User Experience (UX) Design Minors. Students representing each discipline, psychology, computer science, industrial design and graphic design, come together to design a user experience. This course incorporates all of their skills and knowledge together into a realistic project. The process will include: team management, problem discovery, design research, concept development, prototyping, user testing and development. It may be sponsored by industry and guided by UX professionals.

Prerequisites & Notes: Acceptance into UX Design Minor.

Credits: 4

Grade Mode: Letter

Industrial Technology- Vehicle Design Courses

VHCL 260 - Vehicle Systems I

An introduction to the vehicle design process with a focus on vehicle system engineering. The course provides an overview of vehicle systems including powertrain, suspension, and brakes. Students will compare and contrast potential power systems for vehicles including Otto, Clerk, Diesel, Wankel, Rankine and Sterling engine cycles in addition to electric and fuel cell systems. The course features a lab component in which students will assemble various engine components, operate an engine and work on vehicle projects.

Prerequisites & Notes: MATH 124 or concurrent

Credits: 5

Grade Mode: Letter

VHCL 261 - Vehicle Systems II

Model, design and analyze machine elements with respect to vehicles. Principles and practices of mechanical transmission of power. Machine elements such as bearings, cams, gear drive, chain drive, belt drive, overrunning clutches, universal joints, synchromesh transmissions and limited slip differentials are covered in theory and practice. Introduce manufacturing skills such as machining and casting.

Prerequisites & Notes: VHCL 260; ENGR 104; ENGR 170; ENGR 214; MATH 124; MATH 125; PHYS 161; MFGE 261 or concurrent; MFGE 231 or concurrent; ENGR 225 or concurrent

Credits: 5

Grade Mode: Letter

VHCL 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

VHCL 320 - Vehicle Electronics

Basic principles of automotive communication networks and control systems, operation and calibration of sensors and actuators, vehicle wiring harness design considerations, wiring diagrams, diagnostics and troubleshooting.

Prerequisites & Notes: VHCL 261; PHYS 162

Credits: 4

Grade Mode: Letter

VHCL 360 - Vehicle Design I

Vehicle design process including packaging, ergonomics, and chassis design. Suspension design including vehicle dynamics, tire parameters, force-base analysis, spring rates, dampers and anti-roll bars.

Prerequisites & Notes: VHCL 261; MFGE 231; MFGE 261; ENGR 225.

Credits: 5

Grade Mode: Letter

VHCL 361 - Vehicle Design II

Advanced body design, ergonomics, aerodynamics, climate control, aesthetic design of automobile interiors and exteriors. Practical work includes wind tunnel model construction and testing.

Prerequisites & Notes: VHCL 360; ENGR 225

Credits: 5

Grade Mode: Letter

VHCL 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

VHCL 491 - Capstone 1: Powertrain and Project Definition

Engine design, modeling, analysis, and development. Calculate engine efficiency and power. Design and fabricate engine components such as cylinder heads and blocks. Development including dynamometer testing and airflow port development. Capstone project definition.

Prerequisites & Notes: VHCL 361; PHYS 350

Credits: 5

Grade Mode: Letter

VHCL 492 - Capstone 2: Emissions, Alternative Fuels and Project Fabrication

Emission control strategies for spark ignition and compression ignition engines. Alternative fuels including natural gas, biomethane, hydrogen, biodiesel, ethanol and propane. Natural gas station infrastructure. Capstone project fabrication process is monitored within this course.

Prerequisites & Notes: VHCL 491; CHEM 121

Credits: 5

Grade Mode: Letter

VHCL 493 - Capstone 3: Project Implementation and Documentation

Testing, implementation and documentation of a vehicle or fuel related component or system.

Prerequisites & Notes: VHCL 492

Credits: 2

Grade Mode: Letter

VHCL 495 - Directed Research in Vehicle Technology

Advanced study in problems chosen and conducted under supervision. Repeatable 3 times to a maximum of 9 credits, including original course. This may include research and development including powertrain, fuels, materials, vehicle systems or components. This may include a multi-disciplinary, team-based project.

Prerequisites & Notes: VHCL 261

Credits: 1-4

Grade Mode: Letter

Manufacturing Engineering Courses

MFGE 231 - Introduction to Metal Manufacturing Processes

An introduction to the manufacturing processes used to cast, form, cut, and join metal when creating parts per an engineering drawing. Students will be required to complete a fabrication project using machining processes. Includes an introduction to metrology and CNC.

Prerequisites & Notes: ENGR 170 or ID 380; MFGE 261 or concurrent.

Credits: 4

Grade Mode: Letter

MFGE 261 - Introduction to Computer-Aided Design

Introduction to parametric, Computer-Aided Design. Covers sketching and feature-based modeling in the creation of 3D parts for engineered products, assembly modeling and drafting. Emphasizes modeling of machined and plastic components and generation of drawings with proper dimensioning and GDT. Introduction to fabrication using rapid prototyping.

Prerequisites & Notes: ENGR 104

Credits: 4

Grade Mode: Letter

MFGE 300 - Directed Independent Study

ENGINEERING AND DESIGN

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

MFGE 332 - Introduction to CAM and CNC

Introduces the application of Computer-Aided Manufacturing and Computer Numerical Control for fabricating parts using machining processes. Includes manual part programming principals, process planning, cutting tool selection, fixturing, part program generation using CAM, verification of NC programs, set-up and operation of CNC equipment.

Prerequisites & Notes: MFGE 231 and MFGE 261

Credits: 4

Grade Mode: Letter

MFGE 333 - Design for Manufacture

Introduces the consideration of the capabilities of manufacturing processes during product design. Includes impact on geometry, material properties, surface finish and dimensional accuracy. Foundry, forming, joining and machining processes will be explored. Project work will compare parts designed for different process scenarios and require generating appropriate fabrication documentation using CAD.

Prerequisites & Notes: MFGE 231 and MFGE 261

Credits: 4

Grade Mode: Letter

MFGE 341 - Quality Assurance

Quality Assurance as applied to manufacturing operations. Practical applications of Lean Six Sigma and Statistical Control. Proper use of inspection equipment.

Prerequisites & Notes: MATH 345

Credits: 4

Grade Mode: Letter

MFGE 342 - Data Analysis and Design of Experiments

A practical approach to Design of Experiments and the analysis of data, including analysis of variance, linear, multiple linear, and nonlinear regression. Emphasis on the proper use and interpretation of the techniques in solving engineering problems rather than on theoretical development.

Application of these tools using statistical software.

Prerequisites & Notes: MFGE 341

Credits: 4

Grade Mode: Letter

MFGE 362 - CAD Modeling and Analysis Using Surfaces

Introduces advanced CAD modeling techniques using surface based features and operations. Demonstrates use of surfaces to model both homogeneous solid and composite products. Introduces the use of a CAD model of a composite part for structural analysis using FEA.

Prerequisites & Notes: ENGR 225 and MFGE 261

Credits: 4

Grade Mode: Letter

MFGE 381 - Manufacturing Process Planning

Organization of people, equipment, and workstations to create manufacturing systems that are safe and efficient. Basic principles of lean manufacturing. Fundamentals of material needs estimation. Design for assembly principles. Ergonomic design of workstations to fit the human body. Fundamentals of industrial safety, including OSHA compliance, proper materials handling and storage procedures, and safety program management.

Prerequisites & Notes: MFGE 231; MFGE 261; MATH 345 or concurrent

Credits: 4

Grade Mode: Letter

MFGE 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

MFGE 434 - Advanced CAM and CNC

The study of tool path generation using CAM for the machining of freeform surfaces. Includes exposure to techniques for both 3-axis and 5-axis machining. Introduction to the kinematics of 5-axis machines and their simulation for the purposes of NC verification. Overview of post-processor design. Lab experiences include the programming, setup and operation of CNC machine tools.

Prerequisites & Notes: MFGE 332 and MFGE 362

Credits: 4

Grade Mode: Letter

MFGE 453 - Industrial Robotics

An introduction to the fundamentals of robotics, including kinematics and inverse kinematics, path and trajectory planning, robot programming for industrial applications, design and development of robot cells, robot safety, and machine vision systems.

Prerequisites & Notes: MFGE 332 and EE 352

Credits: 4

Grade Mode: Letter

MFGE 463 - Design of Tooling

Design of tooling used in manufacturing processes to include, but not limited to, inspection gages, fixtures, jigs, assembly fixtures, and tooling for forming processes.

Prerequisites & Notes: MFGE 332; MFGE 333; MFGE 381

Credits: 4

Grade Mode: Letter

MFGE 464 - Modeling and Analysis of Mechanisms

An advanced, CAD based approach to the design and analysis of mechanisms. Provides a study of the kinematics of common mechanisms found in manufacturing environments. These include linkages, cams, cranks, power screws and gear and belt drives. Treatment of topics is tailored to provide the ability to validate results generated using CAD based simulations. Develops the ability as part of a team to create and manage large assembly models with moving components. Emphasizes the use of top-down techniques. Introduction to PDM.

Prerequisites & Notes: PHYS 161; MFGE 261

Credits: 4

Grade Mode: Letter

MFGE 465 - Machine Design

Introduces the sizing and selection of machine components to satisfy static and dynamic loading conditions. Includes a study of shafts, power screws, welded and bolted joints, bearings, springs and brakes and clutches, gearing and flexible mechanical components. Project work will incorporate the use of CAD tools to automate the design process for a machine, model its 3D component geometry, and generate engineering drawings. Validation of results obtained from Finite Element Analysis.

Prerequisites & Notes: MFGE 261; ENGR 225; PHYS 163.

Credits: 4

Grade Mode: Letter

MFGE 466 - CAD Automation

Introduces programming techniques that automate the task of building and manipulating 3D parametric part and assembly CAD models. Requires use of Visual Basic for Applications and the VBA programming interface for a state-of-the-art CAD system, in conjunction with other VBA supported software applications such as Excel. Assignments and project work illustrate use of these techniques for creating customized CAD tools that automate problem solving for engineering design and manufacturing applications.

Prerequisites & Notes: CSCI 140 or CSCI 141; MFGE 332; MFGE 362

Credits: 4

Grade Mode: Letter

MFGE 491 - Project Research, Planning and Ethics

First in the series of three capstone project courses. Explores professional and ethical responsibilities, discussion concerning contemporary issues, and the impact of engineering solutions in a global context. Project planning and research skills are also discussed and practiced.

Prerequisites & Notes: ENG 101; MFGE 342

Credits: 4

Grade Mode: Letter

MFGE 492 - Manufacturing Project Proposal

The second course in the capstone project sequence. Takes project specifications defined in the first course and furthers the planning and design work necessary to support project implementation in the final course. Experience culminates in the writing of a formal project proposal that clearly defines expected project results, resource requirements and project milestones.

Prerequisites & Notes: MFGE 491

Credits: 2

Grade Mode: Letter

MFGE 493 - Manufacturing Project Implementation

The third and final course in the capstone project sequence. Implements a plan to design, analyze and/or fabricate a process, product, tool, piece of equipment or enhancement to a manufacturing

ENGINEERING AND DESIGN

system. The results of the project will be fully documented and communicated through journaling, a final report, a poster and an oral presentation.

Prerequisites & Notes: MFGE 492

Credits: 4

Grade Mode: Letter

MFGE 495 - Directed Research in Manufacturing

Research under supervision within one of the areas of manufacturing. Repeatable twice, up to 8 credits, including original course.

Prerequisites & Notes: MFGE 342

Credits: 1-4

Grade Mode: Letter

Plastics and Composite Engineering Courses

PCE 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

PCE 331 - Injection Molding

Theory and practice of injection molding. Analysis of machine functions, processing parameters, production tooling, process control systems, quality assurance, automation, rheology of polymers, heat transfer. Extensive lab experience.

Prerequisites & Notes: PCE 371; PHYS 163; CHEM 122

Credits: 4

Grade Mode: Letter

PCE 371 - Introduction to Plastics Materials and Processes

Polymer science and analysis of basic plastics materials; experience in product design, tooling, and processing of thermoplastic.

Prerequisites & Notes: ENGR 104; ENGR 170

Credits: 5

Grade Mode: Letter

PCE 372 - Introduction to Composite Materials and Processes

Polymer and reinforcement systems; material testing; mold design and development; laboratory involvement in reinforced plastics production processes.

Prerequisites & Notes: PCE 371

Credits: 5

Grade Mode: Letter

PCE 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

PCE 402 - Cooperative Internship

Supervised study of technical problems associated with production, design, materials, and/or management in business and industry. Repeatable up to 8 credits, including original course.

Prerequisites & Notes: PCE 371

Credits: 4

Grade Mode: Letter

PCE 431 - Advanced Materials and Processing

Principles of polymer formulation and modification. Additives and modifiers, compounding processes and equipment. Use of experimental design in compound formulation.

Prerequisites & Notes: PCE 471; MFGE 342

Credits: 4

Grade Mode: Letter

PCE 461 - Tooling for Plastics Processing

Design and construction of various types of production molds that are used for processing plastics. Product design in relationship to molding techniques and various techniques and materials used to construct the molds are the major units of study. Extensive lab work.

Prerequisites & Notes: MFGE 332; PCE 331

Credits: 4

Grade Mode: Letter

PCE 471 - Advanced Materials and Characterization

Structure, properties, processing and applications of engineering polymers. Advanced analysis and testing of polymers for engineering applications.

Prerequisites & Notes: PCE 331; CHEM 308
Credits: 4
Grade Mode: Letter

PCE 472 - Advanced Composites

Advanced polymer matrix and reinforcement systems; structural design and analysis; advanced composites processes and automated production systems.

Prerequisites & Notes: PCE 372; MFGE 362
Credits: 4
Grade Mode: Letter

PCE 491 - Project Research, Planning, and Ethics

First in the series of three capstone project courses. Explores profession and ethical responsibilities, discussion concerning contemporary issues, and the impact of engineering solutions in a global context. Project planning and research skills are also discussed and practiced.

Prerequisites & Notes: ENG 101; MFGE 342 or concurrent
Credits: 4
Grade Mode: Letter

PCE 492 - Plastics Capstone Project Proposal

The second course in the capstone project sequence. Takes project specifications defined in the first course and furthers the planning and design work necessary to support project implementation in the final course. Experience culminates in the writing of a formal project proposal that clearly defines expected project results, resource requirements and project milestones.

Prerequisites & Notes: MFGE 342; PCE 471; PCE 491
Credits: 2
Grade Mode: Letter

PCE 493 - Plastics Capstone Project Implementation

The third and final course in the capstone project sequence. Implements a plan to design, analyze and/or fabricate a process, material, product, tool, piece of equipment or enhancement to a manufacturing system. The results of the project will be fully documented and communicated through journaling, a final report, a poster and an

oral presentation.

Prerequisites & Notes: PCE 492
Credits: 4
Grade Mode: Letter

PCE 495 - Directed Research in Plastics and Composites Engineering

Selection, development and research, under supervision, within one of the areas of plastics and composites engineering. Repeatable 2 times to a maximum of 8 credits, including original course.

Prerequisites & Notes: PCE 371
Credits: 1-4
Grade Mode: Letter

Geology

Introduction

The natural setting of Western Washington University adjacent to the Cascade Mountains and Salish Sea provides an ideal situation for study of a wide variety of geologic problems.

Faculty

At the present time the department consists of 13 faculty members who have a broad range of backgrounds covering the entire field of geology. There are about 180 undergraduate students declaring geology majors and approximately 30 graduate students in the department.

BERNARD A. HOUSEN (1997) Chair and Professor. BS, University of Washington; MS, PhD, University of Michigan.

COLIN B. AMOS (2012) Assistant Professor. BS, University of California - Davis; PhD, University of California - Santa Barbara

JACQUELINE CAPLAN-AUERBACH (2006) Associate Professor. BA, Yale University; PhD, University of Hawaii-Manoa.

DOUGLAS H. CLARK (1998) Associate Professor. BS, MS, Stanford University; PhD, University of Washington.

SUSAN M. DEBARI (1998) Professor. BA, Cornell University; PhD, Stanford University.

BRADY Z. FOREMAN (2014) Assistant Professor. BA, Macalester College; MS University of Michigan; PhD University of Wyoming.

EDWARD E. GEARY (2013) Professor. BS, Stanford University; MS, PhD, Cornell University.

THOR A. HANSEN (1985) Professor. BS, George Washington University; PhD, Yale University.

SCOTT R. LINNEMAN (2000) Professor. BA, Carleton College; PhD, University of Wyoming.

ROBERT J. MITCHELL (1996) Professor. BS, University of Wisconsin-River Falls; MS, Michigan Technological University; PhD, Michigan Technological University.

SEAN R. MULCAHY (2015) Assistant Professor. BS, Virginia Tech; PhD, University of California, Davis.

MELISSA R. RICE (2014) Assistant Professor. BA, Wellesley College; MS, PhD, Cornell University.

ELIZABETH R. SCHERMER (1990) Professor. BS, Stanford University; PhD, Massachusetts Institute of Technology.

PETE STELLING (2011) Assistant Professor. BA, Western State College, Colorado; PhD, University of Alaska-Fairbanks.

Research Associates

CLARK M. BLAKE (1993) AB, University of California-Berkeley; PhD, Stanford University.

RUSSELL F. BURMESTER (1978). BS, Stanford University; MA, University of Texas-Austin; PhD, Princeton University.

ERIC E. GROSSMAN (2011) BA, University of California, Berkeley, MS, PhD, University of Hawaii.

GEORGE MUSTOE (2014) BS, MS, Western Washington University.

BRIAN RUSK (2011) BS, James Madison University, PhD, University of Oregon.

Adjunct Faculty

DAVID TUCKER (2006) BS, MS, Western Washington University.

PETER WILLING (1997) BA, University of Washington; MS, PhD, Cornell University.

Declaration of Major

Phase I: Students can declare as a Phase I major at any time as long as they are in good academic standing. Students can declare and complete a Geology minor, a BA in Geology, or a BA in Education Earth Science or Earth Science/General Science without advancing to Phase II.

Students who wish to earn a BS Geology or BS Geophysics degree must complete a set of preparatory courses for admission into these degree programs. Students must earn a cumulative GPA of 2.0 or higher in this set of preparatory courses, and be in good academic standing to qualify for admission. Priority for admission will be given to students who have a GPA of 2.5 or higher in these preparatory courses; students with a lower GPA will be admitted on a space-available basis.

Preparatory courses for BS Geology:

- GEOL 211, GEOL 212 and GEOL 213
- one of GEOL 306, GEOL 310, GEOL 318, or GEOL 352
- CHEM 121, MATH 124

Preparatory courses in BS Geophysics:

- GEOL 211, GEOL 352
- PHYS 161, PHYS 162
- MATH 124

Geologist License Education Requirements

A professional license is required by law to practice geology in Washington State. The first step toward licensure is passing the National Association of State Boards of Geology (ASBOG) Fundamentals of Geology exam. To qualify to take ASBOG's

Fundamentals of Geology exam you must satisfy certain educational requirements. If you obtain a B.S. degree in geology from WWU your educational requirements are met. If you choose a B.A. in geology or a B.S. in geophysics degree you must have a minimum of 36 credits in specific content areas, so please see your departmental advisor for planning if you take one of these degrees and wish to pursue a professional license.

Departmental Honors and Distinctions

BA or BS students and students in the University Honors program who have completed at least 4 credits of GEOL 490 and have a cumulative GPA of 3.50 or higher meet the requirements for departmental honors. Those students who have completed at least 4 credits of GEOL 490 and have a cumulative GPA higher than 3.20 meet the requirements for departmental distinction.

Other Departmental Information

Facilities and Equipment

Geology is a science that studies the earth, including its surface, interior and history and the processes that have altered it through time. It embraces investigation of the natural environment both in the field and in the laboratory. The Geology Department occupies laboratories, classrooms and offices constructed in 1976 in the Environmental Studies Center. Geology laboratory facilities and equipment are available for Geographic Information System and computational geology, X-ray diffraction, atomic absorption, sedimentation, air photo interpretation, flume and wave tank studies, paleomagnetic analysis, near-surface geophysics, seismology, geochemistry, and petrography, x-ray fluorescence, laser ablation-ICP-MS. Additional equipment and facilities are available through the Geology Department's affiliation with the Advanced Materials Science and Engineering Center (AMSEC).

Programs

Bachelor of Arts

Geology, BA

Department of Geology, College of Science and Engineering

64-76 credits

Objectives of the department are varied, including preparation of undergraduate and graduate students for graduate school and careers as professional geoscientists and also preparation of earth science teachers at the primary and secondary levels.

A wide variety of geologic phenomena in the adjacent Cascade Range and the marine environment of Salish Sea provide a broad spectrum of geologic features for study.

The department offers BA, BAE, BS and MS degrees plus specialized courses in the following subjects: economic geology; environmental geology; geochemistry; geomorphology; geophysics; glacial geology; hydrology; paleomagnetism; paleontology; petrology; planetary geology; sedimentation; seismology; stratigraphy; and structure and tectonics.

Student Involvement in Research

The faculty in the Geology Department are active in a wide variety of ongoing research projects that frequently involve undergraduate and graduate students in special projects and thesis projects or provide employment. Some of this research is funded or partially supported from grants to individual faculty members from the National Science Foundation, U.S. Geological Survey, National Parks Commission, Office of Ecology and geological-related companies. Many of these projects are in the Western Washington region, others include investigations in other parts of the United States, Canada, overseas, or at sea as part of larger oceanographic projects.

Writing Proficiency Course Guidelines

The geology department has a multi-tiered system for upper division writing proficiency courses. Courses are assigned writing proficiency points based on the percentage of the course grade that is determined by writing assignments. A minimum of three writing proficiency points in approved upper-division writing proficiency courses at WWU with a minimum grade of C- is required.

GEOLOGY

Introduction/What is the Study of Geology?

A Geoscientist is someone who studies the Earth's physical makeup and history. Geology is the science that provides the key to finding new sources of useful Earth materials and to understanding Earth processes that affect our lives. Geoscientists provide basic information to society for solving problems and establishing policy for resource management, environmental protection, public health, safety and welfare.

Geoscientists are curious about the Earth. How was it formed? How is it changing? What effects will shrinking glaciers have on the oceans and climate? How do islands form? What makes a continent move? Why did the dinosaurs become extinct? What makes a mountain?

Geoscientists are concerned about the Earth. How severe will the global warming trend be? How and where should we dispose industrial wastes? How can we fill society's growing demands for energy and conserve natural resources for future generations?

Geoscientists enjoy the Earth. It is an outdoor laboratory filled with opportunities to observe Earth processes in action. By applying knowledge of forces that shape the Earth, Geoscientists seek to reconstruct the past and anticipate the future.

Why Consider a Geology Major?

Do you like to know why and how things work? Do you enjoy the outdoors? Are you concerned about the environment? Are you interested in travel? Do you like to analyze things? Are science and nature among your favorite subjects? Have you ever wondered why the Earth appears as it does? If you answer "yes" to most of these questions the geosciences could offer a good career for you.

The BA degree in geology is designed for students who want to study geology, but who are not intending to work as professional geologists. This degree is appropriate for someone interested in pursuing a liberal arts education with a less rigorous course of study in geology and supporting sciences than students in the BS degree. Thus students are allowed more flexibility for additional courses that complement their goals. An accompanying minor in one of the sciences or in mathematics is recommended.

How to Declare (Admission and Declaration Process):

Phase I: Students can declare as a Phase I major at any time as long as they are in good academic standing. Students can declare and complete a Geology minor, a BA in Geology, or a BA in Education Earth Science or Earth Science/General Science without advancing to Phase II.

Students who wish to earn a BS Geology or BS Geophysics degree must complete a set of preparatory courses for admission into these degree programs. Students must earn a cumulative GPA of 2.0 or higher in this set of preparatory courses, and be in good academic standing to qualify for admission. Priority for admission will be given to students who have a GPA of 2.5 or higher in these preparatory courses; students with a lower GPA will be admitted on a space-available basis.

Preparatory courses for BS Geology:

- GEOL 211, GEOL 212 and GEOL 213
- one of GEOL 306, GEOL 310, GEOL 318, or GEOL 352
- CHEM 121, MATH 124

Preparatory courses in BS Geophysics:

- GEOL 211, GEOL 352
- PHYS 161, PHYS 162
- MATH 124

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- CHEM 121 - General Chemistry I
- Choose one of the following options:
 - GEOL 211 - Physical Geology
 - or
 - GEOL 101 - Introduction to Geology
 - and
 - GEOL 211A - Physical Geology Review
 - Or
 - HNRS 212 - Colloquium in Geology
 - or
 - SCED 202 - Matter and Energy in Earth Systems
 - and
 - GEOL 211A - Physical Geology Review
- GEOL 212 - Historical Geology
- GEOL 213 - GIS in Geology
 - or
 - ENVS 320 - GIS I: Introduction to Geographic Information Science
- GEOL 311 - Earth Materials
 - or
 - GEOL 306 - Mineralogy
 - and
 - GEOL 406 - Igneous and Metamorphic Petrology
- GEOL 310 - Geomorphology
- MATH 124 - Calculus and Analytic Geometry I
 - or
 - MATH 240 - Introduction to Statistics
- 15-19 credits under advisement from geology courses 300 level and above for a total of 45 credits.
- Choose either:
 - PHYS 114 - Principles of Physics I
 - PHYS 115 - Principles of Physics II
 - or
 - PHYS 161 - Physics with Calculus I
 - PHYS 162 - Physics with Calculus II
- Two additional courses from the following:
 - MATH 125 - Calculus and Analytic Geometry II
 - CHEM 122 - General Chemistry II
 - CHEM 123 - General Chemistry III
 - BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
 - PHYS 116 - Principles of Physics III
 - PHYS 163 - Physics with Calculus III
 - ASTR 315 - The Solar System
 - ENVS 327 - The Soil Environment
 - CSCI 140 - Programming Fundamentals in C++
 - CSCI 141 - Computer Programming I

GEOLOGY

Departmental Honors and Distinctions

BA or BS students and students in the University Honors program who have completed at least 4 credits of GEOL 490 and have a cumulative GPA of 3.50 or higher meet the requirements for departmental honors. Those students who have completed at least 4 credits of GEOL 490 and have a cumulative GPA higher than 3.20 meet the requirements for departmental distinction.

Bachelor of Arts in Education

Earth Science — Elementary, BAE

Department of Geology, College of Science and Engineering

54-61 credits

Introduction

A geoscientist is someone who studies the Earth's physical makeup and history. Geology is the science that provides the key to finding new sources of useful Earth materials and to understanding Earth processes that affect our lives. Geoscientists provide basic information to society for solving problems and establishing policy for resource management, environmental protection, public health, safety and welfare.

Geoscientists are curious about the Earth. How was it formed? How is it changing? What effects will shrinking glaciers have on the oceans and climate? How do islands form? What makes a continent move? Why did the dinosaurs become extinct? What makes a mountain?

Geoscientists are concerned about the Earth. Is there a global warming trend? How and where should we dispose industrial wastes? How can we fill society's growing demands for energy and conserve natural resources for future generations.

This major satisfies the academic major requirement for teacher certification with an endorsement in elementary education and must be accompanied by the professional preparation program in Elementary Education offered through Woodring College of Education.

Why Consider an Earth Science - Elementary Major?

Do you like to know why and how things work? Do you enjoy the outdoors? Are you concerned about the environment? Are you interested in travel? Do you like to analyze things? Are science and nature among your favorite subjects? Have you ever wondered why the Earth appears as it does? If you answer "yes" to most of these questions the geosciences may be the career for you.

How to Declare (Admission and Declaration Process):

This major satisfies the academic major requirement for teacher certification with an endorsement in elementary education and must be accompanied by the professional preparation program in elementary education. See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements. This major does not lead to an endorsement in Earth & Space Science.

For more information on the Geology Department go to Declaration of Major.

Some 300-level geology courses give preference to majors during Phase I of registration, so it is important to declare a major as early as possible.

Students are admitted to the BA or BS major once they have completed GEOL 211. (NOTE: Grades of D-, D, or D+ are not acceptable for major and supporting courses.) Students must apply to the department for admission to the major.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Requirements

- CHEM 121 - General Chemistry I
- GEOL 212 - Historical Geology
- GEOL 252 - The Earth and Its Weather
- GEOL 340 - Geological Oceanography
- MATH 114 - Precalculus I
- SCED 201 - Matter and Energy in Physical Systems
- SCED 202 - Matter and Energy in Earth Systems
- SCED 203 - Matter and Energy in Life Systems
- SCED 204 - Matter and Energy in Chemical Systems
- SCED 492 - Field Experience in Middle School Science
- One course from:
 - GEOL 211 - Physical Geology
 - GEOL 211A - Physical Geology Review
- Choose either:
 - GEOL 311 - Earth Materials
 - Or the following pair of courses
 - GEOL 306 - Mineralogy AND
 - GEOL 406 - Igneous and Metamorphic Petrology
- One course from:
 - PHYS 101 - Physics Analysis
 - PHYS 104 - Physics Applications
- One course from:
 - ASTR 103 - Introduction to Astronomy
 - ASTR 113 - Sun, Moon, and Planets

Additional Requirements

Elementary Education Professional Program Requirements (100-103 credits)

Department of Elementary Education, Woodring College of Education

Introduction

GEOLOGY

Students seeking a bachelor's degree with teacher certification and an endorsement in elementary education must complete the GURs, an approved academic major, and the professional education course work listed below.

Admission and Declaration Process

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Professional Studies Core (22 credits)

- ELED 303 - Educational Psychology - Development and Learning
- ELED 310 - Education, Culture, and Equity
- ELED 370 - Introduction to Teaching
- I T 344 - Foundations of Technology in Teaching and Learning
- I T 442 - Digital Decisions: Technology for Educators
- SPED 364 - Teaching Each Student

Elementary Program — Methods, Curriculum Content, and Field Experiences (78-81 credits)

- One course from:
 - ART 398 - Integrated Arts for Elementary Educators
 - DNC 398 - Integrated Arts for Elementary Educators
 - MUS 398 - Integrated Arts for Elementary Educators
 - THTR 398 - Integrated Arts for Elementary Educators
- One course from:
 - ART 380 - Art Educating the Child
 - DNC 433 - Creative Movement for Educators With Lab
 - MUS 361 - Music for Elementary Teachers
 - THTR 350 - Theatre for Youth
 - THTR 351 - Creative Pedagogy
- ELED 425 - Social Studies for the Elementary School
- ELED 470 - Developing Teaching
- ELED 471 - Documenting Teaching
- ELED 480 - Literacy: Beginning Communicators
- ELED 481 - Literacy: Fluent Communicators

GEOLOGY

How to Declare (Admission and Declaration Process):

The geology department recommends for teaching endorsement those students who have satisfactorily completed requirements for the bachelor's degree in education with 1) an earth science secondary major or 2) a geology minor combined with a major in one of the other physical or biological sciences.

This program must be accompanied by the professional preparation program in secondary education. See the Secondary Education section of this catalog for program admission, completion, and teacher certification requirements.

This major leads to an endorsement in Earth & Space Science.

Go to the Geology Department website for more information on Declaration of Major.

Some 300-level geology courses give preference to majors during Phase I of registration, so it is important to declare a major as early as possible.

Phase I: Students can declare as a Phase I major at any time as long as they are in good academic standing. Students can declare and complete a Geology minor, a BA in Geology, or a BA in Education Earth Science or Earth Science/General Science without advancing to Phase II.

Grade Requirements

Students must earn a grade of C (2.0) or better in the secondary education professional program and in all courses required for the endorsement.

Requirements

- CHEM 121 - General Chemistry I
- CHEM 122 - General Chemistry II
- GEOL 212 - Historical Geology
- GEOL 213 - GIS in Geology
- GEOL 252 - The Earth and Its Weather
- GEOL 310 - Geomorphology
- GEOL 340 - Geological Oceanography
- MATH 240 - Introduction to Statistics
- PHYS 114 - Principles of Physics I
- PHYS 115 - Principles of Physics II
- SCED 370 - Science and Society
- SCED 481 - Fundamentals of Teaching Science
- SCED 491 - Methods in Secondary Education for Science Teachers
- One course from:
 - GEOL 211 - Physical Geology
 - GEOL 211A - Physical Geology Review
 - HNRS 212 - Colloquium in Geology
- Choose either:
 - GEOL 311 - Earth Materials
 - or
 - GEOL 306 - Mineralogy
 - and
 - GEOL 406 - Igneous and Metamorphic Petrology
- One course from:
 - ASTR 103 - Introduction to Astronomy
 - ASTR 113 - Sun, Moon, and Planets
- Choose either:
 - MATH 114 - Precalculus I
 - and
 - MATH 115 - Precalculus II
 - or complete MATH 124 - Calculus and Analytic Geometry I
- Electives (choose two of the following):

GEOL 303 - Dinosaurs and Their Environment
 GEOL 308 - Earthquakes
 GEOL 309 - Volcanology
 GEOL 314 - Engineering Geology
 GEOL 316 - Research in Marine Paleontology
 GEOL 318 - Structural Geology
 GEOL 407 - Advanced Petrography
 GEOL 414 - Geology of Washington
 GEOL 415 - Sedimentology and Stratigraphy
 GEOL 430 - Image Interpretation
 GEOL 440 - Glacial Geology

Additional Requirements

Secondary Education Undergraduate and Post-Baccalaureate Professional Program (58 credits)

- SEC 303 - Teaching Adolescents: Development and Identity
- SEC 310 - Education, Culture, and Equity
- SEC 410 - Dynamics of Teaching
- SEC 411 - Philosophical Foundations of Education
- SEC 425 - Developmental Reading, Writing and Learning in Secondary Schools
- SEC 430 - Secondary School Methods I - Instructional Strategies, Daily Planning, and Standards
- SEC 431 - Secondary School Methods II-Assessment and Long Term Planning
- SEC 432 - Secondary School Methods III - Management, Motivation and Discipline
- SEC 433 - Teaching and Learning Laboratory
- SEC 435 - Secondary Practicum I
- SEC 436 - Secondary Practicum II
- I T 444 - Classroom Use of Instructional Technology (Secondary)
- SEC 495 - Internship - Secondary
- SPED 363 - Secondary Students With Special Needs

Departmental Honors

BA or BS students and students in the University Honors program who have completed at least 4 credits of GEOL 490 and have a cumulative GPA of 3.50 or higher meet the requirements for departmental honors. Those students who have completed at least 4 credits of GEOL 490 and have a cumulative GPA higher than 3.20 meet the requirements for departmental distinction.

Earth Science/General Science — Secondary, BAE

Combined major offered by the Department of Geology, College of Science and Engineering and the Department of Science Education, College of Science and Engineering.

94-108 credits

Introduction

A geoscientist is someone who studies the Earth's physical makeup and history. Geology is the science that provides the key to finding new sources of useful Earth materials and to understanding Earth processes that affect our lives. Geoscientists provide basic information to society for solving problems and establishing policy for resource management, environmental protection, public health, safety and welfare.

Geoscientists are curious about the Earth. How was it formed? How is it changing? What effects will shrinking glaciers have on the oceans and climate? How do islands form? What makes a continent move? Why did the dinosaurs become extinct? What makes a mountain?

GEOLOGY

Geoscientists are concerned about the Earth. Is there a global warming trend? How and where should we dispose industrial wastes? How can we fill society's growing demands for energy and conserve natural resources for future generations.

Geoscientists enjoy the Earth. It is an outdoor laboratory filled with opportunities to observe Earth processes in action. By applying knowledge of forces that shape the Earth, geoscientists seek to reconstruct the past and anticipate the future.

This major must be accompanied by the professional preparation program in secondary education offered through Woodring College of Education. Courses required for a state teaching endorsement must be completed with a grade of C (2.0) or better.

Why Consider an Earth Science/General Science - Secondary Major?

Do you like to know why and how things work? Do you enjoy the outdoors? Are you concerned about the environment? Are you interested in travel? Do you like to analyze things? Are science and nature among your favorite subjects? Have you ever wondered why the Earth appears as it does? Would you like to share this information with middle or high school students? If you answer "yes" to most of these questions the geosciences could offer a good career for you.

How to Declare (Admission and Declaration Process):

The geology department recommends for teaching endorsement those students who have satisfactorily completed requirements for the bachelor's degree in education with 1) an earth science secondary major or 2) a geology minor combined with a major in one of the other physical or biological sciences.

This program must be accompanied by the professional preparation program in secondary education. See the Secondary Education section of this catalog for program admission, completion, and teacher certification requirements.

This major leads to recommendation for teaching endorsements in Earth & Space Science and Science.

For more information on the Geology Department go to Declaration of Major.

Some 300-level geology courses give preference to majors during Phase I of registration, so it is important to declare a major as early as possible.

Phase I: Students can declare as a Phase I major at any time as long as they are in good academic standing. Students can declare and complete a Geology minor, a BA in Geology, or a BA in Education Earth Science or Earth Science/General Science without advancing to Phase II.

Grade Requirements

Students must earn a grade of C (2.0) or better in the secondary education professional program and in all courses required for the endorsement.

Requirements

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 206 - Introduction to Organismal Biology
- CHEM 121 - General Chemistry I
- CHEM 122 - General Chemistry II
- CHEM 123 - General Chemistry III
- GEOL 212 - Historical Geology
- GEOL 213 - GIS in Geology
- GEOL 252 - The Earth and Its Weather
- GEOL 310 - Geomorphology
- GEOL 340 - Geological Oceanography
- MATH 240 - Introduction to Statistics
- SCED 370 - Science and Society
- SCED 481 - Fundamentals of Teaching Science
- SCED 491 - Methods in Secondary Education for Science Teachers
- One course from:

Bachelor of Science

Geology, BS

Department of Geology, College of Science and Engineering

101-114 credits

Introduction

A geoscientist is someone who studies the Earth's physical makeup and history. Geology is the science that provides the key to finding new sources of useful Earth materials and to understanding Earth processes that affect our lives. Geoscientists provide basic information to society for solving problems and establishing policy for resource management, environmental protection, public health, safety and welfare.

Geoscientists are curious about the Earth. How was it formed? How is it changing? What effects will shrinking glaciers have on the oceans and climate? How do islands form? What makes a continent move? Why did the dinosaurs become extinct? What makes a mountain?

Geoscientists are concerned about the Earth. How extensive is the global warming trend? How and where should we dispose industrial wastes? How can we fill society's growing demands for energy and conserve natural resources for future generations?

Geoscientists enjoy the Earth. It is an outdoor laboratory filled with opportunities to observe Earth processes in action. By applying knowledge of forces that shape the Earth, Geoscientists seek to reconstruct the past and anticipate the future.

Why Consider a Geology Major?

Do you like to know why and how things work? Do you enjoy the outdoors? Are you concerned about the environment? Are you interested in travel? Do you like to analyze things? Are science and nature among your favorite subjects? Have you ever wondered why the Earth appears as it does? If you answer "yes" to most of these questions the Geosciences could offer a good career for you.

This Bachelor of Science major is designed to provide students with a broad background in geology. Completion of this program will prepare students for a variety of careers in geology or graduate work in geology. This program is recommended for students who are preparing to become professional geologists and intend to enter industry or enroll in a graduate program upon completion of the degree.

How to Declare (Admission and Declaration Process):

For more information on the Geology Department go to Declaration of Major.

Some 300-level geology courses give preference to majors during Phase I of registration, so it is important to declare a major as early as possible.

Phase I: Students can declare as a Phase I major at any time as long as they are in good academic standing. Students can declare and complete a Geology minor, a BA in Geology, or a BA in Education Earth Science or Earth Science/General Science without advancing to Phase II.

Students who wish to earn the BS Geology degree must complete a set of preparatory courses for admission into these degree programs. Students must earn a cumulative GPA of 2.0 or higher in this set of preparatory courses, and be in good academic standing to qualify for admission. Priority for admission will be given to students who have a GPA of 2.5 or higher in these preparatory courses; students with a lower GPA will be admitted on a space-available basis.

Preparatory courses for BS Geology:

- GEOL 211, GEOL 212 and GEOL 213
- one of GEOL 306, GEOL 310, GEOL 318, or GEOL 352
- CHEM 121, MATH 124

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Core Program

- CHEM 121 - General Chemistry I
- CHEM 122 - General Chemistry II
- CHEM 123 - General Chemistry III
- Choose one of the following options:
GEOL 211 - Physical Geology

GEOLOGY

- or
- GEOL 101 - Introduction to Geology
- and
- GEOL 211A - Physical Geology Review
- Or
- HNRS 212 - Colloquium in Geology
- or
- SCED 202 - Matter and Energy in Earth Systems
- and
- GEOL 211A - Physical Geology Review
- GEOL 212 - Historical Geology
- GEOL 213 - GIS in Geology (ENVS 320 may be substituted for GEOL 213)
- GEOL 306 - Mineralogy
- GEOL 310 - Geomorphology
- GEOL 318 - Structural Geology
- GEOL 352 - Introduction to Geophysics
- GEOL 406 - Igneous and Metamorphic Petrology
- GEOL 409 - Field Methods and Theory
- GEOL 410 - Geologic Mapping
- GEOL 415 - Sedimentology and Stratigraphy
- PHYS 161 - Physics with Calculus I
- PHYS 162 - Physics with Calculus II
- PHYS 163 - Physics with Calculus III
- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I
 - and
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 134 - Calculus I Honors
 - and
 - MATH 135 - Calculus II Honors
 - or
 - MATH 138 - Accelerated Calculus

Elective courses:

- One course from:
 - GEOL 314 - Engineering Geology
 - GEOL 316 - Research in Marine Paleontology
- One course from:
 - GEOL 407 - Advanced Petrography
 - GEOL 452 - Applied Geophysics
 - GEOL 473 - Hydrogeology
- Two of any other 400-level Geology courses (excluding GEOL 401A and GEOL 401B)
- One course from:
 - MATH 203 - Linear Algebra and Differential Equations I
 - MATH 204 - Elementary Linear Algebra
 - MATH 224 - Multivariable Calculus and Geometry I
 - MATH 240 - Introduction to Statistics
 - MATH 341 - Probability and Statistical Inference

Departmental Honors

BA or BS students and students in the University Honors program who have completed at least 4 credits of GEOL 490 and have a cumulative GPA of 3.50 or higher meet the requirements for departmental honors. Those students who have completed at least 4 credits of GEOL 490 and have a cumulative GPA higher than 3.20 meet the requirements for departmental distinction.

Geophysics, BS

Department of Geology, College of Science and Engineering

96-110 credits

Introduction

A Geoscientist is someone who studies the Earth's physical makeup and history. Geology is the science that provides the key to finding new sources of useful Earth materials and to understanding Earth processes that affect our lives. Geoscientists provide basic information to society for solving problems and establishing policy for resource management, environmental protection, public health, safety and welfare.

Geoscientists are curious about the Earth. How was it formed? How is it changing? What effects will shrinking glaciers have on the oceans and climate? How do islands form? What makes a continent move? Why did the dinosaurs become extinct? What makes a mountain?

Geoscientists are concerned about the Earth. How severe will the global warming trend be? How and where should we dispose industrial wastes? How can we fill society's growing demands for energy and conserve natural resources for future generations?

Geoscientists enjoy the Earth. It is an outdoor laboratory filled with opportunities to observe Earth processes in action. By applying knowledge of forces that shape the Earth, Geoscientists seek to reconstruct the past and anticipate the future.

Why Consider a Geophysics Major?

Do you like to know why and how things work? Do you enjoy the outdoors? Are you concerned about the environment? Are you interested in travel? Do you like to analyze things? Are science and nature among your favorite subjects? Have you ever wondered why the Earth appears as it does? If you answer "yes" to most of these questions the geosciences could offer a good career for you.

This program is recommended for students who are interested in applications of physics as a means of understanding a range of geological processes. Geophysics is distinct from Geology in that a more intensive set of Math and Physics courses, and applications of these skills, are required. Students who complete this degree will be prepared to continue to graduate studies in geology, geophysics, planetary geology/geophysics, physics, or other related fields, or to enter into industry. Students are strongly encouraged to complete a senior thesis project as part of this degree, providing them with an excellent capstone experience. Declaration of this major requires Geol 211, and a completed advising session with a Geophysics faculty advisor.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Some 300-level geology courses give preference to majors during Phase I of registration, so it is important to declare a major as early as possible.

Phase I: Students can declare as a Phase I major at any time as long as they are in good academic standing. Students must apply to the department for admission to the major. Students are admitted to the BS major following a completed advising session with a Geophysics faculty advisor.

GEOLOGY

Phase II: Students who wish to earn the BS Geophysics degree must complete a set of preparatory courses for admission into Phase II of the degree program. Students must earn a cumulative GPA of 2.0 or higher in this set of preparatory courses, and be in good academic standing, for successful admission.

Preparatory courses for BS Geophysics:

- GEOL 211, GEOL 352
- PHYS 161, PHYS 162
- MATH 124

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- CHEM 121 - General Chemistry I
- Choose one of the following options:
 - GEOL 211 - Physical Geology
 - or
 - GEOL 101 - Introduction to Geology
 - and
 - GEOL 211A - Physical Geology Review
 - Or
 - HNRS 212 - Colloquium in Geology
 - or
 - SCED 202 - Matter and Energy in Earth Systems
 - and
 - GEOL 211A - Physical Geology Review
- GEOL 213 - GIS in Geology
- or
- CSCI 140 - Programming Fundamentals in C++
- or
- CSCI 141 - Computer Programming I
- GEOL 311 - Earth Materials
- GEOL 318 - Structural Geology
- GEOL 352 - Introduction to Geophysics
- GEOL 452 - Applied Geophysics
- PHYS 161 - Physics with Calculus I
- PHYS 162 - Physics with Calculus II
- PHYS 163 - Physics with Calculus III
- PHYS 226 - Physics with Calculus IV
- PHYS 326 - Tools and Data Analysis
- PHYS 363 - Classical Mechanics
- PHYS 485 - Mathematical Physics
- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I
 - and
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 138 - Accelerated Calculus
- Choose either:
 - MATH 203 - Linear Algebra and Differential Equations I
 - MATH 303 - Linear Algebra and Differential Equations II
 - or
 - MATH 204 - Elementary Linear Algebra
 - MATH 304 - Linear Algebra
 - MATH 331 - Ordinary Differential Equations
- MATH 224 - Multivariable Calculus and Geometry I
- Five courses from the following electives:

ASTR 315 - The Solar System
 GEOL 306 - Mineralogy
 GEOL 314 - Engineering Geology
 GEOL 412 - Tectonic Geomorphology
 GEOL 451 - Active Tectonics Seminar
 GEOL 453 - Plate Tectonics
 GEOL 454 - Magnetic Fabrics and Geologic Processes
 GEOL 457 - Practical Paleomagnetism
 GEOL 463 - Introduction to Seismology
 GEOL 464 - Mantle Processes
 GEOL 473 - Hydrogeology
 GEOL 490 - Senior Thesis (A minimum of 3 credits and maximum of 5 credits)
 MATH 225 - Multivariable Calculus and Geometry II
 MATH 430 - Fourier Series and Applications to Partial Differential Equations
 PHYS 368 - Electromagnetism I
 PHYS 369 - Electromagnetism II
 PHYS 419 - Professional Writing for Physicists
 PHYS 486 - Computational Physics

Senior Thesis

An undergraduate thesis is an excellent way to develop research skills, establish closer working relationships with faculty, and gain a more in-depth knowledge of geology. Completion of a thesis is also a notable achievement that highlights a student's ability to do research, providing tangible evidence of research ability to either graduate schools or potential employers. Thesis options are available for the BA and BS degrees in geology. Students interested in pursuing a senior thesis should contact potential advisors during their junior year to discuss possible thesis topics. A formal application to the department must be made, and accepted, prior to the start of the thesis project.

Departmental Honors

BA or BS students and students in the University Honors program who have completed at least 4 credits of GEOL 490 and have a cumulative GPA of 3.50 or higher meet the requirements for departmental honors. Those students who have completed at least 4 credits of GEOL 490 and have a cumulative GPA higher than 3.20 meet the requirements for departmental distinction.

Program Description and Goals

Western Washington University offers a Masters program in Geology that aims to prepare students for professional employment in geoscience careers in the Pacific Northwest and beyond or for continuing graduate studies at the doctoral level. We specialize in structure/tectonics, petrology, volcanology, geomorphology, geophysics, hydrogeology and environmental/engineering geology, geothermal energy, sedimentology, planetary geology, and geoscience education.

This program normally leads to employment in consulting firms; in local, state, or federal government resource-based or planning agencies; and in teaching at community colleges or at a secondary level. The degree also serves as a foundation for graduate studies beyond the M.S. level, and for those interested in pursuing related careers, such as environmental law, natural resource management, or policy. The Department encourages an integrative, multi-disciplinary approach.

The M.S. program produces professional geoscientists with the ability to conduct original and meaningful scientific research. Graduates possess a broad grounding in geosciences and sophistication in their area of concentration.

Prerequisites

Students with a bachelor's degree and who meet the requirements of the Graduate School are invited to apply for admission to the graduate program in geology. Students with a BS/BA degree in geology, which includes a recognized geology field course, generally will be offered full admittance into the program provided they have the appropriate math, chemistry, and physics background. Prerequisite course work may be necessary, depending on the applicant's chosen field of study. Applicants without a BS/BA degree in geology will need to take a minimum of 19 quarter credits, including physical geology, historical geology, stratigraphy/sedimentology, mineralogy, petrology, geomorphology, structural geology, geophysics, and a recognized geology field camp, up to a maximum of 42 geology credits, which may include additional prerequisites in chemistry, physics and math, depending on each individual situation. Students who have not completed these courses before entering the geology MS program must do so and maintain an average of B or better in prerequisite courses before being advanced to candidacy. Courses taken to make up these deficiencies are not counted toward the MS degree.

Application Information

Specific Test Requirements: Graduate Record Examination (GRE).

Deadline: The geology department prefers to admit students to enter in fall quarter. Admittance to the program also will depend on the availability of an advisor in the student's area of interest.

TA Deadlines: To be considered for a teaching assistantship, application and supporting materials must be on file by January 15.

Supporting Materials:

- A statement of the student's background and purpose
- Reference letters
- Official transcripts

Program Requirements (45 to 48 credits)

Required Coursework:

- 35 or more credits of graduate level courses (500- and 600-level) including 6 credits of GEOL 595
- 10 or less credits from 400-level courses.
- The 600-level credits shall include 12-15 credits of GEOL 690.

Electives in Specialization

Geology and supporting courses are selected under advisement through the department chair and the chair of the thesis committee. Decisions about those courses should be made as soon as possible in the student's graduate career.

Minor

Geology Minor

Department of Geology, College of Science and Engineering

23-26 credits

Introduction/What is the Study of Geology?

A geoscientist is someone who studies the Earth's physical makeup and history. Geology is the science that provides the key to finding new sources of useful Earth materials and to understanding Earth processes that affect our lives. Geoscientists provide basic information to society for solving problems and establishing policy for resource management, environmental protection, public health, safety and welfare.

Geoscientists are curious about the Earth. How was it formed? How is it changing? What effects will shrinking glaciers have on the oceans and climate? How do islands form? What makes a continent move? Why did the dinosaurs become extinct? What makes a mountain?

Geoscientists are concerned about the Earth. How extensive is the global warming trend? How and where should we dispose industrial wastes? How can we fill society's growing demands for energy and conserve natural resources for future generations?

Geoscientists enjoy the Earth. It is an outdoor laboratory filled with opportunities to observe Earth processes in action. By applying knowledge of forces that shape the Earth, Geoscientists seek to reconstruct the past and anticipate the future.

Why Consider a Geology Minor?

The minor in geology is designed for students who want some preparation in geology to accompany their major course of study. Students majoring in Biology, Environmental Studies, Environmental Science, Chemistry, Computer Science, Anthropology, Journalism, etc. may find that an understanding of Earth processes will be useful in a variety of careers. Thus students minoring in geology are allowed extensive flexibility for selecting courses that complement their goals.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

Grade Requirements

GEOLOGY

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- Choose one of the following options:
 - GEOL 211 - Physical Geology
 - Or
 - GEOL 101 - Introduction to Geology
 - and
 - GEOL 211A - Physical Geology Review
 - Or
 - HNRS 212 - Colloquium in Geology
 - Or
 - SCED 202 - Matter and Energy in Earth Systems
 - and
 - GEOL 211A - Physical Geology Review
- GEOL 212 - Historical Geology
- 15-16 additional credits from geology courses 200 level and above.

Geology Courses

GEOL 101 - Introduction to Geology

Major ideas of modern geoscience; the study of rocks and minerals, plate tectonics, geologic time, the hydrologic cycle; processes that have produced the Earth and its landforms. Some lecture sections will be focused on specific topics within the geological sciences, such as planetary geology, climate and climate change, or National Parks. Includes lab. Prospective geology majors, students who had high school geology, and those planning to take GEOL 212 should take GEOL 211 in lieu of GEOL 101.

Prerequisites & Notes: MATH 107 or MATH 112 with concurrency or higher

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

GEOL 204 - Geology and Society

Thematic approach to geology, with different themes exploring the relationship between scientific ways of knowing, and geology in particular, with society. Repeatable once as an elective with different topics. May be taken only once for GUR credit.

Prerequisites & Notes: GEOL 101 or BIOL 101 or CHEM 101 or PHYS 101 or permission of instructor.

Credits: 3

Grade Mode: Letter

GUR Attributes: SCI

GEOL 211 - Physical Geology

Course for science and geology majors, in which the origin, composition and structure of earth are

explored. Identification of common rocks and minerals; the evolution of the surface features and structures of continents and interpretation of landforms from maps are emphasized. Will include substantial quantitative work. Students intending to major in Geology or affiliated sciences should take GEOL 211 in lieu of GEOL 101. Successful completion of both GEOL 101 and GEOL 211A may substitute for GEOL 211 in all Geology Department requirements.

Prerequisites & Notes: MATH 114 with concurrency, or higher.

Credits: 5

Grade Mode: Letter

GUR Attributes: LSCI

GEOL 211A - Physical Geology Review

This is a laboratory-only course for students who wish to enter the Geology major or minor, or take upper division Geology courses, and have had a general introduction to geology. Emphasis on rock and mineral identification, geologic structures, map interpretation. Successful completion of both GEOL 101 and GEOL 211A or SCED 202 and GEOL 211A may substitute for GEOL 211 in all Geology Department requirements. Geology 211A may not be used to fulfill general education requirements.

Prerequisites & Notes: GEOL 101 or SCED 202 with a grade of B- or better; MATH 114 with concurrency or higher.

Credits: 2

Grade Mode: Letter

GEOL 212 - Historical Geology

Evolution of the major features of the earth's surface and of life; history of the ocean basins, continents and mountain belts related to the

theory of plate tectonics; geologic history of North America and the Pacific Northwest.

Prerequisites & Notes: GEOL 211 or GEOL 211A; and MATH 114 or higher.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

GEOL 213 - GIS in Geology

An introduction to the fundamental elements of geographic information systems (GIS) for spatial data analysis in geology. Emphasis on data sources and ArcGIS tools for data input, display, manipulation, analysis, and output.

Prerequisites & Notes: Geology major status or instructor permission

Credits: 3

Grade Mode: Letter

GEOL 252 - The Earth and Its Weather

An introduction to meteorology from a global viewpoint. A study of the earth's atmosphere, including weather observation and forecasting. Measurement and description of atmospheric properties.

Prerequisites & Notes: GEOL 101, CHEM 101 or PHYS 101

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

GEOL 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

GEOL 301 - Geology Writing Co-Requisite

This course is a writing-intensive supplement to a geology course where students will explore research topics and learn to write scientific papers about those topics. Repeatable up to 3 credits.

Prerequisites & Notes: Co-requisite: Any upper division geology course that does not currently have writing points; excluding GEOL 401, GEOL 409 and GEOL 410. Instructor permission required.

Credits: 1

Grade Mode: Letter

GEOL 303 - Dinosaurs and Their Environment

Dinosaurs and their world; their biology, behavior, evolution, and what the world was like during their reign.

Prerequisites & Notes: GEOL 101 or GEOL 211; or SCED 202 and GEOL 211A; or BIOL 101; or BIOL 204.

Credits: 3

Grade Mode: Letter

GUR Attributes: SCI

GEOL 306 - Mineralogy

Introduction to crystal chemistry and crystallography. Origin, occurrence and classification of common minerals; physical and chemical properties of minerals used in identification. Basic petrographic microscopy techniques and identification of common rock-forming minerals in thin-section.

Prerequisites & Notes: GEOL 211 or GEOL 211A; CHEM 121; CHEM 122 or higher or concurrent.

Credits: 4

Grade Mode: Letter

GEOL 308 - Earthquakes

This course is a qualitative survey of the causes, effects and dynamics of local and global earthquakes. Topics include wave propagation, earth structure, the global distribution of earthquakes, faulting mechanisms, earthquake magnitude, earthquake prediction and seismic hazard. Emphasis is placed on the investigation of earthquake behavior through case studies of historical earthquakes.

Prerequisites & Notes: GEOL 211 or GEOL 211A or SCED 202; and MATH 114 or higher.

Credits: 3

Grade Mode: Letter

GUR Attributes: SCI

GEOL 309 - Volcanology

Processes, products, and hazards of volcanic eruptions. Topics to include eruptive mechanisms, volcanic landforms and their relation to the composition and physical properties of magmas, emplacement mechanisms of pyroclastic flows and characteristics of their deposits, calderas, volcanic gases, effects of volcanic eruptions on climate and the atmosphere, volcanic hazards and their mitigation, and geothermal energy and mineral resources.

Prerequisites & Notes: GEOL 211; or GEOL 101 and GEOL 211A; or SCED 202 and GEOL 211A

GEOLOGY

Credits: 3

Grade Mode: Letter

GEOL 309A - Volcanology Lab

Optional lab to accompany GEOL 309. Observation and interpretation of volcanic rocks and interpretation of volcanic eruption styles.

Prerequisites & Notes: corequisite: GEOL 309

Credits: 1

Grade Mode: Letter

GEOL 310 - Geomorphology

Origin and evolution of topographic features by surface processes; analysis of glaciers, streams, wind, waves, ground water and other agents in development of landforms.

Prerequisites & Notes: GEOL 211 or GEOL 211A; GEOL 213; MATH 114 or higher

Credits: 5

Grade Mode: Letter

GEOL 311 - Earth Materials

Examines geologic materials (minerals, rocks, and soils) from the scale of atoms to tectonic plates. Lecture foci range from the esoteric (mineral symmetry) to the practical (economic minerals). Laboratory exercises emphasize the scientific skills of observation, identification, and classification in lab and in the field. Field trips are required.

Prerequisites & Notes: GEOL 211 or GEOL 211A; CHEM 121 or higher

Credits: 5

Grade Mode: Letter

GEOL 314 - Engineering Geology

Introduction to the engineering properties of rock and soil surficial materials and their significance in civil works and geological processes such as rock slides, soil-slope stability, and liquefaction.

Prerequisites & Notes: GEOL 211 or GEOL 211A; PHYS 121 or PHYS 161.

Credits: 4

Grade Mode: Letter

GEOL 315 - Minerals, Energy and Society

Mineral resources are vital to society, and yet they are nonrenewable, expensive to find, unevenly distributed, and their extraction and consumption can be environmentally damaging. Can we make economically and environmentally sound decisions regarding land-use planning, development vs. conservation, mining vs. environmental protection, recycling vs. waste?

Prerequisites & Notes: GEOL 101 or GEOL 211; or GEOL 101 and GEOL 211A; or SCED 202 and GEOL 211A

Credits: 4

Grade Mode: Letter

GUR Attributes: SCI

GEOL 316 - Research in Marine Paleontology

A problem-solving approach, working on a sequence of problems with reports that build to a core project, report and presentation. Begins with the classification and ecology of marine organisms. Research projects involve data gathering and analysis of fossil samples. Emphasizes hypothesis testing, writing and sharing of data in collaborative research.

Prerequisites & Notes: GEOL 212

Credits: 4

Grade Mode: Letter

GEOL 318 - Structural Geology

An overview of deformation in the earth's crust and introduction to tools for analysis of geologic structures. Topics include geometry and development of faults, folds and rock fabrics; stress, strain, and rheology; interpretation of geologic maps and cross sections. Field and laboratory exercises are major components. One section each year is taught entirely in the field.

Prerequisites & Notes: GEOL 211 or GEOL 211A; GEOL 212; PHYS 114 or higher

Credits: 5

Grade Mode: Letter

GEOL 340 - Geological Oceanography

In this course students will gain an understanding of the nature and origin of oceanic crust and lithosphere. Large scale chemical and geological processes associated with ocean basins, and seawater-rock interactions, and the role of oceanic circulation in climate and climate change will be studied. Additional topics will be included based on student interest, which will be explored via independent reading assignment.

Prerequisites & Notes: GEOL 101 and GEOL 211A; or GEOL 211 or SCED 202.

Credits: 3

Grade Mode: Letter

GUR Attributes: SCI

GEOL 352 - Introduction to Geophysics

Basic elements of geomagnetism, seismology, gravity and heat flow with reference to the internal structure of the earth.

Prerequisites & Notes: GEOL 211 or GEOL 211A; PHYS 121 and PHYS 122, or PHYS 161 and PHYS 162.

Credits: 5

Grade Mode: Letter

GEOL 396A - Honors Tutorial

Repeatable with no maximum.

Credits: 2-5

Grade Mode: Letter

GEOL 396B - Honors Tutorial

Repeatable with no maximum.

Credits: 2-5

Grade Mode: Letter

GEOL 396C - Honors Tutorial

Repeatable with no maximum.

Credits: 2-5

Grade Mode: Letter

GEOL 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

GEOL 401A - Teaching Practicum

Supervised teaching experience in the general geology laboratory. Students will assist in one 2-hour lab section per week. Repeatable to a maximum of 2 cr. S/U grading.

Prerequisites & Notes: GEOL 211 or GEOL 211A, with a minimum grade of B or better, and permission of the chair.

Credits: 1

Grade Mode: S/U

GEOL 401B - Teaching Practicum

Assisting faculty in teaching advanced undergraduate geology courses. Students will assist in two 2-hour lab sections per week in GEOL 211, or one 2-hour session per week in GEOL 212. Repeatable to a maximum of 4 cr. S/U grading.

Prerequisites & Notes: Permission of the chair;

student must have received a minimum of a B grade in the course for which they will be a Teaching Fellow.

Credits: 2

Grade Mode: S/U

GEOL 406 - Igneous and Metamorphic Petrology

Origin, occurrence and classification of igneous and metamorphic rocks, hand specimen identification of rocks. In alternate years, one section that year is taught entirely in the field.

Prerequisites & Notes: GEOL 306; CHEM 121; CHEM 122 or higher or equivalent.

Credits: 4

Grade Mode: Letter

GEOL 407 - Advanced Petrography

Interaction of light with minerals. Advanced petrographic techniques and identification of minerals with the polarizing microscope. Study of rocks and minerals with a polarizing microscope.

Prerequisites & Notes: GEOL 406

Credits: 3

Grade Mode: Letter

GEOL 409 - Field Methods and Theory

Methods of geological field investigations; includes use of field instruments and outcrop studies.

Prerequisites & Notes: GEOL 212; GEOL 318; GEOL 406; GEOL 415; Co-req GEOL 410.

Concurrent or successive enrollment in GEOL 410 required.

Credits: 6

Grade Mode: Letter

GEOL 410 - Geologic Mapping

Application of geological field methods to making geological maps and reports of specific areas; supervised investigation of one or more map areas.

Prerequisites & Notes: Co-requisite: GEOL 409

Credits: 6

Grade Mode: Letter

GEOL 411 - Field Geology of Western United States

Geologic mapping and tectonic analysis of various field sites in the southern U.S. Cordillera, from the plate margin to the craton. Will include outcrop study, reading, independent field research, and discussion of tectonic evolution of the Cordillera.

GEOLOGY

Prerequisites & Notes: GEOL 410 corequisite.

Credits: 3

Grade Mode: Letter

GEOL 412 - Tectonic Geomorphology

This course will focus on interplays between tectonics, climate, and surface processes that shape landscapes in areas of active deformation. Topics covered will include the processes that control and build topography at the scale of mountain belts to individual fault zones. This course will draw upon tools and techniques from structural geology, geomorphology, GIS, geodesy, and geochronology.

Prerequisites & Notes: GEOL 310 and GEOL 318.

Credits: 4

Grade Mode: Letter

GEOL 413 - Fluvial Geomorphology

Stream processes, equilibrium in fluvial environments, channel adjustments, mechanics of sediment erosion and transport. Weekly field trips.

Prerequisites & Notes: GEOL 310 or instructor permission

Credits: 4

Grade Mode: Letter

GEOL 414 - Geology of Washington

The significant geologic features of Washington State; field studies. Offered summer only.

Prerequisites & Notes: GEOL 101 or GEOL 211; or GEOL 101 and GEOL 211A; or SCED 202 and GEOL 211A

Credits: 3-5

Grade Mode: Letter

GEOL 415 - Sedimentology and Stratigraphy

Analysis of the transportation, deposition and consolidation of sediments; classification of sedimentary rocks; determination of depositional facies; principles of stratigraphic nomenclature.

Prerequisites & Notes: GEOL 212, GEOL 306, GEOL 310 or instructor permission

Credits: 4

Grade Mode: Letter

GEOL 423 - Advanced Igneous Petrology

Advanced course on modern methods of igneous petrology. Focus on magma generation and evolution, utilizing major element, trace element, and isotope geochemistry. Interpretive methods include use of the petrographic microscope and geochemical modeling exercises. Individual

research projects required.

Prerequisites & Notes: GEOL 406

Credits: 4

Grade Mode: Letter

GEOL 424 - Advanced Stratigraphy

Meso- and long-timescale behavior of depositional systems in response to sea-level, tectonics, and climate including field, experimental, and modeling approaches.

Prerequisites & Notes: GEOL 415; or permission of instructor.

Credits: 5

Grade Mode: Letter

GEOL 425 - Advanced Metamorphic Petrology

Advanced course in metamorphic petrology. Emphasizes graphical and mathematical analysis of phase relations, and field and laboratory study of metamorphic structures, minerals and microstructures. Individual research projects performed and presented.

Prerequisites & Notes: GEOL 406; GEOL 407 or permission of instructor

Credits: 5

Grade Mode: Letter

GEOL 428 - Depositional Environments

Depositional framework of marine and continental sedimentary basins. Study of the means by which depositional environments of sedimentary rocks are determined.

Prerequisites & Notes: GEOL 415 or equivalent

Credits: 3

Grade Mode: Letter

GEOL 430 - Image Interpretation

Explores fundamental concepts of identifying and interpreting geologic features using remote imagery, including aerial photographs, topographic data (maps, DEMs), multispectral satellite images, and geophysical imagery. Emphasizes critical evaluation and development of multiple working hypotheses in creating geologic maps from images.

Prerequisites & Notes: GEOL 310; GEOL 318 recommended

Credits: 3

Grade Mode: Letter

GEOL 432 - Ore Deposits

Classification, occurrence and origin of ore deposits; thin section and hand specimen study of

rock samples from selected mining districts.

Prerequisites & Notes: GEOL 306; GEOL 406 or concurrent.

Credits: 4

Grade Mode: Letter

GEOL 440 - Glacial Geology

Explores fundamental concepts of glaciology and glacial geology. Topics include formation and dynamics of glaciers and glacier mass-balance, processes of glacial erosion, transport, and deposition, Quaternary climate change associated with global glaciations, and assessing effects of glaciation on the modern landscape. Includes field trips and research components.

Prerequisites & Notes: GEOL 310

Credits: 4

Grade Mode: Letter

GEOL 450 - Advanced Topics in Structural Geology

Analysis of geologic structures from microstructural to plate tectonic scales. Includes active and ancient structures, concepts of stress and strain, kinematics and mechanics of deformation, and modeling of deformation. Field trip and research project required. Taught alternate years.

Prerequisites & Notes: GEOL 318, GEOL 406; GEOL 409 and GEOL 410 recommended

Credits: 4

Grade Mode: Letter

GEOL 451 - Active Tectonics Seminar

Study of active faults, associated crustal deformation and earthquakes. Examines the mechanics of faulting, earthquake seismology, and GPS geodesy. Regional emphasis on the Pacific Northwest.

Prerequisites & Notes: GEOL 318, GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 452 - Applied Geophysics

Geophysical exploration techniques applied to geological problems. Theory and field application of gravity, magnetics, refraction and earthquake seismology, electrical resistivity and others. Class projects include depth-to-bedrock, buried and subsurface features, groundwater estimates and earthquake potential and grounds response.

Prerequisites & Notes: GEOL 352 or equivalent

Credits: 5

Grade Mode: Letter

GEOL 453 - Plate Tectonics

Kinematics and dynamics of plate motions, with applications to geotectonics.

Prerequisites & Notes: GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 454 - Magnetic Fabrics and Geologic Processes

Theory and laboratory measurement of magnetic anisotropy in rocks, sediments, and minerals. Emphasis on the use of magnetic anisotropy techniques to understand various geological processes including deformation, sediment transport, and magma flow and emplacement. Laboratory project and writing project included.

Prerequisites & Notes: GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 456 - Principles of Orogeny Seminar

Study of geological and geophysical aspects of continental tectonics and mountain-building processes. Topics may include thermochronology, heat flow, metamorphic petrology, structural geology, tectonic geomorphology, plate tectonics, and geodesy. The combined lecture and seminar format requires reading and discussion of tectonics literature, and active participation and discussion by all students. Field trip and research project required. Taught alternate years.

Prerequisites & Notes: GEOL 318, GEOL 352, GEOL 406, GEOL 409, GEOL 410

Credits: 4

Grade Mode: Letter

GEOL 457 - Practical Paleomagnetism

Application of rock magnetism and paleomagnetism to field-oriented research problems. Seminar style meetings, field trip(s), and laboratory measurements will focus on solution of an original research problem. Results will be used for a required research paper. Project topics will vary; examples include paleomagnetism of displaced terranes, magnetostratigraphy, magnetic fabrics, environmental magnetism.

Prerequisites & Notes: GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 461 - Analytical Geochemistry

Introduction to analysis of rocks, soil and water. Methods include atomic absorption

GEOLOGY

spectrophotometry, ion chromatography, gas chromatography and quadrupole mass spectrometry as well as gravimetric, volumetric and colorimetric analysis.

Prerequisites & Notes: GEOL 306; CHEM 123 or higher.

Credits: 2

Grade Mode: Letter

GEOL 463 - Introduction to Seismology

Investigates the physics of earthquakes, the effects of earthquakes on our world and the insights into the planet provided by seismology. This class is a quantitative introduction to the study of local and global seismology. Topics include stress and strain, wave propagation, power spectra, earthquake magnitude, seismic hazard, earthquake prediction and associated hazards such as tsunamis and volcano seismology. Whenever possible, student will use real seismic data in their analyses.

Prerequisites & Notes: GEOL 318; GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 464 - Mantle Processes

Investigates geologic and geophysical processes in Earth's mantle, convection, heat flux, the life cycle of lithosphere and the dynamics of mantle plumes. Compares results from geophysical and petrological studies.

Prerequisites & Notes: GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 470 - Landslides and Slope Stability

This seminar will review current research on landslides and slope stability, including: landslide types and processes; landslide triggering mechanisms; soil and rock slope stability; soil and rock slope failure modes; landslide hazard analysis. Offered alternate years.

Prerequisites & Notes: GEOL 310; GEOL 314 or GEOL 318

Credits: 3

Grade Mode: Letter

GEOL 472 - Surface Water Hydrology

Components of the hydrologic cycle, including precipitation, infiltration, evapotranspiration, and runoff, and their effect on a water balance in a watershed.

Prerequisites & Notes: GEOL 211 or GEOL 211A;

MATH 124 or higher.

Credits: 4

Grade Mode: Letter

GEOL 473 - Hydrogeology

Introduction to the geologic and hydrologic factors controlling the occurrence and movement of subsurface water. Applications in well hydraulics and groundwater site investigations.

Prerequisites & Notes: GEOL 211 or GEOL 211A; PHYS 161

Credits: 4

Grade Mode: Letter

GEOL 474 - Ground Water Contamination

Introduction to the principles of some of the important physical, chemical, and biological processes that govern the transport, persistence, and/or degradation of pollutants in saturated and unsaturated groundwater systems.

Prerequisites & Notes: GEOL 473 or instructor permission

Credits: 3

Grade Mode: Letter

GEOL 485 - Geothermal Energy

Understanding the thermodynamics, chemistry, geology and physics of developing and producing geothermal energy. Traditional geothermal electricity, Enhanced Geothermal Systems (EGS), direct use, ground-source heat pumps, and some economic and policy aspects are covered. Geologic and geophysical data are discussed and evaluated. The lab portion of the course will explore methods of geological evaluation of geothermal regions.

Prerequisites & Notes: GEOL 306

Credits: 4

Grade Mode: Letter

GEOL 490 - Senior Thesis

Research project under direction of faculty. Repeatable to a maximum of 9 cr.

Prerequisites & Notes: senior standing

Credits: 1-5

Grade Mode: Letter

GEOL 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for

General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

GEOL 501 - Teaching Practicum

Supervised teaching experiences in undergraduate geology laboratories at the 300 level and above courses. Maximum of 2 credits can be applied toward student's graduate course work.

Prerequisites & Notes: Graduate status and permission of chair.

Credits: 2

Grade Mode: S/U

GEOL 512 - Tectonic Geomorphology

This course will focus on interplays between tectonics, climate, and surface processes that shape landscapes in areas of active deformation. Topics covered will include the processes that control and build topography at the scale of mountain belts to individual fault zones. This course will draw upon tools and techniques from structural geology, geomorphology, GIS, geodesy, and geochronology.

Prerequisites & Notes: GEOL 310 and GEOL 318.

Credits: 4

Grade Mode: Letter

GEOL 513 - Fluvial Geomorphology

Stream processes, equilibrium in fluvial environments, channel adjustments, mechanics of sediment erosion and transport. Weekly field trips.

Prerequisites & Notes: GEOL 310 or instructor permission

Credits: 4

Grade Mode: Letter

GEOL 518 - Structural Geology and Tectonics of Washington

Field methods of structural geology and introduction to the structural and tectonic evolution of Washington, focusing on the building of the Cascade Mountains. Taught during a three-week period prior to the beginning of fall quarter. Involves camping and field work throughout Washington state, including some strenuous hiking.

Prerequisites & Notes: GEOL 318 or equivalent, instructor permission

Credits: 3

Grade Mode: Letter

GEOL 523 - Advanced Igneous Petrology

Advanced course on modern methods of igneous petrology. Focus on magma generation and evolution, utilizing major element, trace element, and isotope geochemistry. Interpretive methods include use of the petrographic microscope and geochemical modeling exercises. Individual research projects required.

Prerequisites & Notes: GEOL 406, GEOL 407 or equivalent

Credits: 4

Grade Mode: Letter

GEOL 524 - Advanced Stratigraphy

Meso- and long-timescale behavior of depositional systems in response to sea-level, tectonics, and climate including field, experimental, and modeling approaches.

Prerequisites & Notes: GEOL 415 or equivalent.

Credits: 5

Grade Mode: Letter

GEOL 525 - Advanced Metamorphic Petrology

Advanced course in metamorphic petrology. Emphasizes graphical and mathematical analysis of phase relations, and field and laboratory study of metamorphic structures, and microscope study of metamorphic structures, minerals and microstructures. Individual research projects performed and presented.

Prerequisites & Notes: GEOL 406, GEOL 407 or equivalent

Credits: 5

Grade Mode: Letter

GEOL 528 - Depositional Environments

Depositional framework of marine and continental sedimentary basins. Study of the means by which depositional environments of sedimentary rocks are determined.

Prerequisites & Notes: GEOL 415 or equivalent

Credits: 3

Grade Mode: Letter

GEOL 530 - Image Interpretation

Explores fundamental concepts of identifying and interpreting geological features using remote imagery, including aerial photographs, topographic data (maps, DEMs), multispectral satellite images, and geophysical imagery. Emphasizes critical evaluation and development of multiple working hypotheses in creating geologic maps from images.

Prerequisites & Notes: GEOL 310; GEOL 318 recommended

GEOLOGY

Credits: 3

Grade Mode: Letter

GEOL 532 - Ore Deposits

Classification, occurrence and origin of ore deposits; thin section and hand specimen study of rock samples from selected mining districts.

Prerequisites & Notes: GEOL 306; GEOL 406 or concurrent.

Credits: 4

Grade Mode: Letter

GEOL 540 - Glacial Geology

Explores fundamental concepts of glaciology and glacial geology. Topics include formation and dynamics of glaciers and glacier mass-balance, processes of glacial erosion, transport, and deposition, Quaternary climate change associated with global glaciations, and assessing effects of glaciation on the modern landscape. Includes field trips and research components.

Prerequisites & Notes: GEOL 310 or equivalent

Credits: 4

Grade Mode: Letter

GEOL 550 - Advanced Topics in Structural Geology

Analysis of geologic structures from microstructural to plate tectonic scales. Includes active and ancient structures, concepts of stress and strain, kinematics and mechanics of deformation, and modeling of deformation. Field trip and research project required. Taught alternate years.

Prerequisites & Notes: GEOL 318, GEOL 406; GEOL 409 and GEOL 410 recommended

Credits: 4

Grade Mode: Letter

GEOL 551 - Active Tectonics Seminar

Study of active faults, associated crustal deformation and earthquakes. Examines the mechanics of faulting, earthquake seismology and GPS geodesy. Regional emphasis on the Pacific Northwest.

Prerequisites & Notes: GEOL 318, GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 552 - Applied Geophysics

Geophysical exploration techniques applied to geological problems. Theory and field application of gravity, magnetics, refraction and earthquake seismology, electrical resistivity and others. Class

projects include depth-to-bedrock, buried subsurface features, groundwater estimates and earthquake potential and grounds response.

Prerequisites & Notes: GEOL 352 or equivalent

Credits: 5

Grade Mode: Letter

GEOL 553 - Plate Tectonics

Kinematics and dynamics of plate motions, with applications to geotectonics.

Prerequisites & Notes: GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 554 - Magnetic Fabrics and Geological Processes

Theory and laboratory measurement of magnetic anisotropy in rocks, sediments, and minerals. Emphasis on the use of magnetic anisotropy techniques to understand various geological processes including deformation, sediment transport, and magma flow and emplacement. Laboratory project and writing project included.

Prerequisites & Notes: GEOL 352 or equivalent

Credits: 4

Grade Mode: Letter

GEOL 556 - Principles of Orogeny Seminar

Study of geological and geophysical aspects of continental tectonics and mountain-building processes. Topics may include thermochronology, heat flow, metamorphic petrology, structural geology, tectonic geomorphology, plate tectonics, and geodesy. The combined lecture and seminar format requires reading and discussion by all students. Field trip, research projects, and oral presentations required. Taught alternate years.

Prerequisites & Notes: GEOL 318, GEOL 352, GEOL 406, GEOL 409, GEOL 410

Credits: 4

Grade Mode: Letter

GEOL 557 - Practical Paleomagnetism

Application of rock magnetism and paleomagnetism to field-oriented research problems. Seminar style meetings, field trip(s), and laboratory measurements will focus on solution of an original research problem. Results will be used for a required research paper. Project topics will vary; examples include paleomagnetism of displaced terranes; magnetostratigraphy; magnetic fabrics, environmental magnetism.

Prerequisites & Notes: GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 558 - Paleomagnetism and Tectonics Lab Seminar

Advanced instruction in the operation of paleomagnetic lab equipment, research techniques in rock and paleomagnetism, discussion and evaluation of current paleomagnetic literature. Seminar topics will focus on presentation of research results and current research in the field. Topics related to paleomagnetism and plate tectonics will vary each quarter. Repeatable for credit one time.

Prerequisites & Notes: GEOL 457 or GEOL 557

Credits: 1-2

Grade Mode: Letter

GEOL 559 - Rock Magnetism and Geomagnetic Field Lab

The course will involve advanced instruction in the operation of paleomagnetic lab equipment, research techniques in rock and paleomagnetism, discussion and evaluation of current paleomagnetic literature. Seminar topics will focus on presentation of research results and current research in the field. Topics related to the geomagnetic field and rock magnetism will vary each quarter. Repeatable for credit one time.

Prerequisites & Notes: GEOL 457 or GEOL 557 or instructor permission

Credits: 1-2

Grade Mode: Letter

GEOL 561 - Analytical Geochemistry

Applications of analytical chemistry to soil, water and rock samples. Methods include atomic absorption spectrophotometry, ion chromatography, gas chromatography, mass spectrometry and X-ray diffraction. Field collection techniques, sample preparation and data processing also are discussed. Course consists of two hours of lecture and two hours of lab per week.

Prerequisites & Notes: instructor permission

Credits: 2

Grade Mode: Letter

GEOL 563 - Introduction to Seismology

Investigates the physics of earthquakes, the effects of earthquakes on our world and the insights into the planet provided by seismology. This class is a quantitative introduction to the study of local and global seismology. Topics include stress and strain, wave propagation, power

spectra, earthquake magnitude, seismic hazard, earthquake prediction and associated hazards such as tsunamis and volcano seismology. Whenever possible, students will use real seismic data in their analyses.

Prerequisites & Notes: GEOL 352

Credits: 4

Grade Mode: Letter

GEOL 564 - Mantle Processes

Investigates geologic and geophysical processes in Earth's mantle, including mantle convection, heat flux, the life cycle of lithosphere and the dynamics of mantle plumes. Compares results from geophysical and petrological studies. Students will be active in presenting material and leading class discussion.

Prerequisites & Notes: GEOL 352 or equivalent.

Credits: 4

Grade Mode: Letter

GEOL 570 - Landslides and Slope Stability

This seminar will review current research on landslides and slope stability, including: landslide types and processes; landslide triggering mechanisms; soil and rock slope stability; soil and rock slope failure modes; landslide hazard analysis. Offered alternate years.

Prerequisites & Notes: GEOL 310; GEOL 318 or GEOL 314 or equivalent

Credits: 3

Grade Mode: Letter

GEOL 572 - Surface Water Hydrology

Components of the hydrologic cycle and their interaction, including precipitation, infiltration, evapotranspiration, and runoff, and their effect on a water balance in a watershed.

Prerequisites & Notes: instructor permission

Credits: 4

Grade Mode: Letter

GEOL 573 - Hydrogeology

Introduction to the geologic and hydrologic factors controlling the occurrence and movement of subsurface water. Applications in well hydraulics and groundwater site investigations.

Prerequisites & Notes: instructor permission

Credits: 4

Grade Mode: Letter

GEOL 574 - Ground Water Contamination

GEOLOGY

Introduction to the principles of some of the important physical, chemical, and biological processes that govern the transport, persistence, and/or degradation of pollutants in saturated and unsaturated groundwater systems.

Prerequisites & Notes: GEOL 573 or instructor permission

Credits: 3

Grade Mode: Letter

GEOL 585 - Geothermal Energy

Understanding the thermodynamics, chemistry, geology and physics of developing and producing geothermal energy. Traditional geothermal electricity, Enhanced Geothermal Systems (EGS), direct use, ground-source heat pumps, and some economic and policy aspects are covered. Geologic and geophysical data are discussed and evaluated. The lab portion of the course will explore methods of geological evaluation of geothermal regions. Graduate students will present papers and lead small group work.

Prerequisites & Notes: GEOL 306

Credits: 4

Grade Mode: Letter

GEOL 595 - Seminar in Contemporary Geology Problems

Seminar and weekend field trips introduce geology graduate students to research problems. Repeatable to a maximum of 6 cr. S/U grading.

Prerequisites & Notes: Graduate status in the department.

Credits: 2

Grade Mode: S/U

GEOL 690 - Thesis

Thesis research, repeatable up to 15 credits.

Credits: 2-15

Grade Mode: Letter

Interdisciplinary Sciences, Technology, and Mathematics Courses

ISTM 201 - Science Literacy

Topics will vary somewhat with different instructors, but may include: Understanding the nature of science and what discriminates science from other ways of knowing. Discriminating among good science, junk science, and pseudoscience. Elementary statistics and how they can mislead.

Logical fallacies. Scientific topics in the news (e.g., creationism vs. evolutionism).

Credits: 3

Grade Mode: Letter

GUR Attributes: SCI

Materials Science

Introduction

The field of Materials Science addresses the challenges of creating, understanding, and using new materials to meet the technological needs of the 21st century. Materials such as alloys, polymers and composites, and semiconductors play important roles in the modern economy where they are used in a wide range of applications, from clean energy to medicine, and aerospace to microelectronics. Materials Science is an interdisciplinary area of study exploring the broad spectrum of materials from basic atomic and molecular scales through macroscopic engineered products. At Western Washington University Materials Science is represented through a diversified and collaborative program based on an interdisciplinary set of courses, faculty, research projects and facilities drawn from several departments.

The Materials Science minor at Western Washington University complements major degree programs such as chemistry, engineering, geology, and physics by providing an interdisciplinary perspective preparing graduates to work at the boundaries between disciplines. Students electing the minor begin their studies in a four-course sequence teaching fundamental concepts and practical skills in materials preparation and characterization (MSCI 201, 320, 330 and 410). These courses are taught by faculty from several departments and involve a variety of facilities and instrumentation. Topics covered include: chemical, mechanical, electronic, and optical properties; polymers and composites, engineering alloys and ceramics, semiconductors and nanomaterials; and applications of materials in modern contexts such as photovoltaics, fuel cells, microelectronics, and geomaterials.

Culminating the minor is a capstone experience involving six credits of intensive research under the guidance of an AMSEC faculty mentor or an internship with a partner company. The research experience or internship is usually performed in the junior or senior year, although for students who become involved in research earlier, it may in some cases be part of a longer term project. Students should consult with the program advisor for assistance in arranging their experience. The capstone practicum is intended to provide opportunities to apply concepts learned in the classroom and laboratory, preparing professionals ready for graduate study or employment in industry.

Other Departmental Information

Facilities and Resources

The Materials Science minor at Western Washington University is administered by the Advanced Materials Science and Engineering Center (AMSEC), a collaborative, interdisciplinary program within the College of Science and Engineering. In addition to its educational programs, AMSEC provides leadership in academic research and scholarship while maintaining strong relationships with regional companies. The Center includes faculty and students from across the College involved in researching a wide range of advanced materials, such as polymers and composites, geological and magnetic materials, organic and inorganic synthesis, materials for clean energy, theory and modeling, and nanomaterials. The Center also operates a shared, open access Materials Characterization Laboratory housing state-of-the-art x-ray diffraction, thin film preparation, mass spectrometry, microscopy, and thermal analysis equipment.

Minor

Materials Science Minor

Department of Materials Science, College of Science and Engineering

23-36 credits

Introduction

Materials science addresses the challenges of creating and using new materials for the 21st century. Advanced materials play a critical role in the modern economy where they are used in a wide range of applications, from high technology to everyday products. They include metals and alloys, ceramics, semiconductors, polymers and composites. Materials science is the study of these materials, their properties and uses.

Why Consider a Materials Science Minor?

Professionals trained in materials science are sought after by Northwest companies ranging from aerospace to biotechnology, microelectronics, nanotechnology, clean energy, defense, and transportation. The materials science and engineering program at WWU teaches students a balanced understanding of fundamental concepts and principles with practical applications and useful skills.

Major/Career Resources

http://www.wvu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Visit <http://www.wvu.edu/amsec/students.shtml>

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- One course from:
 - ENGR 170 - Introduction to Materials Science and Engineering
 - MSCI 201 - Introduction to Materials Science and Engineering
- Two or three courses based on advising:
 - MSCI 321 - Introduction to Materials Science: Materials Chemistry
 - MSCI 322 - Introduction to Materials Science: Polymers & Composites
 - MSCI 323 - Introduction to Materials Science: Semiconductor Materials & Devices
- MSCI 330 - Introduction to Materials Science II
- MSCI 410 - Characterization of Materials
- MSCI 491 - Independent Research or Internship in Materials Science I
- MSCI 492 - Independent Research or Internship in Materials Science II
- One advanced elective with prior departmental approval.

Materials Science Courses

MSCI 101 - The Materials Revolution

An introductory course designed to facilitate a basic understanding of the materials science fundamentals behind the development of today's most important and innovative materials. Topics include: nanomaterials, smart materials, advanced composite materials, and semiconductors. Other important basics such as building materials from atoms, structures, synthesis, materials failures, and sustainability will also be covered.

Prerequisites & Notes: Freshman status or permission - FYE

Credits: 4

Grade Mode: Letter

GUR Attributes: SCI

MSCI 110 - Introduction to Renewable Energy for Scientists and Engineers

The effort to find safe and clean sources of renewable energy is one of the greatest scientific challenges facing the next generation. In this course students will explore renewable energy technology and learn about the science underlying biofuels, wind, and wave power, nuclear power and solar cells. Students will create biodiesel fuel in the laboratory and construct their own solar cell devices. Field trips to local energy companies will

provide real world examples of energy infrastructure. Students will work in small groups to research a focus area of renewable energy, and at the end of the course give group presentations to communicate their findings. S/U grading.

Credits: 1

Grade Mode: S/U

MSCI 201 - Introduction to Materials Science and Engineering

The relationship between the properties, structure and processes of engineering materials is discussed. Emphasis on the fundamentals of selecting materials based on engineering design criteria. Also offered as ENGR 170.

Prerequisites & Notes: CHEM 121 or CHEM 125; MATH 124 and PHYS 161 or concurrent; or MATH 157 and PHYS 114 or concurrent.

Credits: 4

Grade Mode: Letter

MSCI 321 - Introduction to Materials Science: Materials Chemistry

This course is part of an interdisciplinary sequence designed to cover the fundamental concepts of materials science. Basic concepts behind the chemistry of organic and inorganic compounds, chemical bonding and structure, electron

MATERIALS SCIENCE

delocalization, properties of common functional groups and ligands, and structure-property relationships will be covered in this overview course.

Prerequisites & Notes: CHEM 123 or CHEM 125; MSCI 201 or ENGR 170; PHYS 163 or concurrent; or instructor permission.

Credits: 1

Grade Mode: Letter

MSCI 322 - Introduction to Materials Science: Polymers & Composites

This course is part of an interdisciplinary sequence designed to cover the fundamental concepts of materials science. Common synthetic routes for polymerization, common polymers and polymer classifications, mechanical properties of polymers and the relationship to polymer processing, classes of composite materials based on the composition and geometry of dispersed and continuous phases, properties and applications will be covered in this overview course.

Prerequisites & Notes: CHEM 123 or CHEM 125; MSCI 201 or ENGR 170; PHYS 163 or concurrent; or instructor permission.

Credits: 1

Grade Mode: Letter

MSCI 323 - Introduction to Materials Science: Semiconductor Materials & Devices

This course is part of an interdisciplinary sequence designed to cover the fundamental concepts of materials science. Structure and processing of inorganic semiconductors, electronic and optical properties, doping effects and junctions between n- and p-type materials, photovoltaic devices, diodes, and transistors will be covered in this overview course.

Prerequisites & Notes: CHEM 123 or CHEM 125; MSCI 201 or ENGR 170; PHYS 163 or concurrent; or instructor permission.

Credits: 1

Grade Mode: Letter

MSCI 330 - Introduction to Materials Science II

Part of a multi-course interdisciplinary sequence designed to cover the fundamental concepts of materials science. Electrical, magnetic and optical properties and structures of materials are emphasized in this second overview course.

Prerequisites & Notes: MATH 125 or MATH 135 or MATH 138; PHYS 163; Depending upon advising, two or three courses from: MSCI 321, MSCI 322, and MSCI 323; or instructor permission.

Credits: 4

Grade Mode: Letter

MSCI 410 - Characterization of Materials

The third course in a three course interdisciplinary sequence designed to cover the fundamental concepts of materials science. Theory and operating principals of external and internal characterization of materials such as: electron microscopy, x-ray chemical microanalysis, optical microscopy, thermal, magnetic and structural analysis, polymer processing and analysis, thin film preparation and characterization, and x-ray diffraction. Laboratory experience and projects are emphasized.

Prerequisites & Notes: MSCI 330 or instructor permission.

Credits: 4

Grade Mode: Letter

MSCI 491 - Independent Research or Internship in Materials Science I

Undergraduate research in materials science or an undergraduate internship in materials science in industry under supervision. S/U grading.

Prerequisites & Notes: MSCI 330 or instructor permission.

Credits: 3

Grade Mode: S/U

MSCI 492 - Independent Research or Internship in Materials Science II

Undergraduate research in materials science or an undergraduate internship in materials science in industry under supervision. S/U grading.

Prerequisites & Notes: MSCI 330 or instructor permission.

Credits: 3

Grade Mode: S/U

Mathematics

Introduction

The Department of Mathematics offers majors and minors in mathematics, applied mathematics and mathematics education. Combined majors are offered in mathematics and computer science, biology and mathematics, chemistry and mathematics, economics and mathematics, and physics and mathematics. The department also offers a Master of Science degree.

By taking a significant number of graduate math courses as an undergraduate, it is possible to earn both a Bachelor of Science and a Master of Science degree in mathematics within a total of five years of study. Detailed requirements for this option are available from the Department of Mathematics.

The majors mentioned above will serve as components of a liberal education, but each one also prepares the recipient for a career in business, industry, government or education. Further information about career opportunities is available in the department office or website. Persons planning a career in almost any field will find their opportunities for interesting and challenging positions enhanced by the study of mathematics. A person who develops the ability to formulate and solve quantitative problems will be able to attack many of the complex problems of the world.

Mathematics

Mathematics has developed from attempts to find simple general laws governing the behavior of the phenomena we observe around us; phenomena as diverse as the motion of the planets, the evolution of biological systems and the movement of traffic.

These attempts have been remarkably successful, although many problems remain to be solved. The concepts involved are profound and exciting; their development and use require imagination and careful deductive reasoning.

Mathematics reveals hidden patterns that help us understand the world around us. Now much more than arithmetic and geometry, mathematics is a diverse discipline that deals with data, measurements, and observations from science, with inference, deduction, and proof; and with mathematical models of natural phenomena, human behavior, and social systems.

As a practical matter, mathematics is a science of pattern and order. Its domain is not molecules or cells, but numbers, chance, form, algorithms, and change. As a science of abstract objects, mathematics relies on logic rather than on

observation as its standard of truth, yet employs observation, simulation, and even experimentation as means of discovering truth.

The special role of mathematics in education is a consequence of its universal applicability. The results of mathematics — theorems and theories — are both significant and useful; the best results are also elegant and deep. Through its theorems, mathematics offers science both a foundation of truth and a standard of certainty.

In addition to theorems and theories, mathematics offers distinctive modes of thought which are both versatile and powerful, including modeling, abstraction, optimization, logical analysis, inference from data, and use of symbols. Experience with mathematical modes of thought builds mathematical power — a capacity of mind of increasing value in this technological age that enables one to read critically, to identify fallacies, to detect bias, to assess risk, and to suggest alternatives.

Mathematics empowers us to understand better the information-laden world in which we live.

— Excerpts from *Everyone Counts: A Report to the Nation on the Future of Mathematics Education*

© 1989, National Academy of Sciences

The purpose of the mathematics and applied mathematics majors is to acquaint the student with mathematical concepts; to provide the student with the tools needed to apply the concepts in other fields; and to continue to learn and develop new ideas.

A student primarily interested in the application of mathematical ideas in another field should elect the major in applied mathematics or one of the combined majors. A student who is interested in some branch of mathematics itself, or who is considering graduate study in mathematics, should choose the mathematics major. A student considering a career as an actuary should consult the department website for specific course suggestions. A student who is unsure about future plans should probably consult the department website for a mathematics major and adviser.

KIMIHIRO NOGUCHI (2014) Assistant Professor, BS, MS, University of Waterloo, Canada; PhD, University of California-Davis.

ADAM NYMAN (2008) Associate Professor. BS, Massachusetts Institute of Technology; PhD, University of Washington.

THOMAS T. READ (1967) Professor. BA, Oberlin College; MA, PhD, Yale University.

AMITES SARKAR (2007) Associate Professor. BA, PhD, Cambridge University.

YUN-QIU SHEN (1988) Professor. BS, University of Science and Technology of China; MS, PhD, Michigan State University.

STEPHANIE A. TRENEER (2008) Associate Professor. BA, Whitman College; PhD, University of Illinois at Urbana-Champaign.

RACHAEL M. WELDER (2015) Assistant Professor. BS, University of Mary; MS, University of North Dakota; PhD, Montana State University.

JIANYING ZHANG (2006) Associate Professor. BS, MS, Tsinghua University; PhD, University of California-Santa Barbara.

Declaration Process

Students who intend to complete a major in the department are urged to declare the major

formally at an early point in their Western career so that a program of study can be planned in collaboration with a departmental advisor. This does not in any way decrease the opportunity to change plans, but does ensure constructing an efficient program which is not subject to future catalog revisions.

Departmental Honors

The mathematics department offers two means of recognition for outstanding students. One, Graduation with Merit in Mathematics, is an award which recognizes outstanding scholastic achievement in courses required for the major. The second, Graduation with Distinction in Mathematics, is a program which rewards exceptional achievement in mathematics as evidenced by meeting all the requirements for Graduation with Merit and completing certain additional requirements detailed below. While Graduation with Merit is automatically conferred on all students who qualify, students must apply to the Chair of the Department of Mathematics to participate in the program for Graduation with Distinction in Mathematics.

Students interested in these programs should also inquire into the possibility of earning both a Bachelor of Science and a Master of Science degree in mathematics within five years of study. Detailed requirements for this option are available from the Department of Mathematics.

Graduation with Merit

To graduate with Merit in mathematics, a student must complete one of the majors or combined majors offered by mathematics alone or by mathematics in cooperation with another department.

The student's program must include at least 32 quarter hours of mathematics or math-computer science courses taken at Western, including MATH 225, 304 and 312 and at least 23 approved credits at the 400 level or above. The cumulative GPA for mathematics and math-computer science classes taken at Western must be at least 3.6.

Graduation with Distinction

To graduate with Distinction in mathematics, a student must meet all the requirements for graduation with Merit in mathematics.

Furthermore, the student must successfully complete:

- A comprehensive examination covering MATH 124, 125, 224, 225, 226, 204, 331

- An approved senior project

The comprehensive examination should be taken no later than the junior year. This examination may be retaken if necessary, but must be passed no later than fall of the senior year and before beginning the senior project.

The senior project is subject to approval of the Undergraduate Committee and is undertaken under the direction of a faculty member. It includes some independent work, the preparation of a report and a colloquium presentation. The senior project constitutes a course at the 400 level and is letter graded with 4 credits applicable towards the major.

Students interested in graduating with Distinction in mathematics should declare their interest to the Chair of the Department of Mathematics at an early point in their career at Western in order to receive appropriate advice and guidance.

Other Departmental Information

Mathematics Education

The Bachelor of Arts in Education major may be completed with either of two concentrations; one prepares the graduate for teaching mathematics on the secondary level, the other concentrates on the elementary level. Those who intend to pursue one of these concentrations must complete certain courses in calculus, linear algebra, discrete mathematics, statistics, number theory, geometry, the history of mathematics, and computer science. Successful completion of these courses provides a good part of the training necessary for technical expertise in the classroom.

The elementary concentration emphasizes breadth in mathematics. Breadth of experience is important so that the teacher can expose elementary students to a wide variety of mathematical topics. The specialist in mathematics on the elementary level must be particularly skilled at transforming the material mastered in college to a form suitable for the level in question.

Secondary majors learn the methods of teaching mathematics in MATH 483; elementary majors learn such methods in MATH 381, 382, 383 and 491.

Students who wish to teach mathematics on the secondary level also can gain certification in mathematics by completing any one of the Bachelor of Science majors in mathematics, applied mathematics or mathematics-computer science. In addition to the requirements for the major, they are expected to complete these

courses: MATH 302, MATH 360, MATH 419 and MATH 483.

Recommendation for teaching endorsement requires the completion of the major with a minimum grade point average of 2.50 in the courses required for the major. The state of Washington requires a minimum grade of C (2.0) or better for all courses used to meet major certification or endorsement requirements. To gain the Initial Teaching Certificate, students must also complete a program of studies in professional education, including student teaching. Early in their careers at Western students should seek formal advisement on the appropriate program in education. It is essential that the interested reader consult the Elementary Education and Secondary Education sections of this catalog for further information.

Academic Placement

Initial placement in most mathematics courses at Western is on the basis of the results of an appropriate placement test, except for some students who have successfully completed at least one quarter of calculus or precalculus in college. Full information on which test to take and how to take it is available from the admissions office or the mathematics department. Mathematics placement tests are administered throughout the state of Washington each year, and both freshmen and transfer students who are residents in Washington are advised to take the appropriate examination prior to arrival on campus.

Students who have completed at least one year of high school calculus or at least one quarter of college calculus should consult a departmental advisor before registering.

Except by permission of the chair of the Department of Mathematics, a student may not receive credit for any of MATH 101, 106, 107, 112, 114, 115, 118, 156 or 157 if that course is completed after completion of any higher numbered course in this list or after completion of a course in calculus for which college credit has been received.

Advice to Entering Students

The Bachelor of Science degrees in mathematics, applied mathematics and mathematics-computer science are based on the following core:

- MATH 124, MATH 125, MATH 224, MATH 226 (calculus)
- MATH 204, MATH 304 (linear algebra)
- Either MATH 302 or MATH 309
- MATH 312 (proofs in elementary analysis)

MATHEMATICS

- One of CSCI 140, CSCI 141, MATH 307;
(M/CS majors should complete CSCI 141)

The Bachelor of Arts-Secondary Education degree has the same core except for

- MATH 304, MATH 312 and requires both MATH 302 and MATH 309

These courses, except for MATH 304 and MATH 312, represent the minimum that a student planning one of these majors should complete during the first two years. A well-prepared student will be able to build a stronger program, possibly including some graduate-level courses in the senior year, by completing MATH 225 some 300-level work chosen under advisement in addition to the list above. In particular, Math 331 (differential equations) will be suitable for many students.

Transfer students, especially those intending to enter Western with an Associate of Arts degree, should normally complete as much as possible of the core program above prior to entering Western, and certainly including the entire calculus sequence and linear algebra. Students should be aware that 200-level differential equations courses may not transfer as equivalent to MATH 331, and that certain third quarter calculus courses also may not transfer as equivalent to either MATH 224 or 226.

The Bachelor of Arts major in mathematics provides exposure to a wide range of courses but, relative to the Bachelor of Science major, has fewer requirements for courses in analysis and other upper-division courses. A Bachelor of Science major in mathematics is generally more appropriate than a Bachelor of Arts major in mathematics for students intending to pursue graduate studies in any mathematically intensive discipline.

Bachelor of Arts

Instructors in many courses require that students use a graphing calculator. Students should contact the department for recommendations before purchasing a calculator.

Accelerated BS-MS Program

By taking a significant number of graduate math courses as an undergraduate, it is possible to earn both a Bachelor of Science and a Master of Science degree in mathematics within five years of study. Detailed requirements for this option are available from the Department of Mathematics.

Enrollment Preference for Majors

The department will give enrollment preference for certain high-demand courses to its majors.

Information

Those interested in the study of mathematics are welcome to write, phone or visit the Chair of the Department of Mathematics, Western Washington University, Bellingham WA 98225, phone 360-650-3785.

Graduate Study

For a concentration leading to the Master of Science degree, see the Graduate School section of this catalog.

By taking a significant number of graduate math courses as an undergraduate, it is possible to earn both a Bachelor of Science and a Master of Science degree in mathematics within five years of study. Detailed requirements for this option are available from the Department of Mathematics.

observations from science; with inference, deduction, and proof; and with mathematical models of natural phenomena, of human behavior, and of social systems.

As a practical matter, Mathematics is a science of pattern and order. Its domain is not molecules or cells, but numbers, chance, form, algorithms, and change. As a science of abstract objects, Mathematics relies on logic rather than on observation as its standard of truth, yet employs observation, simulation, and even experimentation as means of discovering truth." From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences.

Why Consider a Mathematics Major?

"The special role of Mathematics in education is a consequence of its universal applicability. The results of Mathematics-theorems and theories-are both significant and useful; the best results are also elegant and deep. Through its theorems, Mathematics offers science both a foundation of truth and a standard of certainty.

In addition to theorems and theories, Mathematics offers distinctive modes of thought which are both versatile and powerful, including modeling, abstraction, optimization, logical analysis, inference from data, and use of symbols. Experience with mathematical modes of thought builds mathematical power-a capacity of mind of increasing value in this technological age that enables one to read critically, to identify fallacies, to detect bias, to assess risk, and to suggest alternatives. Mathematics empowers us to understand better the information-laden world in which we live. " From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences

Empowered with the critical thinking skills that Mathematics develops, recent Mathematics graduates from Western have obtained positions in a variety of fields including actuarial science, cancer research, computer software development, business management and the movie industry. The skills acquired in our program have prepared graduates for further academic studies in Mathematics, Computer Science, Physics, Biology, Chemistry, Oceanography and Education.

Compared to the BS Mathematics major, the BA has fewer advanced requirements and provides greater flexibility in the choice of courses to take.

How to Declare (Admission and Declaration Process):

Students who intend to complete a major in Mathematics are urged to declare the major formally at an early point in their Western career so that a program of study can be planned carefully in collaboration with a departmental advisor.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 125 - Calculus and Analytic Geometry II

MATHEMATICS

OR

MATH 134 - Calculus I Honors

MATH 135 - Calculus II Honors

OR

MATH 138 - Accelerated Calculus

Choose either:

MATH 204 - Elementary Linear Algebra

MATH 331 - Ordinary Differential Equations

OR

MATH 203 - Linear Algebra and Differential Equations I

MATH 303 - Linear Algebra and Differential Equations II

MATH 224 - Multivariable Calculus and Geometry I

MATH 226 - Limits and Infinite Series

One course from:

MATH 341 - Probability and Statistical Inference

MATH 441 - Probability

One course from:

MATH 419 - Historical Perspectives of Mathematics

MATH 420 - Topics in the History and Philosophy of Mathematics

One course from:

CSCI 140 - Programming Fundamentals in C++

CSCI 141 - Computer Programming I

MATH 307 - Mathematical Computing

NOTE: If the supporting sequence from CSCI below is chosen, this requirement is fulfilled.

Three courses from:

MATH 302 - Introduction to Proofs Via Number Theory

MATH 304 - Linear Algebra

MATH 309 - Introduction to Proof in Discrete Mathematics

MATH 312 - Proofs in Elementary Analysis

MATH 360 - Euclidean and Non-Euclidean Geometry

Two courses from:

MATH 410 - Mathematical Modeling

M/CS 335 - Linear Optimization

M/CS 375 - Numerical Computation

M/CS 435 - Nonlinear Optimization

M/CS 475 - Numerical Analysis

Sixteen additional approved credits in mathematics or math-computer science, which includes completion of two of the following pairs:

MATH 302 - Introduction to Proofs Via Number Theory

together with one of:

MATH 405 - Algebraic Geometry

MATH 451 - Number Theory

Only one of the pairs from the above group may be used

One course from:

MATH 303 - Linear Algebra and Differential Equations II

MATH 331 - Ordinary Differential Equations

together with one of:

MATH 415 - Mathematical Biology

MATH 430 - Fourier Series and Applications to Partial Differential Equations

MATH 431 - Analysis of Partial Differential Equations

MATH 432 - Systems of Differential Equations

Only one of the pairs from the above group may be used

The following pair:

MATH 341 - Probability and Statistical Inferences

MATH 342 - Statistical Methods I

The following pair:

MATH 401 - Introduction to Abstract Algebra

MATH 402 - Introduction to Abstract Algebra

The following pair:

MATH 421 - Methods of Mathematical Analysis I

MATH 422 - Methods of Mathematical Analysis II

The following pair:

MATH 441 - Probability

MATH 442 - Mathematical Statistics

The following pair:

M/CS 335 - Linear Optimization

M/CS 435 - Nonlinear Optimization

The following pair:

M/CS 375 - Numerical Computation

M/CS 475 - Numerical Analysis

NOTE: Courses counted toward the major in the preceding boxes do not count toward the 16 credits but can serve as part (or all) of the pair.

□ One of the following sequences:

PHYS 161 - Physics with Calculus I

PHYS 162 - Physics with Calculus II

PHYS 163 - Physics with Calculus III

OR

CHEM 121 - General Chemistry I

CHEM 122 - General Chemistry II

CHEM 123 - General Chemistry III

OR

CHEM 125 - General Chemistry I, Honors

CHEM 126 - General Chemistry II, Honors

CHEM 225 - General Chemistry III, Honors

OR

CSCI 141 - Computer Programming I

CSCI 145 - Computer Programming and Linear Data Structures

CSCI 241 - Data Structures

CSCI 301 - Formal Languages and Functional Programming

and one of:

CSCI 305 - Analysis of Algorithms and Data Structures I

CSCI 330 - Database Systems

CSCI 345 - Object Oriented Design

CSCI 401 - Automata and Formal Language Theory

OR

ECON 206 - Introduction to Microeconomics

ECON 207 - Introduction to Macroeconomics

ECON 306 - Intermediate Microeconomics

and one of:

Introduction

"Mathematics reveals hidden patterns that help us understand the world around us. Now much more than Arithmetic and Geometry, Mathematics today is a diverse discipline that deals with data, measurements, and

MATHEMATICS

observations from science; with inference, deduction, and proof; and with mathematical models of natural phenomena, of human behavior, and of social systems.

As a practical matter, Mathematics is a science of pattern and order. Its domain is not molecules or cells, but numbers, chance, form, algorithms, and change. As a science of abstract objects,

Mathematics relies on logic rather than on observation as its standard of truth, yet employs observation, simulation, and even experimentation as means of discovering truth." From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences.

This major satisfies the academic major requirement for teacher certification with an endorsement in elementary education and must be accompanied by the professional preparation program in Elementary Education offered through Woodring College of Education.

Why Consider a Mathematics - Elementary Major?

Teaching Mathematics is a challenge, a responsibility, and an opportunity. Learning to teach Mathematics occurs through a variety of means: the study of a wide variety of Mathematics, pedagogical preparation within a mathematical context, formal clinical preparation in education, an extended internship, and continual experiences as a student, learner, and problem solver in Mathematics.

There is a growing demand for elementary teachers with a strong background in Mathematics, but there is an even greater need for quality Mathematics teachers—elementary teachers who care about both students and Mathematics, elementary teachers who have a broad and deep understanding of Mathematics, and elementary teachers who are thoroughly professional. The responsibilities are great, but the rewards are even greater.

As a prospective elementary teacher specializing in Mathematics you need to focus on expanding your personal understanding of Mathematics and capitalizing on opportunities to work with pre-college students—as a tutor, as a classroom assistant, as a practicum student, and as a novice teacher in your internship. Are you up for it?

How to Declare (Admission and Declaration):

Students who intend to complete a major in Mathematics are urged to declare the major formally at an early point in their Western career so that a program of study can be planned in collaboration with a departmental advisor.

This major satisfies the academic major requirements for teacher certification with an endorsement in elementary education and must be accompanied by the professional preparation program in elementary

education. See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements. For more information on the Math Department go to Declaration of Major.

Grade Requirements

Recommendation for teaching endorsement normally requires completion of the major with a grade point of 2.50 or better in the required major courses. Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Requirements

- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I and
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 134 - Calculus I Honors and
 - MATH 135 - Calculus II Honors
 - or
 - MATH 138 - Accelerated Calculus
- MATH 204 - Elementary Linear Algebra
- MATH 302 - Introduction to Proofs Via Number Theory
- MATH 307 - Mathematical Computing
- MATH 309 - Introduction to Proof in Discrete Mathematics
- MATH 341 - Probability and Statistical Inference
- MATH 360 - Euclidean and Non-Euclidean Geometry
- MATH 381 - Teaching K-8 Mathematics I
- MATH 382 - Teaching K-8 Mathematics II
- MATH 383 - Teaching K-8 Mathematics III
- MATH 419 - Historical Perspectives of Mathematics
- MATH 491 - Internship Seminar - Teaching K-8 Mathematics

Additional Major Requirements

Elementary Education Professional Program Requirements (100-103 credits)

Department of Elementary Education, Woodring College of Education

Introduction

Students seeking a bachelor's degree with teacher certification and an endorsement in elementary education must complete the GURs, an approved academic major, and the professional education course work listed below.

Admission and Declaration Process

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Professional Studies Core (22 credits)

- ELED 303 - Educational Psychology - Development and Learning
- ELED 310 - Education, Culture, and Equity
- ELED 370 - Introduction to Teaching

MATHEMATICS

- I T 344 - Foundations of Technology in Teaching and Learning
- I T 442 - Digital Decisions: Technology for Educators
- SPED 364 - Teaching Each Student

Elementary Program — Methods, Curriculum Content, and Field Experiences (78-81 credits)

- One course from:
 - ART 398 - Integrated Arts for Elementary Educators
 - DNC 398 - Integrated Arts for Elementary Educators
 - MUS 398 - Integrated Arts for Elementary Educators
 - THTR 398 - Integrated Arts for Elementary Educators
- One course from:
 - ART 380 - Art Educating the Child
 - DNC 433 - Creative Movement for Educators With Lab
 - MUS 361 - Music for Elementary Teachers
 - THTR 350 - Theatre for Youth
 - THTR 351 - Creative Pedagogy
- ELED 425 - Social Studies for the Elementary School
- ELED 470 - Developing Teaching
- ELED 471 - Documenting Teaching
- ELED 480 - Literacy: Beginning Communicators
- ELED 481 - Literacy: Fluent Communicators
- ELED 491 - September Experience
- ELED 492 - Practicum: Experience in Literacy Methods
- ELED 494 - Internship - Elementary
- HLED 455 - Health Education Grades K-8
- MATH 381 - Teaching K-8 Mathematics I
- MATH 382 - Teaching K-8 Mathematics II
- MATH 383 - Teaching K-8 Mathematics III
- MATH 491 - Internship Seminar - Teaching K-8 Mathematics

Introduction

"Mathematics reveals hidden patterns that help us understand the world around us. Now much more than arithmetic and geometry, mathematics today is a diverse discipline that deals with data, measurements, and observations from science; with inference, deduction, and proof; and with mathematical models of natural phenomena, of human behavior, and of social systems.

As a practical matter, Mathematics is a science of pattern and order. Its domain is not molecules or cells, but numbers, chance, form, algorithms, and change. As a science of abstract objects, Mathematics relies on logic rather than on observation as its standard of truth, yet employs observation, simulation, and even experimentation as means of discovering truth." From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences.

This major must be accompanied by the professional preparation program in secondary education offered through Woodring College of Education.

Why Consider a Mathematics - Secondary Major?

Teaching Mathematics is a challenge, a responsibility, and an opportunity. Learning to teach Mathematics occurs through a variety of means: the study of a wide variety of Mathematics, pedagogical preparation within a mathematical context, formal clinical preparation in education, an extended internship, and continual experiences as a student, learner, and problem solver in Mathematics.

Everyone aspiring to be a Mathematics teacher is aware of the demand for qualified teachers at the secondary level, but there is an even greater need for quality Mathematics teachers—teachers who care about both students and Mathematics, teachers who have a broad and deep understanding of Mathematics, and teachers who are thoroughly professional. The responsibilities are great, but the rewards are even greater.

As a prospective teacher you need to focus on expanding your personal understanding of Mathematics and capitalizing on opportunities to work with pre-college students as a tutor, as a classroom assistant, as a practicum student, and as a novice teacher in your internship. Are you up for it?

Introduction

"Mathematics reveals hidden patterns that help us understand the world around us. Now much more than arithmetic and geometry, Mathematics today is a diverse discipline that deals with data, measurements, and observations from science; with inference, deduction, and proof; and with mathematical models of natural phenomena, of human behavior, and of social systems.

As a practical matter, Mathematics is a science of pattern and order. Its domain is not molecules or cells, but numbers, chance, form, algorithms, and change. As a science of abstract objects, Mathematics relies on logic rather than on observation as its standard of truth, yet employs observation, simulation, and even experimentation as means of discovering truth." From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences.

Why Consider an Applied Mathematics Major?

The special role of Mathematics in education is a consequence of its universal applicability. The results of Mathematics-theorems and theories-are both significant and useful; the best results are also elegant and deep. Through its theorems, Mathematics offers science both a foundation of truth and a standard of certainty.

In addition to theorems and theories, Mathematics offers distinctive modes of thought which are both versatile and powerful, including modeling, abstraction, optimization, logical analysis, inference from data, and use of symbols. Experience with mathematical modes of thought builds mathematical power—a capacity of mind of increasing value in this technological age that enables one to read critically, to identify fallacies, to detect bias, to assess risk, and to suggest alternatives. Mathematics empowers us to understand better the information-laden world in which we live." From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences.

Empowered with the critical thinking skills that Mathematics develops, recent Mathematics graduates from Western have obtained positions in a variety of fields including actuarial science, cancer research, computer software development, business management and the movie industry. The skills acquired in our program have prepared graduates for further academic studies in Mathematics, Computer Science, Physics, Biology, Chemistry, Oceanography and Education.

Compared to the BA and BS Mathematics majors, this major requires that the student take a carefully selected sequence of courses focusing on a particular area of application of mathematics.

Language competency in French, German or Russian is strongly recommended for those students who may go to graduate school.

Mathematics/Computer Science, BS

Combined major offered by the Department of Mathematics, College of Science and Engineering and the Department of Computer Science, College of Science and Engineering.

91 credits

Introduction

Computer Science at Western is organized around the study of design and analysis techniques used to write software or programs in various application areas, along with details about the internal workings of computers (known as computer architecture and operating systems).

"As a practical matter, Mathematics is a science of pattern and order. Its domain is not molecules or cells, but numbers, chance, form, algorithms, and change. As a science of abstract objects, Mathematics relies on logic rather than on observation as its standard of truth, yet employs observation, simulation, and even experimentation as means of discovering truth." From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences

Why Consider a Mathematics/Computer Science Major?

The Mathematics/Computer Science BS Program provides excellent preparation for graduate study or for careers in the technical, scientific and mathematical application of computers. Graduates are able to apply their knowledge and expertise in the development of computer-based solutions of complicated mathematical problems, including environmental and ecological modeling, scientific and engineering calculations, and statistical analysis.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Students are urged to declare the major formally at an early point in their Western career so that a program of study can be planned carefully in collaboration with departmental advisors. Contact the Mathematics Department when you are ready to declare this major.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- CSCI 141 - Computer Programming I

- CSCI 145 - Computer Programming and Linear Data Structures
- CSCI 241 - Data Structures
- CSCI 301 - Formal Languages and Functional Programming
- CSCI 305 - Analysis of Algorithms and Data Structures I
- CSCI 345 - Object Oriented Design
- CSCI 405 - Analysis of Algorithms and Data Structures II
- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 134 - Calculus I Honors
 - MATH 135 - Calculus II Honors
 - or
 - MATH 138 - Accelerated Calculus
- Choose either:
 - MATH 204 - Elementary Linear Algebra
 - MATH 331 - Ordinary Differential Equations
 - or
 - MATH 203 - Linear Algebra and Differential Equations I
 - MATH 303 - Linear Algebra and Differential Equations II
- MATH 224 - Multivariable Calculus and Geometry I
- MATH 226 - Limits and Infinite Series
- MATH 302 - Introduction to Proofs Via Number Theory
- MATH 312 - Proofs in Elementary Analysis
- One course from:
 - MATH 430 - Fourier Series and Applications to Partial Differential Equations
 - MATH 432 - Systems of Differential Equations
- One course from:
 - MATH 341 - Probability and Statistical Inference
 - MATH 441 - Probability
- One course from:
 - MATH 304 - Linear Algebra
 - MATH 401 - Introduction to Abstract Algebra
- Three courses from:
 - M/CS 335 - Linear Optimization
 - M/CS 375 - Numerical Computation
 - M/CS 435 - Nonlinear Optimization
 - M/CS 475 - Numerical Analysis
- 3 additional upper-division credits in mathematics or computer science as advised

Statistics, BS

Department of Mathematics, College of Science and Engineering

87-95 credits

Introduction

Today's era has witnessed an explosive growth in the amount of data collected, and there has been a realization that these massive data sets ("big data") are reservoirs of valuable information that can be used not only for research purposes but also for direct applications and for sound decision-making. The extraction of the useful parts from big data and the analysis and interpretation of its contents require skills and knowledge in certain areas of the mathematical and computer sciences, specifically in machine learning, data mining - and statistics.

Apart from being a vital component in exploiting big data, statistical expertise is also essential in virtually all scientific organizations, large business enterprises and government agencies. The ability to analyze and make sense of data, big or small, by means of statistical techniques is critical in ensuring that the conclusions reached and the decisions made are based on valid empirical evidence.

MATHEMATICS

Western's B.S. degree in Statistics is organized around a core course of study in probability and statistics that provides students with a background in the fundamentals of statistical thought and the application of the most common types of statistical analyses. In addition, our elective classes offer our students the opportunity to have at their disposal a diverse toolkit of analysis techniques and modeling choices that can be used to make sense of information coming from a breadth of different data types.

How to Declare (Admission and Declaration Process):

Students who intend to complete a major in Statistics are urged to declare the major formally at an early point in their Western career, so that a program of study can be planned carefully in collaboration with a departmental advisor.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Mathematic Requirements (31 credits)

- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I
 - or
 - MATH 134 - Calculus I Honors
- Choose either:
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 135 - Calculus II Honors
- MATH 204 - Elementary Linear Algebra
- MATH 224 - Multivariable Calculus and Geometry I
- MATH 226 - Limits and Infinite Series
- MATH 304 - Linear Algebra
- Choose either:
 - MATH 302 - Introduction to Proofs Via Number Theory
 - or
 - MATH 309 - Introduction to Proof in Discrete Mathematics

Core Requirements (28 credits)

- MATH 341 - Probability and Statistical Inference
- MATH 342 - Statistical Methods I
- MATH 343 - Statistical Method II
- MATH 441 - Probability
- MATH 442 - Mathematical Statistics
- MATH 445 - Computational Statistics
- Choose either:
 - CSCI 140 - Programming Fundamentals in C++
 - or
 - CSCI 141 - Computer Programming I

or
MATH 307 - Mathematical Computing

Electives (16 credits)

- Choose four classes from the following:
 - MATH 443 - Linear Statistical Models
or MATH 543 - Linear Statistical Models
 - MATH 444 - Categorical Data Analysis
 - MATH 456 - Applied Time Series Analysis
or MATH 556 - Applied Time Series Analysis
 - MATH 457 - Bayesian Statistics
or MATH 557 - Bayesian Statistics
 - MATH 458 - Stochastic Processes
or MATH 558 - Stochastic Processes

Breadth Requirement (12-20 credits, or more)

Students must either complete a minor in another department or complete one of the following sequences:

- PHYS 161, PHYS 162, PHYS163;
- CHEM 121, CHEM 122, CHEM 123;
- CHEM 125, CHEM 126, CHEM 225;
- BIO 204, BIO 205, CHEM 121, 122;
- CSCI 145, CSCI 241, CSCI 301, and one of CSCI 305, CSCI 330, CSCI 345, CSCI 401;
- ECON 206, ECON 207, ECON 306, and one of ECON 375, ECON 470, ECON 475;
- MATH 312, MATH 421, MATH 422.

MATHEMATICS

Program Description

The graduate program in mathematics is designed to meet the requirements of subsequent professional and academic work in advanced mathematics. Students are prepared to continue to further graduate studies or for professional employment in industry or in college teaching. The focus is on providing a strong and broad analytical foundation, together with sufficient flexibility to pursue particular interests and areas of application in greater depth.

Goals

The program prepares students for:

- Continuing further graduate studies, or
- Professional employment in industry, or
- College teaching.

Prerequisites/Qualification Examination

To be eligible for admission to the MS program in mathematics, a student should have completed at least the following courses or the equivalent with grades of B or better: Math 224, 304, 312, 331, CS 141 or Math 307, and two math courses at the 400 level.

A student who has not completed all of these courses but who can demonstrate strong promise of the ability to succeed in the program may be admitted with special stipulations. In such cases, the graduate advisor will, in consultation with the student, specify the conditions to be satisfied by the student in order to fully qualify for the program.

Program Application/Admission Requirements

Deadline: Please see Graduate School deadlines.

TA Deadline: Preferred consideration will be given to applicants who have completed files by March 1.

Specific Test Requirements: Graduate Record Exam, General Test.

Contact the mathematics department, 360-650-3785, or see its website at www.wvu.edu/math/grad/prospective.shtml for specifics.

Graduate School Admission Link

Program Requirements

In most cases the student's program must include at least 48 credits for the non-thesis option. At most 10 credits at the 400 level can be included in this total.

Students who have taken a significant number of graduate math courses as undergraduates at WWU may complete the graduate program with only 36 additional 500-level credits (details of this program are available from the Department of Mathematics).

The following mathematics courses or their equivalents must be completed before graduation: Math 504, 521, 522, 691 and at least one course or its equivalent from each of the following four lists

- Algebra:
 - MATH 502 - Abstract Algebra
 - MATH 503 - Topics in Abstract Algebra
 - MATH 560 - Topics in Geometry
 - MATH 564 - Graph Theory
 - MATH 566 - Topics in Combinatorics
- Analysis:
 - MATH 523 - Advanced Calculus of Several Variables
 - MATH 524 - Topics in Analysis

MATH 525 - Topology
 MATH 527 - Real Analysis
 MATH 528 - Functional Analysis
 MATH 539 - Topics in Complex Analysis
 MATH 562 - Differential Geometry

❑ Decisions:

MATH 535 - Nonlinear Optimization
 MATH 542 - Mathematical Statistics
 MATH 543 - Linear Statistical Models
 MATH 545 - Topics in Probability
 MATH 570 - Topics in Optimization

❑ Applied:

MATH 510 - Mathematical Modeling
 MATH 511 - Advanced Modeling
 MATH 573 - Numerical Linear Algebra
 MATH 575 - Numerical Analysis
 MATH 577 - Topics in Numerical Analysis

The student's program must also include at least four of the following courses: Math 503, 511, 523, 525, 527, 528, 533, 539, 545, 560, 562, 564, 566, 570, 573, 577.

A student who has not completed a senior-level course in each of the following areas will also be required to include the indicated course or courses as part of his or her program: abstract algebra (401), second course in ordinary differential equations (432), complex analysis (538), probability or statistics (541).

Graduate teaching assistants are required to take MATH 595 during their first year of study.

Other Requirements

Qualifying Examination for Candidacy

Each student must pass a qualifying exam before being advanced to candidacy.

Advancement to Candidacy

Students are advanced to candidacy when they have completed at least 12 credits of approved course work with a B or better GPA, including at least one course numbered 500 or above, and have passed the qualifying exam.

Project

Every student is required to complete a project (MATH 691). The project will involve both an oral exam on the subject of the project and a colloquium presentation to the mathematical community. The project must be completed before a student may elect the thesis option. See the departmental graduate handbook for additional details.

Further Information and Advice

Each student is urged to prepare a program of courses in consultation with his or her advisor as soon as possible after beginning work toward a degree. Deviations from the requirements above may be approved by the department's Graduate Committee upon request of the student's advisor. For the student's protection, such approval should be obtained before any deviations are made.

A student who wishes to include a course numbered 400, 499, 500 or 599 as part of his or her graduate degree program must obtain approval in advance from the Graduate Committee. The Graduate Committee will consider approval on the basis of a detailed written description submitted by the student not later than three weeks before the date of registration. If the course is approved for graduate credit, the description will be retained in the student's file.

Minor

Mathematics Minor

Department of Mathematics, College of Science and Engineering

35 credits

Major/Career Resources

http://www.wvu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Declaration of Major

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 134 - Calculus I Honors
 - MATH 135 - Calculus II Honors
 - or
 - MATH 138 - Accelerated Calculus
- MATH 204 - Elementary Linear Algebra
- or

- MATH 203 - Linear Algebra and Differential Equations I
- MATH 224 - Multivariable Calculus and Geometry I
- One course from:
 - CSCI 140 - Programming Fundamentals in C++
 - CSCI 141 - Computer Programming I
 - MATH 307 - Mathematical Computing
- 12 credits of approved electives from:
 - MATH 225 - Multivariable Calculus and Geometry II
 - MATH 226 - Limits and Infinite Series
 - And upper-division courses except:
 - MATH 307 - Mathematical Computing
 - MATH 381 - Teaching K-8 Mathematics I
 - MATH 382 - Teaching K-8 Mathematics II
 - MATH 383 - Teaching K-8 Mathematics III
 - MATH 483 - Methods of Teaching Secondary Mathematics
 - MATH 491 - Internship Seminar - Teaching K-8 Mathematics
- Note: Only one of MATH 303 or MATH 331 may be counted toward minor.

Mathematics — Secondary Minor

Department of Mathematics, College of Science and Engineering

41 credits

Introduction

This minor leads to endorsement in secondary mathematics when accompanied by the professional program in secondary education and a qualifying endorsement in another content area. See the Secondary Education section of this catalog for program admission, completion, and teacher certification requirements.

Major/Career Resources

http://www.wvu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Declaration of Major

Grade Requirements

Recommendation for teaching endorsement normally requires completion of the major with a grade point of 2.50 or better in the required major courses. Students must earn a grade of C (2.0) or better in the secondary education professional program and in all courses required for the endorsement.

Requirements

- MATH 204 - Elementary Linear Algebra
- MATH 302 - Introduction to Proofs Via Number Theory
- MATH 307 - Mathematical Computing
- MATH 309 - Introduction to Proof in Discrete Mathematics
- MATH 341 - Probability and Statistical Inference
- MATH 360 - Euclidean and Non-Euclidean Geometry
- MATH 419 - Historical Perspectives of Mathematics
- MATH 483 - Methods of Teaching Secondary Mathematics
- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 134 - Calculus I Honors
 - MATH 135 - Calculus II Honors

MATHEMATICS

or

MATH 138 - Accelerated Calculus

Additional Requirements

Secondary Education Professional Program Requirements (58 credits)

- SEC 303 - Teaching Adolescents: Development and Identity
- SEC 310 - Education, Culture, and Equity
- SEC 410 - Dynamics of Teaching
- SEC 411 - Philosophical Foundations of Education
- SEC 425 - Developmental Reading, Writing and Learning in Secondary Schools
- SEC 430 - Secondary School Methods I - Instructional Strategies, Daily Planning, and Standards
- SEC 431 - Secondary School Methods II-Assessment and Long Term Planning
- SEC 432 - Secondary School Methods III - Management, Motivation and Discipline
- SEC 433 - Teaching and Learning Laboratory
- SEC 435 - Secondary Practicum I
- SEC 436 - Secondary Practicum II
- SEC 495 - Internship - Secondary
- SPED 363 - Secondary Students With Special Needs

Mathematics Courses

MATH 099 - Introductory Algebra

Gain skill working with algebraic language and concepts using graphs, tables and algebraic expressions and equations in order to prepare for math 112. Develop problem solving abilities and understanding. Polynomials, exponents, roots, radicals, and linear equations and inequalities and their graphs. Pass/Fail grading.

Prerequisites & Notes: NOTE: This course will fulfill 5 credits towards financial aid and veterans benefits requirements only. No credit will be allowed toward the graduation requirement of 180 credits.

Credits: 5

MATH 101 - Functions and Algebraic Methods for K-8 Teachers

Designed for prospective K-8 teachers. Emphasizes pattern recognition and generalization, building mathematical models and problem solving.

Supporting topics include polynomials, linear and quadratic equations, inequalities, graphs, rational expressions and functions. Graphing calculators required. Cannot be counted toward majors or minors in mathematics or computer science.

Prerequisites & Notes: Suitable General Math Placement Test score or college intermediate algebra course with a C- or better; instructor permission.

Credits: 5

Grade Mode: Letter

MATH 106 - Quantitative Reasoning

Develops abilities to understand quantitative information and make reasoned decisions using it. Focus is on reasoning and symbolic and quantitative models as they are commonly encountered in personal life, careers and public issues.

Credits: 4

Grade Mode: Letter

MATH 107 - Mathematical Reasoning and Its Applications

Assessing quantitative information, reasoning, personal finance, data display and summary; making quantitative decisions about personal and public issues; understanding linear and exponential growth models; using basic probability techniques. Students interested in taking higher level mathematics courses should instead take an appropriate course from MATH 112, 114, 118, 124, 156, 157 or 240. Note: This course is not an acceptable prerequisite for MATH 112.

Prerequisites & Notes: Suitable General Math Placement Test score or C- or better in MATH 112 or MATH 99, or college intermediate algebra course.

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

MATH 112 - Functions and Algebraic Methods

Pattern recognition and generalization, building mathematical models and problem solving are emphasized. Supporting topics include

polynomials, linear and quadratic equations, inequalities, graphs, rational expressions, radicals and functions. Graphing calculator required. Cannot be counted toward majors or minors in mathematics or computer science.

Prerequisites & Notes: Suitable General Math Placement Test score, MATH 99 or completion of a college intermediate algebra course with a C- or better. Note: Neither MATH 106 nor MATH 107 is acceptable pre-requisite for this course.
Credits: 5
Grade Mode: Letter
GUR Attributes: QSR

MATH 114 - Precalculus I

Data analysis, functions as mathematical models, functions and their graphs. Graphing calculators are required. Cannot be counted toward majors or minors in mathematics or computer science. Students needing math for GUR purposes only should consider MATH 107 instead of MATH 114.

Prerequisites & Notes: Suitable General Math Placement Test score or MATH 112 with a C- or better.
Credits: 5
Grade Mode: Letter
GUR Attributes: QSR

MATH 115 - Precalculus II

Data analysis, modeling, trigonometry, inverse functions. Graphing calculator required. Cannot be counted toward majors or minors in mathematics or computer science.

Prerequisites & Notes: MATH 114 with a C- or better at Western
Credits: 5
Grade Mode: Letter
GUR Attributes: QSR

MATH 118 - Accelerated Precalculus

Not open to students who have taken a lower numbered mathematics course at Western. Functions as mathematical models, functions and their graphs, inverse functions, trigonometry. Graphing calculator required. Cannot be counted toward majors or minors in mathematics or computer science.

Prerequisites & Notes: Suitable General or Advanced Math Placement Test score.
Credits: 5
Grade Mode: Letter
GUR Attributes: QSR

MATH 119A - Topics in Mathematics

A supplement to one or more math courses offered at the 100 level. Repeatable, subject to permission of department.

Prerequisites & Notes: Permission of instructor.
Credits: 1-15
Grade Mode: Letter

MATH 119B - Topics in Mathematics

A supplement to one or more math courses offered at the 100 level. Repeatable, subject to permission of department. S/U grading.

Prerequisites & Notes: Permission on instructor.
Credits: 1-15
Grade Mode: S/U

MATH 124 - Calculus and Analytic Geometry I

Average and instantaneous rates of change, interpretation, computation, and application of derivatives to optimization, rates, graphing, and antiderivative problems. Graphing calculator required.

Prerequisites & Notes: Suitable Advanced Math Placement Test score or C- or better in MATH 115 or MATH 118 at WWU or a grade of 2.5 or higher in the final quarter of a college precalculus sequence.
Credits: 5
Grade Mode: Letter
GUR Attributes: QSR

MATH 125 - Calculus and Analytic Geometry II

The definite integral, techniques of integration, applications including area and volume, growth and decay, introduction to differential equations.

Prerequisites & Notes: MATH 124 or MATH 134.
Credits: 5
Grade Mode: Letter

MATH 134 - Calculus I Honors

Intended for particularly strong students. Average and instantaneous rates of change, interpretation, computation, and application of derivatives to optimization, rates, graphing, and antiderivative problems. Frequent writing assignments. Graphing calculator required.

Prerequisites & Notes: Suitable score on the Advanced Mathematics Placement test or an A in MATH 115 or MATH 118, and permission of instructor.
Credits: 5
Grade Mode: Letter
GUR Attributes: QSR

MATHEMATICS

MATH 135 - Calculus II Honors

Intended for particularly strong students. Riemann sums and the definite integral, interpretation and application to area, volume, growth and decay, techniques of integration. Introduction to differential equations. Frequent writing assignments.

Prerequisites & Notes: MATH 124 or MATH 134, and permission of instructor.

Credits: 5

Grade Mode: Letter

MATH 138 - Accelerated Calculus

Designed for entering freshmen who are thoroughly familiar with the computational aspects of single variable calculus. Students study selected topics from MATH 124 and 125 from a more conceptual point of view. Students who complete this course receive five credits of advanced placement (unless previously received). Not open to students who have taken MATH 124 or 125. Offered fall quarter only. AP mathematics credit and MATH 138 are equivalent to MATH 124 and 125.

Prerequisites & Notes: One year AP-level High School calculus; suitable score on the Advanced Math Placement Test and permission of instructor.

Credits: 5

Grade Mode: Letter

MATH 156 - Algebra With Applications to Business and Economics

Equations and inequalities, graphs and functions, exponential and logarithmic functions, applications to finance. This course is designed for business students continuing on to MATH 157.

Prerequisites & Notes: Suitable General Math Placement Test score or MATH 112 with a C- or better

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

MATH 157 - Calculus With Applications to Business and Economics

Limits, rates of change, differentiation, graphing and optimization, integration, business applications, partial differentiation. MATH 124 may be substituted for MATH 157 but not vice versa. Cannot be taken for credit by a student who has already completed another college-level calculus course.

Prerequisites & Notes: Suitable Advanced Math Placement Test score or C- or better in MATH 156,

MATH 114 or MATH 118; or a final precalculus course with a C+ or better from an accredited college.

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

MATH 160 - Mathematics and Art

An investigation of the connections between mathematics, art and design with emphasis on mathematical inquiry and discovery. This problem solving course includes topics from a variety of mathematical disciplines such as: pattern and proportion, geometric constructions and proofs, symmetry and groups, polyhedra and origami, graphs and colorings, formal perspective, fractals and iterative processes, conics and curves.

Prerequisites & Notes: Suitable General Math Placement Test score or MATH 112 with a C- or better.

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

MATH 203 - Linear Algebra and Differential Equations I

First course in the 203-303 sequence. A unified treatment of the material on elementary linear algebra and elementary differential equations covered in MATH 204 and 331. Together with MATH 303, is equivalent to MATH 204 and MATH 331.

Prerequisites & Notes: MATH 125 or MATH 135 or equivalent

Credits: 4

Grade Mode: Letter

MATH 204 - Elementary Linear Algebra

Systems of linear equations; matrices; the vector space R^n ; linear independence, bases, subspaces and dimension in R^n ; introduction to determinants and the eigenvalue problem; applications.

Prerequisites & Notes: MATH 125 or MATH 135; MATH 224 recommended

Credits: 4

Grade Mode: Letter

MATH 205 - Linear Algebra Workshop

Elementary linear algebra projects on a computer. S/U grading.

Prerequisites & Notes: Math 204 or concurrent.

Credits: 1

Grade Mode: S/U

MATH 220 - Visualization in Multivariable Calculus

Weekly lab projects emphasizing the creation and interpretation of computer-generated graphs and contour diagrams for functions of several variables. Problems are drawn from material being studied in MATH 224. S/U grading.

Prerequisites & Notes: Math 224 or concurrent.

Credits: 1

Grade Mode: S/U

MATH 224 - Multivariable Calculus and Geometry I

Coordinate systems, curves and vectors in the plane and in space, partial derivatives, applications including optimization and motion, multiple integrals.

Prerequisites & Notes: MATH 125 or MATH 135, or MATH 138

Credits: 5

Grade Mode: Letter

MATH 225 - Multivariable Calculus and Geometry II

Multiple integrals, line and surface integrals, gradient fields, Green's and Stokes' theorems.

Prerequisites & Notes: MATH 224

Credits: 4

Grade Mode: Letter

MATH 226 - Limits and Infinite Series

Formal treatment of limits of functions and sequences of continuity, including a thorough training in constructing rigorous proofs of the epsilon-delta type. Convergence tests for infinite series. Radius of convergence, differentiation, and integration of Taylor series.

Prerequisites & Notes: MATH 125, MATH 135 or MATH 138

Credits: 4

Grade Mode: Letter

MATH 240 - Introduction to Statistics

Types of data, measures of center/spread, z-scores, graphical descriptions of data, the normal distribution, 1- and 2-sample hypothesis tests and confidence intervals for means and proportions, sample size calculations, chi-square tests, and one-way analysis of variance. Use of a statistical software package such as SPSS. Cannot be counted toward any major in the Department of Mathematics.

Prerequisites & Notes: Suitable General Math Placement Test score or MATH 112 or a precalculus course with a C+ or better from an accredited college.

Credits: 4

Grade Mode: Letter

GUR Attributes: QSR

MATH 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

MATH 302 - Introduction to Proofs Via Number Theory

The properties of integers, prime numbers, Euclidean algorithm, congruences. The student is expected to develop competence in proving basic results in number theory.

Prerequisites & Notes: MATH 125 or MATH 135 or MATH 138

Credits: 4

Grade Mode: Letter

MATH 303 - Linear Algebra and Differential Equations II

Second course in the MATH 203-303 sequence. A unified treatment of the material on elementary linear algebra and elementary differential equations covered in MATH 204 and 331. Together with MATH 203, is equivalent to MATH 204 and MATH 331.

Prerequisites & Notes: MATH 203

Credits: 4

Grade Mode: Letter

MATH 304 - Linear Algebra

Orthogonality and orthogonal bases; linear transformations and the least squares problem; further study of eigenvalues and eigenvectors and their applications; abstract vector spaces and linear transformations.

Prerequisites & Notes: MATH 204, MATH 224

Credits: 4

Grade Mode: Letter

MATH 307 - Mathematical Computing

MATHEMATICS

Use of mathematical software such as Matlab and Mathematica. Elementary programming, numerical and symbolic computation, visualization and technical reporting in mathematical context.

Prerequisites & Notes: MATH 125 or MATH 135 or MATH 138; MATH 204

Credits: 4

Grade Mode: Letter

MATH 309 - Introduction to Proof in Discrete Mathematics

Logic, sets, functions, sequences, counting methods, graph theory. The student is expected to develop competence in proving basic results in discrete mathematics.

Prerequisites & Notes: MATH 125

Credits: 4

Grade Mode: Letter

MATH 312 - Proofs in Elementary Analysis

Open and closed sets in the line and plane, sequences, least upper bound axiom, continuous functions and their properties. The student is expected to develop competence in proving basic theorems involving these concepts.

Prerequisites & Notes: MATH 226; MATH 302 or MATH 309. Restricted to majors and minors during Registration Phase 1.

Credits: 4

Grade Mode: Letter

MATH 331 - Ordinary Differential Equations

First order equations, first order systems (primarily linear), applications and modeling, qualitative reasoning. First course in the 331-432 sequence.

Prerequisites & Notes: Math 204; Math 224 recommended or concurrent.

Credits: 4

Grade Mode: Letter

MATH 341 - Probability and Statistical Inference

Probability, including combinatorial methods, discrete distributions and continuous distributions using integrals. Descriptive statistics and the use of computer statistical package. Statistical inference, including confidence intervals and hypothesis testing. Please note: MATH 341 and MATH 345 cannot both be counted for credit.

Prerequisites & Notes: MATH 125 or MATH 135 or MATH 138

Credits: 4

Grade Mode: Letter

MATH 342 - Statistical Methods I

Statistical techniques including chi-square tests, simple and multiple linear regression, and one-way analysis of variance. Extensive use of a computer statistical package.

Prerequisites & Notes: MATH 341 or MATH 345

Credits: 4

Grade Mode: Letter

MATH 343 - Statistical Method II

One- and two-way layouts, repeated-measures ANOVA, factorial designs, fixed versus random effects, multiple comparisons, logistic regression.

Prerequisites & Notes: MATH 342.

Credits: 4

Grade Mode: Letter

MATH 344 - Honors Probability and Statistics

Intended for particularly strong students. Probability, including combinatorial methods, discrete distributions and continuous distributions using integrals. Descriptive statistics and the use of a computer statistical package. Statistical inference, including confidence intervals and hypothesis testing. This class will substitute for Math 341 in any major/minor offered by the mathematics department.

Prerequisites & Notes: MATH 125 or MATH 135 or MATH 138; and instructor permission.

Credits: 4

Grade Mode: Letter

MATH 345 - Statistics for Engineering

Basic probability, discrete and continuous probability distributions. Descriptive statistics and the use of computer statistical packages. Statistical inference, including 1- and 2-sample hypothesis tests and confidence intervals for means and proportions, paired t test and sample size calculations. Engineering applications are emphasized. Please note: MATH 341 and MATH 345 cannot both be counted for credit.

Prerequisites & Notes: MATH 125

Credits: 4

Grade Mode: Letter

MATH 360 - Euclidean and Non-Euclidean Geometry

Metric development of Euclidean geometry and consideration of non-Euclidean geometries.

Prerequisites & Notes: MATH 125 or MATH 135 or MATH 138; MATH 204 and MATH 302 or MATH

309.

Credits: 4

Grade Mode: Letter

MATH 381 - Teaching K-8 Mathematics I

Investigations of mathematics topics that focus on logical reasoning, number concepts, and number operations. Emphasis on problem solving, the use of manipulatives and computing technologies, remediation and resource materials, and optimal pedagogical techniques that help students learn quality mathematics. Not acceptable for any departmental major except BA/Ed, Elementary, and does not satisfy GUR requirement except for those who complete the BA/Ed, Elementary.

Prerequisites & Notes: Suitable General Math Placement Test score; C or better in MATH 112 or college intermediate algebra course; one of ELED 370, ELED 372, SPED 420, ECE 391; Prerequisites must have been met within the last 5 years. Waiver of MPT due to college calculus course equivalent to WWU MATH 124.

Credits: 4

Grade Mode: Letter

MATH 382 - Teaching K-8 Mathematics II

Investigations of mathematics topics that focus on proportional thinking, rational numbers, and probability. Emphasis on problem solving, the use of manipulatives and computing technologies, remediation and resource materials, and optimal pedagogical techniques that help students learn quality mathematics. Not acceptable for any department major except BA/Ed, Elementary, and does not satisfy GUR mathematics requirement except for those who complete the BA/Ed, Elementary.

Prerequisites & Notes: MATH 381 with a C or better

Credits: 4

Grade Mode: Letter

MATH 383 - Teaching K-8 Mathematics III

Investigations of mathematics topics that focus on geometry, algebraic reasoning, measurement and statistics. Emphasis on problem solving, the use of manipulatives and computing technologies, remediation, assessment and resource materials, and optimal pedagogical techniques that help students learn quality mathematics. Not acceptable for any departmental major except BA/Ed, Elementary.

Prerequisites & Notes: MATH 382 with a C or better at WWU

Credits: 4

Grade Mode: Letter

MATH 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

MATH 401 - Introduction to Abstract Algebra

Introduction to groups, Lagrange's Theorem, isomorphisms and homomorphisms, normal subgroups and factor groups, the fundamental theorem of finite abelian groups.

Prerequisites & Notes: MATH 204; and MATH 302 or MATH 309.

Credits: 4

Grade Mode: Letter

MATH 402 - Introduction to Abstract Algebra

Introduction to rings and fields, ideals, polynomial rings, unique factorization domains, field extensions, finite fields.

Prerequisites & Notes: MATH 401

Credits: 4

Grade Mode: Letter

MATH 405 - Algebraic Geometry

An overview of algorithms and techniques inspired by geometry and used to solve systems of polynomial equations. Topics include affine varieties, polynomials, the division algorithm, Groebner bases, elimination theory, Hilbert's Nullstellensatz, the ideal-variety correspondence and basic projective geometry.

Prerequisites & Notes: MATH 204; MATH 302 or MATH 309.

Credits: 4

Grade Mode: Letter

MATH 409 - Putnam Exam Preparation

Preparation for participation in the annual Putnam Exam. This exam involves mathematical concepts beyond those typically found in standard courses. Questions cut across the bounds of disciplines and are hard. This course covers the basics of the relevant mathematical content, particularly in discrete mathematics, and emphasizes advanced problem-solving techniques. S/U grading.

Prerequisites & Notes: Permission of instructor.

MATHEMATICS

Credits: 2
Grade Mode: S/U

MATH 410 - Mathematical Modeling

The construction and solution of mathematical models, using optimization, stability analysis, eigenvalue methods, probability and simulation.

Prerequisites & Notes: MATH 204, MATH 224, MATH 331
Credits: 4
Grade Mode: Letter

MATH 412 - Mathematical Modeling Competition

Preparation for participation in the national mathematics modeling competition. Repeatable with no maximum.

Prerequisites & Notes: instructor permission
Credits: 1
Grade Mode: Letter

MATH 415 - Mathematical Biology

An introduction to mathematical models in biology. Population models, Michaelis-Menten kinetics, models for neuron functioning, pattern formation. Mathematical topics: difference equations, dynamical systems, conservation equations, stochastic models.

Prerequisites & Notes: MATH 224; either MATH 204 and MATH 331, or MATH 203 and MATH 303
Credits: 4
Grade Mode: Letter

MATH 419 - Historical Perspectives of Mathematics

History and development of mathematical thought from ancient to modern times. Philosophical, sociological and biographical perspectives.

Prerequisites & Notes: 12 credits upper-division math
Credits: 3
Grade Mode: Letter

MATH 420 - Topics in the History and Philosophy of Mathematics

Concentrated study of a topic or a closely connected group of topics associated with the history and philosophy of mathematics. Students are required to write a substantial expository paper.

Prerequisites & Notes: MATH 312

Credits: 3
Grade Mode: Letter

MATH 421 - Methods of Mathematical Analysis I

Introduction to metric spaces, properties of functions on metric spaces, compactness and continuity. The student is expected to develop competence in proving basic theorems involving these concepts.

Prerequisites & Notes: MATH 312
Credits: 4
Grade Mode: Letter

MATH 422 - Methods of Mathematical Analysis II

Analysis on the real line, including uniform convergence of series, using metric space notions. The student is expected to develop competence in proving theorems involving these concepts.

Prerequisites & Notes: MATH 421
Credits: 4
Grade Mode: Letter

MATH 424 - Topics in Analysis

Topics such as pointwise convergence of Fourier series, Gibbs phenomenon, Poisson summability, Dirichlet problem for the disc, Weierstrass approximation theorem. Repeatable to a maximum of 8 credits with various topics.

Prerequisites & Notes: Math 422
Credits: 4
Grade Mode: Letter

MATH 430 - Fourier Series and Applications to Partial Differential Equations

An introduction to Fourier series and the Fourier transform; applications to boundary value problems including the wave and heat equations.

Prerequisites & Notes: MATH 204, MATH 226, MATH 331
Credits: 4
Grade Mode: Letter

MATH 431 - Analysis of Partial Differential Equations

Solutions for general first order and linear second order partial differential equations. Topics from characteristics; propagation of singularities; hyperbolic, and elliptic equations; Cauchy problem; Dirichlet problem; Green's function; Poisson formula; maximum principle.

Prerequisites & Notes: MATH 204, MATH 225, MATH 226, MATH 312, MATH 331, or equivalent(s).

Credits: 4

Grade Mode: Letter

MATH 432 - Systems of Differential Equations

Forced second order equations, systems of nonlinear differential equations, applications.

Prerequisites & Notes: MATH 204, MATH 331; or MATH 203, MATH 303.

Credits: 4

Grade Mode: Letter

MATH 438 - Introduction to Complex Variables

Differentiation and integration of complex-valued functions; Cauchy integral theorem; calculations of residues.

Prerequisites & Notes: MATH 225 and MATH 312

Credits: 4

Grade Mode: Letter

MATH 441 - Probability

Discrete and continuous random variables, moment generating functions, multivariate distributions, survey of widely used distributions such as normal, chi-square, gamma, t and F distributions. Emphasis on the theoretical aspects of probability.

Prerequisites & Notes: MATH 204, MATH 224, MATH 302 or MATH 309

Credits: 4

Grade Mode: Letter

MATH 442 - Mathematical Statistics

Limiting distributions, the Central Limit Theorem, statistical inferences such as confidence intervals, hypothesis testing and chi-square tests, maximum likelihood methods, sufficiency.

Prerequisites & Notes: MATH 441 or equivalent

Credits: 4

Grade Mode: Letter

MATH 443 - Linear Statistical Models

Matrix algebra for linear models, multivariate normal distribution, quadratic forms, Gauss-Markov Theorem, estimation in full-rank and less-than-full-rank models, hypothesis testing in full-rank models.

Prerequisites & Notes: MATH 441/541, and either MATH 342 or MATH 442/542, or equivalent(s).

Credits: 4

Grade Mode: Letter

MATH 444 - Categorical Data Analysis

Statistical models and methods for categorical responses. Topics include chi-square and likelihood-ratio tests for the analysis of contingency tables, as well as a treatment of generalized linear models including logistic, cumulative logit, and Poisson regression. Extensive use of a computer statistical package.

Prerequisites & Notes: MATH 342

Credits: 4

Grade Mode: Letter

MATH 445 - Computational Statistics

Generation of random variables, Monte Carlo simulation and variance reduction techniques, resampling methods including bootstrap, jackknife, and permutation, Markov chain Monte Carlo. Extensive use of a computer statistical package.

Prerequisites & Notes: MATH 341; MATH 224;

and one of: CSCI 140, CSCI 141 or MATH 307.

Credits: 4

Grade Mode: Letter

MATH 451 - Number Theory

An overview of elementary number theory beyond MATH 302, including such topics as multiplicative functions, quadratic residues and reciprocity, primitive roots, nonlinear Diophantine equations, continued fractions, and cryptology.

Prerequisites & Notes: MATH 302

Credits: 4

Grade Mode: Letter

MATH 456 - Applied Time Series Analysis

Exploratory analysis of trend and seasonality, stationary and non-stationary processes including ARIMA, model estimation, selection, diagnostics, and forecasting.

Prerequisites & Notes: MATH 342.

Credits: 4

Grade Mode: Letter

MATH 457 - Bayesian Statistics

Introduction to Bayesian inference; prior and posterior distributions; conjugate priors; statistical inference, including summarizing posterior information and making predictions; hierarchical and linear regression models. Monte Carlo methods including Gibbs sampling.

MATHEMATICS

Prerequisites & Notes: MATH 342 and MATH 442; or instructor permission.

Credits: 4

Grade Mode: Letter

MATH 458 - Stochastic Processes

Selected topics in the area of stochastic processes including Random Walks, Markov Chains, Poisson Processes and Brownian Motion.

Prerequisites & Notes: MATH 441 or MATH 541.

Credits: 4

Grade Mode: Letter

MATH 473 - Numerical Linear Algebra

Norms; fundamental matrix types, transformations and factorizations; linear equations, linear least squares; rounding error, condition and stability; the algebraic eigenvalue problem (QR method).

Prerequisites & Notes: MATH 304; ability to program.

Credits: 4

Grade Mode: Letter

MATH 483 - Methods of Teaching Secondary Mathematics

Topics include pre-algebra, algebra, geometry, problem solving and resource materials.

Prerequisites & Notes: Minimum of two upper-division math courses, SEC 431, or permission of instructor.

Credits: 4

Grade Mode: Letter

MATH 490 - Senior Project

Intensive study of an advanced topic in mathematics.

Prerequisites & Notes: Permission of the Department Chair.

Credits: 4

Grade Mode: Letter

MATH 491 - Internship Seminar - Teaching K-8 Mathematics

Focus on issues and practices related to teaching K-8 mathematics, coordinated with the year-long K-8 classroom internship. Includes the use of ideas, theory, and lesson plans from the Mathematics 381-383 sequence in actual classroom settings, plus opportunity to assess and work with K-8 students on an individual, small group, and whole class basis. Not acceptable for any departmental major except BA/Ed, Elementary. S/U grading.

Prerequisites & Notes: MATH 383 with a C or better at WWU

Credits: 2

Grade Mode: S/U

MATH 495 - Academic or Industrial Learning and Research Experience in Math

Participation in a learning program, research project or internship in business, industry, a government agency or academic institution. Oral and written report required. Repeatable to a maximum of 8 cr. S/U grading.

Prerequisites & Notes: 20 credits math above the 100-level; department permission

Credits: 1-4

Grade Mode: S/U

MATH 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

MATH 502 - Abstract Algebra

Introduction to rings and fields, ideals, polynomial rings, unique factorization domains, field extensions, finite fields.

Prerequisites & Notes: MATH 401 or equivalent

Credits: 4

Grade Mode: Letter

MATH 503 - Topics in Abstract Algebra

Topics such as Galois theory, number theory, group representation theory, algebraic geometry, Lie algebras. Repeatable with various topics.

Prerequisites & Notes: MATH 502 or equivalent

Credits: 3

Grade Mode: Letter

MATH 504 - Abstract Linear Algebra

Abstract vector spaces, linear transformations, spectral theory.

Prerequisites & Notes: MATH 304 or equivalent

Credits: 4

Grade Mode: Letter

MATH 505 - Algebraic Geometry

An overview of algorithms and techniques inspired by geometry and used to solve systems of polynomial equations. Topics include affine varieties, polynomials, the division algorithm, Groebner bases, elimination theory, Hilbert's Nullstellensatz, the ideal-variety correspondence and basic projective geometry.

Prerequisites & Notes: MATH 204 and one of either MATH 302 or MATH 309; or by permission of instructor
Credits: 4
Grade Mode: Letter

MATH 510 - Mathematical Modeling

The construction and solution of mathematical models, using optimization, stability analysis, eigenvalue methods, probability and simulation.

Prerequisites & Notes: MATH 204, MATH 224, MATH 331
Credits: 4
Grade Mode: Letter

MATH 511 - Advanced Modeling

Exact and numerical techniques for the development and analysis of models of dynamic processes, including the construction and validation of models.

Prerequisites & Notes: MATH 331; instructor permission
Credits: 4
Grade Mode: Letter

MATH 515 - Mathematical Biology

An introduction to mathematical models in biology. Population models, Michaelis-Menten kinetics, models for neuron functioning, pattern formation. Mathematical topics: difference equations, dynamical systems, conservation equations, stochastic models.

Prerequisites & Notes: MATH 224; MATH 204 and MATH 331 or MATH 203 and MATH 303
Credits: 4
Grade Mode: Letter

MATH 521 - Methods of Mathematical Analysis I

Introduction to metric spaces, properties of functions on metric spaces, compactness and continuity.

Credits: 4
Grade Mode: Letter

MATH 522 - Methods of Mathematical Analysis II

Analysis on the real line, including uniform convergence of series, using metric space notions.

Prerequisites & Notes: MATH 521
Credits: 4
Grade Mode: Letter

MATH 523 - Advanced Calculus of Several Variables

Parameterization, integration and changes of variables in Euclidean spaces.

Prerequisites & Notes: MATH 304 or equivalent; MATH 521
Credits: 4
Grade Mode: Letter

MATH 524 - Topics in Analysis

Topics such as pointwise convergence of Fourier series, Gibbs phenomenon, Poisson summability, Dirichlet problem for the disc, Weierstrass approximation theorem. Repeatable to a maximum of 8 credits with various topics.

Prerequisites & Notes: MATH 522
Credits: 4
Grade Mode: Letter

MATH 525 - Topology

Topological spaces, connectedness, compactness, product and quotient spaces, homotopy.

Prerequisites & Notes: MATH 521
Credits: 3
Grade Mode: Letter

MATH 527 - Real Analysis

Theory of Lebesgue measure and integration.

Prerequisites & Notes: MATH 522
Credits: 4
Grade Mode: Letter

MATH 528 - Functional Analysis

Spaces of functions, linear functionals and their representation, applications.

Prerequisites & Notes: MATH 522
Credits: 4
Grade Mode: Letter

MATH 530 - Fourier Series and Applications to Partial Differential Equations

MATHEMATICS

An introduction to Fourier series and the Fourier transform; applications to boundary value problems including the wave and heat equations.

Prerequisites & Notes: MATH 204, MATH 226, MATH 331 or equivalent

Credits: 4

Grade Mode: Letter

MATH 531 - Analysis of Partial Differential Equations

Solutions for general first order and linear second order partial differential equations emphasizing geometric properties and integral representations. Topics include characteristics; propagation of singularities; hyperbolic, elliptic, and parabolic equations; Cauchy problem; Dirichlet problem; Green's function; Poisson formula; maximum principle.

Prerequisites & Notes: MATH 204, MATH 225, MATH 226, MATH 312, MATH 331, or equivalent.

Credits: 4

Grade Mode: Letter

MATH 533 - Advanced Ordinary Differential Equations

Existence and uniqueness of solutions, stability theory for nonlinear equations, bifurcation.

Prerequisites & Notes: MATH 432 or equivalent; MATH 521

Credits: 3

Grade Mode: Letter

MATH 535 - Nonlinear Optimization

Nonlinear programming with emphasis on basic theory (including Lagrange multipliers and the Kuhn-Tucker conditions), algorithms for numerical solution of problems, and applications. Introductory dynamic programming, with emphasis on applications and algorithms.

Prerequisites & Notes: MATH 204, MATH 224; CSCI 140 or CSCI 141 or MATH 307.

Credits: 4

Grade Mode: Letter

MATH 538 - Complex Variables

Differentiation and integration of complex-valued functions, Cauchy integral theorem, residues.

Prerequisites & Notes: MATH 312 or equivalent.

Credits: 4

Grade Mode: Letter

MATH 539 - Topics in Complex Analysis

Topics such as normal families, mapping properties of analytic functions, conformal mappings, fluid flow, Dirichlet and Neumann problems, Julia sets. Repeatable with various topics.

Prerequisites & Notes: MATH 521, MATH 538

Credits: 3

Grade Mode: Letter

MATH 541 - Probability

Discrete and continuous random variables, moment generating functions, multivariate distributions, survey of widely used distributions such as normal, chi-square, gamma, t and F distributions. Emphasis on the theoretical aspects of probability.

Prerequisites & Notes: MATH 204, MATH 224, MATH 312

Credits: 4

Grade Mode: Letter

MATH 542 - Mathematical Statistics

Limiting distributions, the Central Limit Theorem, statistical inferences such as confidence intervals, hypothesis testing and chi-square tests, maximum likelihood methods, sufficiency.

Prerequisites & Notes: MATH 441 or equivalent

Credits: 4

Grade Mode: Letter

MATH 543 - Linear Statistical Models

Matrix algebra for linear models, multivariate normal distribution, quadratic forms, Gauss-Markov Theorem, estimation in full-rank and less-than-full-rank models, hypothesis testing in full-rank models.

Prerequisites & Notes: MATH 441/541, and either MATH 342 or MATH 442/542 or equivalent(s).

Credits: 4

Grade Mode: Letter

MATH 545 - Topics in Probability

Topics from Markov and sequential decision processes, renewal theory, inventory theory, stochastic control, random arrival and service processes, waiting time, number in queue, bulk arrivals, networks, balking. Repeatable with various topics.

Prerequisites & Notes: MATH 541

Credits: 3

Grade Mode: Letter

MATH 551 - Number Theory

An overview of topics in elementary number theory, including multiplicative functions, quadratic residues and reciprocity, nonlinear Diophantine equations, continued fractions, primality testing and cryptology.

Prerequisites & Notes: MATH 302; or by permission of instructor

Credits: 4

Grade Mode: Letter

MATH 556 - Applied Time Series Analysis

Exploratory analysis of trend and seasonality, stationary and non-stationary processes including ARIMA, model estimation, selection, diagnostics, and forecasting.

Prerequisites & Notes: MATH 342.

Credits: 4

Grade Mode: Letter

MATH 557 - Bayesian Statistics

Introduction to Bayesian inference; prior and posterior distributions; conjugate priors; statistical inference, including summarizing posterior information and making predictions; hierarchical and linear regression models. Monte Carlo methods including Gibbs sampling.

Prerequisites & Notes: MATH 342 and MATH 442 or instructor permission.

Credits: 4

Grade Mode: Letter

MATH 558 - Stochastic Processes

Selected topics in the area of stochastic processes including Random Walks, Markov Chains, Poisson Processes and Brownian Motion.

Prerequisites & Notes: MATH 441 or MATH 541.

Credits: 4

Grade Mode: Letter

MATH 560 - Topics in Geometry

A study of one or more topics in geometry such as convex sets, polytopes, tilings, integral geometry or combinatorial geometry. Repeatable with various topics.

Credits: 3

Grade Mode: Letter

MATH 562 - Differential Geometry

Geometry of curves, surfaces and manifolds.

Prerequisites & Notes: MATH 522

Credits: 4

Grade Mode: Letter

MATH 564 - Graph Theory

Basic properties of graphs, trees, Eulerian and Hamiltonian circuits, genera of graphs, algorithms, applications.

Credits: 3

Grade Mode: Letter

MATH 566 - Topics in Combinatorics

Counting techniques, generating functions, coding, coloring and relations with probability theory. Repeatable with various topics.

Credits: 3

Grade Mode: Letter

MATH 570 - Topics in Optimization

Topics taken from nonlinear programming, calculus of variations or the theory of optimal control. Repeatable with various topics.

Prerequisites & Notes: MATH 304, MATH 521

Credits: 4

Grade Mode: Letter

MATH 573 - Numerical Linear Algebra

Norms; fundamental matrix types, transformations and factorizations; linear equations, linear least squares; rounding error, condition and stability; the algebraic eigenvalue problem (QR method).

Prerequisites & Notes: MATH 304; ability to program

Credits: 4

Grade Mode: Letter

MATH 575 - Numerical Analysis

Polynomial interpolation including splines, orthogonal systems of functions and least squares approximation; numerical differentiation and integration; solution of systems of nonlinear equations and unconstrained optimization.

Prerequisites & Notes: MATH 224, M/CS 375

Credits: 4

Grade Mode: Letter

MATH 577 - Topics in Numerical Analysis

Topics from numerical optimization, approximation, linear algebra, quadrature, and the solution of algebraic and differential equations. Repeatable with various topics.

MATHEMATICS

Prerequisites & Notes: MATH 573 or M/CS 375

Credits: 4

Grade Mode: Letter

MATH 582 - Teaching Core College Mathematics

Teaching content presentation and problem solving skills in the context of core college math classes at the level of calculus and above.

Prerequisites & Notes: Graduate status.

Credits: 3

Grade Mode: Letter

MATH 595 - Teaching Algebra and Precalculus

Curriculum and instructional support for teaching the algebra and precalculus sequence. S/U grading.

Credits: 2

Grade Mode: S/U

MATH 599 - Mathematics Seminar

Repeatable to a maximum of 4 cr.

Credits: 1-3

Grade Mode: Letter

MATH 680 - Internship in Industrial Mathematics

An internship in industry, government, or other organizations during which participants will work with people in the host organization on problems of a quantitative nature. Number of credits depends on time spent at the host organization. S/U grading.

Prerequisites & Notes: MATH 510, MATH 547, MATH 575 or equivalents

Credits: 2-8

Grade Mode: S/U

MATH 690 - Thesis

Repeatable to a maximum of 4 cr. S/U grading.

Credits: 1-4

Grade Mode: S/U

MATH 691 - Required Project

Repeatable to a maximum of 2 cr. S/U grading.

Prerequisites & Notes: advancement to candidacy

Credits: 1-2

Grade Mode: S/U

Mathematics/Computer Science Courses

M/CS 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

M/CS 335 - Linear Optimization

The optimization of linear functions subject to linear constraints. Linear programming, duality theory, sensitivity analysis, applications.

Prerequisites & Notes: MATH 204; and one of CSCI 140 or CSCI 141 or MATH 307.

Credits: 4

Grade Mode: Letter

M/CS 375 - Numerical Computation

Computer arithmetic, solution of nonlinear equations and optimization in a single variable; matrix factorization; matrix iterative techniques.

Prerequisites & Notes: MATH 204; CSCI 140 or CSCI 141 or MATH 307.

Credits: 4

Grade Mode: Letter

M/CS 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

M/CS 435 - Nonlinear Optimization

Nonlinear optimization with emphasis on basic theory (including Lagrange multipliers and the Kuhn-Tucker conditions), algorithms for numerical solution of problems, and applications. Introductory dynamic programming, with emphasis on applications and algorithms.

Prerequisites & Notes: MATH 204; MATH 224; MATH 331; CSCI 140 or CSCI 141 or MATH 307.

Credits: 4

Grade Mode: Letter

M/CS 475 - Numerical Analysis

Polynomial interpolation including splines, orthogonal systems of functions and least squares approximation; numerical differentiation and integration; solution of systems of nonlinear equations and unconstrained optimization.

Prerequisites & Notes: MATH 224, M/CS 375

Credits: 4

Grade Mode: Letter

Physics and Astronomy

Introduction

Physics is the most foundational of sciences. It is the study of matter, energy, space and time. Astronomy, biology, chemistry, geology and engineering apply the principles of physics to specific problems. Almost all areas of modern technology involve applications of physics. The Department of Physics and Astronomy offers a Bachelor of Science (BS) degree in Physics and a Bachelor of Arts in Education (BAE) degree in Physics/Mathematics education. Students graduating with the BS degree in physics are well prepared for graduate school in physics, astronomy, materials science, and education as well as several fields of engineering and a variety of professions in industry.

Coursework

The BS in physics is based on a core curriculum that covers fundamental theories of physics: classical mechanics, thermodynamics, electromagnetism, and quantum mechanics. Laboratory work forms an important part of the core with sophisticated upper-division laboratories in electronics, astronomy, optics, and material physics. Students planning graduate work and professional careers in astronomy should select the BS program in physics and complete the full year of 300-level astronomy courses offered in the department.

Research

The Department of Physics and Astronomy values the role of research in the undergraduate experience. Students work collaboratively with peers and faculty to investigate open-ended problems of current interest. The department has research specialists in condensed matter and materials physics, astronomy, and physics education. Research topics in condensed matter and materials physics include magnetism and magnetic materials, organic semiconductor materials, surface science, paleomagnetism, and a variety of theoretical and computational subfields. Many of these research areas offer opportunities to collaborate across disciplines with faculty and students in Western's Advanced Materials Science and Engineering Center (AMSEC). Research topics in astronomy include observational and theoretical studies of the Milky Way, distant galaxies and galaxy clusters using imaging and spectroscopy at multiple wavelengths.

Research topics in physics education research include the identification of specific conceptual and

reasoning difficulties and the development and testing of instructional strategies.

Teaching

Physics majors are encouraged to participate as laboratory teaching assistants. Such involvement provides valuable experience and financial support. Students report their teaching experience deepens their understanding of fundamental physics concepts, builds leadership and communication skills, and fosters community. Close collaboration among faculty and students in teaching and learning is one of the strengths of the department.

Faculty

ANDREAS RIEMANN (2006) Chair and Associate Professor. BS, MS, University Halle, Germany; PhD, Free University Berlin, Germany.

ANDREW BOUDREAU (2008) Associate Professor. BS, University of California-Berkeley; PhD, University of Washington.

KEVIN COVEY (2014) Assistant Professor. BA, Carleton College; PhD, University of Washington.

MILTON FROM (1998) Associate Professor. BSC, University of Manitoba; MSc, PhD, McGill University.

BRAD JOHNSON (1997) Professor. BS, MS, University of Colorado-Colorado Springs; PhD, University of Colorado-Boulder.

KRISTEN LARSON (2002) Associate Professor. BS, University of California-San Diego; MS, PhD, Rensselaer Polytechnic Institute.

JANELLE LEGER (2008) Associate Professor. BS, University of California-Davis; PhD, University of California - Santa Cruz.

ARMIN RAHMANI (2016) Assistant Professor. BS, Baha'i Institute for Higher Education; PhD, Boston University.

MELISSA R. RICE (2014) Assistant Professor. BA, Wesley College; MS, PhD, Cornell University.

KENNETH RINES (2008) Associate Professor. BA, Rice University; AM, PhD, Harvard University.

TAKELE SEDA (2002) Associate Professor. BS, Asmara University (Eritrea); MS, Addis Ababa University (Ethiopia); PhD, University of the Witwatersand, Johannesburg, South Africa.

Adjunct Faculty

REGINA BARBER DEGRAAFF, BS, Physics, Western Washington University; MS, Physics, San Diego State University; PhD, Physics, Washington State University.

BRANDON PEDEN, BS, Physics, MS, Mathematics, Western Washington University; PhD, Physics, University of Colorado-Boulder.

KATHLEEN SANDELIN, BS, Chemistry, Western Washington University; MS, Physics, College of William and Mary.

Declaring a Physics Major/Minor

Students are advised to declare the major as soon as possible, ideally no later than the end of the freshmen year or immediately upon transfer to Western. Admission to the Physics B.S. major is a two-step process - see details under the Physics B.S. below. Declaring the major allows you to receive important information from the department, priority enrollment into required courses, and benefits such as accounts on department computers and access to department study space. Contact the department office to declare the Physics B.S. major or a minor (Physics or Astronomy) in person or by email. Be sure to provide unofficial copies of your transcript(s). We will determine which of the courses you have already taken will be applied toward the major/minor and develop a plan of study for the remaining coursework. If you are not sure which program option is for you, we can help. For the Physics/Mathematics - Secondary, BAE, contact the Math department (see below).

Other Departmental Information

Advice to Freshman

The core curriculum for the BS program is arranged sequentially, with earlier courses required as prerequisites for later courses. Thus, it is important to start the core sequence as early as possible, since any substantial delay will result in the student needing more than four years to complete the degree. All core courses require mathematics, and calculus is particularly important. For this reason, freshmen considering a major in physics should enroll in MATH 124, MATH 134, or MATH 138 during their first quarter at Western concurrently with PHYS 161. Freshmen who have had calculus in high school are advised to take PHYS 161 during their first quarter, along with the appropriate level of calculus course. Freshmen who have had no calculus at all should

postpone PHYS 161 until they may concurrently complete MATH 124, MATH 134, or MATH 138 with PHYS 161.

Advice to Transfer Students

The first two years of the physics BS program is based on the following core courses:

- PHYS 161, PHYS 162, PHYS 163; MATH 124 or MATH 134, MATH 125 or MATH 135, or MATH 138, MATH 224
- PHYS 224, PHYS 225, PHYS 226, PHYS 322; PHYS 326, MATH 204, MATH 304, MATH 331; CSCI 140 or CSCI 141

Students planning to transfer to Western from a community college should strive to take as many equivalents of the courses above as possible. The community college sequence equivalent to PHYS 161-162-163 will usually be called introductory physics with calculus and will probably include labs. MATH 124 or 134, MATH 125 or 135, or 138, 224 is the first year of college calculus. MATH 204 is Elementary Linear Algebra, MATH 304 is Linear Algebra and MATH 331 is Ordinary Differential Equations. Students should be aware that like-named 200-level community college courses may not transfer as equivalent.

Information

Anyone interested in learning more about the study of physics at Western is invited to write, phone, e-mail, fax or visit the Department of Physics and Astronomy, Western Washington University, Bellingham, WA 98225-9164, telephone: 360-650-3818, fax: 360-650-6505. The department office is in Communication Facility 385. Information about Western's physics and astronomy programs is also available at the department website, www.wvu.edu/depts/physics.

Bachelor of Arts in Education

Chemistry/Physics — Secondary, BAE (see Chemistry Department)

Chemistry/Physics - Secondary, BAE (see Chemistry Department)

Physics/Mathematics — Secondary, BAE

Combined major offered by the Department of Physics and Astronomy, College of Science and Engineering and the Department of Mathematics, College of Science and Engineering.

104 credits

PHYSICS AND ASTRONOMY

Introduction

Physics is the fundamental science. It is the study of matter and energy and of the interaction between the two. Astronomy, Biology, Chemistry, Geology and Engineering apply the principles of Physics to specific problems. Almost all areas of modern technology involve applications of Physics.

"Mathematics reveals hidden patterns that help us understand the world around us. Now much more than Arithmetic and Geometry, Mathematics today is a diverse discipline that deals with data, measurements, and observations from science; with inference, deduction, and proof; and with mathematical models of natural phenomena, of human behavior, and of social systems." From: Everybody Counts: A Report to the Nation on the Future of Mathematics Education (c) 1989 National Academy of Sciences.

This major must be accompanied by the professional preparation program in secondary education offered through Woodring College of Education. Courses required for a state teaching endorsement must be completed with a grade of C (2.0) or better.

Why Consider a Physics/Mathematics - Secondary Major?

Teaching mathematics and physics is a challenge, a responsibility, and an opportunity. Learning to teach mathematics and physics occurs through a variety of means: the study of a wide variety of mathematics and physics, pedagogical preparation within a mathematical and science context, formal clinical preparation in education, an extended internship, and continual experiences as a student, learner, and problem solver in mathematics and physics.

Everyone aspiring to be a mathematics and physics teacher is aware of the demand for qualified teachers at the secondary level, but there is an even greater need for quality mathematics and physics teachers—teachers who care about both students and mathematics and physics, teachers who have a broad and deep understanding of mathematics and physics, and teachers who are thoroughly professional. The responsibilities are great, but the rewards are even greater.

As a prospective teacher you need to focus on expanding your personal understanding of mathematics and physics and capitalizing on opportunities to work with pre-college students as a tutor, as a classroom assistant, as a practicum student, and as a novice teacher in your internship. Are you up to it?

How to Declare (Admission and Declaration Process)

Students are advised to declare the major as soon as possible, ideally no later than the end of the freshmen year or immediately upon transfer to Western. Contact the department office to declare in person or by mail. Be sure to provide unofficial copies of your transcript(s). We will determine which of the courses you have already taken will be applied toward the major and develop a plan of study for the remaining coursework. If you are not sure which program option is for you, we can help. Declaring the major allows you to receive

important information from the department, priority enrollment into required courses, and benefits such as accounts on department computers and access to department study space.

This major must be accompanied by the professional education program in secondary education. This major meets the requirements for Washington state teaching endorsements in both physics and mathematics. See the Secondary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

A cumulative GPA of at least 2.50, plus a minimum grade of C (2.0) or better in the individual courses, must be maintained in the courses required by the major. Students must earn a grade of C (2.0) or better in the secondary education professional program and in all courses required for the endorsement.

Requirements

- ASTR 315 - The Solar System
- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I and
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 134 - Calculus I Honors and
 - MATH 135 - Calculus II Honors
 - or
 - MATH 138 - Accelerated Calculus
- Choose either:
 - MATH 204 - Elementary Linear Algebra and
 - MATH 331 - Ordinary Differential Equations
 - or
 - MATH 203 - Linear Algebra and Differential Equations I and
 - MATH 303 - Linear Algebra and Differential Equations II
- MATH 224 - Multivariable Calculus and Geometry I
- MATH 309 - Introduction to Proof in Discrete Mathematics
- MATH 360 - Euclidean and Non-Euclidean Geometry
- MATH 419 - Historical Perspectives of Mathematics
- MATH 483 - Methods of Teaching Secondary Mathematics
- At least two of the following:
 - MATH 307 - Mathematical Computing
 - MATH 341 - Probability and Statistical Inference
 - MATH 410 - Mathematical Modeling
 - PHYS 161 - Physics with Calculus I
 - PHYS 162 - Physics with Calculus II
 - PHYS 163 - Physics with Calculus III
 - PHYS 226 - Physics with Calculus IV
 - PHYS 224 - Modern Physics I
 - PHYS 225 - Modern Physics II
 - PHYS 322 - Fundamentals of Electronics
 - PHYS 326 - Tools and Data Analysis
 - PHYS 363 - Classical Mechanics
 - PHYS 391 - Junior Lab
 - SCED 370 - Science and Society
 - SCED 481 - Fundamentals of Teaching Science
 - SCED 491 - Methods in Secondary Education for Science Teachers
- 6 additional credits of upper-division physics or astronomy courses

Additional Requirements

PHYSICS AND ASTRONOMY

Secondary Education Undergraduate and Post-Baccalaureate Professional Program (58 credits)

- SEC 303 - Teaching Adolescents: Development and Identity
- SEC 310 - Education, Culture, and Equity
- SEC 410 - Dynamics of Teaching
- SEC 411 - Philosophical Foundations of Education
- SEC 425 - Developmental Reading, Writing and Learning in Secondary Schools
- SEC 430 - Secondary School Methods I - Instructional Strategies, Daily Planning, and Standards
- SEC 431 - Secondary School Methods II-Assessment and Long Term Planning
- SEC 432 - Secondary School Methods III - Management, Motivation and Discipline
- SEC 433 - Teaching and Learning Laboratory
- SEC 435 - Secondary Practicum I
- SEC 436 - Secondary Practicum II
- I T 444 - Classroom Use of Instructional Technology (Secondary)
- SEC 495 - Internship - Secondary
- SPED 363 - Secondary Students With Special Needs

Bachelor of Science

Physics, BS

Department of Physics and Astronomy, College of Science and Engineering

104-108 credits

Introduction

Physics is the fundamental science. It is the study of matter and energy and the interaction between the two. Astronomy, Biology, Chemistry, Geology and Engineering apply the principles of physics to specific problems. Almost all areas of modern technology involve applications of physics. An undergraduate major in Physics provides a solid foundation upon which to build later work and study in physics, astronomy and engineering.

Why Consider a Physics Major?

A Bachelor's degree in Physics provides an excellent foundation in liberal arts and technology. The Physics BS degree can open a variety of doors for jobs in high tech industries, government labs, and as preparation for graduate school. Recent Physics graduates have found positions in a variety of fields including engineering, software development, optoelectronics, failure analysis, and education, among many others. Many graduates have found the skills acquired in our degree program have prepared them for further academic studies in Physics, Astronomy, Engineering, Patent Law, Medical Physics, Medicine, and Education to name a few.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Admission to the Physics BS major is a two-step process. Students are classified as Phase I majors until they have completed PHYS 161, 162, 163, 224, 225, 226; and MATH 124, 125, 224; and MATH 203 and 303 (or MATH 204, 304, and 331). Admission to Phase II is based on students' academic performance in the Phase I courses. Students with a cumulative grade point average of 3.0 or higher in the Phase I courses will be given preferential admission to Phase II, while students with a cumulative grade point average below 3.0 in the Phase I courses will be considered for admission on a case by case basis. Note, however, that neither completion of the prerequisites nor attainment of any specific GPA guarantees admission to Phase II.

Students may obtain Phase I major status by contacting the Physics/Astronomy department, Communications Facility 385, and completing the Phase I major form. At this time students will be assigned an academic adviser from the physics faculty.

The application to Phase II includes an application form and a transcript, and should be submitted to the department main office by the end of the 5th week of Spring quarter during the sophomore year of the major program. Phase II major status will be granted by the beginning of Fall quarter of the junior year.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- ASTR 315 - The Solar System
- MATH 224 - Multivariable Calculus and Geometry I
- PHYS 161 - Physics with Calculus I
- PHYS 162 - Physics with Calculus II
- PHYS 163 - Physics with Calculus III
- PHYS 224 - Modern Physics I
- PHYS 225 - Modern Physics II
- PHYS 226 - Physics with Calculus IV
- PHYS 322 - Fundamentals of Electronics
- PHYS 326 - Tools and Data Analysis
- PHYS 335 - Statistical and Thermal Physics
- PHYS 339 - Optics
- PHYS 363 - Classical Mechanics
- PHYS 368 - Electromagnetism I
- PHYS 369 - Electromagnetism II
- PHYS 391 - Junior Lab
- PHYS 419 - Professional Writing for Physicists
- PHYS 455 - Quantum Mechanics I
- PHYS 456 - Quantum Mechanics II
- PHYS 475 - Physics of Solids and Materials I
- PHYS 485 - Mathematical Physics
- PHYS 486 - Computational Physics
- Choose either:
 - MATH 124 - Calculus and Analytic Geometry I and
 - MATH 125 - Calculus and Analytic Geometry II
 - or
 - MATH 134 - Calculus I Honors and
 - MATH 135 - Calculus II Honors
 - or
 - MATH 138 - Accelerated Calculus
- Choose either:
 - MATH 203 - Linear Algebra and Differential Equations I
 - MATH 303 - Linear Algebra and Differential Equations II
 - or

PHYSICS AND ASTRONOMY

MATH 204 - Elementary Linear Algebra
MATH 304 - Linear Algebra
MATH 331 - Ordinary Differential Equations

Choose either:

CSCI 140 - Programming Fundamentals in C++
CSCI 141 - Computer Programming I

One course selected from:

PHYS 391 - Junior Lab (as a repeated course)
PHYS 444 - Special Topics in Physics
PHYS 476 - Physics of Solids and Materials II
ASTR 316 - Stars and Galaxies
ASTR 320 - Cosmology
ASTR 416 - Astrophysics
or other courses under advisement

Astronomy Courses

ASTR 103 - Introduction to Astronomy

A survey of astronomy including stars, galactic structure and cosmology. Not recommended for science, math or computer science majors.

Prerequisites & Notes: MATH 107 or higher.
Credits: 4

Grade Mode: Letter
GUR Attributes: SCI

ASTR 113 - Sun, Moon, and Planets

Introduction to the Solar System. Topics include the motion of objects in the sky, seasons, phases of the Moon and eclipses, and the properties of the Sun, planets, and moons with discussion of recent results from space missions. Some class sessions will be held in the planetarium. Open to all students.

PHYSICS AND ASTRONOMY

Prerequisites & Notes: MATH 107 or higher.

Credits: 3

Grade Mode: Letter

GUR Attributes: SCI

ASTR 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ASTR 315 - The Solar System

Introduction to the modern physical understanding of the Solar System. Topics include gravity, orbits, the formation of stars and planets, planetary atmospheres and surfaces, physical processes in the Solar System.

Prerequisites & Notes: PHYS 114, PHYS 115 and PHYS 116; or PHYS 161, PHYS 162 and PHYS 163

Credits: 3

Grade Mode: Letter

ASTR 316 - Stars and Galaxies

Observational evidence of the nature of stars; star formation and star death; structure and kinematics of the Milky Way and other galaxies.

Prerequisites & Notes: ASTR 315; PHYS 114, PHYS 115 and PHYS 116 or PHYS 161, PHYS 162 and PHYS 163.

Credits: 3

Grade Mode: Letter

ASTR 320 - Cosmology

Large-scale structure of the universe; black holes and active galaxies; curved spacetime; evolution of the expanding universe; the Big Bang and the early universe.

Prerequisites & Notes: ASTR 316.

Credits: 3

Grade Mode: Letter

ASTR 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for

General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ASTR 416 - Astrophysics

Application of physics to stars, nebulae and galaxies. Radiation; atomic spectra and chemical abundances in stellar atmospheres and gaseous nebulae; nuclear synthesis in stars; stellar evolution.

Prerequisites & Notes: ASTR 316; PHYS 335; PHYS 363.

Credits: 3

Grade Mode: Letter

Physics Courses

PHYS 101 - Physics Analysis

In-depth analysis of physical phenomena such as the motion of objects and conditions for equilibrium; development and application of conceptual models that account for observations and have predictive power. Instruction seeks to actively engage students in scientific reasoning. Lab.

Prerequisites & Notes: MATH 107 or higher.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

PHYS 102 - Physics and Contemporary Issues

Exploration of the relationships between basic physics concepts and broader social issues such as the generation of energy or global climate change; using scientific evidence to judge claims and construct arguments.

Prerequisites & Notes: Math 107 or higher.

Credits: 3

Grade Mode: Letter

GUR Attributes: SCI

PHYS 104 - Physics Applications

A study of physics as a human endeavor to understand everyday phenomena and the development of technology. Exploration of basic concepts from physics relevant to phenomena such as weather, music, or sports; investigation of the effects of technology and the causes of disasters; new advances in applied physics. Lab.

Prerequisites & Notes: MATH 107 or higher

Credits: 4

Grade Mode: Letter
GUR Attributes: LSCI

PHYS 114 - Principles of Physics I

Kinematics and dynamics of particles; force, momentum, energy; rotational dynamics and equilibrium; gravity and oscillations. Recommended for students in science and pre-professional programs not requiring physics with calculus.

Prerequisites & Notes: MATH 115 or MATH 118.
Credits: 5
Grade Mode: Letter
GUR Attributes: SCI

PHYS 115 - Principles of Physics II

Fluids; kinetic theory; heat and thermodynamics; principles of electricity and magnetism. Lab.

Prerequisites & Notes: PHYS 114
Credits: 5
Grade Mode: Letter
GUR Attributes: LSCI

PHYS 116 - Principles of Physics III

Waves and sound; geometrical and physical optics; relativity and modern physics. Lab.

Prerequisites & Notes: PHYS 115
Credits: 5
Grade Mode: Letter
GUR Attributes: LSCI

PHYS 161 - Physics with Calculus I

Kinematics and dynamics of particles; work and energy; gravitation; collisions and conservation of momentum. Includes lab.

Prerequisites & Notes: MATH 124 or concurrent OR MATH 134 or concurrent OR MATH 138 or concurrent.
Credits: 5
Grade Mode: Letter
GUR Attributes: LSCI

PHYS 162 - Physics with Calculus II

Electrostatics; magnetic fields of steady currents; time-varying electric and magnetic fields; DC and AC circuits; electromagnetic waves. Includes labs.

Prerequisites & Notes: PHYS 161; MATH 124 or MATH 134 and MATH 125 or MATH 135 or concurrent, or MATH 138.
Credits: 5
Grade Mode: Letter
GUR Attributes: LSCI

PHYS 163 - Physics with Calculus III

Rotations and oscillations, waves in elastic media, superposition, interference and standing waves; sound waves and electromagnetic waves; geometric optics including reflection and refraction; interference and diffraction of light. Includes labs.

Prerequisites & Notes: PHYS 162; MATH 124 or MATH 134 or MATH 134 and MATH 135 or MATH 138
Credits: 5
Grade Mode: Letter
GUR Attributes: LSCI

PHYS 190 - Exploring Physics and Astronomy

Seminar for students interested in majoring in Physics. Current topics and trends in physics, with emphasis on research opportunities for undergraduates. S/U grading.

Prerequisites & Notes: PHYS 161 or concurrent OR PHYS 162 or concurrent.
Credits: 1
Grade Mode: S/U

PHYS 224 - Modern Physics I

Special relativity, quantization of charge, matter waves, bound and unbound states in quantum physics.

Prerequisites & Notes: PHYS 163; PHYS 226; MATH 203 or MATH 204.
Credits: 3
Grade Mode: Letter

PHYS 225 - Modern Physics II

Schrodinger equation in three dimensions, spin and atomic physics, statistical physics, molecules and solids.

Prerequisites & Notes: PHYS 224; MATH 303 or MATH 331
Credits: 3
Grade Mode: Letter

PHYS 226 - Physics with Calculus IV

Thermodynamics, Physics of continuous media, Introduction to statistical mechanics. Includes lab.

Prerequisites & Notes: PHYS 163; MATH 124 and MATH 125 or MATH 134 and MATH 135 or MATH 138
Credits: 4
Grade Mode: Letter

PHYS 291 - Independent Research

PHYSICS AND ASTRONOMY

Individual research under faculty supervision. Written report required. Repeatable for credit with no limit. S/U grading.

Prerequisites & Notes: Permission of instructor.
Credits: 1-3
Grade Mode: S/U

PHYS 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

PHYS 322 - Fundamentals of Electronics

AC/DC circuit theory, transistor and op-amp circuit design, digital basics and introduction to LabView programming. Includes lab.

Prerequisites & Notes: PHYS 163; PHYS 326; CSCI 140 or CSCI 141.
Credits: 4
Grade Mode: Letter

PHYS 326 - Tools and Data Analysis

Introduction to error analysis, data handling, and numerical solution methods in physics using computer programs such as KaleidaGraph, Mathematica, and LabView. Lecture and computer lab.

Prerequisites & Notes: PHYS 163; MATH 203 or MATH 204; MATH 224; CSCI 140 or CSCI 141.
Credits: 3
Grade Mode: Letter

PHYS 335 - Statistical and Thermal Physics

Foundations of macroscopic thermodynamics, statistical description of physical systems, laws of thermodynamics, statistical ensemble theory and applications.

Prerequisites & Notes: PHYS 225; PHYS 226; MATH 224; and Phase II Physics BS majors.
Credits: 4
Grade Mode: Letter

PHYS 339 - Optics

Topics in modern physical and geometrical optics including general solutions to the 3-D wave equation, analytical ray tracing, polarized light,

interferometric techniques, and introduction to lasers.

Prerequisites & Notes: PHYS 163; PHYS 368
Credits: 3
Grade Mode: Letter

PHYS 350 - Engineering Thermodynamics

Introduction to concepts and applications of thermodynamics, including the laws of thermodynamics, processes, and cycles. Applications to ideal gases, heat engines, thermal expansion. Heat transfer.

Prerequisites & Notes: PHYS 161; MATH 124
Credits: 3
Grade Mode: Letter

PHYS 363 - Classical Mechanics

Newtonian mechanics; general motion of a particle in three dimensions; Lagrangian mechanics; canonical coordinates; particle systems and rigid bodies; gravitation and Newtonian cosmology; nonlinear mechanics and chaos.

Prerequisites & Notes: PHYS 163; PHYS 326; PHYS 225 or GEOL 352; MATH 303, or MATH 304 and MATH 331; and Phase II Physics BS majors or Phase II Geophysics BS majors.
Credits: 4
Grade Mode: Letter

PHYS 368 - Electromagnetism I

Vector calculus, Green's and Stokes' theorems; static electric and magnetic field laws; boundary-value problems; Lorentz force; polarization and magnetization in materials.

Prerequisites & Notes: PHYS 163; MATH 224; MATH 303, or MATH 304 and MATH 331.
Credits: 4
Grade Mode: Letter

PHYS 369 - Electromagnetism II

Electrodynamics; Maxwell's equations; plane electromagnetic waves in free space; dielectrics and conductors; reflection and refraction at a plane boundary; electromagnetic radiation; relativistic dynamics.

Prerequisites & Notes: PHYS 368; MATH 303.
Credits: 3
Grade Mode: Letter

PHYS 391 - Junior Lab

Selected experiments in modern physics, optics, astronomy, condensed matter physics and

materials science. Graded work includes lab notebook, oral and written presentations, and exams. Repeatable once.

Prerequisites & Notes: PHYS 225; PHYS 322; PHYS 326.

Credits: 3

Grade Mode: Letter

PHYS 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

PHYS 419 - Professional Writing for Physicists

Presentation of scientific research in written form; abstracts, project reports, and documentation; elements of successful posters; proposals and professional critique.

Prerequisites & Notes: PHYS 391; PHYS 455 or concurrent, or GEOL 352.

Credits: 3

Grade Mode: Letter

PHYS 444 - Special Topics in Physics

Introduction to a special topic, current research, or application in physics. Repeatable up to two times for credit.

Prerequisites & Notes: PHYS 363 and PHYS 368.

Credits: 3

Grade Mode: Letter

PHYS 455 - Quantum Mechanics I

Review of the Schrodinger equation with applications to simple potentials, introduction to Dirac notation, generalized function spaces, and general uncertainty relations. The Schrodinger equation in three dimensions, including the hydrogen atom, angular momentum, and spin. Introduction to identical particles.

Prerequisites & Notes: PHYS 225; PHYS 363; PHYS 369; MATH 303; or MATH 304 and MATH 331.

Credits: 3

Grade Mode: Letter

PHYS 456 - Quantum Mechanics II

Introduction to perturbation theory (including time independent, degenerate, and time dependent), the variational principle and WKB approximations. Introduction to scattering theory. Special topics such as Bell's theorem, relativistic quantum mechanics.

Prerequisites & Notes: PHYS 455

Credits: 3

Grade Mode: Letter

PHYS 475 - Physics of Solids and Materials I

Structure and properties of materials including crystallography, symmetry, bonding-related properties, electronic structure, phase diagrams, surfaces, semiconductors, metals.

Prerequisites & Notes: PHYS 225 or instructor permission.

Credits: 3

Grade Mode: Letter

PHYS 476 - Physics of Solids and Materials II

Application and investigation of materials including amorphous, liquid crystal, magnetic, porous and novel materials, lasers, photo detectors, optical fibers, microscopy, spectroscopy.

Prerequisites & Notes: PHYS 475

Credits: 3

Grade Mode: Letter

PHYS 485 - Mathematical Physics

Fourier transforms; Laplace transforms; orthogonal functions and boundary value problems; series expansions; rotations and tensors; complex integration.

Prerequisites & Notes: PHYS 363 or concurrent; MATH 224; MATH 303, or MATH 304 and MATH 331.

Credits: 3

Grade Mode: Letter

PHYS 486 - Computational Physics

Introduction to methods of solving physics problems with computers. Topics include molecular dynamics, electronic states, calculation of classical electromagnetic fields and orbits, and Monte Carlo methods applied to statistical mechanics and quantum systems.

Prerequisites & Notes: PHYS 326; PHYS 363; PHYS 369; CSCI 140 or CSCI 141.

Credits: 3

Grade Mode: Letter

PHYS 491 - Independent Research

PHYSICS AND ASTRONOMY

Individual research under faculty supervision.
Written report required. Repeatable for credit. S/U
grading.

Prerequisites & Notes: Permission of instructor.

Credits: 1-3

Grade Mode: S/U

Science Education

Introduction

The Science, Mathematics and Technology Education Program is a visionary and practical program designed to enrich the training and education of K-12 pre-service and in-service teachers and, through them, their students. From a collaboration of the disciplines of education, chemistry, geology, biology, physics/astronomy, mathematics, and engineering, the Science, Mathematics and Technology Education Program (SMATE) offers an opportunity for teachers and future teachers to gain specific skills and broaden talents within their chosen discipline.

The General Science major is offered at three levels: Elementary for students intending to teach grades K-8, Middle School for students intending to teach science in grades 4-9, and Secondary for students intending to teach science in middle or high school. Students planning to be teachers and major in one of the sciences or mathematics should consult with the appropriate science education advisor in the appropriate science or mathematics department or with the director of science education regarding the General Science major.

For further information and advisement, consult with an advisor or the director of Science, Mathematics and Technology Education, Dr. Edward Geary, phone 360-650-3637, Science, Math and Technology Education Building, SL 250D, e-mail Edward.Geary@wwu.edu or Lori Torres, Program Manager, SL 220, phone 360.660.7605, e-mail Lori.Torres@wwu.edu.

Faculty

EDWARD E. GEARY (2013) SMATE Director and Professor. BS, Stanford University; MS, PhD, Cornell University.

ALEJANDRO ACEVEDO-GUTIÉRREZ (2002) Associate Professor. BSc, Universidad Autonoma de Baja California Sur, Mexico; PhD, Texas A&M University.

EMILY BORDA (2005) Associate Professor. BS-Chemistry, Gonzaga University; MEd-Educational Leadership and Policy, MS, PhD-Chemistry, University of Washington.

ANDREW BOUDREAUX (2008) Associate Professor, BS, University of California Berkeley (1993), PhD, University of Washington.

DONALD BURGESS (2004) Associate Professor.

MS Education-Biology, State University of New York, Cortland.

SUSAN M. DEBARI (1998) Professor. BA, Cornell University; PhD, Stanford University.

DEBORAH A. DONOVAN (1998) Professor. BSc, MSc, University of California-Davis; PhD, University of British Columbia.

SCOTT R. LINNEMAN (2000) Professor. BA, Carleton College; PhD, University of Wyoming.

CHRIS OHANA (1999) Associate Professor. BA, University of California- Berkeley; MA, University of Oregon; PhD, Iowa State University.

Other Departmental Information

Facilities and Resources

Pivotal to this program is a facility designed to accommodate this academic vision. The 19,000 square foot facility contains our state-of-the-art classrooms and laboratories, one each specifically tailored to elementary and secondary education. They surround a Learning Resource Center with more than 15,000 books on standards, assessment, curriculum and activities. It also contains collections of classic and current materials, laboratory resources, educational technology, and expertise that students, faculty, the local community and teachers from around the state can draw upon either on site or in the schools. In both its approach and facilities, the SMATE Program is a national model for teacher training in undergraduate mathematics, science and technology education. Additionally, the SMATE faculty are engaged in a number of research projects that connect the preservice program to the K-12 schools and offer students the opportunity to gain unique research and field experiences. Numerous scholarships are available each year for future teachers of science.

To find out more about the Irwin L. Slesnick STEM Education Resource Center and SMATE facilities, contact Jamie Harrington, assistant director of the SMATE program, at 360-650-3647, by e-mail at Jamie.Harrington@wwu.edu, visit the website, www.smate.wwu.edu/smate/, or stop by the Science, Math and Technology Education Building, Science Lecture 220.

Graduate Study

For a concentration leading to a Master of Education degree in natural science/science education see the Graduate School section of this catalog.

Bachelor of Arts in Education

General Science — Elementary, BAE

Department of Science Education, College of Science and Engineering

51-52 credits

Introduction

The Science, Mathematics and Technology Education Program (SMATE) is a visionary and practical program designed to enrich the training and education of K-12 pre-service teachers and, through them, their students. From a collaboration of the disciplines, Chemistry, Geology, Biology, Physics/ Astronomy, Mathematics, and Engineering, the Science, Mathematics and Technology Education Program offers an opportunity for teachers and future teachers to gain specific skills and broaden talents within their chosen discipline.

This program is designed to prepare future teachers at the elementary and middle school level with an emphasis in Science. This major satisfies the academic major requirement for teacher certification with an endorsement in elementary education and must be accompanied by the professional preparation program in Elementary Education offered through Woodring College of Education.

Why Consider a General Science - Elementary Major?

If you want a broad base of knowledge in the field of science to prepare you for teaching at the elementary level, this major will provide it. You will take a range of introductory courses from different areas of science, including Biology, Chemistry, Physics and Geology. Other Science majors focus on a single subject such as Biology or Chemistry (see WWU Catalog).

Completion of this program results in a highly qualified status for elementary or middle school science under the federal NCLB guidelines.

How to Declare (Admission and Declaration Process):

This major satisfies the academic major requirement for teacher certification with an endorsement in elementary education and must be accompanied by the professional preparation program in elementary education. It does not result in a science endorsement. See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

A grade of C (2.0) or better is required for courses in the elementary education professional program and all courses required for the endorsement.

Requirements

- One course from:
 - ASTR 103 - Introduction to Astronomy
 - ASTR 113 - Sun, Moon, and Planets
- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- CHEM 121 - General Chemistry I
- GEOL 211A - Physical Geology Review
- GEOL 212 - Historical Geology
- GEOL 311 - Earth Materials
- MATH 114 - Precalculus I
- SCED 201 - Matter and Energy in Physical Systems
- SCED 202 - Matter and Energy in Earth Systems
- SCED 203 - Matter and Energy in Life Systems
- SCED 204 - Matter and Energy in Chemical Systems
- SCED 492 - Field Experience in Middle School Science
- One course from:
 - PHYS 101 - Physics Analysis
 - PHYS 104 - Physics Applications

Additional Requirements

Elementary Education Professional Program Requirements (100-103 credits)

Department of Elementary Education, Woodring College of Education

Introduction

Students seeking a bachelor's degree with teacher certification and an endorsement in elementary education must complete the GURs, an approved academic major, and the professional education course work listed below.

Admission and Declaration Process

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Professional Studies Core (22 credits)

- ELED 303 - Educational Psychology - Development and Learning
- ELED 310 - Education, Culture, and Equity
- ELED 370 - Introduction to Teaching
- I T 344 - Foundations of Technology in Teaching and Learning
- I T 442 - Digital Decisions: Technology for Educators
- SPED 364 - Teaching Each Student

Elementary Program — Methods, Curriculum Content, and Field Experiences (78-81 credits)

- One course from:
 - ART 398 - Integrated Arts for Elementary Educators
 - DNC 398 - Integrated Arts for Elementary Educators
 - MUS 398 - Integrated Arts for Elementary Educators

SCIENCE EDUCATION

THTR 398 - Integrated Arts for Elementary Educators

☐ One course from:

ART 380 - Art Educating the Child

DNC 433 - Creative Movement for Educators With Lab

MUS 361 - Music for Elementary Teachers

THTR 350 - Theatre for Youth

THTR 351 - Creative Pedagogy

☐ ELED 425 - Social Studies for the Elementary School

☐ ELED 470 - Developing Teaching

☐ ELED 471 - Documenting Teaching

☐ ELED 480 - Literacy: Beginning Communicators

☐ ELED 481 - Literacy: Fluent Communicators

☐ ELED 491 - September Experience

☐ ELED 492 - Practicum: Experience in Literacy Methods

☐ ELED 494 - Internship - Elementary

☐ HLED 455 - Health Education Grades K-8

☐ MATH 381 - Teaching K-8 Mathematics I

☐ MATH 382 - Teaching K-8 Mathematics II

☐ MATH 383 - Teaching K-8 Mathematics III

☐ MATH 491 - Internship Seminar - Teaching K-8 Mathematics

☐ PE 345 - Physical Education for Elementary School

☐ SCED 480 - Science Methods and Curriculum for the Elementary School

☐ SCED 490 - Laboratory/Field Experience in Elementary Science

General Science — Middle Level, BAE

- Choose one of the following series:
 - PHYS 114 - Principles of Physics I
 - PHYS 115 - Principles of Physics II
 - PHYS 116 - Principles of Physics III
 - or
 - PHYS 161 - Physics with Calculus I
 - PHYS 162 - Physics with Calculus II
 - PHYS 163 - Physics with Calculus III
- One course from:
 - ASTR 103 - Introduction to Astronomy
 - ASTR 113 - Sun, Moon, and Planets
- Electives in a single scientific discipline, under advisement to meet state endorsement standards for that discipline: 21-42 additional credits from single science discipline.

Additional Requirements

Secondary Education Undergraduate and Post-Baccalaureate Professional Program (58 credits)

- SEC 303 - Teaching Adolescents: Development and Identity
- SEC 310 - Education, Culture, and Equity
- SEC 410 - Dynamics of Teaching
- SEC 411 - Philosophical Foundations of Education
- SEC 425 - Developmental Reading, Writing and Learning in Secondary Schools
- SEC 430 - Secondary School Methods I - Instructional Strategies, Daily Planning, and Standards
- SEC 431 - Secondary School Methods II-Assessment and Long Term Planning
- SEC 432 - Secondary School Methods III - Management, Motivation and Discipline
- SEC 433 - Teaching and Learning Laboratory
- SEC 435 - Secondary Practicum I
- SEC 436 - Secondary Practicum II
- I T 444 - Classroom Use of Instructional Technology (Secondary)
- SEC 495 - Internship - Secondary
- SPED 363 - Secondary Students With Special Needs

Master of Education

Natural Science/Science Education, Non-Thesis, MEd (In Moratorium)

College of Science and Engineering

This program is not currently accepting new students for the 2011-2012 Academic Year. For further information, please contact Science, Mathematics and Technology Education Department, Western Washington University, 516 High Street, SL 220, Bellingham WA 98225-9155, 360-650-7605.

Graduate Faculty

Acevedo-Gutierrez, Alejandro, PhD, biology.

DeBari, Susan, PhD, geology.

Donovan, Deborah, PhD, biology.

Geary, Edward, PhD, geology.

Linneman, Scott, PhD, geology.
Ohana, Chris, PhD, elementary education.

Program Advisor: Dr. Edward Geary

Goals

This program is focused on helping practicing teachers of science at all levels P-12 advance their careers by:

- Improving their instruction through advanced study, research and field work;
- Gaining familiarity with current research on student learning and new developments in curriculum assessment; and developing their leadership skills.

Prerequisites

Students applying for admission are normally expected to have a teaching certificate and to have completed at least one year of teaching in the P-12 system prior to entering the program. Elementary endorsed teachers are expected to have completed at least one course in each of the science areas (biology, chemistry, earth science, and physics). Secondary teachers are expected to have an undergraduate major or minor and a subject endorsement in their area of specialization. (General science teachers should have an endorsement in one or more of the natural sciences. A major in a science field is highly desirable.)

Application Information

In addition to the Graduate School-required materials for admission, each student is required to take the Graduate Record Exam (GRE), and submit a résumé and a statement of personal career goals and reasons for seeking admissions to the program. An on-campus interview may be requested by the program faculty.

Program Requirements (48 credits)

The Non-Thesis option involves an action research project culminating in an oral presentation and written summary.

Comprehensive assessment

Student achievement in the program will be assessed by faculty through the action research proposal, summary document and presentation.

Core requirements (22 credits)

- EDUC 501 - Introduction to Educational Research
- EDUC 506
- I T 503 - Designing Instruction and Selecting Technologies for Learning
- SCED 501 - Advanced Studies in Science Education
- SCED 513 - Science Curriculum Grades K-12
- SCED 515 - Assessment for Science Understanding

Focus (electives) under advisement (20 credits)

Emphasis in specific disciplines, pedagogy, assessment or science education research. At least 11 credits must be taken at the 500 level.

Non-Thesis Research Project (6 credits)

- SCED 598 - Research Project

SCIENCE EDUCATION

Natural Science/Science Education, Thesis, MEd (In Moratorium)

College of Science and Engineering

This program is not currently accepting new students for the 2011-2012 Academic Year. For further information, please contact Science, Mathematics and Technology Education Department, Western Washington University, 516 High Street, SL 220, Bellingham WA 98225-9155, 360-650-7605.

Donovan, Deborah, PhD, biology.

Geary, Edward, PhD, geology.

Linneman, Scott, PhD, geology.

Miles, John, PhD, Huxley College of the Environment.

Myers, O. Eugene, PhD, Huxley College of the Environment.

Ohana, Chris, PhD, elementary education.

Program Advisor: Dr. Edward Geary

Goals

This program is focused on helping practicing teachers of science at all levels P-12 advance their careers by:

- Improving their instruction through advanced study, research and field work;
- Gaining familiarity with current research on student learning and new developments in curriculum assessment; and developing their leadership skills.

Prerequisites

Students applying for admission are normally expected to have a teaching certificate and to have completed at least one year of teaching in the P-12 system prior to entering the program. Elementary endorsed teachers are expected to have completed at least one course in each of the science areas (biology, chemistry, earth science, and physics). Secondary teachers are expected to have an undergraduate major or minor and a subject endorsement in their area of specialization. (General science teachers should have an endorsement in one or more of the natural sciences. A major in a science field is highly desirable.)

Application Information

In addition to the Graduate School-required materials for admission, each student is required to take the Graduate Record Exam (GRE), and submit a résumé and a statement of personal career goals and reasons for seeking admissions to the program. An on-campus interview may be requested by the program faculty.

Program Requirements (48 credits)

This option requires students to submit a proposal for a Thesis (690a) or a Field Project (690b) for approval by the student's committee prior to registering for 690a or b. A thesis involves original research. A field project is a formal study carried out in a school setting. Both require the preparation of a formal document.

Program Requirements

Comprehensive assessment

Student achievement in the program will be assessed by faculty through either the thesis (field project) proposal or the thesis (field project) and the oral defense (option I); or the action research proposal, summary document and presentation (option II).

Core requirements [22 credits]

- ❑ EDUC 501 - Introduction to Educational Research

- ❑ EDUC 506
- ❑ I T 503 - Designing Instruction and Selecting Technologies for Learning
- ❑ SCED 501 - Advanced Studies in Science Education
- ❑ SCED 513 - Science Curriculum Grades K-12
- ❑ SCED 515 - Assessment for Science Understanding

Focus (electives) under advisement [20 credits]

❑ Emphasis in specific disciplines, pedagogy, assessment or science education research. At least 11 credits must be taken at the 500 level.

Thesis [6-12 credits]

- ❑ Thesis or Field Project
 - SCED 690A - Research
 - SCED 690B - Field Project

Science Education Courses

SCED 201 - Matter and Energy in Physical Systems

This course is the first in a 4 course series designed for prospective elementary teachers but open to all students. The course uses a student-oriented pedagogy with an integrated content focus to help students develop important ideas in physical science.

Prerequisites & Notes: MATH 112 or higher.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

SCED 202 - Matter and Energy in Earth Systems

This course is one of a 4 course series designed for prospective elementary teachers but open to all students. The course uses a student-oriented pedagogy with an integrated content focus to help students develop important ideas in earth science.

Prerequisites & Notes: MATH 112, SCED 201 or instructor permission.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

SCED 203 - Matter and Energy in Life Systems

This course is one of a 4 course series designed for prospective elementary teachers but open to all students. The course uses a student-oriented pedagogy with an integrated content focus to help students develop important ideas in life science.

Prerequisites & Notes: MATH 112 or higher,

SCED 201 or instructor permission.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

SCED 204 - Matter and Energy in Chemical Systems

This course is one of a 4 course series designed for prospective elementary teachers but open to all students. The course uses a student-oriented pedagogy with an integrated content focus to help students develop important ideas in chemical science.

Prerequisites & Notes: SCED 201 or permission of instructor.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

SCED 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SCED 370 - Science and Society

An in-depth exploration of selected contemporary issues such as global climate change, energy crisis, genetically modified foods, and large-scale extinction of species. The course also explores what constitutes science and pseudo science, looking specifically at 'creation science.'

Prerequisites & Notes: Completion of science

SCIENCE EDUCATION

GURs and completion 90 credits or permission of instructor.

Credits: 3

Grade Mode: Letter

SCED 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SCED 401 - Reading in Science Education

In-depth study of science education literature with a view to writing one short and one extensive report, plus making two short presentations to class peers based on these reports.

Prerequisites & Notes: SCED 491 or concurrent

Credits: 1

Grade Mode: Letter

SCED 417 - Special Topics in Science Education

Topics vary.

Prerequisites & Notes: instr perm

Credits: 1

Grade Mode: S/U

SCED 445W - Outstanding Sci Ed Part 3

Topics vary.

Credits: 1

Grade Mode: S/U

SCED 480 - Science Methods and Curriculum for the Elementary School

Classroom/laboratory study of theory, curriculum, science content and processes and effective teaching methods in the context of national and Washington state standards in science and with activities appropriate for the elementary classroom.

Prerequisites & Notes: Completion of Natural Science GURs, including SCED 201 or permission of instructor; SCED 202, SCED 203, and SCED 204 are highly desired GURs; ELED 370 or ELED 372 or SPED 420.

Credits: 5

Grade Mode: Letter

SCED 481 - Fundamentals of Teaching Science

Study of key topics related to teaching science including nature of science, science standards, constructivism, preconceptions, and assessment.

Prerequisites & Notes: CHEM 123 or CHEM 225 or GEOL 212 or BIOL 206 or PHYS 163.

Credits: 2

Grade Mode: Letter

SCED 490 - Laboratory/Field Experience in Elementary Science

A field-based experience in which WWU students teach science within their internship year. Includes bi-weekly seminar.

Prerequisites & Notes: SCED 480

Credits: 3

Grade Mode: Letter

SCED 491 - Methods in Secondary Education for Science Teachers

Study of literature, curriculum and teaching strategies in life, earth and physical sciences for grades 4-12, plus peer teaching and school observations.

Prerequisites & Notes: Admission to the secondary teaching program and a major or concentration in natural sciences; SEC 431 or SEC 532; SCED 481.

Credits: 5

Grade Mode: Letter

SCED 492 - Field Experience in Middle School Science

A field-based experience in which WWU students teach science with experience mentor teachers in local middle schools. Includes weekly seminar.

Prerequisites & Notes: SCED 480 and SCED 490 for General Science majors; or permission of instructor for Secondary Science majors.

Credits: 3

Grade Mode: Letter

SCED 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SCED 501 - Advanced Studies in Science Education

A critical study of research and developments related to science education.

Prerequisites & Notes: teaching experience

Credits: 4

Grade Mode: Letter

SCED 511 - Internship in Science Education

Assisting with the teaching of an on-campus science methods course for pre-service elementary school teachers. S/U grading.

Prerequisites & Notes: instructor permission

Credits: 3

Grade Mode: S/U

SCED 512 - In-Service Workshops in Science Education

Planning and implementing a series of not less than three in-service workshops in elementary school science. Repeatable for elective credit. S/U grading.

Credits: 3

Grade Mode: S/U

SCED 513 - Science Curriculum Grades K-12

Examination of science curricula for grades K-12 with major emphasis on the elementary grades as a basis for selection of a science curriculum and teacher's guide for use in local school systems.

Prerequisites & Notes: teaching experience or instructor permission

Credits: 4

Grade Mode: Letter

SCED 514 - Seminar in Elementary Science Education

Repeatable to a maximum of 3 cr.

Prerequisites & Notes: instructor permission

Credits: 1-3

Grade Mode: Letter

SCED 515 - Assessment for Science Understanding

A seminar addressing the development of a variety of formative and summative assessment techniques and exploring psychometric properties of science items and tests for practicing science teachers.

Prerequisites & Notes: SCED 501, EDU 501.

Credits: 4

Grade Mode: Letter

SCED 517L - Implementing and Supporting Science Professional Learning Communities

This-year long seminar course will provide teachers and principals opportunities for ongoing learning and reflection on the challenges they face in supporting and sustaining effective professional learning communities.

Credits: 3

Grade Mode: S/U

SCED 580 - Special Problems in Science Teaching in the Elementary School

Problems related to science instruction and curriculum. Repeatable to a maximum of 10 cr.

Prerequisites & Notes: teaching experience or instructor permission

Credits: 2-5

Grade Mode: Letter

SCED 582 - Special Topics in the Physical Sciences for Elementary School Teachers

In-depth study of topics in the physical sciences most appropriate for instruction in the elementary school. Repeatable with instructor and/or graduate advisor permission to a maximum of 8 cr.

Prerequisites & Notes: SCED 390, SCED 391 or equivalent

Credits: 4

Grade Mode: Letter

SCED 583 - Special Topics in the Biological Sciences for Elementary School Teachers

In-depth study of topics in the biological sciences most appropriate for instruction in elementary school. Repeatable with instructor and/or graduate advisor permission to a maximum of 8 cr.

Prerequisites & Notes: SCED 390, SCED 391 or equivalent

Credits: 4

Grade Mode: Letter

SCED 584 - Special Topics in the Earth Sciences for Elementary School Teachers

In-depth study of topics in earth sciences most appropriate for instruction in the elementary school. Repeatable with instructor and/or graduate advisor permission to a maximum of 8 cr.

Prerequisites & Notes: SCED 390, SCED 391 or equivalent

SCIENCE EDUCATION

Credits: 4

Grade Mode: Letter

SCED 584A - Earth Science for Elementary Teachers

In-depth study of topics in earth sciences most appropriate for instruction in the elementary school. Repeatable with instructor and/or graduate advisor permission to a maximum of 8 cr.

Credits: 4

Grade Mode: Letter

SCED 590 - Special Problems in Science Teaching in the Junior and Senior High School

Problems related to science instruction and curriculum. Repeatable with no maximum.

Prerequisites & Notes: teaching experience or instructor permission

Credits: 2-5

Grade Mode: Letter

SCED 590S - Special Problems in Science Teaching in the Junior and Senior High School

Problems related to science instruction and curriculum. Repeatable with no maximum.

Prerequisites & Notes: teaching experience or instructor permission

Credits: 2

Grade Mode: Letter

SCED 592 - Special Topics in the Physical Sciences

Content topics in chemistry and physics of special interest to secondary teachers. Repeatable with instructor and/or graduate advisor permission to a maximum of 8 cr.

Prerequisites & Notes: secondary method course; admission to natural science MEd program; completion of undergraduate courses required for admission

Credits: 4

Grade Mode: Letter

SCED 593 - Special Topics in the Biological Sciences

Content topics in biology of special interest to the secondary teacher. Repeatable with instructor and/or graduate advisor permission to a maximum of 8 cr.

Prerequisites & Notes: secondary method course; admission to natural science Med program; completion of undergraduate courses required for

admission

Credits: 4

Grade Mode: Letter

SCED 594 - Special Topics in the Earth Sciences

Content topics in geology and related fields of special interest to secondary teachers. Repeatable with instructor and/or graduate advisor permission to a maximum of 8 cr.

Prerequisites & Notes: secondary method course; admission to natural science Med program; completion of undergraduate courses required for admission

Credits: 4

Grade Mode: Letter

SCED 598 - Research Project

Research in fields of biology, chemistry, earth science, general science, physical science, physics or education for non-thesis option.

Prerequisites & Notes: Admission to MEd natural sciences program and completion of 15 credits of 500-level courses including EDU 501, EDU 506 and SCED 501.

Credits: 6

Grade Mode: Letter

SCED 690A - Research

Restricted to thesis-related research. Repeatable to a maximum of 12 cr.

Prerequisites & Notes: admission to program

Credits: 1-12

Grade Mode: Letter

SCED 690B - Field Project

Field project under the direction of a faculty committee. A portion of the field project normally requires work off campus. Repeatable to a maximum of 12 cr. S/U grading.

Prerequisites & Notes: graduate committee approval

Credits: 1-12

Grade Mode: S/U

Fairhaven College of Interdisciplinary Studies

Introduction

Dr. Jack Herring, Dean

A College Within the University

Founded in 1967, Fairhaven College of Interdisciplinary Studies is an undergraduate division of Western Washington University. Its purpose is to offer students the opportunity to take an uncommon degree of responsibility for the structure and content of their own education where students design their own degree programs by drawing on the resources of a larger University. The college offers training in writing and research, critical thought and creative expression, independent judgment and scholarship, self-evaluation and narrative assessment.

As a learning community, Fairhaven is defined by five attributes: (1) interdisciplinary study, (2) student designed studies and evaluations of learning, (3) examination of issues arising from a diverse society, (4) development of leadership and a sense of social responsibility, and (5) curricular, instructional and evaluative innovations.

At Fairhaven, students are challenged to bring what they learn to bear on human concerns and crucial real-world problems, to experiment, to discover and to act. This style of education supports the development of certain values, virtues and skills: self-discipline, resourcefulness, initiative, self-development, adaptability, reasonable risk-taking, leadership, sensitivity to injustice, and respect for persons. Fairhaven courses prepare students to listen carefully and engage respectfully in discussion, to value and respect different world views and to appreciate multiple voices reflecting the diversity of experiences in our society.

Fairhaven College is committed to interdisciplinary study and serving a diverse student body in terms of age, ethnic background, academic interest, and life experience. The College is committed to a gender-conscious and multicultural approach to topics, resources and classroom practices. Courses and other learning experiences provide an opportunity to examine the impacts and contemporary and historical roots of race, class and gender relations.

Fairhaven College's role in the University is not only to provide a learning environment for students interested in self-designed study and interdisciplinary learning, but also to help the University ask questions about teaching and learning. Members of the Fairhaven community collaborate with and learn from colleagues in other colleges both within and outside of Western.

Fairhaven College also administers the curriculum of the **American Cultural Studies Program**, which offers significant depth in learning about current and historical topics in the diverse tapestry of people who make up the United States.

A Structure for Learning

The structure of learning at Fairhaven College consists of close working relationships between teachers and students; we are known for our practice of student-centered learning. Classes are small and the emphasis is on open discussion and the exchange of ideas. Our classes are interactive; we believe every student is essential to the discovery and creation of knowledge and, hence, to unleashing the full value of an undergraduate education as a tool for enhancing the lives of individuals, communities, and the world, as creative, actively engaged citizens.

In any given quarter, students may select classes offered across the University and/or design independent study projects in consultation with their faculty advisor. Students are encouraged to formulate and carry out independent research projects. Faculty members sponsor and monitor these projects and help students develop the resources necessary to complete them. Field work, practica, internships, and study abroad can also form important components of a Fairhaven education. Students are encouraged to work outside their comfort zone and to find ways to connect their learning with challenges and opportunities in the real world, ways to understand relationships of thought and action, theory and expertise, ways to cultivate opportunities for applying what they learn through campus and community volunteer activities, and through internships.

Collaborative learning is often used together with independent research. Narrative assessments, including a student self-evaluation and written responses from faculty replace letter grades, promoting a more deeply reflective experience and encouraging a student to take full ownership of her/his/their education.

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

Fairhaven College Learning Goals and Assessment

A culture and pedagogy of self-assessment and reflection have been significant features of teaching and learning at Fairhaven College since its founding as an experimental college. Assessment is valued as an essential part of the learning process.

Students assess their own learning in each course and are also asked to assess the course and the faculty. Students assess their writing skills in the development of a writing plan, and later in their education revisit that plan when they create their college writing portfolio. A cumulative self-assessment, the Summary and Evaluation, is required of all students prior to graduation.

Faculty provide individual narrative assessment of students in each course they teach, and provide

on-going assessment of student growth in the advising process. Faculty regularly revisit and respond to outcomes of their teaching through reviewing student self-evaluations, faculty and course evaluations. Faculty peer review of teaching practices happen regularly through team teaching, shared concentration committee mentorship of students, shared advising (often in student Transition conferences) and collaborative curriculum review and college governance.

Beyond supporting students in their individualized learning goals, Fairhaven College has also established a set of goals that we aspire all students to achieve by the time they graduate. These goals are deeply woven into the structure of the core curriculum and are regularly assessed to determine how the core curriculum can be improved.

Fairhaven College Learning Goals

Upon graduation, Fairhaven College students will be able to:
Consider and listen openly to perspectives that are different from their own as they investigate complex issues.
Recognize and trace the development of their own ideas, skills, perspectives and learning processes.
Demonstrate the ability to imagine, problem-solve, and take creative risks.
Articulate the ways in which systems of power, privilege, and oppression shape their experiences as individuals and members of communities.
Develop a sense of personal agency for creating positive social and ecological change within a multicultural and global context.
Effectively communicate complex ideas orally and in writing.
Apply quantitative reasoning to the construction, communication and evaluation of arguments.

Fairhaven Core Curriculum

Fairhaven students complete Fairhaven's core curriculum in lieu of the WWU General University Requirements (GUR). A student who leaves Fairhaven for another WWU program must complete the GUR. Fairhaven College also offers the opportunity for self-motivated students who have demonstrated exceptional learning skills to design an individualized alternative to parts of the core curriculum through the use of existing course challenge procedures.

The Fairhaven Core Curriculum includes a series of courses designed to widen students' exposure to various areas of study, to connections among disciplines and to interdisciplinary theory and practice. Its purpose is to help students become perceptive, probing learners who can ask questions and pursue answers with care and confidence. Skills in reading, writing, presentation and analysis

are emphasized. Each course deals with methods of knowing and understanding, themes, modes of creativity and practical applications to be found in each area of study.

Elements of this core contribute to its unique character:

- Courses are conducted in a collaborative seminar format
- Class sizes seldom exceed 20 students
- A strong mentoring/advising relationship is established
- Interdisciplinary studies mirror the shape of complex problems
- Instruction is shared by all Fairhaven faculty members - artists, scientists, philosophers, lawyers, historians, poets,

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

social scientists, anthropologists, psychologists - who adapt the diverse themes of their disciplines to core studies

- Evaluation takes the form of narrative assessment

There are core courses in each of the three curricular stages: **exploratory studies, concentrated studies and advanced studies**, as outlined in the degree-specific requirements. Students need not complete one curricular stage before advancing to the next.

Exploratory Studies (Stage One)

- FAIR 101A - An Introduction to Interdisciplinary Study At Fairhaven College
- FAIR 201A - Critical and Reflective Inquiry
- FAIR 202A - Core: Humanities and the Expressive Arts I
- FAIR 203A - Social Relationships and Responsibility: Theories and Critiques
- FAIR 206A - Core: Science and Our Place on the Planet I
- FAIR 305A - Core: Writing and Transition Conference
- One 300-level course in each of the following areas, with the specific course in each area, selected from a listing of approved courses found on Fairhaven College website:

Humanities and the Expressive Arts II
Society and the Individual II
Science and Our Place on the Planet II

Concentrated Studies (Stage Two)

Option A: WWU major

Option B: Fairhaven Interdisciplinary Concentration:

- FAIR 303A - Core: Interdisciplinary Concentration Seminar
- FAIR 401A - Core: Senior Project

Option C: Fairhaven Upside-Down Program

Advanced Studies (Stage Three)

- FAIR 403A - Core: Advanced Seminar (meets the writing proficiency requirement for graduation)

Degree Requirements

Requirements for bachelor's degrees awarded by Fairhaven College are as follows:

- Meet the University Degree Requirements
- The Fairhaven Core Curriculum
- An Interdisciplinary Concentration (the individually designed major), OR the Fairhaven Upside-Down Program, OR other WWU departmental major
- Completion of at least 25 credits at Fairhaven
- Completion of at least 50 credits outside of Fairhaven
- Scholarship and credit standards as prescribed by Fairhaven College

Fairhaven College Degree Option	Curriculum Process and Requirements
Interdisciplinary Concentration, BA	Complete all three stages of core curriculum; design an interdisciplinary concentration with a committee and complete specified coursework including FAIR 401A, Senior Project.
Interdisciplinary Concentration with a Law, Diversity & Justice (LDJ) Emphasis, BA	Complete all three stages of core curriculum plus LDJ required coursework; design an interdisciplinary concentration with a strong

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

	interest in law, diversity and access to the legal system for under-served communities and complete FAIR 401A, Senior Project.
Interdisciplinary Concentration, BAE	For students seeking the flexibility interdisciplinary concentration, and wishing to apply their degree in the profession of education. Requirements match BA Interdisciplinary Concentration, plus requirements appropriate for the level of professional certification sought by student and approved through Woodring College of Education.
Fairhaven Upside-Down Program, BA	For transfer students who complete a pre-approved technical 2-year degree from a Washington state college and transfer to Western. Students complete stage and three of the Fairhaven core curriculum and a set of appropriate upper-division coursework to complement their previous academic experiences.
Fairhaven College enrollment and completion of University Major, Degree as specified for that Major (e.g. BA, BS, BFA)	Complete stage one and three of Fairhaven core curriculum and all requirements for major as determined by the relevant Department.

Fairhaven Grade Requirements

At Fairhaven College of Interdisciplinary Studies, the A-to-F grading system is not used. Classes and studies are taken on a "Satisfactory/Unsatisfactory" basis. Academic credit is granted after requirements have been satisfactorily completed and the student has submitted a written self-evaluation of his or her work to faculty instructors. Faculty respond with a written evaluation of the student's progress. Credit will be entered on Fairhaven students' official transcripts only if they fulfill their academic obligations.

The official transcript, held in the University Registrar's office, lists all Fairhaven and other Western Washington University classes completed. A cumulative GPA is not displayed on the official transcript for Fairhaven students. The student-faculty narrative evaluations are held in the student's permanent academic file and form part of the student's credentials for applying for employment and for graduate programs. For students enrolled in Fairhaven College a complete record of academic achievement includes both the official transcript and an official set of narrative evaluations to supplement this transcript.

Credits attempted but not completed will be recorded in the student's Academic History with an NX. The college does not assign a K grade (incomplete) to Fairhaven students, but instead does not award credit until a class is completed. If a registered class is never completed and no credit is awarded, the incomplete class does not appear on the student's official transcript. An NX, indicating "no credit awarded," will appear in the Grade column of the student's unofficial Academic History. Students receiving an NX may request a Time Extension Contract from the instructor outlining

the terms of work to be completed for the awarding of credit. The maximum deadline for credit to be awarded for an NX class is one year after the quarter of enrollment, pending instructor approval.

Federal regulations require all schools participating in Title IV federal financial aid programs to have a standard of Satisfactory Progress, which applies to all applicants/recipients of financial aid as one determinant of eligibility. Classes receiving an NX will count toward credits attempted in Financial Aid Satisfactory Academic Progress and may affect eligibility for aid.

Fairhaven College follows all other student records policies of Western Washington University found elsewhere in this catalog.

Special Opportunities

Independent field studies abroad or community internships might consume a full quarter's registration. The Adventure Learning Program (ALG) provides opportunities for selected Fairhaven students to spend 10 months immersed in a cultural environment different than their own while engaging in a scholarly project of their own design. In recent years, ALG grant recipients have lived and conducted research in Madagascar, Ethiopia, Kenya, Uganda, South Africa, India, Korea, Thailand, Brazil, and Lebanon.

Professional Education. For students wishing to acquire teaching credentials, Western's Woodring College of Education offers a choice of majors — including certain Fairhaven Concentrations — appropriate to public school teaching. Faculty advise students in the construction of their programs and work closely with the College of Education in helping students to complete requirements.

CIEL Student Exchanges. Fairhaven College is a member of The Consortium for Innovative Environments in Learning (CIEL), a growing network of distinguished, progressive higher education institutions. Through this network, students at Fairhaven College have the opportunity to spend a quarter or semester on one of the Consortium campuses. Visit www.Cielearn.org.

Information on these and other special opportunities can be accessed on the Fairhaven College Website or is available at the main Fairhaven office.

College Admission and Advising

Fairhaven College of Interdisciplinary Studies has selective admission and enrolls first-year students, transfer students, and students from other WWU programs fall, winter, spring and summer quarters. New applicants to Fairhaven and to the University complete the WWU Undergraduate Application (available online or in print form). Indicate interest in Fairhaven College in your application. Send the standard application, transcripts, and required test scores to: Office of Admissions, Western Washington University, Bellingham, WA 98225-9009.

In addition to the WWU application, Fairhaven requests a personal statement, two letters of recommendation and an interview (in person or by telephone). For more information or to make an appointment, please call 360-650-6680.

Students currently enrolled in other University programs may apply to transfer to Fairhaven's program by the quarterly application deadlines. Current WWU students applying to Fairhaven do not need to submit transcript test scores or the WWU Undergraduate Application.

Visitors are welcome, and with advance notice appointments can be arranged with Fairhaven advising and admissions staff, students or other WWU staff.

Advising

Students benefit from high quality advising; extensive and intensive advising is a hallmark of the Fairhaven College learning experience for all its students. All full-time faculty members are academic advisors supported by professional staff, and student peer mentoring. Great thought has been given to the design of advising at Fairhaven – multiple advisors and kinds of advising at multiple points along the path from admission to graduation. We provide an organized sequence of required advising engagements with every student. Advising is continuous and embedded in the curriculum.

The role of the faculty advisor is to mentor, advise, question, recommend resources, and ultimately, oversee and approve the student's satisfaction of degree requirements for graduation. The faculty advisor is a useful resource for facilitating connections for students with other departments and classes on campus; the advisor can also be an influential and important advocate for students seeking internships, study abroad recommendations, exceptions to policies, and graduate school information and references. Faculty advisors review each student's writing portfolio, facilitate student transition conferences, and are essential mentors in supporting the development of the student interdisciplinary concentrations.

A professional Advising Coordinator oversees the system of advising at Fairhaven. This person advises new students regarding credit evaluation, degree planning, graduation processes, narrative assessment, and programs and services outside the college. The Advising Coordinator regularly reviews the academic progress of each Fairhaven student and works with faculty advisors, support personnel, and students to promote retention and satisfactory academic progress.

Faculty

JACK A. HERRING (2013) Dean. BS, University of Alaska, Fairbanks; PhD, University of Washington.

BABAFEMI AKINRINADE (2008) Associate Professor. LL.B University of Ife; BL Nigerian Law School, LL.M Obafemi Awolowo University, LL.M. University of Notre Dame, J.S.D. University of Notre Dame.

JOHN L. BOWER (1998) Professor. BS, PhD, Cornell University.

ANDREW J. BROWN (2015) Assistant Professor. BA, Muhlenberg College; MA, Northwestern University; ABD, Northwestern University.

LAWRENCE J. ESTRADA (1989) Associate Professor and Director, American Cultural Studies. BA, University of California, Santa Barbara; MEd, Whittier College; PhD, University of California, Los Angeles.

JOHN V. FEODOROV (2005) Associate Professor. BFA, California State University-Long Beach; MFA, Vermont College.

JULIE A. HELLING (2000) Associate Professor. BA, University of Iowa; JD, University of Michigan Law School.

ANA CECILIA LOPEZ (2016) Assistant Professor. BA, Western Washington University, Fairhaven College; JD, University of Washington Law School.

MARK Y. MIYAKE (2015) Assistant Professor. BA, MA, PhD, Indiana University.

NIALL Ó MURCHÚ (2001) Associate Professor. BA, MA, University College, Dublin; MA, PhD, University of Washington.

HILARY SCHWANDT (2013) Assistant Professor.

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

BA, Cal Poly, San Luis Obispo; MHS, PhD, John Hopkins Bloomberg School of Public Health.

TANIS S'EILTIN (1992) Associate Professor. BA, University of Alaska, Fairbanks; MFA, University of Arizona.

TAMARA SPIRA (2014) Assistant Professor. BA, Oberlin College; MA, PhD, University of California Santa Cruz.

STAN TAG (1997) Associate Professor. BA, Whitworth College; MA, PhD, University of Iowa.

MIDORI TAKAGI (1994) Associate Professor. BA, Oberlin College; MA, American University; MPhil, PhD, Columbia University.

JOHN TUXILL (2007) Associate Professor, BA, Williams College; MS University of Wisconsin-Madison, PhD, Yale University.

JENNIFER WANG (2014) Assistant Professor. BS, MS, PhD, University of Washington.

Faculty specialties. Areas of faculty study and interest include African American and Asian American history, American literature, anthropology, art and art history, civil and international human rights, constitutional and environmental law, creative writing, ecology, economics, history and philosophy of science, Holocaust and mass atrocities, human development, international law, mathematics, multicultural issues and literature, music and society, Native American issues, natural sciences, nature writing, ornithology, performance studies, physics, poetry, political economy, psychology of women, queer studies, scriptwriting, social theory, theater and drama, theory and practice of teaching, transitional justice, video production, women studies, ethics, philosophy of nature, political philosophy, and other areas.

Other members of the Western Washington University faculty from various departments and programs contribute to Fairhaven's curriculum as teachers of classes, members of advisory committees for concentrations, and as lecturers. Visiting faculty and guest lecturers from other universities, and from a variety of other occupations, also add to the resources available to Fairhaven students.

Other College Information

Tuition, Financial Aid and Scholarships

Fairhaven students pay the same tuition and fees as students of other colleges in the University. See other sections of this catalog for specific details. Information regarding federal, state and private financial assistance and application procedures should be addressed to: Financial Aid, Western Washington University, Bellingham, WA 98225-9006.

Fairhaven offers scholarships to selected students. Check the college's website or the WWU scholarship center website for information.

The Registration Process

University Registration. Registration for Fairhaven College offerings occurs during scheduled University registration periods. Class schedules (timetables) are available online. Registration for Fairhaven College variable credit classes and independent studies is via the

Web4U Independent Study Proposal process.

Fairhaven College Students. Credit earned by Fairhaven students taking Fairhaven classes may apply to the core requirements, to the concentration and to the general 180-credit requirement for graduation. Credit earned in other WWU classes by Fairhaven students may apply to the major or concentration, and to the 180-credit requirement for graduation.

Other WWU Students. Fairhaven College credit earned by students affiliated with Western's other colleges is applied to the general 180-credit requirement for graduation. Occasionally department advisors in other colleges may approve Fairhaven courses as electives for majors. Fairhaven's courses and studies are open to all WWU students (unless indicated in prerequisites or otherwise).

The Fairhaven College Quarterly Class Descriptions. Available prior to registration in the fall, winter and spring, this publication is available online. It announces schedule changes and additions and describes in detail Fairhaven's offerings each term. Students are advised to consult the schedule before finalizing their programs.

Bachelor of Arts

Fairhaven Upside-Down Program, BA

Fairhaven College of Interdisciplinary Studies

Introduction

Upside-Down Program: The usual route to a BA degree calls for general education in the first two years and specialization in the last two years. The Upside-Down Program, BA gives selected students an option to reverse this process. Graduates of Washington state 2- and 4-year colleges who hold the ATA, the AAS or other approved two-year technical degrees may apply to transfer their specializations to Fairhaven as the completed major. Stages 1 and 3 of the curriculum and a minimum of 90 credits are then required for graduation. Students are expected to complete as much as possible of their elective credit at the upper-division level (courses numbered 300 or above). Each application for this program is reviewed on an individual basis. Students are urged to contact Fairhaven College early in the admissions process.

Why Consider the Fairhaven Upside-Down Program Major?

For students with a two-year technical or pre-professional degree, this is an opportunity to put those studies at the center of a four-year BA degree.

How to Declare (Admission and Declaration Process):

Fairhaven College of Interdisciplinary Studies has a selective admission process for The Upside Down, BA program and enrolls first-year students, transfer students, and students from other WWU programs fall, winter, spring and summer quarters. New applicants to Fairhaven and to the University complete the WWU Undergraduate Application (available online or in print form). Indicate interest in Fairhaven College in your application. Send the standard application, transcripts, and required test scores to: Office of Admissions, Western Washington University, Bellingham, WA 98225-9009.

In addition to the WWU application, Fairhaven requests a personal statement, two letters of recommendation and an interview (in person or by telephone). For more information or to make an appointment, please call 360-650-6680.

Visitors are welcome and with advance notice, appointments can be arranged with Fairhaven advising and admissions staff, students or other WWU staff.

Grade Requirements

A grade of 'S' in Fairhaven courses or C- or better in courses in other departments is required for this degree.

Fairhaven Core Curriculum

Exploratory Studies (Stage One)

- FAIR 101A - An Introduction to Interdisciplinary Study At Fairhaven College
- FAIR 201A - Critical and Reflective Inquiry

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

- FAIR 202A - Core: Humanities and the Expressive Arts I
- FAIR 203A - Social Relationships and Responsibility: Theories and Critiques
- FAIR 206A - Core: Science and Our Place on the Planet I
- FAIR 305A - Core: Writing and Transition Conference
- FAIR 403A - Core: Advanced Seminar
- One 300-level course in each of the following areas, with the specific course in each area, selected from a listing of approved courses found on the Fairhaven College website:
 - Humanities and the Expressive Arts II
 - Society and the Individual II
 - Science and our Place on the Planet II

- The technical 2-year degree coursework forms the bulk of the concentrated studies for this degree.
- Transfer coursework will be complemented by a set of primarily upper-division coursework determined in consultation with The Upside Down Program advisor.

Advanced Studies (Stage Three)

- FAIR 403A - Core: Advanced Seminar
- A minimum of 90 total credits at Western Washington University are required for this degree, with 180 credits total.

Interdisciplinary Concentration, BA

Fairhaven College of Interdisciplinary Studies

Introduction

Interdisciplinary Concentration – the Individually Designed Major. The Fairhaven College Interdisciplinary Concentration provides an opportunity for developing an individually designed major for the Bachelor of Arts or Bachelor of Arts in Education degrees. It allows maximal flexibility in formulating a program to meet personal and career goals, bringing together each student's vital interests from more than one discipline into a cohesive whole.

The self-designed concentration process allows students to work with a faculty committee to articulate a sound rationale for their area of study and to develop a plan including courses, independent study projects, senior projects and, where applicable, internships and apprenticeships. Students are assisted in completing the concentration by faculty and other advisors and by the Concentration Seminar course. At the conclusion of the program, a senior project and a concentration summary and evaluation help each graduate to evaluate her or his own work and to look toward the future.

Concentrations have been developed in a wide range of areas not available through traditional majors. Further information pertaining to the concentration, its possibilities and prospects, may be found in the Student Guide to Fairhaven College.

Why Consider an Interdisciplinary Concentration at Fairhaven College?

Fairhaven College offers a unique opportunity for students wanting to be fully engaged in the process of designing their college education.

Interdisciplinary Concentration: Law, Diversity & Justice Emphasis, BA

Fairhaven College of Interdisciplinary Studies

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

Introduction

Interdisciplinary Concentration – the Individually Designed Major. The Fairhaven College Interdisciplinary Concentration: Law, Diversity & Justice Emphasis provides an opportunity for developing an individually designed major for the Bachelor of Arts degree. It allows maximal flexibility in formulating a program to meet personal and career goals, bringing together each student's vital interests from more than one discipline into a cohesive whole.

The self-designed concentration process allows students to work with a faculty committee to articulate a sound rationale for their area of study and to develop a plan including courses, independent study projects, senior projects and, where applicable, internships and apprenticeships. Students are assisted in completing the concentration by faculty and other advisors and by the Concentration Seminar course. At the conclusion of the program, a senior project and a concentration summary and evaluation help each graduate to evaluate her or his own work and to look toward the future.

Concentrations have been developed in a wide range of areas not available through traditional majors. Further information pertaining to the concentration, its possibilities and prospects, may be found in the Student Guide to Fairhaven College.

Why Consider an Interdisciplinary Concentration with a Law, Diversity & Justice Emphasis at Fairhaven College?

The Law, Diversity & Justice (LDJ) Concentration is designed for students with a strong interest in law, diversity and access to the legal system for under-served communities. The Law, Diversity and Justice Concentration is open to all Fairhaven students with a passion for social justice. The concentration welcomes students who desire to effect change and who have the potential to act as leaders and role models in their communities using legal knowledge and processes. The curriculum also emphasizes a critical examination of how issues such as race, class, gender, sexual orientation and disability intersect with the legal system.

Sample Careers	
Audio recording technician Music producer	
Major/Career Resources	
http://www.wwu.edu/careers/students_choosingamajor.shtml	

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

How to Declare (Admission and Declaration Process):

Students seeking admission to the minor must first complete FAIR 270H - Introduction to Audio Recording satisfactorily and should then contact Jackie McClure at Fairhaven College. This minor is open to all students that meet the prerequisite.

Grade Requirements

A grade of 'S' in Fairhaven courses or C- or better in courses in other departments is required for this minor.

Core Requirements

- FAIR 270H - Introduction to Audio Recording
- FAIR 370I - Introduction to Pro Tools
- FAIR 370J - Studio Recording I
- FAIR 370K - Studio Recording II
- MUS 101 - Fundamentals of Music
- Two courses selected from the Music and Society list:
 - FAIR 255Y - Folk Music Experience
 - FAIR 336V - Topics in Art
 - FAIR 334Q - The Science and Music of Natural Sounds
 - FAIR 336M - Topics in Music & Society
 - FAIR 353V - Art in Public Sphere
 - FAIR 353Y - Songwriting Workshop
 - MUS 205 - Survey of World Musical Cultures
 - MUS 305 - Musics of the Pacific Rim

Electives (7-11 credits) by advisement

Through these electives a student may focus more on one element of the minor.

- Choose electives from courses in the Music and Society Core Requirements list not applied to the Core or courses from the following list:
 - COMM 244 - Advocacy Through Media
 - COMM 430 - Visual Rhetoric
 - FAIR 336V - Topics in Art
 - FAIR 353Y - Songwriting Workshop
 - JOUR 190 - Introduction to Mass Media
 - JOUR 375 - Diversity, Mass Media and Social Change
 - MUS 105 - Survey of Popular and Rock Music
 - MUS 230 - Introduction to Electroacoustic Music
 - MUS 232 - Computer Music Seminar
 - MUS 432 - Electroacoustic Music(Other courses or independent studies may be substituted with permission of minor advisor.)

Education and Social Justice Minor (see Secondary Education Department)

Education and Social Justice Minor (see Secondary Education department)

Law, Diversity & Justice Minor

Fairhaven College of Interdisciplinary Studies

23-28 credits

Introduction

The Law, Diversity & Justice Minor is an interdisciplinary course of study for students who are interested in law, diversity and access to the legal system for under-served communities. **This minor, open to all Western students**, is taught by a faculty that includes attorneys using law school texts. The minor builds the skills necessary for success after college: critical reading, writing, research, oral communication, and analytical ability. The curriculum also emphasizes a critical examination of how issues such as race, class, gender, sexual orientation and disability intersect with the legal system. The minor welcomes students who desire to effect change and who have the potential to act as leaders and role models in their communities using legal knowledge and processes.

Why Consider a Law, Diversity & Justice Minor?

For students who want to understand how legal systems work for and against justice in our society.

Core Requirements (15-18 credits)

- FAIR 311B - The American Legal System
Or
PLSC 311 - Introduction to Law and Judicial Process
- FAIR 412E - Advanced Topics in Law
Or
FAIR 334F - International Law
- FAIR 422K - Advanced Legal Writing and Analysis
- One course from:
 - FAIR 334C - International Human Rights
 - FAIR 393B - Rights, Liberties and Justice in America

Electives (minimum 8-10 credits)

Additional coursework related to diversity issues approved in advance by the LDJ Minor advisor. These courses might be drawn from the American Cultural Studies courses, Fairhaven courses, Political Science courses, Sociology courses, or other appropriate electives with approval.

Fairhaven Courses

FAIR 101A - An Introduction to Interdisciplinary Study At Fairhaven College

Provides a framework for Fairhaven College's interdisciplinary philosophy and practices. Students will be introduced to the Fairhaven community, mission, educational philosophies, and their complementary processes leading toward graduation. S/U grading.

Prerequisites & Notes: admission to Fairhaven College

Credits: 1

Grade Mode: S/U

FAIR 162B - Film/Video Production with Final Cut Pro

In this course you will learn how to plan for, shoot and edit short videos using Final Cut Pro X. Students will complete 4 short videos by the end of the week; one 30 second commercial, one "my life on campus" video, a short silent video and a group music video. Throughout the assignments the class will cover the basics of shooting with a green screen, light kit set-up, microphones and prosumer video cameras. Taught during Summer Quarter for College Quest only.

Credits: 1

Grade Mode: S/U

FAIR 200 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver. S/U grading.

Credits: 1-15

FAIR 201A - Critical and Reflective Inquiry

This interdisciplinary seminar engages students in the processes of critical and reflective thinking, reading and writing. It is a place to explore what these processes are, why they are valued, how they work, and where they fit into a Fairhaven education. Exploration of these processes will be rooted in a topical and methodological approach of the professor's choosing. S/U grading.

Prerequisites & Notes: Admission to Fairhaven College

Credits: 5

Grade Mode: S/U

FAIR 202A - Core: Humanities and the Expressive Arts I

Explores the assumptions and practices which inform human inquiry and creativity in literature, philosophy and the arts. S/U grading.

Credits: 5

Grade Mode: S/U

FAIR 203A - Social Relationships and Responsibility: Theories and Critiques

This interdisciplinary seminar is an introduction to modern social theory. Employs critical social theories to explore social relationships and examine society from positions of race, class, gender and sexuality, focusing specifically on the rights, responsibilities and obligations of individuals and communities. Integral to this examination are the experiences of those excluded from the Western ideals of freedom and equality that, arguably, form the basis of liberal democracy. S/U grading.

Prerequisites & Notes: Admission to Fairhaven College

Credits: 5

Grade Mode: S/U

FAIR 206A - Core: Science and Our Place on the Planet I

Science and technology are systematic, self-critical, intellectual activities by which a culture seeks to understand and benefit from the physical phenomena of its world. This course addresses science in Western culture - its social and philosophical implications, its technological applications, its potential and its limitations. S/U grading.

Credits: 5

Grade Mode: S/U

FAIR 210A - World Issues

Exploration of the complex dynamics of our globalized world from a holistic, inter-disciplinary and cross-border perspective. Examination of multiple world issues such as global inequality and poverty, food security, human rights, water, energy, population growth, migration, cultural change and public health, and of our individual and community roles as agents of social change on local and global levels. This course is connected to the World Issues Forum speaker series. Repeatable up to 10 credits. S/U grading.

Credits: 5
Grade Mode: S/U
GUR Attributes: ACGM

FAIR 212C - Introduction to Political Economy

Study of the American macroeconomic system from two perspectives: orthodox and critical; application of both theoretical frameworks to problems in modern society. S/U grading.

Credits: 5
Grade Mode: S/U

FAIR 212E - Coast to Coast on a Piece of Toast: Hoboism and the Great Depression

Explores phenomenon of 'riding the rails' in America in the Twentieth Century. Examines the effects of 'hoboism' and the Great Depression on labor and politics as well as literature, music and art. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 213B - Topics in Popular Culture

Introductory course looking at critical interpretations of popular culture theory as it relates to particular popular culture phenomena from an interdisciplinary perspective. Topics may include reality television, soap operas, celebrity and tabloid magazines, advertising, and more. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 201A or concurrent registration.

Credits: 2-5
Grade Mode: S/U

FAIR 213D - Slave Narratives and Other Testimonies of the Old South

An introductory, interdisciplinary approach to early African American history and the history of the Old South. Using slave autobiographies, WPA interviews, free black testimonies and memoirs in addition to contemporary historical works, we will reconstruct, analyze and deconstruct the history of Southern life and culture during the Antebellum era through the Civil War. S/U grading.

Credits: 3
Grade Mode: S/U

FAIR 214B - Interdisciplinary Topics in American Experience

Significant events, movements, art genres, history or other phenomena in American society. Uses multiple approaches, not limited to the traditional

disciplines, to interpret course material. Examples of topics include a particular art form, the Ku Klux Klan etc. Repeatable with different topics. S/U grading.

Credits: 3-4
Grade Mode: S/U

FAIR 215F - The Asian-American Experience

The history of Asians in the United States, the development of communities and the effects of the encounter between Asian cultures and the developing American cultural context. Also offered as AMST 205. S/U grading.

Prerequisites & Notes: Also offered as AMST 205

Credits: 4
Grade Mode: S/U

FAIR 216B - Testimonies of the New South

An interdisciplinary, introductory-level course examining the social, cultural, economic changes that occurred in the South after the Civil War to the early 1900s. The primary source of documentation will be autobiographies, speeches, literature and commentaries made by black and white southerners who experienced these changes at that time. This course is a continuation of Fair 213D. S/U grading.

Credits: 3
Grade Mode: S/U

FAIR 218C - The Hispano/A-American Experience

The development of the Hispano/a-American community, with emphasis on its history, its social and political institutions, and the effects of education, continuing immigration and economic stratification. Also offered as AMST 203. S/U grading.

Prerequisites & Notes: Also offered as AMST 203.

Credits: 4
Grade Mode: S/U

FAIR 219D - The African-American Experience

An overview of African-American history from an interdisciplinary perspective. Emphasis is on the struggle for social and political equality in a developing capitalist economy. The contemporary social, economic and political life of African Americans will also be examined. S/U grading. Also offered as AMST 204.

Credits: 4
Grade Mode: S/U

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

FAIR 221J - Interdisciplinary Writing

Directed toward the student who wishes to improve expository writing skills. Theory, practice and criticism of student work. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 222G - Imaginative Writing: Poetry

This course is an invitation to immerse yourself in the language of being: poetry. We will explore what it means to breathe, to live as creatures of rhythm, to delight in pattern, to illuminate images and moments, to sing, and to let words trip the light fantastic along our tongues. We will read ancient and contemporary poetry, listen to poetry, discuss poetry, cook poetry, eat poetry, make poetry, walk poetry, and discover poetry in strange and ordinary places in our lives. Be prepared to experiment, take risks, work hard, ask lots of questions, and write and write and write. Repeatable to 12 credits. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 222H - Imaginative Writing: Fiction

This class will look at fiction through both reading and creative writing, it will follow examples of fiction, non-fiction and poetry into that borderland of nets where the marvelous meets the real. Repeatable to 12 credits. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 223G - Elements of Style

An examination of the rules and principles of English composition, including grammar, punctuation, word usage, sentence construction, and strategies for proofreading and revision. Repeatable 3 times. S/U grading.

Credits: 1
Grade Mode: S/U

FAIR 223K - Collecting Personal Narratives: The Art of the Interview

Introduction to skills in listening, questioning, and critical approaches to critiquing interviews. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 225G - Presentational Speaking

An opportunity to develop strategies for effective presentations in a variety of contexts. S/U grading.

Credits: 3
Grade Mode: S/U

FAIR 226H - Words

An etymological exploration of words: their origins, roots, history, evolution, connotations, and usage. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 227J - Walking

A literary and experiential examination of walking. S/U grading.

Prerequisites & Notes: 0
Credits: 4
Grade Mode: S/U

FAIR 230C - Active Lifestyles for Health

This course combines the academic and practical study of active lifestyles. Classes will include the study of particular types of fitness activities combined with involvement in the activity itself. Repeatable up to four credits including original course. S/U grading.

Prerequisites & Notes: FAIR 201A or concurrent.
Credits: 2
Grade Mode: S/U

FAIR 231N - Introduction to Applied Human Ecology: Sustainable Systems

Study of relationships between human systems and the environment with an emphasis on the principle of sustainability. Study of models of sustainable development and appropriate technology complement practical applications in the Outback Farm/Wetland/Outdoor Learning Center. Student participation in instruction. S/U grading. Repeatable up to 9 credits, including original course.

Credits: 3
Grade Mode: S/U

FAIR 232P - User-Friendly Statistics

Basic statistical techniques (sampling, distributions, graphing, hypothesis testing, test of correlation and significance) in the context of real-world issues of concern to nontechnical majors, along with skills for evaluating and critiquing statistical arguments and discerning statistical abuse. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 234P - Psychology and Society

This class will take a social psychological perspective to understand the ways individual's behaviors are influenced by the real or imagined presence of others, with a focus on social situations and construals as causes of behavior. The core areas of the field concentrate on attitudes, group processes, and interpersonal and intergroup relations. S/U grading.

Credits: 5
Grade Mode: S/U

FAIR 234U - Introduction to Cross-Cultural Psychology

This survey course provides an introduction to understanding and developing an appreciation for cultural influences on the self, behavior, cognition, emotion, relationships, morality, and mental and physical health, with an emphasis on social psychological research. The course will focus on both international and U.S. perspectives. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 242R - The Art of Play: Reclaiming Imagination and Spontaneity for The Adult

The practice of adult play with focus on methods to reclaim imagination and spontaneity. Providing an intellectual and interdisciplinary framework for understanding the nature of play through readings in philosophy, anthropology and psychology. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 243T - Awareness Through the Body

An experiential introduction to the discipline of somatics and to traditions of somatic practice. Attention is paid both to theories and experiences of the body and its immediate environment. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 243U - Topics in Mind and Body

An interdisciplinary exploration of the interface between mind, body and psyche; including, but not limited to, studies in somatics, movement, dance, sensory awareness, cross-cultural or integrative

wellness paradigms, consciousness, death and dying. Approaches may be experiential, historical, education, theoretical, cultural, political and transpersonal. Repeatable with different topics to a maximum of 15 credits. S/U grading.

Credits: 3-5
Grade Mode: S/U

FAIR 252V - Introduction to Drawing

Studio course introducing experimental drawing mediums and style. Assigned projects emphasize the possibilities of extending traditional concepts concerning the parameters of drawing. Students set and solve their own experiential creative problems. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 254X - Introduction to Relief Printing

Introduction to basic relief printing techniques with emphasis on narrative image-making and composition. Woodblocks, linoleum blocks and plexiglass plates will be employed for understanding printing techniques. Repeatable up to 8 credits. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 255Y - Folk Music Experience

Focus on group performance of music from the American folk tradition, practicing instruments, learning songs, and researching folk music issues, performers, and/or songs and meeting weekly to play music together. Repeatable to a maximum of 8 credits. S/U grading.

Credits: 2
Grade Mode: S/U

FAIR 257V - Topics in Studio Art

An interdisciplinary exploration of specific topics in studio art, including painting, printmaking, sculpture, and mixed media. Approaches may include historical, theoretical, literary, cultural, or political readings. Repeatable with different topics. S/U grading.

Credits: 3-8
Grade Mode: S/U

FAIR 258W - Introduction to Acrylic Painting

Acrylic painting techniques and elements of form composition and color using still life, photographs and live models. S/U grading.

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

Credits: 4
Grade Mode: S/U

FAIR 261E - Race In/To the Movies I: Race Relations on Film 1900-1950

Explores race relations in America between 1900 and 1950 using film as one source of historical documentation. Films such as Birth of a Nation, Broken Blossoms and The Scar of Shame will demonstrate how movies both reflect and reinforce contemporary perceptions of inter- and intra-race relations. Readings will place the films into a broader historical context. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 263B - The American Indian Experience

Pre-contact American Indian cultures and the impacts of colonization, primarily in North America. Focus on such aspects as sovereignty, treaty rights, health, education and economic development. Also offered as AMST 202. S/U grading.

Prerequisites & Notes: Also offered as AMST 202
Credits: 4
Grade Mode: S/U

FAIR 270B - Introduction to Digital Video Production

This class will introduce basic camera use and video editing in the digital medium. Students will script, shoot, and edit 5 assignments using Final Cut Studio 2. Projects range from a 30-second commercial to a 3-5 minute final video on the student's choice of topic. S/U grading.

Credits: 2
Grade Mode: S/U

FAIR 270H - Introduction to Audio Recording

Introduction to Audio Recording explores the techniques, tools, and technology used in multi-track recording. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 280 - Practicum

By arrangement: fall, winter and spring. Fairhaven College independent study proposal approval required for registration. Learning through practical involvement outside the classroom; general exposure and experience. Repeatable. S/U grading.

Prerequisites & Notes: approval by two or more Fairhaven faculty

Credits: 1-6
Grade Mode: S/U

FAIR 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver. S/U grading.

Credits: 1-15

FAIR 303A - Core: Interdisciplinary Concentration Seminar

Application of procedures and assistance in ordering one's course of study into an effective concentration proposal. Credit awarded upon filing the proposal or declaration of a WWU major. S/U grading.

Prerequisites & Notes: FAIR 101a, FAIR 201a, FAIR 203a and FAIR 305a. Required of students in the Interdisciplinary Concentration.

Credits: 5
Grade Mode: S/U

FAIR 305A - Core: Writing and Transition Conference

Development of a portfolio of writing and demonstration of writing competency and readiness to pursue Concentrated Studies, in consultation with faculty. See Student Guide to Fairhaven College for procedure. Partially satisfies the all-University writing proficiency requirement. S/U grading.

Prerequisites & Notes: FAIR 101a and FAIR 201a.

Credits: 3
Grade Mode: S/U

FAIR 310N - American Indians in the Cinema

Explores portrayal of American Indians in the cinema and the effects of racist images and perpetuated stereotypes on Native identity, self-esteem and cultural survival. S/U grading.

Credits: 5
Grade Mode: S/U

FAIR 310W - American Indian Celebrations

Cultural background and history of some American

Indian celebrations. Films, readings, discussion, and sharing individual research. Will attend several Native celebrations in the area. This course is offered during the Summer quarter. S/U grading.

Prerequisites & Notes: AMST course or instructor permission

Credits: 3-5

Grade Mode: S/U

FAIR 311B - The American Legal System

The American legal system and how it affects individuals and society. The structure and evolving nature of the legal system, legal reasoning and the role of courts in government. Skill development in reading and analyzing court opinions. S/U grading.

Prerequisites & Notes: FAIR 203A or Social Science GUR or permission of instructor.

Credits: 5

Grade Mode: S/U

GUR Attributes: SSC

FAIR 311C - Alternatives in Education

Exploration of various alternative education and school reform movements including philosophy, politics, implementation, financing and historical context. Some of the models which may be discussed include: Montessori, Steiner (Waldorf), home schooling, free schools, single culture or gender school programs, New American Schools Development Corporation. Repeatable with different topics. S/U grading.

Credits: 4

Grade Mode: S/U

FAIR 312D - Issues in International Studies

Explores issues of concern to selected nations. May also include global scope. Examples of topics include globalization, reinventing development, and environmental issues in economically poor countries. Repeatable with various topics. S/U grading.

Prerequisites & Notes: FAIR 203a or instructor permission.

Credits: 3-6

Grade Mode: S/U

FAIR 312E - Transgender Identities and Histories

An overview of the transgender, transsexual, and intersex communities, focusing on the development of identity (male, female, 'other'). This course will look at the narratives of trans people and the history of the communities, as well as the questions raised about the nature of gender

identity formation. S/U grading.

Prerequisites & Notes: FAIR 201A and FAIR 203A.

Credits: 4

Grade Mode: S/U

FAIR 312F - Globalizations since 1870

Overview of the global political economy and the expansions of the capitalist system from the late nineteenth century to the early twenty-first, from the era of globalization before World War I to our current era of globalization since 1973, via Two World Wars, the Great Depression, decolonization, and the Cold War. Examines facets of the history, politics, economics, sociology, and culture of globalization, the increased mobility of goods, people, capital, and ideas around the world. S/U grading. Also offered as INTL 312.

Prerequisites & Notes: FAIR 203A or INTL 201 required; FAIR 212C or ECON 206 or HNRS 209 recommended.

Credits: 5

Grade Mode: S/U

GUR Attributes: SSC

FAIR 313D - Slave Narratives and Other Testimonies of the Old South

This is an upper division course that examines the history of African and African-American slavery in the U.S. Starting from 1619, we will be exploring the development of the slave system, also referred to as the 'peculiar institution,' from the view point of enslaved African Americans, to the final collapse and destruction of slavery during the Civil War. While the predominant source of documentation will be narratives and other testimonies written during the 19th century, we will also pay attention to how scholars have approached slavery over the years.

Prerequisites & Notes: Any lower division U.S. history course or AMST 204 or FAIR 203A; or permission of instructor.

Credits: 5

Grade Mode: S/U

FAIR 313E - Queer Issues in Education

Explores challenges for gay, lesbian, bisexual, transgendered students, teachers and families in the education system including social and development considerations, the impact of mediated heterosexism, politics of schooling. Also explores roles of allies and curriculum transformation. S/U grading.

Prerequisites & Notes: AMST 242

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

Credits: 4
Grade Mode: S/U

FAIR 314B - Advanced Interdisciplinary Topics in American Experience

Study of events, movements, art genres, or other phenomena in America. Employs interdisciplinary approaches and social theory to deeply explore topics. Topics might include the art deco movement, nativist movements, or war. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 203A
Credits: 4
Grade Mode: S/U

FAIR 314E - Critical Pedagogy

This course helps students, who may or may not be looking toward a professional career in schools, develop the knowledge and skills necessary to critically examine and evaluate various classroom practices using the theories and practice of critical pedagogy. Analyses will focus on those practices which are conceptually sound, ethically responsible, and culturally responsive, or will consider the various ways to make them so.

Prerequisites & Notes: AMST 301 or FAIR 366E.
Credits: 4
Grade Mode: S/U

FAIR 319B - Current Issues in Law

A look at one or two current legal issues being addressed by US courts (including federal, state and/or tribal) today. Study of the cases surrounding the legal issue, popular opinion about the issue, and current cases testing the legal issue. Examples of possible topics include abortion, immigration, criminal law and procedure. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 311B or PLSC 311 or permission of instructor.
Credits: 2-5
Grade Mode: S/U

FAIR 319E - Advanced Topics in Popular Culture

Advanced course studying major popular culture theorists and applying those theories to the study of popular culture from an interdisciplinary perspective. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 201A and FAIR 203A
Credits: 2-5
Grade Mode: S/U

FAIR 322M - Memoirs and Memory: Childhood in America

Using literature, film and theoretical readings, investigates the 'idea' of childhood and, using other cultures and historical periods as lenses, examines how today's American society constructs the ideal and implements the reality. S/U grading.

Prerequisites & Notes: FAIR 201A and FAIR 203A or equivalent or instructor permission.
Credits: 4
Grade Mode: S/U

FAIR 323G - Imaginative Writing II

An opportunity to continue development of creative skills in fiction, poetry or writing for children, including the revision of promising works for publication. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 222G or FAIR 222H, creative writing course, or instructor permission.
Credits: 4
Grade Mode: S/U

FAIR 323H - Elements of Style II

An exploration into the art of syntax and sentence-making. Builds on the exercises and concepts examined in Fair 223g Elements of Style. S/U grading.

Prerequisites & Notes: FAIR 223g or permission of instructor.
Credits: 1
Grade Mode: S/U

FAIR 324H - Poetry and Lyric

Exploration of both poetry and song lyrics with a focus on similarities and differences of compositional intent. Reading, listening and writing to explore how constraints and conventions of form shape poems and songs. S/U grading.

Prerequisites & Notes: FAIR 202A or equivalent or poetry course.
Credits: 4
Grade Mode: S/U

FAIR 325G - Maps

An interdisciplinary exploration of maps and mapmaking. Emphasis on the history of maps, diverse ways of mapping, cross-cultural expressions of space, and hands-on creation of individual and communal maps. S/U grading.

Prerequisites & Notes: FAIR 202A or instructor permission.

Credits: 4
Grade Mode: S/U

FAIR 325J - Studies in Myth and Mythology

Literary and artistic archetypes, world mythology, comparative cosmology, symbols and the unconscious. Repeatable with various topics. S/U grading.

Prerequisites & Notes: Background in humanities or cultural history.

Credits: 4
Grade Mode: S/U

FAIR 328M - American Lives

Examines the lives and work of Americans. Subjects may include artists, environmentalists, writers, scientists, civil rights activists, athletes, children, and so on. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 202A or instructor permission.

Credits: 4
Grade Mode: S/U

FAIR 330D - Natural History and Environmental Issues of NW Washington

This field course will introduce students to the natural history and environmental issues of Northwestern Washington. S/U grading.

Credits: 5
Grade Mode: S/U

FAIR 330E - Ethnobotany

Study of how people use plants--as food, medicine, material goods, and symbolic and ceremonial elements of human culture. Includes a focus on plant identification, historical exploration of plant uses, and hands-on learning about wild edibles, plant domestication, herbal medicines, fibers and more. S/U grading.

Prerequisites & Notes: FAIR 206A or equivalent.

Credits: 5
Grade Mode: S/U

FAIR 331N - Natural History

An experiential and literary investigation into the science of natural history, its roots, and the diverse ways it is being applied to our contemporary lives and world. S/U grading.

Prerequisites & Notes: FAIR 206A or equivalent or instructor permission.

Credits: 5
Grade Mode: S/U

FAIR 332N - Current Environmental Topics

The interdisciplinary context of current environmental issues, including the scientific basis for concern. Examples include acid rain, loss of genetic diversity, climate modification by logging, global warming, ozone depletion, overpopulation, nuclear waste disposal. Repeatable with various topics. S/U grading.

Prerequisites & Notes: FAIR 206A or instructor permission.

Credits: 2-5
Grade Mode: S/U

FAIR 334B - Transitional Justice

This course examines different approaches taken by countries and the international community in dealing with past serious violations of human rights, and the process by which formerly repressive States transform themselves into societies based on democracy and the rule of law. S/U grading.

Prerequisites & Notes: FAIR 203A

Credits: 4
Grade Mode: S/U

FAIR 334C - International Human Rights

This course examines the idea of human rights, its historical, philosophical and legal origins. It explores the notion of universal rights and examines the relativity debate. It will introduce students to rights that are guaranteed and selective substantive rights will be examined - civil and political rights; economic, social and cultural rights, and other classes of rights. Other considerations include national, regional and international institutions created to supervise implementation of and compliance with those rights. It will also consider the role of non-governmental organizations and activists who seek to enforce human rights. S/U grading.

Prerequisites & Notes: FAIR 203a or instructor permission.

Credits: 5
Grade Mode: S/U

FAIR 334D - State Failure and State Collapse

Exploration of State failure and State collapse; considers the causes and consequences of State collapse and related issues of anarchy, civil war and the emergence of strong non-State actors. It also examines the regional implications of State collapse and the possibility of predicting and

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

preventing failure and collapse. Student cannot receive credit for both this course and Fair 334e. S/U grading.

Prerequisites & Notes: FAIR 203A or permission of instructor.

Credits: 5

Grade Mode: S/U

FAIR 334E - State Collapse and State Reconstruction

Exploration of State failure and collapse and the prospects for reconstruction in these States. It examines the causes and consequences of State failure and collapse; the possibility of predicting and preventing failure or collapse; and various State rebuilding models. Focuses on contemporary cases of failure and collapse and State reconstruction. Student cannot receive credit for both this course and either FAIR 334D or FAIR 334G. S/U grading.

Prerequisites & Notes: FAIR 203A or permission of instructor.

Credits: 5

Grade Mode: S/U

FAIR 334F - International Law

Introduction to public international law, which governs the relations of States and increasingly, other non-State actors. Covers the basic doctrines of public international law and the international legal system, which will be applied to contemporary issues of international law. S/U grading. Also offered as INTL 334.

Prerequisites & Notes: FAIR 203A or permission of instructor.

Credits: 5

Grade Mode: S/U

FAIR 334G - State Reconstruction

This course considers the prospects for rebuilding failed and collapsed States. It examines various state-building models and focuses on contemporary cases of reconstruction in the aftermath of failure and collapse, and other post-conflict reconstruction situations. Students cannot receive credit for both this course and FAIR 334E. S/U grading.

Prerequisites & Notes: FAIR 334D or permission of instructor.

Credits: 4

Grade Mode: S/U

FAIR 334H - Human Rights in Africa

This course examines the state and contemporary

practice of human rights in Africa. It reviews efforts aimed at human rights promotion and protection, in the context of colonialism and neo-colonialism, apartheid, the authoritarianism of the post-colonial African State and recent public health challenges that threaten the welfare and dignity of individual Africans. Topics to be covered include the role of the African Charter on Human and People's Rights; human rights and democracy; the NEPAD initiative; economic, social, and cultural rights; the public health challenge -- HIV/AIDS, malaria and other diseases; human rights of women, children, and other vulnerable groups; human rights and armed conflict in Africa; challenges to and future prospects for human rights in Africa. S/U grading.

Prerequisites & Notes: FAIR 203A or FAIR 334C or SSC GUR course or instructor permission.

Credits: 5

Grade Mode: S/U

GUR Attributes: ACGM

FAIR 334J - Genocide

The course will explore the relationship between genocide and newer forms of mass violence, state-sponsored and non-state terror. Students will gain an understanding of the background, causes and effect of genocide; how to define and the possibility of predicting and preventing genocide, and the multiple impact of genocide on victims, perpetrators, bystanders and the society/country where it occurs.

Prerequisites & Notes: FAIR 203A or FAIR 334C or instructor permission.

Credits: 4

Grade Mode: S/U

FAIR 334K - Human Trafficking and Smuggling

Interdisciplinary examination of the various manifestations of human trafficking and human smuggling: human trafficking, bonded labor, forced labor, worst forms of child labor, organ trafficking, prostitution and sexual slavery. Examines the rise and growth, and the cross-sectoral consequences of trafficking and smuggling. Examines the challenges of addressing human trafficking and human smuggling, and the appropriate policy responses to the problem by State and non-State actors around the world. Also offered as INTL 335. S/U grading.

Prerequisites & Notes: FAIR 203A or INTL 201.

Credits: 4

Grade Mode: S/U

GUR Attributes: ACGM

FAIR 334L - The Holocaust

Interdisciplinary examination of the origins, course, and aftermath of the Nazi Holocaust. Situates the Holocaust within the multiple genocides around the world in the twentieth century. Examines the responses of targeted groups, survivor accounts (including the impact on children of the victims and perpetrators), and issues of memorialization, politicization, representation, and sacralization of the Nazi Holocaust. Also offered as INTL 336. S/U grading.

Prerequisites & Notes: FAIR 203A or INTL 201.
Credits: 4
Grade Mode: S/U
GUR Attributes: BCGM

FAIR 334N - Topics in Evolutionary Biology

Explores evolutionary theory, the history of evolutionary thought, and the relevance of biological evolution to the modern human condition. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 206A.
Credits: 4-8
Grade Mode: S/U

FAIR 334P - Field Studies in Science

Systematic studies of quantitative natural history, employing field techniques from biology, chemistry, physics, and interdisciplinary science. Repeatable to a maximum of 20 credits. S/U grading.

Prerequisites & Notes: FAIR 206A.
Credits: 3-8
Grade Mode: S/U

FAIR 334Q - The Science and Music of Natural Sounds

Recording sounds in local natural settings with a focus on how and why animals produce sound, how sound travels through the environment, how we can use the sound for biological survey work and to estimate environmental degradation, how urban sounds differ from natural areas, and using recordings to compose and perform music. S/U grading.

Prerequisites & Notes: FAIR 206A or instructor permission.
Credits: 5
Grade Mode: S/U

FAIR 334R - Olympic National Park Natural History and Ecology

This field course introduces the natural history and ecology of the Olympic National Park through a

weeklong camping trip including visits and study in old growth forest, beaches, montane, and river systems. Offered summer quarter only. S/U grading.

Prerequisites & Notes: FAIR 206A or Permission of Instructor.
Credits: 5
Grade Mode: S/U

FAIR 334S - Holocaust Film

Focuses on cinematic treatments and complex issues surrounding the representation of the Holocaust. Highlights the representation in films of how the victims attempted to hide; how the Germans rounded them up, took them to camps and killed them, as well acts of courage and resistance by victims, perpetrators and bystanders. Examines how cinematic 'kitsch' and the voyeurism of uninformed audiences around the world have adulterated public memory of the Holocaust. Also offered as INTL 338.

Prerequisites & Notes: FAIR 201A or ENG 101 or INTL 201.
Credits: 5
Grade Mode: S/U
GUR Attributes: HUM

FAIR 335B - Global Inquiry

Preparation for global studies and travel abroad. Repeatable to a maximum of 4 credits, including original course. S/U grading.

Prerequisites & Notes: FAIR 201a or equivalent
Credits: 2
Grade Mode: S/U

FAIR 335C - Multicultural Psychology

Interpersonal and intergroup mechanisms that can have the cumulative impact on the health, performance outcomes, and acceptance of various racial minority groups and Whites in the United States, the intersectionality between race, gender, social class, and other social group memberships will be examined.

Prerequisites & Notes: FAIR 203a or equivalent or instructor permission
Credits: 5
Grade Mode: S/U

FAIR 335H - HIV and AIDS in a Global Context

Students will learn the biology of HIV and AIDS as well as the social and political factors that affected the spread, positively or negatively, of HIV in a global context. Topics will include the typology of

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

the HIV virus, how the virus interacts with the human host, the spread of HIV, the process of moving from HIV infection to an AIDS diagnosis, the history of HIV from an American perspective, the history of HIV from a non-Western perspective, the current approach to HIV treatment, and the future direction of HIV prevention and treatment programs. Links between the biology, social, political, and historical aspects of HIV in a global context will be emphasized throughout the course – as well as with other infectious diseases. S/U grading.

Prerequisites & Notes: FAIR 206A.

Credits: 5

Grade Mode: S/U

FAIR 335M - Nutrition and Public Health

This course will discuss the biology of nutrition and its impact on the individual, society, and the global community. Students will build an understanding of nutrition and various types of malnutrition, such as starvation, eating disorders, and obesity; as well as a variety of metabolic disorders and food allergies. This class will include discussions on the impact of diet on health with every topic covered. The class will also explore inequities in nutrition – why they might exist and what types of programs have been piloted to address the inequities.

Prerequisites & Notes: FAIR 206A or instructor permission

Credits: 5

Grade Mode: S/U

FAIR 335N - Visioning Sustainable Futures

A critical examination of alternative futures envisioned by various writers representing the world views of diverse cultures and communities of interest, in light of present-day sociopolitical, economic and environmental realities. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 201A or ENG 101, and previous course work/experience in sociopolitical/environmental issues from sociopolitical perspective

Credits: 4-5

Grade Mode: S/U

FAIR 335P - Global Biodiversity Science and Policy

Introduction to the science of documenting, describing, categorizing, and measuring biological diversity globally, from genes and species to eco-regions and biomes. Includes an examination of 1) biodiversity's importance for human welfare and 2) current policies and approaches for conserving and sustaining biological diversity worldwide. S/U

grading.

Prerequisites & Notes: FAIR 206A or equivalent.

Credits: 4

Grade Mode: S/U

FAIR 335Q - Qualitative Research Methods

Students in this course will learn how to design qualitative studies, collect and analyze data, and write a report on qualitative findings. Each student will work with a team of other students on a topic of their choice. This study will be a quarter long project for each team of students – ending in a culminating presentation and research paper on the study findings at the end of the term. S/U grading.

Prerequisites & Notes: FAIR 206A.

Credits: 5

Grade Mode: S/U

FAIR 336B - Topics in Social Issues

An interdisciplinary exploration of specific topics in the social sciences, including studies in economics, political science, international studies, social theory, ethnicity, race, culture, gender, class, law, psychology, and social activism. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 203a or equivalent

Credits: 4-5

Grade Mode: S/U

FAIR 336H - Topics in Performance

Stories matter. An interdisciplinary exploration of specific topics in performance, including studies in economics, political science, international studies, social theory, ethnicity, race, culture, gender, class, law, psychology, and social activism and how they are represented through performance. Will include performance components; no performance experience necessary. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 201A.

Credits: 2-6

Grade Mode: S/U

FAIR 336M - Topics in Music & Society

An interdisciplinary exploration of specific topics in the social applications and context of music, including studies of varied music genres and their roles in society as entertainment, as cultural representation and as tools for social critique. Repeatable with different topics up to 12 credits. S/U grading.

Credits: 4
Grade Mode: S/U

FAIR 336N - Topics in Science

The interdisciplinary exploration of specific topics in science, including health, reproductive science, ecology, energy, natural history, animal studies, botany, sustainability, the history of science, and science and society. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 206a or equivalent
Credits: 4-5
Grade Mode: S/U

FAIR 336V - Topics in Art

An interdisciplinary exploration of specific topics in the arts, including music, art, creativity, dance, theatre, and performance. Approaches may be historical, theoretical, literary, cultural, or political, or through studio work. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 202a or equivalent
Credits: 4-5
Grade Mode: S/U

FAIR 338P - Cultural and Biological Perspectives on Pregnancy and Childbirth

The biology of pregnancy and childbirth, including the development of the fetus, morphological, physiological and psychological changes women experience during pregnancy and childbirth, and the co-evolutionary relationship between mothers and fetuses. Explores childbirth from cross-cultural and historical perspectives, and focuses on the ways American medicine has viewed and treated childbirth and recent changes in American childbirth practices. S/U grading.

Prerequisites & Notes: FAIR 203A and 206A or instructor permission.
Credits: 5
Grade Mode: S/U

FAIR 340P - Sustainable Forestry

An examination of the development of forestry as an applied science in Europe & the U.S. and of forest management worldwide, asking what common conditions favor or promote sustainable approaches to forest management? Critical examination of sustainability itself as a guiding concept in natural resource management. S/U grading.

Prerequisites & Notes: FAIR 206A or permission of instructor.

Credits: 4
Grade Mode: S/U

FAIR 341R - Psychology of Mindfulness and Well-Being

Numerous studies show that 'mindfulness,' an ancient practice now widely used in the West, offsets stress and leads to health, focus, and feelings of well-being. This course examines the origins, techniques and effects of mindfulness. S/U grading.

Prerequisites & Notes: FAIR 203A and psychology related course or instructor permission.
Credits: 5
Grade Mode: S/U

FAIR 341T - Awareness Through the Body II

A continuation of FAIR 243T with deeper attention, experiential and cognitive, to the philosophical concepts introduced in the first course, to psychophysical integration, and to the underlying principles, methods and theories in somatics. S/U grading.

Prerequisites & Notes: FAIR 243T or instructor permission.
Credits: 4
Grade Mode: S/U

FAIR 342U - The Body Speaks: Culture and Eating Disorders

Examines eating disorders in the United States and developing countries from cultural and gender perspectives, as well as controversies regarding origins and treatments. S/U grading.

Prerequisites & Notes: previous course in psychology or instructor permission.
Credits: 4
Grade Mode: S/U

FAIR 343R - Death and Dying

The implications of one's death for philosophy, culture, art, literature, aging, economics, psychology, medicine and living. Draws upon books, essays, films, field trips and personal experience. S/U grading.

Credits: 5
Grade Mode: S/U

FAIR 343U - Advanced Topics in Mind and Body

An advanced examination of specific mind-body topics. Repeatable with different topics. S/U grading.

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

Prerequisites & Notes: FAIR 201A

Credits: 3-5

Grade Mode: S/U

FAIR 344P - Asian-American Psychology

This course examines the current psychological research on Asian American individuals and the community, with an emphasis on social psychological research. Topics will include the model minority myth, stereotypes of unassimilation, multicultural identities, perceived exemplary family values, and stigma and mental health. Also offered as AMST 344. S/U grading.

Prerequisites & Notes: AMST 205 or FAIR 215F or PSY 101.

Credits: 4

Grade Mode: S/U

GUR Attributes: BCGM

FAIR 344U - Cross-Cultural Psychology

Introducing non-Western perspective of human behaviors. Culture's influences on human thinking, feeling, and action. Learning diversity in understanding societies and human beings. Repeatable with different topics. S/U grading.

Prerequisites & Notes: any psychology course

Credits: 4

Grade Mode: S/U

FAIR 345A - Principles of Social Entrepreneurship

This course is an introduction to the principles and practices of social entrepreneurship. The emphasis is on understanding systems changes to improve the lives of people and the planet in the face of current local and global problems. The course will analyze social entrepreneur's current efforts to address and solve these problems by through socially responsible and sustainable systems.

Prerequisites & Notes: FAIR 203A or other introductory social theory/responsibility class approved by instructor.

Credits: 4

Grade Mode: S/U

FAIR 349V - Art During Wartime

This class will explore how various artists, composers and filmmakers have expressed enthusiasm and disdain for war and its injustices throughout history. We will discuss potential contemporary applications for art during wartime and create three art projects based upon reading and discussions. S/U grading.

Prerequisites & Notes: FAIR 202a or equivalent

Credits: 4

Grade Mode: S/U

FAIR 351V - Art, Race and Gender

This combination studio art and seminar course explores how artists and theorists address issues of race and gender identity through art. Students will research numerous artists and theorists while creating artworks that explore and express their own identities. Strategies for creating dialogues through art will also be discussed. Offered every other year. S/U grading.

Prerequisites & Notes: Either FAIR 220A or Art History, and one art studio course or instructor permission. Some familiarity with race or gender issues is recommended.

Credits: 4

Grade Mode: S/U

FAIR 351W - Printmaking Narratives

Exploration of and experimentation with advanced printmaking techniques emphasizing the four-color technique. Relief, intaglio, drypoint, woodcut collagraph and monotype illustrating personal narratives and themes. S/U grading.

Prerequisites & Notes: FAIR 254X or two design or two studio art courses.

Credits: 4

Grade Mode: S/U

FAIR 353V - Art in Public Sphere

Explore history and concepts behind public art, create proposals and models for public art projects, and research artists who work within public space. S/U grading.

Prerequisites & Notes: Introduction to drawing and one of: FAIR 355Y, FAIR 359V, FAIR 355W or permission. Background in art history recommended.

Credits: 4

Grade Mode: S/U

FAIR 353Y - Songwriting Workshop

Examination of the elements of songwriting: discussing techniques, strategies and blocks; the roles and inter-relationships of melody, rhythm, and lyric; and song forms and styles. Through a series of exercises, development of a portfolio of songs. S/U grading.

Credits: 4

Grade Mode: S/U

FAIR 354V - Scriptwriting Workshop I

Practice in the art and craft of writing for the dramatic media: theater, film, television and radio. Intensive writing and rewriting experience with a supportive group of other writers. S/U grading.

Prerequisites & Notes: previous course work or experience with creative writing or instructor permission

Credits: 4

Grade Mode: S/U

FAIR 356V - Site-Specific Art

Students will explore the creation of three-dimensional art installations, environments and/or performances developed for specific locations outside of the traditional art gallery paradigm. Students will research histories of prospective sites and communities in order to write proposals and create thematic and socially relevant artworks. S/U grading. Repeatable up to 8 credits, including original course.

Prerequisites & Notes: FAIR 202A and one studio art course or instructor permission. ART 109 recommended.

Credits: 4

Grade Mode: S/U

FAIR 356W - Video, Performance & Sound Art

Students will explore and develop ideas and existing skills in the areas of video, performance and/or sound art within the context of contemporary art; culminating in a public screening, exhibition or performance of a final project. Students will present proposals and timelines to the instructor, give regular progress reports to the class, and write artist statements for each of their projects. Experimentation and creative risk-taking is highly encouraged. Emphasis will be placed upon stepping outside of traditional and popular genres in order to challenge both artist and audience. S/U grading

Prerequisites & Notes: FAIR 202A or one course in either music, art or theater/dance history, and previous course in either audio, video or performance practice.

Credits: 4

Grade Mode: S/U

FAIR 356X - Dreams, Imagination and Creativity

A study, through readings, discussion, experiences, of the content and interrelationships between dreams, imagination and creativity to enhance the intuitive dimension of daily life. Extending the range of imagination through practice: visualization techniques, artistic expression, journal writing. S/U grading.

Prerequisites & Notes: FAIR 203A or FAIR 243R or instructor permission.

Credits: 4

Grade Mode: S/U

FAIR 357V - Topics in Studio Art II

An interdisciplinary exploration of specific topics in studio art, including painting, printmaking, sculpture, and mixed media for students with some studio art background. Approaches may include historical, theoretical, literary, cultural, or political readings. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 202A and previous experience in studio art or permission of instructor.

Credits: 3-8

Grade Mode: S/U

FAIR 357Y - Theatre/Film Production

An opportunity to work with intensive instruction on production of student-written dramas or films. Repeatable twice. S/U grading.

Prerequisites & Notes: previous work in theatre/film production or instructor permission

Credits: 4

Grade Mode: S/U

FAIR 358V - Intermediate Acrylic Painting

Intermediate acrylic painting techniques and elements of form composition and color using still life, photographs and live models. S/U grading.

Prerequisites & Notes: FAIR 258W

Credits: 4

Grade Mode: S/U

FAIR 361E - Race In/To the Movies II: Race Relations on Film: 1950-1980

Explores race relations in America between 1950 and 1980, using film as one source of historical documentation. Films such as Raisin in the Sun, Twelve Angry Men and various 'Blaxploitation' movies will demonstrate how movies both reflect and reinforce contemporary perceptions on inter- and intra-race relations. Readings will place the films into a broader historical context. S/U grading.

Prerequisites & Notes: FAIR 261E or other film studies class.

Credits: 4

Grade Mode: S/U

FAIR 362F - We're Not for Sale: History of Asian Women in America

Explores the history and experiences of Asian

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

women in America from the mid-19th century to the present. S/U grading.

Prerequisites & Notes: FAIR 215F or AMST 205 or course in history of American women.

Credits: 4

Grade Mode: S/U

FAIR 363B - Suzie Wong to Miss Saigon: Asian Presence in Hollywood

Explores the different perspectives of, and attitudes toward, Asian Americans and Asians in America from 1915 to the present, using film as a main source of historical documentation. S/U grading.

Credits: 4

Grade Mode: S/U

FAIR 364C - El Movimiento Chicano

Examines the sociohistorical, political and cultural characteristics of the Chicana/o Movement from 1848 to present. Formation and symbolic evolution of the United Farmworkers' Movement, the Chicana/o cultural renaissance of the '60s and '70s, the Chicana/o student movement for educational liberation and the roots of the Chicana/feminist and lesbian movements from the '70s through the '90s. S/U grading.

Prerequisites & Notes: FAIR 203A or FAIR 218C or AMST 203 or HIST 463.

Credits: 4

Grade Mode: S/U

FAIR 365C - Contemporary Voices of Latin American Resistance

This course will look at the formative structure of Latin American leftist, political ideology by examining the writings of Theotonio Dos Santos, Paulo Freire, Che Guevara, Jose Marti and Antonio Gramsci. It will further focus on contemporary authors and the present course of Latin American politics by reflecting upon the political beliefs and perspectives of such authors as: Comandante Marcos, Elena Poniatowska, Eduardo Galeano, Hugo Chavez, Evo Morales, Luiz Ignacio Lula Da Silva and Michelle Bachelet. S/U grading.

Prerequisites & Notes: FAIR 203A or permission of instructor.

Credits: 4

Grade Mode: S/U

FAIR 366E - Comparative Cultural Studies

Interaction of immigrant and indigenous cultures with the developing American cultural patterns. Emphasis on modes and concepts of interaction,

especially related to African Americans, Native Americans, Asian Americans and Latinos. Also offered as AMST 301. S/U grading.

Prerequisites & Notes: Also offered as AMST 301

Credits: 4

Grade Mode: S/U

FAIR 367B - Issues in Political Economy

Upper division seminar in political economy. Course themes may include, but are not limited to: labor market stratification by race and gender; trade and globalization; human and political development; varieties of capitalism; and varieties of welfare states. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 203A or permission.

Credits: 3-6

Grade Mode: S/U

FAIR 369C - Vietnam War Redux

This course examines the war in Vietnam from 1962-1975 from the under/other side. It does not focus on whether or why the United States lost the war. Rather, it explores the tragic costs of the war from usually marginalized perspectives: Vietnamese fighters and civilians, American families, and women and minorities who served. S/U grading.

Prerequisites & Notes: FAIR 203A or instructor permission

Credits: 4

Grade Mode: S/U

FAIR 369D - American War Stories: The Great War to Iraq

This seminar presents an exploration of the major stories (literature, cinema, arts) and social movements produced by American wars since WWI. Rather than a traditional history of the wars aimed at discovering how and why someone lost and why others won, the seminar examines the impacts war has had on American and opponents' veterans, families, arts and ideals. We will learn how war affects people at the individual and family level, how movements of support and resistance develop and what have been the wars' major influences on popular culture. S/U grading.

Prerequisites & Notes: FAIR 203A or permission of instructor.

Credits: 4

Grade Mode: S/U

FAIR 370I - Introduction to Pro Tools

This course will introduce students to mixing and

editing audio with Avid's Pro Tools software. S/U grading.

Prerequisites & Notes: FAIR 270H or concurrent.

Credits: 2

Grade Mode: S/U

FAIR 370J - Studio Recording I

Studio Recording I takes the concepts introduced in FAIR 270H and FAIR 370I and allows the student to apply and practice them in a hands-on manner, with the goal of becoming familiar and competent in the use of all the gear in the Fairhaven Recording Studio. S/U grading.

Prerequisites & Notes: FAIR 370I or FAIR 370P.

Credits: 4

Grade Mode: S/U

FAIR 370K - Studio Recording II

This class will give students with advanced recording experience the opportunity to record and mix on an industry standard Pro Tools HD system. Students will enhance their knowledge of Pro Tools and learn how to use the software in conjunction with a large-format analog mixing console. Repeatable up to 6 credits. S/U grading.

Prerequisites & Notes: FAIR 370J or FAIR 370H.

Credits: 2

Grade Mode: S/U

FAIR 370T - World Issues Group Study

As engaged citizens, what do we know and understand about global issues and ourselves in a world faced with the complex issues of growing economic disparities, fragile democracies, environmental degradation, wars, human rights, globalization, and ethnic/religious conflicts? What is our awareness of and participation in local and global efforts for peace and justice? Students in the class join campus and community members in the weekly World Issues Forum with guest speakers. As a class, students research, discuss and reflect on the forum topic and find ways to respond through social justice/service learning in the community. Repeatable up to 12 credits. S/U grading.

Prerequisites & Notes: FAIR 203A; or a social science GUR course.

Credits: 4

Grade Mode: S/U

FAIR 371B - Topics in Middle East Studies

Seminar in Middle East studies. Course themes may include, but are not limited to, a survey of the history and political economy of the Modern Middle

East; the colonial past and present in the Middle East; Orientalism; US policy toward the Middle East; State-society Relations in the Middle East; and case studies of specific countries and conflicts. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 203A or permission.

Credits: 3-6

Grade Mode: S/U

GUR Attributes: ACGM

FAIR 371E - Nations and Nationalism

Survey course on the development of national identity since the late eighteenth century and the rise of the nation-state. Focus on the slippage between national and ethnic identities and the predicaments of stateless nations. Comparative case studies of various nationalisms in the United States, Europe, and the post-colonial world. S/U grading.

Prerequisites & Notes: FAIR 203A or permission.

Credits: 5

Grade Mode: S/U

FAIR 372F - Race and Society Within the Latino Caribbean

The purpose of the course is to examine the past and present context of how race and cultural fusion have been experienced among peoples and nation states within the Latino Caribbean. Particular emphasis will be placed on the various ways in which racial/cultural identities are complicated by questions of gender, religion, politics, class and sexuality both in the Caribbean as well as those Latino-a Caribbean populations now residing in the United States. S/U grading.

Prerequisites & Notes: One of ANTH 101, ANTH 104, ANTH 201, FAIR 201a, FAIR 203a, AMST 203 or HIST 273.

Credits: 4

Grade Mode: S/U

FAIR 374B - The Cultural Creation of Identity

How ethnic, racial and cultural identity is created by society. Includes a study of the social construction of identity from a scholarly perspective, but will also require the student to examine his or her own personal identity. S/U grading.

Prerequisites & Notes: FAIR 203A or instructor permission.

Credits: 5

Grade Mode: S/U

FAIR 381G - Topics in Literature

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

An exploration of writers, periods, genres, theories or comparative studies which engage the student in the careful reading and critical discussion of literature, and in writing clearly about the works and issues involved. Repeatable with different topics. S/U grading.

Credits: 3-5

Grade Mode: S/U

FAIR 384J - Writing Nature

Workshop on creative nonfiction writing focusing on natural history, nature, wildness, environment, conservation, science, medicine, landscape or place. S/U grading.

Prerequisites & Notes: FAIR 201A or instructor permission.

Credits: 5

Grade Mode: S/U

FAIR 386E - Topics in Humanities

An interdisciplinary exploration of specific topics in the humanities, including history, philosophy, religion, literature, and mythology. Repeatable to a maximum of 15 credits with different topics. S/U grading.

Prerequisites & Notes: FAIR 202A or equivalent

Credits: 4-5

Grade Mode: S/U

FAIR 387K - Grant Writing Workshop

Focuses on the basics of grant writing, including seeking funding sources, reading and interpreting funding guidelines, developing and refining proposals, and tricks of the trade. Development of, either individually or as a group, two small grant proposals. S/U grading.

Credits: 4

Grade Mode: S/U

FAIR 388M - Oral History

Study in methods for conducting, editing, and interpreting oral interviews. S/U grading.

Prerequisites & Notes: FAIR 223 or instructor permission

Credits: 4

Grade Mode: S/U

FAIR 393B - Rights, Liberties and Justice in America

Study of American ideas of rights and liberties; what they mean in practice; competing principles and ideologies at work in the arena of

constitutional rights; history of our justice system with regard to rights and liberties and directions it seems to be heading. S/U grading.

Prerequisites & Notes: upper-division courses in social science or history highly recommended

Credits: 4

Grade Mode: S/U

FAIR 399B - Contemporary American Indian Issues

Presents timely issues in Indian-White relations. Emphasis on case studies of issues of sovereignty, land claims, treaty rights, cultural appropriation, economic development, health, education, and environment. Also offered as AMST 315. Repeatable with various topics. S/U grading.

Prerequisites & Notes: AMST 202 or FAIR 263 or HIST 275; or instructor permission. Also offered as AMST 315

Credits: 4

Grade Mode: S/U

FAIR 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver. S/U grading.

Credits: 1-15

FAIR 401A - Core: Senior Project

Independent study required of students undertaking an Interdisciplinary Concentration. See the Fairhaven College Guidelines for Concentrations for more information. S/U grading.

Credits: 1-18

Grade Mode: S/U

FAIR 403A - Core: Advanced Seminar

Required of all Fairhaven College students. A forum in which students are required to reflect on, summarize and evaluate their major or concentration programs and to consider their education in relation to the world they are entering. Course must be taken in final quarter before graduation. S/U grading.

Prerequisites & Notes: Required by all Fairhaven students. Senior status.

Credits: 4

Grade Mode: S/U

FAIR 412D - Global Justice

Examination of the question of justice in a globally interconnected world, including the moral duties we as individuals, societies and governments have to those disadvantaged by world economy and global institutions. Also offered as INTL 412. S/U grading.

Prerequisites & Notes: FAIR 210A or INTL 201 or FAIR 203A.
Credits: 5
Grade Mode: S/U

FAIR 412E - Advanced Topics in Law

Investigation of an area of the law using a law school class format and text. Examples of topics include Federal Indian Law II, Property Law, Current Issues in the U.S. Supreme Court, and critical legal studies. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 311B or PLSC 311 or permission of instructor.
Credits: 2-5
Grade Mode: S/U

FAIR 413A - International Childhood

An examination of a wide range of children's experiences around the world, including a cultural analysis of middle-class American childhood, to unpack constricted, culture-bound conceptions of childhood and to illustrate the diverse forms of children's development and societal roles.

Prerequisites & Notes: INTL 201 or FAIR 203A
Credits: 4
Grade Mode: S/U

FAIR 413E - Curers, Clients and Culture: Cross Cultural Perspectives on Health and Illness

Examines health belief systems in cross-cultural perspective, including the roles of practitioner and patient; explanation, diagnosis and treatment of disease; the impact of modernization on non-Western medical systems, and ethnicity and health care in the U.S. S/U grading.

Prerequisites & Notes: cross-cultural study or instructor permission
Credits: 5
Grade Mode: S/U

FAIR 414B - Vietnam on Film

Exploration of the cinematic interpretations of the Southeast Asian war as a process of rationalizing and renegotiating American interests and history

to suit contemporary political and cultural purposes. S/U grading.

Prerequisites & Notes: FAIR 369C or HIST 104 or evidence of familiarity with the Vietnam War or instructor permission.
Credits: 4
Grade Mode: S/U

FAIR 414D - Special Topics in Social Justice Education

Specific issues in social justice education will be used as lenses for analyzing, evaluating and transforming interlocking systems of power, privilege, oppression and discriminatory institutional structures and cultural practices and social behavior. Also offered as EDUC 414.

Prerequisites & Notes: AMST 301 or FAIR 366E; FAIR 314E; and EDUC 411.
Credits: 4
Grade Mode: S/U

FAIR 419F - Cross-Cultural Shamanism

Cross-cultural comparison of the roles, recruitment, techniques and performances of shamans, those ceremonial practitioners who move in a state of ecstasy between various spiritual realms. The relationships between healing, magic, sorcery and alternative states of consciousness in cultural context. S/U grading.

Prerequisites & Notes: FAIR 203A and either ANTH 201 or a course in cross-cultural studies, or instructor permission.
Credits: 5
Grade Mode: S/U

FAIR 421H - Advanced Topics in Literature

In-depth consideration of a small number of works, with theoretical or comparative analysis and intensive work with critical discussion and writing. Repeatable with different topics. S/U grading.

Prerequisites & Notes: 300-level course work in literature
Credits: 3-5
Grade Mode: S/U

FAIR 422J - Art of the Essay

An advanced course in the art of writing essays. Repeatable to a maximum of 12 cr. S/U grading.

Prerequisites & Notes: FAIR 201A and FAIR 202A, and 300-level writing course.
Credits: 4
Grade Mode: S/U

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

FAIR 422K - Advanced Legal Writing and Analysis

Explores persuasive legal writing, researching and writing an appellate brief on a current legal issue. S/U grading.

Prerequisites & Notes: FAIR 311B or PLSC 311 or permission of instructor.

Credits: 4

Grade Mode: S/U

FAIR 423K - Space, Place and Imagination

An advanced exploration of the relationship between who we are and where we are, between self and place, imagination and landscape. S/U grading.

Prerequisites & Notes: 300-level Humanities course.

Credits: 5

Grade Mode: S/U

FAIR 432Q - Ecological Restoration

Introduces students to the science and practice of restoring ecological integrity and health to natural landscapes. The approach of the course will be philosophical as well as empirical. This course is repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 206A or equivalent, a course in biology or ecology, and upper level standing, or instructor's permission.

Credits: 5

Grade Mode: S/U

FAIR 433P - Advanced Topics in Evolutionary Biology

Explores advanced and specific topics in evolutionary theory, the history of evolutionary thought, and/or the application of biological evolution to the modern human experience. Repeatable with different topics to a maximum of 8 credits. S/U grading.

Prerequisites & Notes: Any course in evolution or permission of instructor.

Credits: 1-8

Grade Mode: S/U

FAIR 434P - Advanced Studies in Field Science

In-depth quantitative field study, including study design, data collection and analysis, and the writing of a scientific paper to report the findings. Repeatable with various topics. S/U grading.

Prerequisites & Notes: FAIR 206A, or equivalent,

or instructor permission.

Credits: 5-8

Grade Mode: S/U

FAIR 436B - Advanced Topics in Social Issues

An advanced examination of specific topics in the social sciences. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 203A; 300-level social science course or equivalent

Credits: 4-8

Grade Mode: S/U

FAIR 436N - Advanced Topics in Science

An advanced examination of specific topics in science. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 206A; 300-level science course or equivalent

Credits: 4-8

Grade Mode: S/U

FAIR 436V - Advanced Topics in Art

An advanced examination of specific topics in the arts. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 202A; 300-level art course

Credits: 4-8

Grade Mode: S/U

FAIR 440N - Ethnoecology: Conservation and Development

Exploration of the role of traditional ecological knowledge in maintaining and restoring healthy ecological relationships between communities and the environment. Taught every other year. S/U grading.

Prerequisites & Notes: FAIR 206A or equivalent or permission of instructor.

Credits: 3

Grade Mode: S/U

FAIR 441U - The Relational Self: Theories and Research

Study of new paradigms of the self, including revisions of familiar concepts of identity, self-knowledge and self-esteem. S/U grading.

Prerequisites & Notes: previous courses in psychology or instructor permission

Credits: 4

Grade Mode: S/U

FAIR 444U - Depression: Causes, Cultures and Treatments

An examination of biochemical, clinical and cultural explanations for depression and questions regarding why depression is becoming so widespread. Issues will include the increase of depression symptoms worldwide, gender differences in depression and specific treatments. S/U grading.

Prerequisites & Notes: previous psychology courses or instructor permission
Credits: 4
Grade Mode: S/U

FAIR 448T - Risk and Resilience in Adolescent Girls: Development, Culture and Identity

A consideration of latest literature on female adolescent development, including diversity. S/U grading.

Prerequisites & Notes: Previous courses in psychology or women studies.
Credits: 5
Grade Mode: S/U

FAIR 451X - Resistance Art of the Indigena

Examines contemporary visual and literary arts of indigenous peoples of Canada and the United States. Emphasis on artwork that reflects personal and cultural histories, government and state relations, and Western misrepresentation of Native peoples in the media and academia. S/U grading.

Prerequisites & Notes: FAIR 218C or AMST 202 or FAIR 399B or AMST 315; studio art courses or experience above the 200-level
Credits: 4
Grade Mode: S/U

FAIR 451Y - The 'Primitive' in Modern Art

This class will provide students with an alternative understanding of art and art history beginning in the Modern era late in the nineteenth century and continuing forward to the 21st century. The study of Primitivism will work to introduce students to early Western concepts of race, art and identity. The investigation of methods with which Indigenous artists and scholars challenge these notions will provide a new lens for understanding the history of colonization, the politics of representation, and various definitions of race and art. Also offered as AMST451

Prerequisites & Notes: FAIR 202A or AMST 301 or instructor permission.
Credits: 4
Grade Mode: S/U

FAIR 454Y - Scriptwriting Workshop II

Advanced practice in the art and craft of writing for dramatic media: theatre, film, television, radio. Emphasis on sharpening forms and styles, and on preparing scripts for production. Repeatable to a maximum of 12 cr. S/U grading.

Prerequisites & Notes: FAIR 354V; previous 200-level work in scriptwriting any medium, or instructor permission.
Credits: 4
Grade Mode: S/U

FAIR 455V - Advanced Printmaking

Advanced printmaking techniques illustrating various themes developed by students in consultation with instructor, with an emphasis on technique and aesthetics. S/U grading.

Prerequisites & Notes: FAIR 254X, FAIR 351W.
Credits: 4
Grade Mode: S/U

FAIR 457V - Advanced Topics in Studio Art

An advanced exploration of specific topics in studio art, including painting, printmaking, sculpture, and mixed media for students with some studio art background. Approaches may include historical, theoretical, literary, cultural, or political readings. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 202A and upper-division coursework in studio art or permission of instructor.
Credits: 3-8
Grade Mode: S/U

FAIR 464D - Advanced Topics in American Indian Studies

This seminar presents an interdisciplinary examination of a major topic in Indian/White relations such as gaming, treaty rights, sovereignty, or education. Repeatable with different topics. S/U grading.

Prerequisites & Notes: Permission of instructor.
Credits: 4
Grade Mode: S/U

FAIR 480 - Internship

By arrangement: fall, winter and spring. Fairhaven College independent study proposal approval required for registration. Practicum in an area related to one's course of study; addresses specific roles or responsibilities. S/U grading.

Prerequisites & Notes: approval of two or more

FAIRHAVEN COLLEGE OF INTERDISCIPLINARY STUDIES

Fairhaven faculty

Credits: 1-15

Grade Mode: S/U

FAIR 486E - Advanced Topics in the Humanities

An advanced examination of specific topics in the humanities. Repeatable with different topics. S/U grading.

Prerequisites & Notes: FAIR 202A or equivalent; 300-level humanities course

Credits: 4-8

Grade Mode: S/U

FAIR 490A - Good Teaching: Power of Art and Community

This course is offered in conjunction with the annual Northwest Teacher's Conference. See <http://www.nwteachersconference.org/> for details about registering for the Conference. The specific workshops vary from year to year, but through pre-reading activities, daily workshops and reflective writing, students will explore questions related to the challenge of sustaining good teaching practices amid increasing pressures to standardize curriculum, classrooms, and children's needs. We will envision learning environments where finding meaning matters and where the creative process is valued as a learning strategy. We will identify personal and community resources needed to broaden and/or transform teaching practices.

Credits: 2

Grade Mode: S/U

FAIR 499B - Special Problems in Interdisciplinary Studies

Investigation of problems and issues through advanced interdisciplinary study. Repeatable with various topics. S/U grading.

Prerequisites & Notes: upper-division status or instructor permission

Credits: 10-15

Grade Mode: S/U

Huxley College of the Environment

Introduction

Dr. Steven J. Hollenhorst, Dean

Huxley College of the Environment is one of seven colleges constituting Western Washington University, consistently recognized as one of the outstanding public institutions of higher education in the West.

As one of the oldest environmental colleges in the nation, Huxley College is a recognized leader in producing the next generation of environmental professionals and stewards. Huxley's integrative approach is designed to train students for creative, fulfilling careers in a changing world. Since its establishment in 1969, Huxley College has won national and international recognition for undergraduate and graduate programs that are continually refined to enhance practical, collaborative approaches to solving environmental problems.

Students enter Huxley College with a foundation in science and social science and pursue specialization in their chosen fields with plans of study designed to provide a broad base of knowledge and perspective. A unique component of our programs is the interdisciplinary requirement that Environmental Science students take courses in Environmental Studies, and vice versa. Students are also encouraged to design independent programs within the college and to participate in cooperative programs with other university departments. Huxley faculty and staff are readily available to collaborate with student initiatives in learning. In addition to classroom work, seniors participate in internships and may serve with faculty and staff on college committees. Students also complete a capstone class in which students find solutions to very real community problems that may end with a presentation to a city council, port governing board or even representatives from the Washington State Department of Ecology instead of a final exam.

Academic Programs Leading to Undergraduate and Graduate Degrees

Business and Sustainability*	BA
Economics/Environmental Studies*	BA
Environmental Education	BA, MED
Environmental Policy	BA
Environmental Science	BS, MS
Environmental Studies	BA, MA
Environmental Studies/Elementary	BAE
Geography	BA
Geography/Elementary	BAE

Faculty specialties include oceanography, zoology, engineering, geology, disaster resilience, psychology, coastal geography, population biology, urban planning, marine chemistry and many other fields. Huxley College courses embrace natural and physical sciences, human ecology and ethics, history and resource policy, writing and photography, and others. Our students publish the quarterly award-winning Planet magazine, and routinely receive instruction and mentoring in the use of a variety of new technologies included in the water quality, toxicology and planning labs, and Shannon Point Marine Center.

Most Huxley College classrooms, offices and laboratories are located in the Environmental Studies building and Arntzen Hall. Huxley College also houses the Institute of Environmental Toxicology for research on risk assessment and effects of toxic substances; the Institute for Watershed Studies for freshwater and limnological studies; the Resilience Institute for promoting sustainable development and fostering resilient communities; and the Huxley Spatial Institute for teaching and research in Geographic Information Science and remote sensing. Huxley College is also a collaborating partner with the College of Business and Economics and the College of Science and Engineering to support the Institute for Energy Studies, an innovative new program designed to meet the needs of a rapidly expanding green-energy economy and student interest in energy-related fields.

Mission

Huxley College of the Environment addresses today's environmental issues and prepares tomorrow's interdisciplinary problem solvers. We accomplish this mission by integrating outstanding educational programs, faculty-student collaboration, applied research, and professional and community service.

Vision

Huxley College of the Environment is a premier institution for the education of future environmental experts and leaders.

HUXLEY COLLEGE OF THE ENVIRONMENT

College Admission and Advisement

Admissions and Declaration of Major

- Completion of required preparatory course work
- A brief essay in response to a given question
- Academic performance (gpa)

Applications should be received by the Huxley College office (ES 539) by:

- April 25 for admission to summer or fall quarters
- October 6 for admission winter quarter
- January 15 for admission spring quarter

Department Chairs

Dr. John M. Rybczyk Environmental Sciences
Dr. Gigi Berardi Environmental Studies

Departments, Courses and Programs

Courses listed in this catalog constitute a record of the total academic program of the University. For an exact scheduling of courses at Western, students should consult the annual online Timetable of Classes, and Extended Education bulletins.

Environmental Sciences

Introduction

Chair: John M. Rybczyk

Environmental science draws on basic knowledge of the physical, chemical, biological and quantitative aspects of natural systems. The knowledge of how natural systems work is applied to solving problems largely created by human activities. Often these problems are represented by disturbances in the functioning of natural systems. Humans are altering their own life-support systems — the air, the water and the soil. Scales of disturbance range from the molecular and cellular to individuals, populations, ecosystems, and regional and global levels.

Graduates in environmental science enter a wide variety of career paths in local, state and federal governments, universities, and the private sector. Fields include environmental toxicology, environmental chemistry, terrestrial ecology, environmental impact assessment, watershed studies, air pollution control, solid and hazardous waste management, and marine pollution assessment. Many graduates choose to pursue advanced studies.

Faculty

The interdisciplinary nature of environmental science is reflected in the wide-ranging expertise of the environmental science faculty. Oceanographers, toxicologists, chemists, biologists, limnologists, terrestrial ecologists and others work together as an interdisciplinary team to offer a curriculum grounded in the sciences, but oriented to the understanding and solution of environmental problems. Active engagement in research allows the faculty to bring an analysis of new knowledge into the classroom.

Facilities and Equipment

Facilities are available for teaching laboratory courses and for student research projects. Students gain practical hands-on experience in data collection and analysis in both laboratory and field settings including terrestrial, aquatic, estuarine and marine environments. Specialized equipment is available for a wide variety of applications including toxicological and water quality monitoring (in a state-certified lab), atmospheric chemistry, dendrochronology, global positioning systems, wildlife telemetry, and forest and aquatic habitat characterization. Instrumentation includes an autoanalyzer for phosphorous, carbon and nitrogen, a gamma ray

detector for sediment dating and a remotely operated vehicle (ROV) equipped with a camera for underwater viewing of the marine environment. Extensive computer facilities include a Geographic Information Systems and Remote Sensing laboratory with state-of-the-art capabilities.

The Shannon Point Marine Center offers access to aquaria and a wide variety of laboratory and field sampling equipment for students interested in the marine environment.

The Canyon Lake Creek Community Forest provides access to 2,300 acres in the foothills of Mt. Baker.

In addition to these university owned facilities, our location provides unparalleled access to public lands that cover a range of environments including the alpine zone, dense old-growth forests, wetlands, lakes, streams, estuaries and the coast.

Faculty

JOHN M. RYBCZYK (2000) Chair and Professor. BS (wildlife biology), Michigan State University; MS (ecosystem biology), Eastern Michigan University; PhD (oceanography and coastal science), Louisiana State University.

JENISE M. BAUMAN (2014) Assistant Professor. BS (horticulture), Eastern Kentucky University; MS (plant pathology), West Virginia University; PhD (botany) Miami University.

CHARLES J. BARNHART (2014) Assistant Professor. BS (physics and astronomy), University of Washington-Seattle; PhD (planetary geophysics), University of California-Santa Cruz.

BRIAN L. BINGHAM (1995) Professor. BS (zoology), MS (zoology), Brigham Young University; PhD (biology), Florida State University.

LEO R. BODENSTEINER (1995) Professor. BA (biology), Moorhead State University; MA (zoology), PhD (zoology), Southern Illinois University-Carbondale.

ANDREW G. BUNN (2006) Professor. BS (zoology) The Evergreen State College; MEM (resource ecology) Duke University; PhD (environmental science), Montana State University-Bozeman.

REBECCA BUNN (2010) Associate Professor. BS, (civil engineering), Michigan Technology Institute; MS, (environmental engineering) University of Colorado; PhD (land resources and environmental science), Montana State University.

JAMES M. HELFIELD (2005) Associate Professor. BA (English), Duke University; MSc (physical geography), University of Toronto; PhD (forest ecology), University of Washington.

STEVEN J. HOLLENHORST (2012) Professor and Dean, Huxley College of the Environment. BS, MS (recreation and park management), University of Oregon; PhD (recreation and park management),

ENVIRONMENTAL SCIENCES

The Ohio State University.

PETER S. HOMANN (1996) Professor. BA (natural sciences) and BS (chemistry), Case Western Reserve University; MS (forest ecology), Yale School of Forestry and Environmental Studies; PhD (forest soils, nutrient cycling), University of Washington.

WAYNE G. LANDIS (1989) Professor and Director, Institute of Environmental Toxicology and Chemistry. BA (biology), Wake Forest University; MA (biology) and PhD (zoology), Indiana University.

BROOKE A. LOVE (2012) Assistant Professor, BS (engineering geology) Stanford University, PhD (chemical oceanography) University of Washington.

ROBIN A. MATTHEWS (1986) Professor and Director, Institute for Watershed Studies. BS (biology), University of California-Riverside; MS (environmental studies), Indiana University; PhD (botany/aquatic ecology), Virginia Polytechnic Institute and State University.

JOHN F. McLAUGHLIN (1996) Associate Professor. BA (biological sciences), BA (biochemistry), BA (integrated science program), Northwestern University; MS (biological sciences) and PhD (biological sciences, population biology), Stanford University.

DAVID H. SHULL (2003) Professor. BS (oceanography), University of Washington; MS (oceanography), University of Connecticut; PhD (environmental, coastal and ocean sciences), University of Massachusetts.

RUTH M. SOFIELD (2003) Professor. BA, West Virginia University; MS, McNeese State University; PhD (environmental science and engineering), Colorado School of Mines.

DAVID O. WALLIN (1995) Professor. BS (biology), Juniata College; MA (biology), The College of William and Mary; PhD (environmental science), University of Virginia.

Emeritus Faculty

JOHN T. (JACK) HARDY Professor Emeritus of Environmental Sciences. BA, University of California-Santa Barbara; MA, Oregon State University; PhD, University of Washington

J. RICHARD MAYER Professor Emeritus of Environmental Science. BS, Union College; MA, Columbia University; PhD, Yale University.

ROBERT L. MONAHAN Professor Emeritus of Geography and Environmental Social Sciences. BA, University of Washington; MA, University of Michigan; PhD, McGill University.

LYNN A. ROBBINS Professor Emeritus of Environmental Studies. BA, University of Utah; MA, PhD, University of Oregon.

BRADLEY F. SMITH (1994) Professor Emeritus of Huxley College of the Environment. BA, MA, Western Michigan University; PhD, University of Michigan.

WILLIAM C. SUMMERS Professor Emeritus of Environmental Science. BS, ME, PhD, University of Minnesota.

THOMAS A. TERICH Professor Emeritus of Geography. BA and MA, California State University, Los Angeles; PhD, Oregon State University.

HERBERT H. WEBBER Professor Emeritus of Geography and Environmental Social Sciences. BSc, PhD, University of British Columbia.

MING-HO YU Professor Emeritus of Huxley College. BS, National Taiwan University; MS, PhD, Utah State University.

Adjunct Faculty

JAMES D. ALLAWAY, PhD (natural resources, policy, and planning), Cornell University.

JUDE APPLE, Marine Scientist, Shannon Point Marine Center. PhD (marine and estuarine ecology), University of Maryland.

PAUL DINNEL Marine Scientist, Shannon Point Marine Center. PhD (fisheries), University of Washington.

STEFAN FREELAN, MS (geography), Western Washington University.

JERRY FREILICH, Research and Monitoring Coordinator, Olympic National Park, PhD (aquatic ecology), University of Georgia.

APRIL MARKIEWICZ, MS (environmental science), Western Washington University.

BRADY OLSON, Marine Scientist, Shannon Point Marine Center. PhD (biological oceanography), University of Washington.

CLIFF RICE, PhD, Research Scientist, Washington Department of Fish and Wildlife.

MICHAEL G. STONER, Environmental Manager, Port of Bellingham. MS (forest soils), University of Washington.

SUZANNE STROM, Marine Scientist, Shannon Point Marine Center. PhD (biological oceanography), University of Washington.

KATHRYN L. VAN ALSTYNE, Marine Scientist, Shannon Point Marine Center. PhD (marine ecology), University of Washington.

SETH VIDANA, WWU Sustainability Coordinator. MEd (environmental education), Western Washington University.

SAUL WEISBERG, Executive Director, North Cascades Institute. MS (biology), Western Washington University.

Affiliated Faculty

JOHN BOWER, Associate Professor, Fairhaven College

DON BURGESS, Assistant Professor, SMATE

CRAIG DUNN, Associate Professor, Management, CBE

DAN HAGEN, Professor, Economics, CBE

JILL HECKATHORN, Senior Instructor, PE

VICTOR NOLET, Professor, Woodring College of

Education

ARUNAS OSLAPAS, Professor, Engineering Technology
DEBRA J. SALAZAR, Professor, Department of Political Science
DAVID SATTLER, Professor, Department of Psychology

STEPHEN D. SULKIN, Professor and Director, Shannon Point
PHIL THOMPSON, Assistant Professor, Economics, CBE
JOHN TUXILL, Assistant Professor, Fairhaven College

Bachelor of Science

Environmental Science Extension Major, BS

Department of Environmental Sciences, Huxley College of the Environment

133-138 credits (preparatory courses and major)

Introduction

Students wishing to complete an Environmental Science major in four years should complete the general chemistry series during their freshman year and the general biology series during their sophomore year. Prospective environmental science majors are strongly advised to take additional preparatory courses that provide a strong background in chemistry, biology and mathematics. The preparatory courses are listed with the major, where approved as GUR courses in the catalog, may be used to fulfill both Huxley College and GUR requirements. All preparatory courses required for admission should be completed on a lettered or numeric grading scale, not P/NP, and must be completed with a grade of C- or better. This Environmental Science major is offered at off-site locations. Exact locations are listed in the Extended Education section of this catalog.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

If you are interested in the Environmental Science (Extension), BS major, you must first complete either: a Direct Transfer Agreement (DTA) Associate Degree or the equivalent to Western Washington University's General University Requirements. You can decide to become an Environmental Science major at any time. It is advantageous to plan for your major during your freshman or sophomore year, as prerequisite classes can be a part of earning your DTA. Contact the program manager (see below) to develop a plan for completing the prerequisite courses while earning your DTA. Your email can be added to the 'interested students' distribution list for Huxley College on the Peninsulas and you will begin to receive notifications, general announcements, and information about jobs, internships, or research opportunities.

Important information about admission to the ESCI major:

Admission is a competitive process and requires the coursework above and a satisfactory GPA in all coursework. You must then submit two applications: the Extension Undergraduate Program at <http://admissions.wwu.edu/print/EESPEExtensionUGApp.pdf> and a Huxley on the Peninsulas application that lists relevant experience and includes a 1-2 page essay describing your reasons for wanting to enter into the Environmental Science Extension major. Applications are obtained from the program manager and accepted in the spring for fall admittance.

If you have any questions, please contact Nancy Bluestein-Johnson, program manager, by phone (360-417-6521) or Nancy.Bluestein-Johnson@wwu.edu

ENVIRONMENTAL SCIENCES

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Preparatory Courses (48-53 credits)

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 206 - Introduction to Organismal Biology
- CHEM 121 - General Chemistry I
- CHEM 122 - General Chemistry II
- CHEM 123 - General Chemistry III
- ECON 206 - Introduction to Microeconomics
- MATH 124 - Calculus and Analytic Geometry I
- One course from:
 - ENVS 203 - Physical Geography
 - GEOL 211 - Physical Geology
- Any BCOM or CCOM GUR requirement course
- Any PLSC course

Major (85 credits)

- ESCI 325 - Fundamentals of Ecology
- ESCI 340 - Biostatistical Analysis
- ESCI 493 - Environmental Impact Assessment
- ENVS 304 - Environment and Resource Policy
- ENVS 305 - Environmental History and Ethics
- Choose either:
 - CHEM 251 - Elementary Organic Chemistry
 - or the following series:
 - CHEM 351 - Organic Chemistry
 - CHEM 352 - Organic Chemistry
 - CHEM 354 - Organic Chemistry Laboratory I
- One course from:
 - ESCI 321 - Oceanography
 - ESCI 435 - Landscape Ecology
 - ESCI 492 - Climate Change
 - ENVS 326 - Climatology
- One course from (minimum of 10 credits):
 - ESCI 498A - Senior Thesis
 - ESCI 498B - Internship
 - ESCI 498C - Senior Project
- Two lecture/lab courses or combination of courses from:
 - ESCI 321 - Oceanography AND
 - ESCI 322 - Oceanography Laboratory
 - ESCI 328 - Introduction to Ecosystem Management
 - ESCI 361 - Water Quality
 - ESCI 407 - Forest Ecology
 - ESCI 429 - Stream Ecology
- Electives under advisement (28-35 credits)
 - A minimum of 20 credits from:
 - ESCI 300- or 400-level
 - Additional electives, if needed from:
 - BIOL 300- or 400-level
 - CHEM 300- or 400-level
 - ENVS 300- or 400-level

ESCI 300– or 400-level
 GEOL 300- or 400-level
 MATH 125 - Calculus and Analytic Geometry II
 MATH 203 - Linear Algebra and Differential Equations I
 MATH 204 - Elementary Linear Algebra
 MATH 205 - Linear Algebra Workshop
 MATH 307 - Mathematical Computing
 MATH 309 - Introduction to Proof in Discrete Mathematics
 MATH 224 - Multivariable Calculus and Geometry I
 MATH 225 - Multivariable Calculus and Geometry II
 MATH 226 - Limits and Infinite Series
 MATH 300- or 400-level
 Maximum 3 courses allowed from:
 PHYS 114 - Principles of Physics I
 PHYS 115 - Principles of Physics II
 PHYS 116 - Principles of Physics III
 PHYS 161 - Physics with Calculus I
 PHYS 226 - Physics with Calculus IV
 PHYS 300- or 400-level

Environmental Science — Freshwater Ecology Emphasis, BS

 - ESCI 322 - Oceanography Laboratory

ESCI 361 - Water Quality
 ESCI 407 - Forest Ecology
 ESCI 408 - Field Methods in Wildlife Ecology
 ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout AND
 ESCI 411 - Habitat Assessment of Pacific Salmon and Trout
 ESCI 421 - Fisheries Management Lab AND
 ESCI 425 - Environmental Biology of Fishes
 ESCI 423 - Reconstructing Climate
 ESCI 426 - Marine Invertebrates and Their Environment
 ESCI 428 - Freshwater Algae Bioindicators
 ESCI 429 - Stream Ecology
 ESCI 430 - Limnology and Limnology Lab
 ESCI 440 - Wetlands Ecology
 ESCI 442 - Introduction to Remote Sensing
 ESCI 445 - Marine Geochemistry
 ESCI 455 - Environmental Toxicology I AND
 ESCI 457 - Environmental Toxicology Laboratory I
 ESCI 456 - Environmental Toxicology II AND
 ESCI 458 - Environmental Toxicology Laboratory II

□ Electives under advisement (28-37 credits)

A minimum of 20 credits from

ESCI 300- or 400-level

Additional electives, if needed from:

BIOL 300- or 400-level

CHEM 300- or 400-level

ENRG 270 - Energy Science I

ENRG 300- or 400-level

ENVS 300- or 400-level

ESCI 300- or 400-level

FAIR 330E - Ethnobotany

FAIR 434P - Advanced Studies in Field Science

GEOL 300- or 400-level

MATH 125 - Calculus and Analytic Geometry II

MATH 203 - Linear Algebra and Differential Equations I

MATH 204 - Elementary Linear Algebra

MATH 205 - Linear Algebra Workshop

MATH 224 - Multivariable Calculus and Geometry I

MATH 225 - Multivariable Calculus and Geometry II

MATH 226 - Limits and Infinite Series

MATH 300- or 400-level

Maximum 3 courses allowed from:

PHYS 114 - Principles of Physics I

PHYS 115 - Principles of Physics II

PHYS 116 - Principles of Physics III

PHYS 161 - Physics with Calculus I

PHYS 226 - Physics with Calculus IV

PHYS 300- or 400-level

Freshwater Ecology Emphasis (34 credits minimum)

Complete the following courses to fulfill the Freshwater Ecology Emphasis. Courses used to fulfill requirements in the emphasis may also be used to fulfill above major requirements.

□ A minimum of 25 credits from:

ESCI 302 - Environmental Pollution

ESCI 333 - Introduction to Environmental Toxicology

ESCI 361 - Water Quality

ESCI 407 - Forest Ecology

ESCI 408 - Field Methods in Wildlife Ecology

ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout

ESCI 411 - Habitat Assessment of Pacific Salmon and Trout

ESCI 421 - Fisheries Management Lab

ENVIRONMENTAL SCIENCES

ESCI 425 - Environmental Biology of Fishes
ESCI 428 - Freshwater Algae Bioindicators
ESCI 429 - Stream Ecology
ESCI 430 - Limnology and Limnology Lab
ESCI 431 - Watershed Biogeochemistry
ESCI 433 - Population Biology
ESCI 439 - Conservation of Biological Diversity
ESCI 440 - Wetlands Ecology
ESCI 442 - Introduction to Remote Sensing
ESCI 459 - Aquatic Toxicology
ESCI 460 - Contaminant Movement in the Environment
ESCI 463 - Wetlands for Wastewater Treatment
ESCI 490 - Environmental Risk Assessment
ESCI 492 - Climate Change

Additional electives, if needed, from:

Maximum 3 courses allowed from:

BIOL 403 - Physiological Ecology of Animals
BIOL 404 - Plant Ecology
BIOL 405 - Microbial Ecology
BIOL 416 - Ecosystem Ecology and Global Change
BIOL 452 - Systematic Botany
BIOL 456 - Algae
BIOL 462 - Entomology

Maximum 3 courses allowed from:

CHEM 300- or 400-level

Maximum 3 courses allowed from:

ENVS 320 - GIS I: Introduction to Geographic Information Science
ENVS 327 - The Soil Environment
ENVS 426 - Water Resources
ENVS 427 - Soil Landscapes

Maximum 3 additional courses allowed from:

ENVS 300- or 400-level

FAIR 434P - Advanced Studies in Field Science

Maximum 3 courses allowed from:

GEOL 413 - Fluvial Geomorphology
GEOL 415 - Sedimentology and Stratigraphy
GEOL 472 - Surface Water Hydrology
GEOL 473 - Hydrogeology
GEOL 474 - Ground Water Contamination

Maximum 3 courses allowed from:

PHYS 114 - Principles of Physics I
PHYS 115 - Principles of Physics II
PHYS 116 - Principles of Physics III
PHYS 161 - Physics with Calculus I
PHYS 226 - Physics with Calculus IV

Marine Ecology Emphasis (34 credits minimum)

Complete the following courses to fulfill the Marine Ecology Emphasis. Courses used to fulfill requirements in the emphasis may also be used to fulfill above major requirements.

- A minimum of 25 credits from:
 - ESCI 321 - Oceanography
 - ESCI 322 - Oceanography Laboratory
 - ESCI 333 - Introduction to Environmental Toxicology
 - ESCI 361 - Water Quality
 - ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout
 - ESCI 411 - Habitat Assessment of Pacific Salmon and Trout
 - ESCI 421 - Fisheries Management Lab
 - ESCI 425 - Environmental Biology of Fishes
 - ESCI 426 - Marine Invertebrates and Their Environment
 - ESCI 431 - Watershed Biogeochemistry
 - ESCI 432 - Topics in Marine Ecology
 - ESCI 433 - Population Biology
 - ESCI 439 - Conservation of Biological Diversity
 - ESCI 440 - Wetlands Ecology
 - ESCI 444 - Biogeochemistry of Marine Sediments
 - ESCI 445 - Marine Geochemistry
 - ESCI 455 - Environmental Toxicology I
 - ESCI 456 - Environmental Toxicology II
 - ESCI 457 - Environmental Toxicology Laboratory I
 - ESCI 458 - Environmental Toxicology Laboratory II
 - ESCI 459 - Aquatic Toxicology
 - ESCI 460 - Contaminant Movement in the Environment
 - ESCI 463 - Wetlands for Wastewater Treatment
 - ESCI 491 - Oceanography of Puget Sound
 - ESCI 492 - Climate Change
 - ESCI 494 - Marine Conservation
- Additional electives, if needed, from:
 - Maximum 3 courses allowed from:
 - BIOL 403 - Physiological Ecology of Animals
 - BIOL 405 - Microbial Ecology
 - BIOL 407 - Marine Ecology
 - BIOL 410 - Animal Behavior
 - BIOL 416 - Ecosystem Ecology and Global Change
 - BIOL 456 - Algae
 - BIOL 460 - Invertebrate Zoology
 - BIOL 464 - Biology of Marine Mammals
 - Maximum 3 courses allowed from:
 - CHEM 300- or 400-level
 - Maximum 3 courses allowed from:
 - ENVS 300- or 400-level
- GEOL 340 - Geological Oceanography
 - Maximum 3 courses allowed from:
 - MATH 125 - Calculus and Analytic Geometry II
 - MATH 204 - Elementary Linear Algebra
 - MATH 224 - Multivariable Calculus and Geometry I
 - MATH 331 - Ordinary Differential Equations

ENVIRONMENTAL SCIENCES

Maximum 3 courses allowed from:
PHYS 114 - Principles of Physics I
PHYS 115 - Principles of Physics II
PHYS 116 - Principles of Physics III
PHYS 161 - Physics with Calculus I
PHYS 226 - Physics with Calculus IV

Environmental Science — Terrestrial Ecology Emphasis, BS

Department of Environmental Sciences, Huxley College of the Environment

133-138 credits

Introduction

Students wishing to complete an Environmental Science major in four years should complete the general chemistry series during their freshman year and the general biology series during their sophomore year. Prospective environmental science majors are strongly advised to take additional preparatory courses that provide a strong background in chemistry, biology and mathematics. The preparatory courses are listed with the major, where approved as GUR courses in the catalog, may be used to fulfill both Huxley College and GUR requirements. All preparatory courses required for admission should be completed on a lettered or numeric grading scale, not P/NP, and must be completed with a grade of C- or better.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Preparatory Courses (48-53 credits)

- BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- BIOL 205 - Introduction to Cellular and Molecular Biology
- BIOL 206 - Introduction to Organismal Biology
- CHEM 121 - General Chemistry I
- CHEM 122 - General Chemistry II
- CHEM 123 - General Chemistry III
- ECON 206 - Introduction to Microeconomics
- MATH 124 - Calculus and Analytic Geometry I
- One course from:
 - ENVS 203 - Physical Geography
 - GEOL 211 - Physical Geology
- Any BCOM or CCOM GUR requirement course
- Any PLSC course

Major (85 credits)

- Choose either:

- CHEM 251 - Elementary Organic Chemistry
or the following series:
CHEM 351 - Organic Chemistry
CHEM 352 - Organic Chemistry
CHEM 354 - Organic Chemistry Laboratory I
- One course from:
 - ESCI 321 - Oceanography
 - ESCI 435 - Landscape Ecology
 - ESCI 492 - Climate Change
 - ENVS 326 - Climatology
 - ENVS 327 - The Soil Environment
 - One course from:
 - ESCI 325 - Fundamentals of Ecology
 - BIOL 325 - Ecology
 - One course from:
 - ESCI 340 - Biostatistical Analysis
 - BIOL 340 - Biometrics
 - One course from:
 - ESCI 454 - Science, Management and Outreach of Contaminated Sites
 - ESCI 470 - Ecological Restoration
 - ESCI 490 - Environmental Risk Assessment
 - ESCI 491 - Oceanography of Puget Sound
 - ESCI 493 - Environmental Impact Assessment
 - ESCI 494 - Marine Conservation
 - ENVS 410 - Agroecology and Sustainable Agriculture
 - ENVS 430 - Borderlands: Resource Management
 - ENVS 474 - Planning for Sustainable Communities
 - ENVS 493 - Environmental Impact Assessment
 - ENVS 496 - Environmental Stewardship

Or other ENVS or ESCI approved course with a capstone (CPST) attribute.
 - One course from: (minimum of 10 credits; maximum of 15 credits)
 - ESCI 498A - Senior Thesis
 - ESCI 498B - Internship
 - ESCI 498C - Senior Project
 - ESCI 498D - International Study
 - One course from two of the following categories:
 - Human Ecology, Geography:
 - ENVS 303 - Human Ecology and Sustainability
 - ENVS 341 - Population and Resources
 - ENVS 343 - Urbanization: Processes and Patterns
 - Environmental Policy:
 - ENVS 304 - Environment and Resource Policy
 - ENVS 320 - GIS I: Introduction to Geographic Information Science
 - Environmental History, Philosophy, Ethics:
 - ENVS 305 - Environmental History and Ethics
 - Two lecture/lab courses or combination of courses from:
 - ESCI 321 - Oceanography AND
 - ESCI 322 - Oceanography Laboratory
 - ESCI 361 - Water Quality
 - ESCI 407 - Forest Ecology
 - ESCI 408 - Field Methods in Wildlife Ecology
 - ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout AND
 - ESCI 411 - Habitat Assessment of Pacific Salmon and Trout
 - ESCI 421 - Fisheries Management Lab AND
 - ESCI 425 - Environmental Biology of Fishes
 - ESCI 423 - Reconstructing Climate
 - ESCI 426 - Marine Invertebrates and Their Environment
 - ESCI 428 - Freshwater Algae Bioindicators
 - ESCI 429 - Stream Ecology
 - ESCI 430 - Limnology and Limnology Lab
 - ESCI 440 - Wetlands Ecology

ENVIRONMENTAL SCIENCES

- ESCI 442 - Introduction to Remote Sensing
- ESCI 445 - Marine Geochemistry
- ESCI 455 - Environmental Toxicology I AND
- ESCI 457 - Environmental Toxicology Laboratory I
- ESCI 456 - Environmental Toxicology II AND
- ESCI 458 - Environmental Toxicology Laboratory II

Electives under advisement (28-37 credits)

A minimum of 20 credits from

ESCI 300- or 400-level

Additional electives, if needed from:

BIOL 300- or 400-level

CHEM 300- or 400-level

ENRG 270 - Energy Science I

ENRG 300- or 400-level

ENVS 300- or 400-level

ESCI 300- or 400-level

FAIR 330E - Ethnobotany

FAIR 434P - Advanced Studies in Field Science

GEOL 300- or 400-level

MATH 125 - Calculus and Analytic Geometry II

MATH 203 - Linear Algebra and Differential Equations I

MATH 204 - Elementary Linear Algebra

MATH 205 - Linear Algebra Workshop

MATH 224 - Multivariable Calculus and Geometry I

MATH 225 - Multivariable Calculus and Geometry II

MATH 226 - Limits and Infinite Series

MATH 300- or 400-level

Maximum 3 courses allowed from:

PHYS 114 - Principles of Physics I

PHYS 115 - Principles of Physics II

PHYS 116 - Principles of Physics III

PHYS 161 - Physics with Calculus I

PHYS 226 - Physics with Calculus IV

PHYS 300- or 400-level

Terrestrial Ecology Emphasis (34 credit minimum)

Complete the following courses to fulfill the Terrestrial Ecology Emphasis. Courses used to fulfill requirements in the emphasis may also be used to fulfill above major requirements.

A minimum of 24 credits from

ENVS 327 - The Soil Environment

ENVS 427 - Soil Landscapes

ESCI 330 - Natural History of the Pacific Northwest

ESCI 392 - Introduction to Global Change

ESCI 407 - Forest Ecology

ESCI 408 - Field Methods in Wildlife Ecology

ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout

ESCI 411 - Habitat Assessment of Pacific Salmon and Trout

ESCI 423 - Reconstructing Climate

ESCI 431 - Watershed Biogeochemistry

ESCI 433 - Population Biology

ESCI 435 - Landscape Ecology

ESCI 439 - Conservation of Biological Diversity

ESCI 442 - Introduction to Remote Sensing

ESCI 492 - Climate Change

Additional electives, if needed, from:

Maximum 4 courses allowed from:

BIOL 326 - Ecology Laboratory

BIOL 403 - Physiological Ecology of Animals

BIOL 404 - Plant Ecology

BIOL 410 - Animal Behavior

BIOL 416 - Ecosystem Ecology and Global Change
 BIOL 432 - Evolutionary Biology
 BIOL 450 - Plant Anatomy
 BIOL 451 - Developmental Biology of Plants
 BIOL 452 - Systematic Botany
 BIOL 460 - Invertebrate Zoology
 BIOL 462 - Entomology
 BIOL 465 - Vertebrate Zoology
 BIOL 467 - Comparative Vertebrate Physiology
 BIOL 468 - Comparative Vertebrate Physiology Laboratory
 BIOL 479 - Plant Physiology
 BIOL 482 - Developmental Biology of Animals

Maximum 3 courses allowed from:

CHEM 300- or 400-level

Maximum 4 courses allowed from:

ENVS 320 - GIS I: Introduction to Geographic Information Science
 ENVS 326 - Climatology
 ENVS 372 - Natural Hazards Planning
 ENVS 420 - GIS III: Analysis and Modeling
 ENVS 421 - GIS IV: Advanced GIS Applications
 ENVS 422 - Advanced Spatial Analysis
 ENVS 428 - Biogeography

Maximum 4 courses allowed from:

ESCI 321 - Oceanography
 ESCI 361 - Water Quality
 ESCI 421 - Fisheries Management Lab
 ESCI 429 - Stream Ecology
 ESCI 430 - Limnology and Limnology Lab
 ESCI 440 - Wetlands Ecology
 ESCI 455 - Environmental Toxicology I
 ESCI 456 - Environmental Toxicology II
 ESCI 457 - Environmental Toxicology Laboratory I
 ESCI 458 - Environmental Toxicology Laboratory II
 ESCI 459 - Aquatic Toxicology
 ESCI 462 - Air Pollution
 ESCI 490 - Environmental Risk Assessment

Maximum 3 courses allowed from:

ENVS 300- or 400-level

Maximum 3 courses allowed from:

FAIR 330E - Ethnobotany
 FAIR 434P - Advanced Studies in Field Science

Maximum 3 courses allowed from:

GEOL 310 - Geomorphology
 GEOL 318 - Structural Geology
 GEOL 413 - Fluvial Geomorphology
 GEOL 415 - Sedimentology and Stratigraphy
 GEOL 470 - Landslides and Slope Stability
 GEOL 472 - Surface Water Hydrology
 GEOL 473 - Hydrogeology
 GEOL 474 - Ground Water Contamination

Maximum 3 courses allowed from:

PHYS 114 - Principles of Physics I
 PHYS 115 - Principles of Physics II
 PHYS 116 - Principles of Physics III
 PHYS 161 - Physics with Calculus I
 PHYS 226 - Physics with Calculus IV

 - ESCI 435 - Landscape Ecology
 - ESCI 439 - Conservation of Biological Diversity
 - ESCI 444 - Biogeochemistry of Marine Sediments
 - ESCI 462 - Air Pollution
 - ESCI 492 - Climate Change
- Minimum of 4 courses, including 1 lab from:
 - ESCI 333 - Introduction to Environmental Toxicology
 - ESCI 453 - Science and Management of Contaminated Sites
 - ESCI 454 - Science, Management and Outreach of Contaminated Sites
 - ESCI 457 - Environmental Toxicology Laboratory I
 - ESCI 458 - Environmental Toxicology Laboratory II
 - ESCI 459 - Aquatic Toxicology
 - ESCI 460 - Contaminant Movement in the Environment
 - ESCI 490 - Environmental Risk Assessment
- Additional electives, if needed, from:
 - BIOL 321 - Genetics
 - BIOL 322 - Genetics Lab
 - BIOL 405 - Microbial Ecology
 - CHEM 333 - Analytical Chemistry
 - CHEM 351 - Organic Chemistry
 - CHEM 352 - Organic Chemistry

CHEM 353 - Organic Chemistry
 CHEM 354 - Organic Chemistry Laboratory I
 CHEM 375 - Elements of Biochemistry
 CHEM 471 - Biochemistry I
 ENVS 320 - GIS I: Introduction to Geographic Information Science
 ENVS 326 - Climatology
 ENVS 327 - The Soil Environment
 Maximum 6 additional courses allowed from:
 ENVS 300- or 400-level
 Maximum 3 courses from:
 PHYS 114 - Principles of Physics I
 PHYS 115 - Principles of Physics II
 PHYS 116 - Principles of Physics III
 PHYS 161 - Physics with Calculus I
 PHYS 226 - Physics with Calculus IV

Environmental Science, BS

Department of Environmental Sciences, Huxley College of the Environment

133-138 credits

Introduction

Environmental Science draws on basic knowledge of the physical, chemical, biological and quantitative aspects of natural systems. The knowledge of how natural systems work is applied to solving problems largely created by human activities. Often these problems are represented by disturbances in the functioning of natural systems. Humans are altering their own life-support systems – the air, the water and soil. The scale of disturbance ranges from the molecular and cellular to individuals, populations, ecosystems, and regional and global levels.

The Environmental Science major will acquire the scientific and problem solving skills needed to conserve and restore the natural environment. Students of Environmental Science will go directly into an environmental science career or on to graduate school to further their study.

Students wishing to complete an Environmental Science major in four years should complete the general chemistry series during their freshman year and the general biology series during their sophomore year. Prospective environmental science majors are strongly advised to take additional preparatory courses that provide a strong background in chemistry, biology and mathematics. The preparatory courses are listed with the major, where approved as GUR courses in the catalog, may be used to fulfill both Huxley College and GUR requirements. All preparatory courses required for admission should be completed on a lettered or numeric grading scale, not P/NP, and must be completed with a grade of C- or better.

Why Consider an Environmental Science Major?

Are you excited by how natural systems work? Do you want to solve the problems of the natural environment caused by human activities? Do you love to work outdoors? Do you love the sciences and scientific inquiry? Then Environmental Science is for you.

Student/Faculty Designed, BS (Huxley College of the Environment)

Department of Environmental Sciences, Huxley College of the Environment

Introduction

Students who wish to design their own majors within Huxley College should obtain complete guidelines from the Undergraduate Advisors located in ES 539, the Huxley College office. The major must be developed with faculty advisement and must be approved by two faculty members and the Huxley College Curriculum Committee at least four quarters before the student's anticipated graduation.

Kathryn.Patrick@wwu.edu

Sample Careers

Career choices are determined by the student's interests.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Students who wish to pursue a BS with a Student/Faculty Designed major must complete the preparatory courses and apply to the Environmental Science major first. The declaration of a Student/Faculty Designed major degree occurs after approval of the title and coursework by Huxley College's Curriculum Committee and the University's Academic Coordinating Commission.

It is strongly advised that students meet with the Huxley College admissions advisor as they begin their preparatory classes. Students can also declare as an Environmental Science pre-major during their first advising meeting.

Once the student has completed the preparatory courses for the Environmental Science major they can submit their plan for their self-designed major to the Huxley College Curriculum Coordinating Committee with a brief written explanation of their major and the signatures of two faculty advisors. This must be done at least four quarters before graduation.

The Academic Coordinating Commission, a standing committee of Western's Faculty Senate, must provide final approval of a Student/Faculty Designed major title.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Master of Science

Environmental Science, Environmental Toxicology & Chemistry, Thesis, MS

Department of Environmental Sciences, Huxley College of the Environment

Graduate Faculty

Abel, Troy D., PhD, environmental policy, conservation politics, civic environmentalism, policy analysis, globalization and environment.

Bach, Andrew J., PhD, physical geography, geomorphology, soils and weathering, geoarcheology.

Bauman, Jenise M., Assistant Professor. BS (horticulture), Eastern Kentucky University; MS (plant pathology), West Virginia University; PhD (botany) Miami University.

Barnhart, Charles J., Assistant Professor. BS (physics and astronomy), University of Washington; PhD (planetary geophysics), University of California-Santa Cruz.

Berardi, Gigi, PhD, resources management, agroecology, international community development, food security, all-hazards planning.

Bingham, Brian L., PhD, invertebrate biology, marine ecology, experimental design.

Bodensteiner, Leo R., PhD, fish ecology.

Buckley, Patrick H., PhD, economic and development geography, quantitative methods, GIS, environmental issues in Japan and China, quality of life, transborder environmental issues.

Bunn, Andrew G., PhD, climate change, paleoecology, energy, ecological models.

Bunn, Rebecca, PhD, belowground ecology, toxicology, restoration, energy, the application of statistics.

Darby, Kate J., PhD, social and environmental justice, environmental justice pedagogy in higher education, sustainable food systems and urban socio-ecological systems.

Helfield, James M., PhD, ecology of rivers and riparian forests, terrestrialaquatic ecosystem linkages, watershed management and restoration.

Hollenhorst, Steven, PhD, social dimensions of natural resources, wilderness and protected area policy management.

Homann, Peter S., PhD, biogeochemistry, soil sciences, forest ecology.

Kamel, Nabil, PhD

Landis, Wayne G., PhD, environmental toxicology, population biology, risk assessment.

Laniga, Tamara (Tammi), PhD, federal land use policy and planning, collaborative planning, community economic development, and the social components of bioenergy development.

Love, Brooke, PhD, geochemistry, ocean acidification, hydrothermal systems, chemistry of volatiles in the marine environment.

Matthews, Robin A., PhD, freshwater ecology, aquatic toxicology, statistical ecology.

McLaughlin, John F., PhD, terrestrial ecology, population biology, conservation biology.

Medler, Michael J., PhD, biogeography, GIS, remote sensing, forest fire and wilderness management.

Melious, Jean O., JD, environmental and land use law and policy, international environmental policy.

Myers, O. Eugene, PhD, environmental education, conservation psychology, human ecology, environmental history and ethics.

Rossiter, David A., PhD, Canada, cultural-historical geographies, political ecologies.

Rybczyk, John M., PhD, wetland ecology and management, ecosystem modeling, global climate change.

Shull, David H., PhD, structure and function of marine benthic communities, pollution and marine ecosystems.

Sofield, Ruth M., PhD, aquatic toxicology, biochemical and genetic toxicology, environmental chemistry.

Stangl, Paul A., PhD, pedestrian planning, new urbanism, urban landscapes, memory and meaning; Europe and Berlin.

Wallin, David O., PhD, terrestrial ecology, forest ecosystems.

Wang, Grace A., PhD, natural resource policy, cultural resources management, community-based forestry.

Zaferatos, Nicholas C., PhD, community and environmental planning, sustainable development, European environmental policy, Native American political development.

Program Advisor: Dr. Ruth Sofield, Environmental Studies 440

Program Description

The MS in environmental science is a two-year curriculum which draws upon course work from Huxley College and the other colleges of WWU. It is directed toward the development and integration of scientific information in order to describe, predict and/or manage natural systems, and to assess human impacts on those systems. This specialization focuses on the transport, fate and toxic effects of chemicals in the environment, laboratory testing and field work, chemical analytical measurement of pollutants and the influence of nutritional factors on pollutant toxicity. Studies of chemical fate and toxicity at the biochemical, organismal, population and ecosystem levels.

ENVIRONMENTAL SCIENCES

Goals

The program prepares students to describe, predict and/or manage natural systems and to assess human impacts on those systems.

Prerequisites

A bachelor's degree and college-level course work including a minimum of one year of general chemistry plus one quarter or semester of organic chemistry, one year of general biology, one course each in ecology, calculus and statistics.

Application Information

Admit Quarter: Students will be admitted into the MS in environmental science program fall quarter only.

Deadlines: Because maximum student enrollment is limited, all applicants are strongly encouraged to submit application materials by February 1. Review of materials will begin after that date and will continue until the enrollment limit is reached or on June 1, whichever comes first.

TA Deadline: To be considered for a graduate teaching assistantship, applicants should submit their application materials by February 1 and indicate in the statement of purpose how the prerequisites listed above have or will be met before starting the program.

Specific Test Requirements: For all options: Graduate Record Exam, General Test. Applicants with advanced degrees are not required to submit GRE scores.

Supporting Materials:

- An application for admission into the MS program in environmental science must include a one- to two-page statement of purpose indicating which specialization the applicant is most interested in, explaining why the applicant wishes to pursue graduate studies in environmental science, and what future expectations he or she has for the MS degree.
- The statement may indicate a preferred faculty advisor; students are encouraged to review faculty research interests as described on the Huxley website huxley.wvu.edu prior to contacting potential faculty advisors; students are admitted into the program only upon agreement of potential faculty advisors.

Program Requirements (45-69 credits)

Minimum of 45 credits are required, including:

- ESCI 501 (3);
- 30 credits of course work, including three courses from the area of specialization, or course substitutions, under advisement;
- 12 credits of ESCI 690 (thesis).

Ten credits or less of approved 400-level course work may be included in the program. No more than four elective credits of ESCI 595 (Teaching Practicum) may be used toward the MS degree in environmental science. Each candidate should note that the department has an annual review of student progress that affects retention, in addition to the other program requirements listed here. The student will make a public presentation of the thesis research either on campus at Western Washington University or Shannon Point and will participate in an oral exam given by the thesis committee.

For further information, write or consult the Huxley College Graduate Program Coordinator, Western Washington University, Bellingham, WA 98225-9079, 360-650-3646.

Specialization courses:

- ESCI 450
- ESCI 460 - Contaminant Movement in the Environment

- ❑ ESCI 500 (when toxicology/chemistry topic)
- ❑ ESCI 502 - Experimental Design
- ❑ ESCI 503 - Statistical Ecology
- ❑ ESCI 517 (when toxicology/chemistry topic)
- ❑ ESCI 533 - Advanced Population Biology
- ❑ ESCI 545 (when toxicology/chemistry topic)
- ❑ ESCI 555 - Advanced Environmental Toxicology I
- ❑ ESCI 556 - Advanced Environmental Toxicology II
- ❑ ESCI 557 - Advanced Environmental Toxicology Laboratory I
- ❑ ESCI 558 - Advanced Environmental Toxicology Laboratory II
- ❑ ESCI 559 - Aquatic Toxicology
- ❑ ESCI 562 - Advanced Air Pollution
- ❑ ESCI 590 - Advanced Environmental Risk Assessment
- ❑ ESCI 597 (when toxicology/chemistry topic)
- ❑ ESCI 599 - Graduate Environmental Studies Seminar (when toxicology/chemistry topic)

Program Advisor: Dr. Ruth Sofield, Environmental Studies 440

Program Description

The MS in environmental science is a two-year curriculum which draws upon course work from Huxley College and the other colleges of WWU. It is directed toward the development and integration of scientific information in order to describe, predict and/or manage natural systems, and to assess human impacts on those systems.

The Marine and Estuarine Science (MES) option is offered through Huxley College of the Environment, the Department of Biology, and Shannon Point Marine Center. Students graduating from the program will have an understanding of biota and topical management issues, and fundamental biological and chemical oceanographic processes. Curriculum Coordinator: Dr. Brian L. Bingham

Goals

The program prepares students to describe, predict and/or manage natural systems and to assess human impacts on those systems.

Prerequisites

A bachelor's degree and college-level course work including a minimum of one year of general chemistry plus one quarter or semester of organic chemistry, one year of general biology, one course each in ecology, calculus and statistics.

Application Information

Admit Quarter: Students will be admitted into the MS in environmental science program fall quarter only.

Deadlines: Because maximum student enrollment is limited, all applicants are strongly encouraged to submit application materials by February 1. Review of materials will begin after that date and will continue until the enrollment limit is reached or on June 1, whichever comes first.

TA Deadline: To be considered for a graduate teaching assistantship, applicants should submit their application materials by February 1 and indicate in the statement of purpose how the prerequisites listed above have or will be met before starting the program.

Specific Test Requirements: For all options: Graduate Record Exam, General Test. Applicants with advanced degrees are not required to submit GRE scores.

Supporting Materials:

- An application for admission into the MS program in environmental science must include a one- to two-page statement of purpose indicating which specialization the applicant is most interested in, explaining why the applicant wishes to pursue graduate studies in environmental science, and what future expectations he or she has for the MS degree.
- The statement may indicate a preferred faculty advisor; students are encouraged to review faculty research interests as described on the Huxley website huxley.wvu.edu prior to contacting potential faculty advisors; students are admitted into the program only upon agreement of potential faculty advisors.

Program Requirements (45 to 69 credits)

a minimum of 45 credits are required, including:

- ESCI 501 (3);
- 30 credits of course work, including three courses from the area of specialization, or course substitutions, under advisement;
- 12 credits of ESCI 690 (thesis).

Ten credits or less of approved 400-level course work may be included in the program. No more than four elective credits of ESCI 595 (Teaching Practicum) may be used toward the MS degree in environmental science. Each candidate should note that the department has an annual review of student progress that affects retention, in addition to the other program requirements listed here. Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- ESCI 101 - Environmental Studies: A Scientific Approach
- ESCI 302 - Environmental Pollution

- ❑ ESCI 325 - Fundamentals of Ecology
- ❑ One lab/lecture course or combination of courses from:
 - ESCI 321 - Oceanography and
 - ESCI 322 - Oceanography Laboratory
 - ESCI 361 - Water Quality
 - ESCI 407 - Forest Ecology
 - ESCI 408 - Field Methods in Wildlife Ecology
 - ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout and
 - ESCI 411 - Habitat Assessment of Pacific Salmon and Trout
 - ESCI 421 - Fisheries Management Lab and
 - ESCI 425 - Environmental Biology of Fishes
 - ESCI 423 - Reconstructing Climate
 - ESCI 426 - Marine Invertebrates and Their Environment
 - ESCI 429 - Stream Ecology
 - ESCI 430 - Limnology and Limnology Lab
 - ESCI 440 - Wetlands Ecology
 - ESCI 442 - Introduction to Remote Sensing
 - ESCI 445 - Marine Geochemistry
 - ESCI 455 - Environmental Toxicology I and
 - ESCI 457 - Environmental Toxicology Laboratory I
 - ESCI 456 - Environmental Toxicology II and
 - ESCI 458 - Environmental Toxicology Laboratory II
- ❑ One course from:
 - ESCI 321 - Oceanography
 - ESCI 435 - Landscape Ecology
 - ESCI 492 - Climate Change
 - ENVS 326 - Climatology
 - ENVS 327 - The Soil Environment
- ❑ Electives under advisement (6 credits)
 - BIOL 326 - Ecology Laboratory
 - BIOL 340 - Biometrics
 - ESCI 300- and 400-level
 Maximum 1 course allowed from:
 - ENVS 320 - GIS I: Introduction to Geographic Information Science
 - ENVS 326 - Climatology
 - ENVS 327 - The Soil Environment

Environmental Sciences Courses

ESCI 101 - Environmental Studies: A Scientific Approach

An introduction to environmental studies which stresses a scientific approach toward understanding the nature and scope of contemporary problems in man's environment. The course reflects application of physical, chemical, biological and geologic principles to define ecological change, both natural and man-made.

Credits: 3
Grade Mode: Letter
GUR Attributes: SCI

ESCI 204 - The Oceans: Topics in Marine Science

Introduction to marine life and environments from the polar regions to the tropics and from the near

surface to the ocean depths. Examines the role of the ocean in controlling climate and supporting a great diversity of life forms. Considers all the major marine ecosystems, their use by humans and the impacts of humans.

Prerequisites & Notes: 2 quarters college-level natural science courses; MATH 112
Credits: 4
Grade Mode: Letter
GUR Attributes: SCI

ESCI 205 - Distinguished Scholar Program Seminar: Ds

Seminar and field course work with various Environmental topics. Equivalent to ESTU 205 and repeatable with different topics up to 4 credits combined. S/U grading.

Prerequisites & Notes: Admission to Huxley College Distinguished Scholars Program
Credits: 1
Grade Mode: S/U

ENVIRONMENTAL SCIENCES

ESCI 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ESCI 302 - Environmental Pollution

Examination of human-induced environmental perturbations of air, land and water occurring on local, regional and global scales.

Prerequisites & Notes: CHEM 115 or CHEM 121; 1 quarter of biology; MATH 114

Credits: 4

Grade Mode: Letter

ESCI 310 - Environmental Systems

Interaction of biotic systems with earth's physical systems; principles of ecology and natural systems; ecosystem structure, function and management. Should not be taken by students who have completed or intend to enroll in ESCI 325 or BIOL 325.

Prerequisites & Notes: CHEM 121; 1 quarter Biology; MATH 114

Credits: 4

Grade Mode: Letter

ESCI 315 - Art, Science and Ethics of Flyfishing

The goals of this course are to learn how to fly fish and to use fly fishing as a window into environmental studies and, more specifically, into the structure and function of river ecosystems and how people interact with them. Class format includes lectures, discussions, and laboratory and field exercises to gain insight into stream ecology and to understand relations of science, ethics, and environmental management. Offered summer only.

Prerequisites & Notes: Knowledge of ecology or permission of instructor.

Credits: 3

Grade Mode: Letter

ESCI 316 - Advanced Flyfishing: river stewardship, reflection, and native trout

Students will be immersed in a wilderness setting for one intensive week of hands-on study, following classroom preparation. Classroom

preparation includes lectures, organism identification, flyfishing techniques, and fly tying as background for the field experience. Selections from flyfishing literature will be used to discuss the reflective nature and ethics of fly fishing and conservation with a focus on native trout. Students will learn to identify freshwater fishes of the Pacific Northwest and will be collecting and identifying aquatic insects at three long-term monitoring sites that will be surveyed by subsequent classes to assess environmental status. In conjunction with all of these activities, students will be instructed in journaling and will be expected to use these to record observations and reflections.

Prerequisites & Notes: ESCI 315 or permission of instructor.

Credits: 2

Grade Mode: Letter

ESCI 321 - Oceanography

Principles of oceanography, with emphasis on a description of the marine environment as an entity. Physics, chemistry and biology of the ocean.

Prerequisites & Notes: 2 quarters Biology; CHEM 121; MATH 115; Physics recommended

Credits: 4

Grade Mode: Letter

ESCI 322 - Oceanography Laboratory

A laboratory course supplementing lectures in oceanography, especially ESCI 321 and GEOL 340. Emphasis on the coastal ocean as ecological habitat, and physical oceanography - waves, tides and currents.

Prerequisites & Notes: pre/corequisite: ESCI 321

Credits: 2

Grade Mode: Letter

ESCI 325 - Fundamentals of Ecology

Investigation of the complex interactions of organisms with each other and with their physical surroundings, explored in the context of populations, communities, ecosystems and landscapes.

Prerequisites & Notes: BIOL 204, BIOL 205 and BIOL 206; CHEM 121, CHEM 122 and CHEM 123

Credits: 3

Grade Mode: Letter

ESCI 328 - Introduction to Ecosystem Management

Identification of non-market ecosystem values required of ecosystem management. Site specific

inventory and assessment of resource values, methods of collecting, storing, displaying and interpretation of resource data. The use of GIS as a resource management tool. Laboratory time will focus on identifying resource values of parks, natural preserves and other areas with high resource values. Course offered only at Huxley on the Peninsulas.

Prerequisites & Notes: ESCI 302 or ESCI 310 or one year of biology or instructor permission

Credits: 5

Grade Mode: Letter

ESCI 330 - Natural History of the Pacific Northwest

A field-oriented introduction to the geology, climate and ecosystems of the Pacific Northwest, with a focus on the biology and the ecology of important organisms.

Prerequisites & Notes: ESCI 310 or one year of biology or instructor permission

Credits: 4

Grade Mode: Letter

ESCI 333 - Introduction to Environmental Toxicology

Explore the foundations of how environmental pollutants affect biological health. Topics include source and exposure routes of pollutants, basics of quantitative toxicology, effects of exposures, risk perception, and environmental regulations as they relate to toxicology.

Prerequisites & Notes: One course general biology, one course general chemistry, or instructor permission.

Credits: 4

Grade Mode: Letter

ESCI 340 - Biostatistical Analysis

Study, at an introductory and intermediate level, of data analysis and statistical tests commonly used in the biological and environmental sciences. Descriptive statistics, hypothesis testing, analysis of variance, regression and correlation, experimental design. Calculator required.

Prerequisites & Notes: BIOL 204, BIOL 205 and BIOL 206; CHEM 121, CHEM 122 and CHEM 123.

Credits: 5

Grade Mode: Letter

ESCI 360 - Energy Efficient and Carbon Neutral Design

Introduction to energy use in buildings and the concept of energy efficiency as a resource.

Provides a quantitative but accessible approach to the analysis, design and evaluation of measures to improve energy efficiency and pursue net-zero and/or carbon neutral design. Topics covered include building heating and cooling loads, HVAC system efficiency, solar energy resources and sun angles, passive solar design and rooftop photovoltaic sizing, energy efficient and zero-carbon design for buildings, vehicles, appliances, hot water and HVAC. Also offered as ENRG 360.

Prerequisites & Notes: MATH 115; ENRG 101 or ENRG 380 or ESCI 380 or instructor permission.

Credits: 4

Grade Mode: Letter

ESCI 361 - Water Quality

Water quality principles, problems, and issues; standard methods of assessing water quality; practical approaches in solving water-related problems. Includes laboratory.

Prerequisites & Notes: CHEM 121, CHEM 122, CHEM 123 and BIOL 204, BIOL 205, BIOL 206; or CHEM 121, BIOL 101, and ESCI 302 or ESCI 310 or ESCI 392.

Credits: 5

Grade Mode: Letter

ESCI 366 - Life Cycle and Net Energy Analysis

Life cycle analysis (LCA) is a powerful tool for assessing the environmental impact associated with all the stages of a product's life from cradle-to-grave (i.e from raw material extraction through materials processing, manufacture, distribution, use, repair and maintenance, and disposal or recycling). This large picture view helps avoid a narrow outlook on environmental concerns and is an excellent method of comparing two potential products to see which has less impact on the environment. This course will focus on the energetic costs and carbon emissions associated with energy resources and technologies. Also offered as ENRG 366.

Prerequisites & Notes: CHEM 121 and MATH 124.

Credits: 4

Grade Mode: Letter

ESCI 380 - Energy and Environment

How do our choices in energy production impact the global and local environment? What does the future hold in terms of human use of energy? This class emphasizes the physical principles behind energy and the effects of energy on the environment. We will explore the interdependence of world economies and environment as well as look at individual opinions and choices on energy

ENVIRONMENTAL SCIENCES

related issues. This course is also offered as ENRG 380.

Prerequisites & Notes: CHEM 121, and MATH 114

Credits: 3

Grade Mode: Letter

ESCI 392 - Introduction to Global Change

By 2050, there will be ten billion people on the planet and we are changing the global environment at a pace unknown to history. We will unravel some of the linkages between biophysical systems, ecological responses, and human activities. We will cover changes to the climate, but also take a step back to appreciate the incredible suite of simultaneous global changes taking place in biotic diversity, hydrologic and chemical cycles, and human assimilation of Earth's energy.

Prerequisites & Notes: CHEM 121, BIOL 101, MATH 114

Credits: 3

Grade Mode: Letter

ESCI 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ESCI 402 - Topics in Environmental Studies

Presentations by WWU faculty, researchers from other institutions, and Huxley College graduate students on a wide variety of topics in environmental studies. A written critique of selected presentations required. Questions, discussions and interactions encouraged. Informal brown bag lunch format. Repeatable to a maximum of 3 cr. S/U grading.

Prerequisites & Notes: Huxley major

Credits: 1

Grade Mode: S/U

ESCI 407 - Forest Ecology

Ecology and analysis of forest ecosystems. Investigates the interactions of ecosystem components, specifically soil, plant and animal processes, with an emphasis on Pacific Northwest forests. Includes investigative field and lab studies of local ecosystems.

Prerequisites & Notes: ESCI 325 or BIOL 325; ESCI 340 or BIOL 340; or equivalent

Credits: 5

Grade Mode: Letter

ESCI 408 - Field Methods in Wildlife Ecology

Rationale and practice of methods to study vertebrates in the field. Emphasis on terrestrial environments. Students design and conduct field research projects.

Prerequisites & Notes: ESCI 325 or BIOL 325; ESCI 340; or equivalent

Credits: 5

Grade Mode: Letter

ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout

Examination of the habitat, ecology and management of Pacific salmon and trout, with emphasis on Pacific northwest ecosystems. Topics covered include basic principles of watershed and riparian ecology, habitat requirements and ecology of salmonid fishes, effects of forest management and other land use practices on stream habitat, and strategies for mitigating adverse impacts.

Prerequisites & Notes: ESCI 310 or ESCI 325 or BIOL 325, or instructor permission.

Credits: 3

Grade Mode: Letter

ESCI 411 - Habitat Assessment of Pacific Salmon and Trout

A project-oriented course based on laboratory and field investigations of riparian and in-stream habitats and their fish communities. Small groups will undertake investigations of local streams through the use of commonly accepted assessment practices.

Prerequisites & Notes: Co-req ESCI 410 or permission of instructor.

Credits: 2

Grade Mode: Letter

ESCI 421 - Fisheries Management Lab

Field and laboratory experience in typical fisheries management techniques. Especially directed toward marine and freshwater sampling, population identification and quantification, and estimation of management parameters.

Prerequisites & Notes: ESCI 325.

Credits: 2

Grade Mode: Letter

ESCI 423 - Reconstructing Climate

Introduction to the central concepts and techniques of reconstructing climate. This includes the reconstructions of past temperature, precipitation, streamflow, and sea surface temperatures using proxy data from ice cores, pollen records, tree rings etc. The class will be in lecture/lab format. The lab portion will include field trips to significant paleoecological sites in Washington. The primary lab activities involve building tree-ring chronologies using climate-sensitive trees.

Prerequisites & Notes: ESCI 325 or BIOL 325; ESCI 340 or BIOL 340 or instructor permission.

Credits: 5

Grade Mode: Letter

ESCI 425 - Environmental Biology of Fishes

An examination of the physiological, morphological and behavioral adaptations of fishes to the wide array of aquatic environments as demonstrated by various taxonomic and ecological groups.

Prerequisites & Notes: ESCI 325 or BIOL 325

Credits: 3

Grade Mode: Letter

ESCI 426 - Marine Invertebrates and Their Environment

Classroom and field study of marine invertebrates and adaptation to their environment. Emphasis on identification and study of the diverse Puget Sound marine fauna.

Prerequisites & Notes: BIOL 206 or equivalent.

Credits: 5

Grade Mode: Letter

ESCI 428 - Freshwater Algae Bioindicators

Introduction to the taxonomy and ecology of freshwater algae, with an emphasis on the role of freshwater algae as bioindicators of environmental pollution.

Prerequisites & Notes: ESCI 325 or BIOL 325 or permission of instructor.

Credits: 4

Grade Mode: Letter

ESCI 429 - Stream Ecology

Ecology and analysis of streams with emphasis on physical and chemical properties in relation to biotic communities. Processing of organic matter by stream invertebrates and fish communities. Perturbation by high organic loading or chemical pollutants and recovery processes. Reservoirs as hybrid systems. Field and laboratory exercises in sampling and analysis of stream ecosystems.

Prerequisites & Notes: ESCI 325 or BIOL 325; ESCI 361 or concurrent.

Credits: 5

Grade Mode: Letter

ESCI 430 - Limnology and Limnology Lab

Ecology and analysis of lakes and standing water bodies, with emphasis on the physical, chemical and biological factors that determine biological productivity. Human impacts on lakes.

Prerequisites & Notes: ESCI 325 or BIOL 325; and ESCI 361

Credits: 5

Grade Mode: Letter

ESCI 431 - Watershed Biogeochemistry

Transfer, cycling, and interaction of carbon, nutrients, and other elements within and between terrestrial and aquatic ecosystems. Physical, chemical and biological influences on transfers. Computer simulation modeling of processes in an ecosystem context.

Prerequisites & Notes: ESCI 325 or BIOL 325; ESCI 361 or ENVS 327

Credits: 3

Grade Mode: Letter

ESCI 432 - Topics in Marine Ecology

Primary literature is used to introduce students to important and current topics in marine ecology.

Prerequisites & Notes: ESCI 321

Credits: 4

Grade Mode: Letter

ESCI 433 - Population Biology

Introduction to theory and application of population biology, with emphasis on population ecology. Study of structure, distribution, and dynamics of populations. Applications to population conservation and management.

Prerequisites & Notes: ESCI 325 or BIOL 325; MATH 124; ESCI 340; MATH 125 recommended.

Credits: 3

Grade Mode: Letter

ESCI 435 - Landscape Ecology

The study of landscape patterns across temporal and spatial scales; emphasis on their organization, functional interactions and dynamics. Application of landscape principles to land management problems.

Prerequisites & Notes: ESCI 325 or BIOL 325;

ENVIRONMENTAL SCIENCES

ESCI 340 or BIOL 340; or equivalent

Credits: 4

Grade Mode: Letter

ESCI 439 - Conservation of Biological Diversity

Examination of causes and consequences of declines in biodiversity due to human activities. Review of conflicts arising from multiple-use management of natural resources. Survey and evaluation of conservation efforts directed at single species and at ecosystems. Optional field trips.

Prerequisites & Notes: ESCI 325 or BIOL 325

Credits: 4

Grade Mode: Letter

ESCI 440 - Wetlands Ecology

An ecosystem approach to investigating the hydrologic, chemical and biological interactions that are unique to wetland systems. Students will take several field trips to bogs, swamps, marshes and estuaries in the area to become familiar with diverse wetland habitats and to illustrate the principals covered in class.

Prerequisites & Notes: ESCI 340 and ESCI 325 or concurrent

Credits: 5

Grade Mode: Letter

ESCI 442 - Introduction to Remote Sensing

An introduction to remote sensing concepts and techniques for monitoring the earth's surface features. Special emphasis on mapping land use and land cover and on quantifying aspects of vegetation structure and composition. Labs are based on the use of data from airborne and spaceborne multispectral scanners and LIDAR.

Prerequisites & Notes: Completion of a 300-level course in either ESCI, ESTU, EGEO, ENVS, BIOL, GEOL, ANTH, or permission of instructor.

Credits: 5

Grade Mode: Letter

ESCI 443 - Ecological Images

Creation, documentation and presentation of high-quality digital images for communicating ecological concepts, using hand-held camera, light microscope, and scanning electron microscope.

Prerequisites & Notes: One of: ESCI 302, or ESCI 310, or ESCI 325, or ESCI 392 or BIOL 325.

Credits: 3

Grade Mode: Letter

ESCI 444 - Biogeochemistry of Marine Sediments

Introduces concepts in chemical oceanography and methodology of studying sediments and their chemistry.

Prerequisites & Notes: ESCI 321

Credits: 4

Grade Mode: Letter

ESCI 445 - Marine Geochemistry

This course will cover theory and application of the basics of marine geochemistry, including chemical fluxes, nutrient cycles, carbon dynamics, and stable isotopes. Topics are approached through directed reading, laboratory, field and classroom exercises.

Prerequisites & Notes: ESCI 321.

Credits: 4

Grade Mode: Letter

ESCI 452 - Introduction to Science and Management of Contaminated Sites

An orientation to the policy, economic, social, technological, and scientific aspects of managing contaminated sites in Washington State. Speakers will include stakeholder groups, decision makers, and those involved in the technical aspects of the clean-up. S/U grading

Prerequisites & Notes: ENVS 413 or ENVS 381, or concurrent; or similar course and instructor permission.

Credits: 1

Grade Mode: S/U

ESCI 453 - Science and Management of Contaminated Sites

Using site documents and the Model Toxics Control Act, decisions will be made on how to clean up a Washington State contaminated site. Included in this process will be discussions on the methods used to characterize the extent of chemical contamination and available remediation techniques. Economic, social, regulatory, and scientific considerations will be included. A proposal for cleanup in the form of a Cleanup Action Plan (CAP) and a proposal for work to be conducted in ESCI 454 will be produced by students.

Prerequisites & Notes: ESCI 333 or ESCI 361 or ESCI 455; or ESCI 460 or concurrent or instructor permission.

Credits: 3

Grade Mode: Letter

ESCI 454 - Science, Management and Outreach of Contaminated Sites

Students select an aspect of contaminated site cleanups in Washington State and develop a project under faculty direction that will address specific questions or needs. The projects will include technical components related to cleaning up contaminated sites with an additional emphasis on how to communicate the technical information to a general audience. The project will be completed as a group. Previous examples of student projects are available. Supplemental lectures will support the group projects.

Prerequisites & Notes: ESCI 453

Credits: 3

Grade Mode: Letter

ESCI 455 - Environmental Toxicology I

Physiological and biochemical effects of common pollutants found in our environment. Mechanism of action of individual pollutants, including cellular damage at molecular level.

Prerequisites & Notes: ESCI 302 or ESCI 333 or permission of instructor.

Credits: 4

Grade Mode: Letter

ESCI 456 - Environmental Toxicology II

Second course in environmental toxicology series. Covers toxicity testing, biomonitoring, data analysis and environmental risk assessment.

Prerequisites & Notes: ESCI 455 or instructor permission

Credits: 4

Grade Mode: Letter

ESCI 457 - Environmental Toxicology Laboratory I

Protocols and procedures for evaluating the toxicity of chemicals and environmental samples using a variety of organisms and end point responses. Emphasis on organisms at the biochemical level. Introduction to quality assurance/quality control principles.

Prerequisites & Notes: ESCI 455 or concurrent.

Credits: 4

Grade Mode: Letter

ESCI 458 - Environmental Toxicology Laboratory II

Protocols and procedures for evaluating toxicological effects of chemicals and other stressors on aquatic and terrestrial organisms,

measuring a variety of responses besides mortality. Emphasis on impacts at the organism-level and applying results to determine short and long-term effects at populations and community levels.

Prerequisites & Notes: ESCI 456 or concurrent or permission of instructor.

Credits: 4

Grade Mode: Letter

ESCI 459 - Aquatic Toxicology

Effects of toxic compounds on aquatic organisms. Acute and chronic responses of organisms to aquatic toxicants, and current literature on population, community and ecosystem aquatic toxicology.

Prerequisites & Notes: ESCI 455 or ESCI 456 or a minimum of 4 credits 400-level aquatic ecology courses

Credits: 3

Grade Mode: Letter

ESCI 460 - Contaminant Movement in the Environment

Physical, chemical, and biological processes that govern movement of contaminants in the environment and ultimate fate of these contaminants. Aspects of these processes that will be investigated include concentration, persistence, reactivity and partitioning among environmental media (air, water, soil, sediment and biota). These processes will be used as a basis of simple mathematical expressions used to determine contaminant behavior in the environment.

Prerequisites & Notes: Completion of Huxley Environmental Science prerequisites; ESCI 361 or ESCI 455; CHEM 251 or (CHEM 351 and CHEM 352).

Credits: 4

Grade Mode: Letter

ESCI 462 - Air Pollution

Types of air pollutants, their measurement and effects. Removal of air pollutants from gas streams. Air pollution meteorology and dispersion. Air pollution laws and standards. Air resources management.

Prerequisites & Notes: CHEM 121; ESCI 302.

Credits: 4

Grade Mode: Letter

ESCI 463 - Wetlands for Wastewater Treatment

This class will begin with brief introductions to

ENVIRONMENTAL SCIENCES

conventional wastewater treatment methods (primary, secondary and tertiary) and chemistry as it relates to wetlands and wastewater treatment. Through assigned readings, we will then examine the use of both natural and constructed wetlands for the treatment of municipal wastewater, acid mine drainage, stormwater runoff, and agricultural wastewater. Each student will also be responsible for carrying out a research project using the campus stormwater wetland as a study site.

Prerequisites & Notes: Huxley or MESP major, or instructor permission

Credits: 3

Grade Mode: Letter

ESCI 470 - Ecological Restoration

Investigates the theory and practice of ecological restoration, including methods for evaluating the success of restoration projects. Incorporates physical and ecological as well as economic and cultural considerations. Students work in groups on actual restoration projects.

Prerequisites & Notes: Senior status.

Credits: 5

Grade Mode: Letter

ESCI 480 - Applications in Energy Production

This class is designed to bring students into contact with the industries where energy is produced. In this field-based class we will visit conventional and alternative energy facilities and learn how energy is produced and delivered to consumers. We will pay particular attention to the basic physics, chemistry and biology of energy systems as well as their impacts on the environment. This course is also offered as ENRG 480.

Prerequisites & Notes: ESCI 380 or ESCI 329 or ENRG 380.

Credits: 4

Grade Mode: Letter

ESCI 490 - Environmental Risk Assessment

Principles and methods of quantitative environmental risk assessment, data analysis and risk communication.

Prerequisites & Notes: Senior status. One 300 or 400 level toxicology course strongly recommended.

Credits: 4

Grade Mode: Letter

ESCI 491 - Oceanography of Puget Sound

Focuses on estuarine circulation and its relation to

biological and chemical processes in Puget Sound. Students conduct a capstone research project integrating oceanography and public policy. As a capstone, course is for Seniors only.

Prerequisites & Notes: ESCI 321

Credits: 4

Grade Mode: Letter

ESCI 492 - Climate Change

Study the basics of climate change science at global and regional scales. We will evaluate the probable impact on natural ecosystems, resources (food, water and energy) and society.

Prerequisites & Notes: MATH 124 or MATH 134; ESCI 340 or BIOL 340 or instructor permission

Credits: 4

Grade Mode: Letter

ESCI 493 - Environmental Impact Assessment

Environmental Impact Assessment requires a range of professional qualifications and involves a wide spectrum of disciplines and methodologies. This interdisciplinary capstone course involves class preparation of an impact assessment of a local project, summarizing physical, biological and social aspects of a study area. Review of pertinent laws and EIS documents.

Prerequisites & Notes: Huxley major and senior status.

Credits: 5

Grade Mode: Letter

ESCI 494 - Marine Conservation

Principles of marine conservation including the properties of marine ecosystems, the scientific basis of our understanding of these systems, and strategies for resource protection through governance and community action. Students will engage with local conservation groups through guest speakers and preparation of their own case studies as a capstone project.

Prerequisites & Notes: Huxley major and senior status.

Credits: 4

Grade Mode: Letter

ESCI 495 - Teaching Practicum

Experience in teaching a lecture or laboratory course in environmental sciences. Repeatable to a maximum of 4 cr. S/U grading.

Prerequisites & Notes: relevant course work; instructor permission

Credits: 1-3
Grade Mode: S/U

ESCI 496 - Integration of Environmental Science and Policy

This course will investigate the integration of science and policy within EPA and other Federal agencies such as U.S. Forest Service, U.S. Geological Survey, NOAA and NASA. The course will be an introduction to the process of science, a review of Kuhn, Popper and Oreskes, and the interaction between observational and experimental data, theory and simulation. Policy formulation under several federal level programs will be introduced. Detailed examination of several case studies will be presented by the students. During the quarter local policy makers-shapers will also be invited to discuss their experiences in melding science and policy.

Prerequisites & Notes: Huxley College status or permission of instructor.

Credits: 3
Grade Mode: Letter

ESCI 498A - Senior Thesis

The Senior thesis makes an original contribution to knowledge by using primary research methods of an academic discipline. In cooperation with a faculty adviser, skills are developed in synthesizing prior knowledge, formulating a question or hypothesis, gathering new data or identifying existing information, analyzing results and drawing conclusions. The approach may be theoretical, historical, laboratory or field based. Two bound copies of the senior thesis, in an approved format, are submitted by the student, and one of them is kept in Wilson Library. Repeatable to a maximum of 15 credits.

Credits: 1-15
Grade Mode: Letter

ESCI 498B - Internship

The internship provides the student with a supervised work and learning experience in a paid employment or unpaid voluntary, environmentally relevant, professional setting. The sponsoring organization may be non-profit; academic; private-sector; or local, state or federal government. The experience is documented in an internship report conforming to an approved format. Two bound copies of the report are submitted by the student, and one of them is kept in Wilson Library. Repeatable to a maximum of 15 credits. S/U grading.

Prerequisites & Notes: Permission of instructor.

Credits: 1-15
Grade Mode: S/U

ESCI 498C - Senior Project

Applies knowledge and skills to a practical problem or situation in environmental research, education, or resource management. In cooperation with the faculty advisor, develops expertise in planning, development, implementation, management, and completion of an independent project. Approach may be laboratory, computer, field, or community based. The student presents a written report, digital presentation, seminar, performance, or physical product appropriate to the project, as approved by the faculty advisor. Repeatable to a maximum of 15 credits.

Credits: 1 TO 15
Grade Mode: L

ESCI 498D - International Study

International study exposes the student to environmental concerns, situations, and problems in cultural and geographical setting of a foreign country. The experience fosters broadening the student's awareness of human and natural impacts on the environment, and natural and cultural contexts of environmental issues. The experience must contain a significant independent research or problem-solving component. Credits from non-Huxley programs may be substituted to partially or fully meet the requirement, provided prior approval of the faculty adviser is documented in a '498 contract.' The student presents a written report, film, digital presentation, or seminar appropriate for the project, as approved by the faculty adviser. Repeatable to a maximum of 15 credits. S/U grading.

Prerequisites & Notes: Permission of instructor.
Credits: 1-15
Grade Mode: S/U

ESCI 499A - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Credits: 1
Grade Mode: S/U

ESCI 499B - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

ENVIRONMENTAL SCIENCES

Credits: 1
Grade Mode: S/U

ESCI 499C - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission.
Credits: 1
Grade Mode: S/U

ESCI 499D - Solar Power and its Impacts

A one-hour seminar dedicated to examining solar power's current and future impacts across the technological, political, economic, and environmental spectrum.

Credits: 1
Grade Mode: S/U

ESCI 499E - Seminar

Student/faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission.
Credits: 1
Grade Mode: S/U

ESCI 499F - Seminar

Student-faculty interaction. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

Student-faculty interaction. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

Credits: 2

Grade Mode: Letter

ESCI 499W - Seminar

Student-faculty interaction. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

Credits: 2

Grade Mode: Letter

ESCI 499X - Seminar

Student-faculty interaction. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

Credits: 2

Grade Mode: Letter

ESCI 499Y - Seminar

Student-faculty interaction. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

Credits: 2

Grade Mode: Letter

ESCI 499Z - Seminar

ENVIRONMENTAL SCIENCES

Student-faculty interaction. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

Credits: 2

Grade Mode: Letter

ESCI 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ESCI 501 - Research in Environmental Science

Philosophy and ethics of research; funding sources; proposal writing; research methodology; oral and written communication of research results; analytical and computer resources available at WWU.

Prerequisites & Notes: Graduate status in environmental science or permission of instructor.

Credits: 3

Grade Mode: Letter

ESCI 502 - Experimental Design

Elements of good experimental design, including modeling experiments and evaluating appropriate analysis techniques. Course draws heavily from current literature discussing appropriate use of statistics in experimental studies. Emphasis is on the application of univariate designs in ecological studies.

Prerequisites & Notes: minimum of one 300-level statistics course

Credits: 4

Grade Mode: Letter

ESCI 503 - Statistical Ecology

Covers graphical, descriptive and basic inferential statistics; nonparametric procedures; regression, correlation, and analysis of variance; and multivariate classification and ordination. Emphasis on using a variety of statistical tools to analyze ecological data sets.

Prerequisites & Notes: Minimum of one 300-level biostatistics course.

Credits: 4

Grade Mode: Letter

ESCI 507 - Advanced Forest Ecology

Ecology and analysis of forest ecosystems. Investigates the interactions of ecosystem components, specifically soil, plant and animal processes with an emphasis on Pacific Northwest forests. Includes investigative field and lab studies of local ecosystems.

Prerequisites & Notes: ESCI 325 or BIOL 325; ESCI 340 or BIOL 340; or equivalent

Credits: 5

Grade Mode: Letter

ESCI 510 - Advanced Salmon and Trout Ecology

Examination of watershed ecology and fisheries biology, with an emphasis on Pacific Northwest ecosystems. Topics covered include salmonid fish life histories, riparian ecology, effects of land use practices on stream habitat, and strategies for fisheries management, conservation and restoration. Small groups will undertake empirical, field-based research projects. Offered concurrently with ESCI 410.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 3

Grade Mode: Letter

ESCI 521 - Biological Oceanography

Course will provide a process-oriented view of marine pelagic ecosystems. Areas covered may include biogeography, energetics, food webs, biogeochemical cycles, fisheries oceanography. Laboratory and field work will emphasize current oceanographic techniques. Repeatable once.

Prerequisites & Notes: Graduate status; at least one year of biology, including ecology.

Credits: 5

Grade Mode: Letter

ESCI 522 - Estuarine Ecology

Structure and function of estuarine ecosystems with emphasis on the effect of physical and chemical factors on biological systems. Current management issues resulting from human impacts on estuaries.

Prerequisites & Notes: course in general ecology, oceanography or limnology

Credits: 5

Grade Mode: Letter

ESCI 523 - Past Environments of the Pacific Northwest

Introduction to the concepts of paleoecology and paleoclimatology with a focus on changes in the northwestern United States over the Holocene. Students will work with fossil pollen, charcoal, and tree-ring data. Lecture/lab format.

Prerequisites & Notes: MATH 124; ESCI 325 or BIOL 325; ESCI 340 or BIOL 340; or permission of instructor.

Credits: 5

Grade Mode: Letter

ESCI 529 - Advanced Stream Ecology

Ecology of rivers and streams from a watershed perspective, with emphasis on Pacific Northwest ecosystems. Topics covered include hydrology, geomorphology, organic matter and trophic dynamics, biogeochemical cycles, aquatic insects, fish, riparian ecology and hyporheic processes. Offered concurrently with ESCI 429. Graduate students must enroll in graduate laboratory section.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 5

Grade Mode: Letter

ESCI 530 - Advanced Limnology

Advanced study of the physical, chemical and biological properties of lakes.

Prerequisites & Notes: Minimum of 10 credits of general chemistry.

Credits: 5

Grade Mode: Letter

ESCI 533 - Advanced Population Biology

Study of the structure, distribution, and dynamics of populations. Emphasis is on both empirical and theoretical approaches to studying populations.

Prerequisites & Notes: ESCI 325 or BIOL 325; MATH 124; BIOL 321; MATH 125 recommended

Credits: 4

Grade Mode: Letter

ESCI 535 - Advanced Landscape Ecology

The advanced study of landscape patterns across temporal and spatial scales with emphasis on their organization, functional interactions and dynamics. Application of landscape principles to land management problems.

Prerequisites & Notes: ESCI 325, ESCI 340 or

equivalent

Credits: 4

Grade Mode: Letter

ESCI 536 - Environmental Impact Assessment Practicum

Preparation of an objective assessment description of a real natural area including the search for public documentation, evaluation of coverage and specific new analyses. Coordinating role in task group data assembly and editorial review of draft project summaries. Experience directly related to professional responsibilities in the environmental field. Review of assessment utilization in the EIS format and of significant legislation.

Prerequisites & Notes: Graduate status.

Credits: 4

Grade Mode: Letter

ESCI 539 - Advanced Conservation of Biological Diversity

Advanced study of causes and consequences of declines in biodiversity due to human activities. Review of conflicts arising from multiple-use management of natural resources. Survey and evaluation of conservation efforts directed at single species and at ecosystems. Discussion of primary conservation literature. Optional field trips.

Prerequisites & Notes: ESCI 325 or BIOL 325

Credits: 5

Grade Mode: Letter

ESCI 540 - Wetlands Ecology

Uses an ecosystem approach to investigate the hydrologic, chemical and biological interactions that are unique to wetland systems. Students will take several field trips to bogs, swamps, marshes and estuaries in the area to become familiar with diverse wetland habitats and to illustrate the principals covered in class.

Prerequisites & Notes: ESCI 502 or concurrent

Credits: 5

Grade Mode: Letter

ESCI 542 - Remote Sensing

Concepts and applications of remote sensing techniques for monitoring earth surface features. Special emphasis on mapping land use and land cover and on quantifying aspects of vegetation structure and composition. Labs are based on the use of data from airborne and spaceborne multispectral scanners and LIDAR.

Prerequisites & Notes: Graduate Status

ENVIRONMENTAL SCIENCES

Credits: 5

Grade Mode: Letter

ESCI 555 - Advanced Environmental Toxicology I

Physiological and biochemical effects of major pollutants found in the environment; influence of various nutrients on pollutant toxicity.

Prerequisites & Notes: ESCI 302, CHEM 375; or instructor permission

Credits: 4

Grade Mode: Letter

ESCI 556 - Advanced Environmental Toxicology II

Second course in environmental toxicology series. Covers toxicity testing, biomonitoring, data analysis and environmental risk assessment.

Prerequisites & Notes: ESCI 455 or ESCI 555 or instructor permission

Credits: 4

Grade Mode: Letter

ESCI 557 - Advanced Environmental Toxicology Laboratory I

Protocols and procedures for evaluating the toxicity of chemicals and environmental samples using a variety of organisms and end point responses. Emphasis on organisms at the biochemical level.

Prerequisites & Notes: pre/corequisite: ESCI 555 or instructor permission

Credits: 3

Grade Mode: Letter

ESCI 558 - Advanced Environmental Toxicology Laboratory II

Protocols and procedures for evaluating the toxicological effects of chemicals and other stressors on aquatic and terrestrial organisms measuring a variety of responses besides mortality. Emphasis on impacts at the organism level and applying results to determine short- and long-term effects at population and community levels.

Prerequisites & Notes: pre/corequisite: ESCI 556 or instructor permission

Credits: 3

Grade Mode: Letter

ESCI 559 - Aquatic Toxicology

Evaluation of the effects of toxic compounds on aquatic organisms. Acute and chronic responses to aquatic toxicants. Current trends in organismal,

community and ecosystem aquatic toxicology.

Prerequisites & Notes: ESCI 555 or ESCI 556 or minimum of 4 credits 400-level courses in aquatic ecology

Credits: 3

Grade Mode: Letter

ESCI 562 - Advanced Air Pollution

Types of air pollutants, their measurements and effects. Removal of air pollutants from gas streams. Air pollution meteorology and dispersion. Air pollution laws and standards. Air resources management.

Prerequisites & Notes: ESCI 302; general chemistry; 2 quarters of calculus

Credits: 4

Grade Mode: Letter

ESCI 590 - Advanced Environmental Risk Assessment

Principles and methods of quantitative environmental risk assessment, data analysis and risk communication.

Prerequisites & Notes: Graduate status.

Credits: 4

Grade Mode: Letter

ESCI 592 - Climate Change

Magnitude and extent of climatic change and its probable impact on natural ecosystems resources (food, water and energy) and society. Evaluates possible actions which could minimize the impacts.

Prerequisites & Notes: Graduate status.

Credits: 4

Grade Mode: Letter

ESCI 595 - Teaching Practicum

Experience in teaching a lecture or laboratory course in environmental studies. Repeatable. S/U grading.

Prerequisites & Notes: relevant course work

Credits: 1-3

Grade Mode: S/U

ESCI 599 - Graduate Environmental Studies Seminar

Selected topics across the spectrum of environmental studies (e.g., toxicology, watershed studies, applied ecology, geography, environmental education, etc.). Repeatable to a maximum of 6 cr. S/U grading.

Prerequisites & Notes: Graduate status.

Credits: 1-2

Grade Mode: S/U

ESCI 690 - Thesis Research

Thesis research in environmental science under faculty direction, an integral part of the MS in environmental science. Repeatable up to 36 credits. S/U grading.

Prerequisites & Notes: thesis advisory committee permission

Credits: 1-12

Grade Mode: S/U

Environmental Studies

Introduction

Students, faculty, and staff in the Department of Environmental Studies approach environmental understanding and problem solving through diverse programs that examine interacting social and natural systems. By putting the social sciences, natural sciences, humanities, and environmental professions into direct dialogue, the department's curriculum is designed to help students make the intellectual connections and gain the practical skills necessary for building socially and environmentally sustainable futures.

The department's undergraduate programs include major specializations in environmental education, environmental policy, geography, and urban planning and sustainable development, as well as an interdisciplinary major in environmental studies. The department also offers joint programs with the College of Business and Economics, Woodring College of Education, and the College of Humanities and Social Sciences. A range of minors, including Disaster Risk Reduction (DRR), Geographic Information Science (GIS), Energy Policy, and Sustainable Design, and Geographic Information Certificate are also available. These programs direct students to specific environmental career paths or provide an excellent background for advanced study in education, law, natural resource management, public administration, urban and environmental planning, and other fields. The department also offers advanced study through graduate degrees in Environmental Education and Environmental Studies.

Faculty

The faculty's work in this department is diverse, yet tied together by a shared commitment to ongoing interdisciplinary exchange. Faculty are trained in anthropology, education, engineering, geography, history, law, natural resources management, political science, psychology, urban and regional planning, and related fields. Active research programs keep faculty at the forefront of these fields as they intersect with environmental studies. Department academic programs also draw upon the expertise of colleagues in other units of the University, such as the departments of economics and political science.

Department Resources

Department facilities support applied student learning in the 38-computer spatial analysis lab with a complete suite of state-of-the-art GIS, cartography, and remote sensing software, GPS

receivers, and extensive local data sets. Facilities also include the planning studio and environmental education lab. Experiential learning is emphasized in many of our programs, taking students into the field, from the local to the international, where they apply their skills and knowledge to current problems. Student work has received recognition from state, national, and international organizations for exceptional problem-solving solutions, which use geographic information science and computer-aided design.

Major Declaration

You can declare yourself as an Environmental Studies (ENVS) major at any time, and there are several advantages to declaring during your freshman or sophomore year. Once you are declared as a phase I major you are assigned a Huxley faculty advisor based on your interests at the time of declaration. You can then meet with your faculty advisor to discuss which courses to take and when, how to prepare for graduate school or a future career, or simply to get assistance navigating through the Huxley curriculum. Your email is added to an email distribution list for Huxley majors so you will begin to receive notifications and general announcements, as well as information about jobs, internships, or research opportunities.

Some important information about the ENVS major:

1. Most students begin the ENVS major in Phase I, while completing the preparatory classes for ENVS Phase II admission (BIOL 101 or 204, PLSC 250, ECON 206, Math 114 or equivalent, CHEM 121, as well as ENVS 201, 202, and 203). Those pursuing joint programs offered by Environmental Studies with other Western academic units may also begin as Phase I majors, although the preparatory and major requirements differ from those of the other ENVS majors as outlined in this catalog. You can declare an ENVS Phase I major at any time by going to the central Huxley College office in Environmental Studies Building 539 and filling out a major declaration card.
2. Admission to Phase II is a competitive process and requires the coursework above and a grade of B- or better in ENVS 201, ENVS 202, and ENVS 203, as well as a satisfactory GPA in all other coursework. You must then submit an application that includes a 1- to 2-page essay describing your reasons for wanting to enter into one of the five ENVS majors (Environmental Education, Environmental Studies, Geography, Urban Planning, or Policy) as

well as a plan of study created with the Huxley admissions advisor and signed by a faculty advisor. Entry into the Environmental Studies major requires the signature of a second departmental faculty member on the plan of study. ENVS Phase II applications are accepted at central Huxley College office in the fall, winter, and spring quarters.

- Changes to your major, plan of study, or requests for a change of advisor during Phase II require completing a new declaration card.

If you have any questions, please contact an undergraduate advisor at the central Huxley College office in Environmental Studies Building 539, or by phone (360-650-2817), or (360-650-3748).

Faculty

GIGI BERARDI (1995) Chair and Professor. Policy, Planning, Education and Geography, BA (biology), University of California at San Diego; MS (natural resources conservation), PhD (natural resources, policy and planning), Cornell University.

TROY D. ABEL (2006) Associate Professor. BS, Indiana University (public health); MPA, George Mason University (public policy analysis); PhD, public policy and science and technology policy).

ANDREW J. BACH (1995) Associate Professor. BS, MA (geography), University of California-Davis; PhD (geography), Arizona State University.

PATRICK H. BUCKLEY (1987) Professor. BS (civil engineering and geology), University of Notre Dame; MA (economic geography and South Asian studies), University of Washington; PhD (economic geography), Boston University.

KATE J. DARBY (2010) Assistant Professor. BS, Pennsylvania State University (chemical engineering); MS, University of Oregon (certificate: Not-for-Profit Management); PhD, Arizona State University (environment, technology and society).

AQUILA FLOWER, PhD, environmental change from a geographic perspective using a suite of methodological approaches drawn from the fields of dendrochronology, ecology, statistics, and geospatial analysis.

STEVEN J. HOLLENHORST (2012) Professor and Dean, Huxley College of the Environment. BS and MS (recreation and park management), University of Oregon; Phd (recreation and park management), The Ohio State University.

NABIL KAMEL (2004) Associate Professor. BS (Architecture and Urban Planning), MA (Urban Planning), Texas A&M University; PhD (Public Policy and Social Research), University of California, Los Angeles.

TAMARA J. LANINGA (2005) Assistant Professor. BS, Western Washington University (environmental policy and

assessment); MA, University of Colorado (water resource policy); Graduate interdisciplinary certificate, University of Colorado (certificate in environmental policy); PhD, University of Colorado, Denver (design and urban planning).

MICHAEL J. MEDLER (2002) Associate Professor. BS (philosophy), MS (environmental studies), University of Oregon; PhD (geography), University of Arizona.

JEAN O. MELIOUS (1996) Professor. BA (government and environmental studies), St. Lawrence University; PhM (urban design and regional planning), University of Edinburgh; JD, Harvard Law School.

O. EUGENE MYERS (1995) Professor. BS (human ecology), Western Washington University; MA, PhD (psychology and human development), University of Chicago.

MARK NEFF (2009) Assistant Professor. BA (German Literature and Language), MS (Environmental Studies), University of Oregon; PhD (Life Sciences and Consortium for Science, Policy and Outcomes), Arizona State University.

REBEKAH PACI-GREEN, PhD, human ecology, the Disaster Risk Reduction minor, and advises The Planet publication.

DAVID A. ROSSITER (2005) Associate Professor. BA (Honors), University of British Columbia; MA (geography); PhD, (geography) York University.

PAUL STANGL (2007) Associate Professor. BS (liberal arts) Kansas State University; MCRP (city and regional planning), Rutgers University; PhD (geography), University of Texas-Austin

NICK STANGER (2014) Assistant Professor. BS Honors (Comparison of Temperate Old-Growth Forest Epiphyte Communities), MA (Youth and Environmental Art), Royal Roads University; PhD (Replacing Ourselves in Nature), University of Victoria.

WENDY WALKER (1991) Visiting Senior Instructor. BA and K-12 Teaching Certificate (geology), Western Washington University; MS (religion), Florida State University.

GRACE WANG (2002) Associate Professor. BS (political economy of natural resources), University of California-Berkeley; MS, PhD (forestry), University of Minnesota.

NICHOLAS C. ZAFERATOS (1999) Professor. BA (economic and regional geography), State University of New York; MS (urban and regional planning), Western Washington University; PhD (urban planning), University of Washington.

Emeritus Faculty

JOHN T. (JACK) HARDY Professor Emeritus of Environmental Sciences. BA, University of California-Santa Barbara; MA, Oregon State University; PhD, University of Washington

J. RICHARD MAYER Professor Emeritus of Environmental Science. BS, Union College; MA, Columbia University; PhD, Yale University.

ENVIRONMENTAL STUDIES

JOHN C. MILES Professor Emeritus of Huxley College of the Environment. BA, MA, University of Oregon; PhD, The Union Institute.

ROBERT L. MONAHAN Professor Emeritus of Geography and Environmental Social Sciences. BA, University of Washington; MA, University of Michigan; PhD, McGill University.

DEBNATH MOOKHERJEE Professor Emeritus of Geography. BSc, MSc, University of Calcutta; PhD, University of Washington.

LYNN A. ROBBINS Professor Emeritus of Environmental Studies. BA, University of Utah; MA, PhD, University of Oregon.

BRADLEY F. SMITH Professor Emeritus of Huxley College of the Environment. BA, MA, Western Michigan University; PhD, University of Michigan.

THOMAS A. TERICH Professor Emeritus of Geography. BA and MA, California State University, Los Angeles; PhD, Oregon State University.

HERBERT H. WEBBER Professor Emeritus of Geography and Environmental Social Sciences. BSc, PhD, University of British Columbia.

MING-HO YU Professor Emeritus of Huxley College. BS, National Taiwan University; MS, PhD, Utah State University.

Adjunct Faculty

JAMES D. ALLAWAY, PhD (natural resources, policy, and planning), Cornell University.

PAUL DINNEL Marine Scientist, Shannon Point Marine Center. PhD (fisheries), University of Washington.

STEFAN FREELAN, MS (geography), Western Washington University.

JERRY FREILICH, Research and Monitoring Coordinator, Olympic National Park, PhD (aquatic ecology), University of Georgia.

APRIL MARKIEWICZ, MS (environmental toxicology), Western Washington University.

BRADY OLSON, Marine Scientist, Shannon Point Marine Center. PhD (biological oceanography), University of Washington.

JENNIFER SELTZ, PhD (history), University of Washington.

MICHAEL G. STONER, Environmental Manager, Port of Bellingham. MS (forest soils), University of

Washington.

SUZANNE STROM, Marine Scientist, Shannon Point Marine Center. PhD (biological oceanography), University of Washington.

LAURIE D. TRAUTMAN, Associate Director, Border Policy Research Institute. PhD (geography), University of Oregon.

KATHRYN L. VAN ALSTYNE, Marine Scientist, Shannon Point Marine Center. PhD (marine ecology), University of Washington.

SETH VIDANA, WWU Sustainability Manager, MEd (environmental education), Western Washington University.

SAUL WEISBERG, Executive Director, North Cascades Institute. MS (biology) Western Washington University.

Department of Environmental Studies, Huxley College of the Environment

125-134 credits: Phase I, Phase II, and Major

Introduction

The major consists of four distinct parts. First, students acquire an understanding of the content of environmental studies. Second, students examine the process of education for an environmental perspective. Third, students investigate ways of applying environmental education content and techniques in the professional roles they may pursue. Fourth, students participate in internships, a field practicum, or research.

Why Consider an Environmental Education Major?

Are you excited about teaching people about the environment? Do you want to help people learn to make environmental choices in their lives? Do you love to work outdoors with children or adults? Then Environmental Education is for you.

Graduates of this major have assumed positions as teachers in private schools, as interpreters with resource management agencies, as staff in programs for special populations such as at-risk youth and persons with disabilities, among others, and with wilderness education non-profits.

How to Declare (Admission and Declaration Process):

You can declare yourself as an Environmental Studies (ENVS) major at any time, and there are several advantages to declaring during your freshman or sophomore year. Once you are declared as a phase I major you are assigned a Huxley faculty advisor based on your interests at the time of declaration. You can then meet with your faculty advisor to discuss which courses to take and when, how to prepare for graduate school or a future career, or simply to get assistance navigating through the Huxley curriculum. Your email is added to an email distribution list for Huxley majors so you will begin to receive notifications and general announcements, as well as information about jobs, internships, or research opportunities

Some important information about the ENVS major:

1. Most students begin the ENVS major in Phase I, while completing the preparatory classes for ENVS Phase II admission (BIOL 101 or 204, PLSC 250, ECON 206, Math 114 or equivalent, CHEM 121, as well as ENVS 201, 202, and 203). You can declare an ENVS Phase I major at any time by going to the central Huxley College office in Environmental Studies Building 539 and filling out a major declaration card.
2. Admission to Phase II is a competitive process and requires the coursework above and a grade of B- or better in ENVS 201, ENVS 202, and ENVS 203, as well as a satisfactory GPA in all other coursework. You must then submit an application that includes a 1-2 page essay describing your reasons for wanting to enter into one of the five ENVS majors (Environmental Education, Environmental Studies, Geography, Urban Planning, or Policy) as well as a plan of study created with the Huxley admissions advisor and signed by a faculty advisor. Entry into the Environmental Studies major requires the signature of a second departmental faculty member on the plan of study. ENVS Phase II applications are accepted at central Huxley College office in the fall, winter, and spring quarters.

ENVIRONMENTAL STUDIES

3. Changes to your major, plan of study, or requests for a change of advisor during Phase II require completing a new declaration card.

If you have any questions, please contact an undergraduate advisor at the central Huxley College office in Environmental Studies Building 539, or by phone (360-650-2817), or (360-650-3748).

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

PHASE I

Required Courses (33 credits):

- One course from:
 - BIOL 101 - Introduction to Biology
 - BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- CHEM 121 - General Chemistry I
- ECON 206 - Introduction to Microeconomics
- MATH 114 - Precalculus I or equivalent or higher
- PLSC 250 - The American Political System
- ENVS 201 - Understanding Environmental Data and Information
- ENVS 202 - Introduction to Environmental Studies and Sustainability
- ENVS 203 - Physical Geography

PHASE II

ENVS CORE

Required Courses (17-20 credits):

- One course from:
 - ENVS 303 - Human Ecology and Sustainability
 - ENVS 304 - Environment and Resource Policy
- ENVS 305 - Environmental History and Ethics
- One course from:
 - ENVS 343 - Urbanization: Processes and Patterns
 - ENVS 361 - Introduction to Planning
- One course from:
 - ESCI 302 - Environmental Pollution
 - ESCI 310 - Environmental Systems
 - ESCI 325 - Fundamentals of Ecology
 - ESCI 392 - Introduction to Global Change
- One course from:
 - ESCI 321 - Oceanography
 - ESCI 333 - Introduction to Environmental Toxicology
 - ESCI 361 - Water Quality
 - ESCI 463 - Wetlands for Wastewater Treatment

Environmental Education Major

Required Courses (75-81 credits):

- ENVS 381 - Introduction to Education for Environment and Sustainability
- ENVS 483 - Environmental Interpretation
- ENVS 484 - The Literature of Nature and Place

- ENVS 485 - Natural History for Environmental Education *
- ENVS 486 - Field Methods in Environmental Education *
- ENVS 488 - Outdoor Education *
- ENVS 489 - Leadership for a Sustainable Future *
- ENVS 492 - Curriculum for Environment and Sustainability

Part of Spring Block

- ESCI 330 - Natural History of the Pacific Northwest

- One course from:

ENVS 412 - Environmental Journalism

ENVS 491 - Environmental Communication

Students are required to take one ENVS approved course with a capstone "CPST" attribute during their senior year. A capstone class is a field or project based class that can be taken by students from both departments (ENVS/ESCI). This class is meant to be a culminating experience for the students bringing all the varied disciplines together as applied work on a real world issue. One example of a capstone is ENVS/ESCI 493 Environmental Impact Assessment where students work in groups to conduct an assessment.

- ENVS Capstone - One course from:

ENVS 410 - Agroecology and Sustainable Agriculture

ENVS 430 - Borderlands: Resource Management

ENVS 466 - Greening Business Applications

ENVS 474 - Planning for Sustainable Communities

ENVS 493 - Environmental Impact Assessment

ENVS 496 - Environmental Stewardship

ESCI 470 - Ecological Restoration

ESCI 490 - Environmental Risk Assessment

ESCI 491 - Oceanography of Puget Sound

ESCI 493 - Environmental Impact Assessment

Or other ENVS or ESCI approved course with a capstone (CPST) attribute

- One course from (minimum 10 credits):

ENVS 498A - Senior Thesis

ENVS 498B - Internship

ENVS 498C - Senior Project

ENVS 498D - International Study

- 20-24 credits - Specialized Electives 300- or 400-level

Environmental Policy (Extension), BA

Department of Environmental Studies, Huxley College of the Environment

116-125 credits (Phase I, Phase II and Major)

Introduction

The interdisciplinary program in Environmental Policy (Extension) is offered at off-site locations and prepares students to enter professional fields concerned with the sustainability of the human and natural environment. The program provides students with the knowledge and skills necessary to promote positive change by solving problems and implementing shared visions in both natural settings and urban communities. The Environmental Policy Emphasis concentrates in public policy development, sustainability, law and decision making. Exact off site locations are listed in the Extended Education section of this catalog.

ENVIRONMENTAL STUDIES

How to Declare (Admission and Declaration Process):

If you are interested in the Environmental Policy (Extension), BA major, you must first complete either; a Direct Transfer Agreement (DTA) Associate Degree or the equivalent to Western Washington University's General University Requirements. You can decide to become an Environmental Policy major at any time. It is advantageous to plan for your major during your freshman or sophomore year, as prerequisite classes can be a part of earning your DTA. Contact the program manager (see below) to develop a plan for completing the prerequisite courses while earning your DTA. Your email can be added to the "interested students: distribution list for Huxley on the Peninsulas and you will begin to receive notifications, general announcements, and information about jobs, internships, or research opportunities.

Important information about admission to the ENVS major:

1. Phase I: Most students complete the Environmental Policy major Phase I, while completing their DTA associates degree. The Phase I prerequisites must be complete before admission into Huxley on the Peninsulas. Phase I prerequisites include BIOL 101 or 204, PLSC 250, ECON 206, Math 114 or equivalent or higher, CHEM 121, as well as Math 240 (or equivalent), ENVS 203, plus a DTA.
2. Phase II: Admission to Phase II is a competitive process and requires the coursework above and a satisfactory GPA in all coursework. You must then submit two applications: the Extension Undergraduate Program at <http://admissions.wvu.edu/print/EESPExtensionUGApp.pdf> and a Huxley on the Peninsulas application that lists relevant experience and includes a 1-2 page essay describing your reasons for wanting to enter into the Environmental Policy major. Applications are obtained from the program manager and accepted in the spring for fall admittance.
3. Changes to your major during Phase II require completing a new declaration card.

If you have any questions, please contact Nancy Bluestein-Johnson, program manager, by phone (360-417-6521) or Nancy.Bluestein-Johnson@wvu.edu

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

PHASE I (Required Courses): 34-37 credits

- One course from:
 - BIOL 101 - Introduction to Biology
 - BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- CHEM 121 - General Chemistry I
- ECON 206 - Introduction to Microeconomics
- ENVS 203 - Physical Geography
- MATH 114 - Precalculus I
- PLSC 250 - The American Political System
- Any BCOM or CCOM GUR requirement course
- One course from:
 - ENVS 201 - Understanding Environmental Data and Information
 - DSCI 205 - Business Statistics
 - MATH 240 - Introduction to Statistics
 - SOC 304 - Statistics for Sociology

PHASE II (ENVS Core - Required Courses): 20-21 credits:

- ESCI 325 - Fundamentals of Ecology
- ENVS 202 - Introduction to Environmental Studies and Sustainability
- ENVS 304 - Environment and Resource Policy
- ENVS 305 - Environmental History and Ethics

- ❑ ENVS 361 - Introduction to Planning
- ❑ One course from:
 - ESCI 321 - Oceanography
 - ESCI 330 - Natural History of the Pacific Northwest
 - ESCI 361 - Water Quality

Environmental Policy Extension Major Required Courses: 62-67 credits

- ❑ ECON 383 - Environmental Economics
- ❑ ENVS 450 - Science in the Policy Process
- ❑ ENVS 456 - Environmental Governance
- ❑ ENVS 457 - Environmental Dispute Resolution
- ❑ One course from:
 - ENVS 350 - Energy Policy and Politics
 - ENVS 451 - Natural Resource Policy
 - ENVS 452 - International Environmental Policy
- ❑ One course from:
 - ENVS 455 - Environmental Law
 - ENVS 461 - Land Use Law
- ❑ ESCI - One or more 300-level or above natural science courses (4-5 credits)
 - ESCI 302 - Environmental Pollution
 - ESCI 310 - Environmental Systems
 - ESCI 315 - Art, Science and Ethics of Flyfishing
 - ESCI 321 - Oceanography
 - ESCI 328 - Introduction to Ecosystem Management
 - ESCI 330 - Natural History of the Pacific Northwest
 - ESCI 333 - Introduction to Environmental Toxicology
 - ESCI 361 - Water Quality
 - ESCI 380 - Energy and Environment
 - ESCI 392 - Introduction to Global Change
 - ESCI 407 - Forest Ecology
 - ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout
 - ESCI 429 - Stream Ecology
 - ESCI 432 - Topics in Marine Ecology
 - ESCI 462 - Air Pollution
 - ESCI 463 - Wetlands for Wastewater Treatment
 - ESCI 470 - Ecological Restoration
 - ESCI 480 - Applications in Energy Production
- ❑ One course from (minimum of 10 credits):
 - ENVS 498A - Senior Thesis
 - ENVS 498B - Internship
 - ENVS 498C - Senior Project
 - ENVS 498D - International Study
- ❑ Capstone (one course from):
 - ENVS 493 - Environmental Impact Assessment
 - ESCI 493 - Environmental Impact Assessment
- ❑ 19-22 Specialization electives 300 or 400 level, under advisement.

Environmental Policy, BA

Environmental Studies, Huxley College of the Environment

109-118 credits: Phase I, Phase II, and Major

Introduction

This interdisciplinary program prepares students to enter professional fields concerned with the sustainability of the human and natural environment. The Environmental Policy program consists of a core, and specialization electives. The core incorporates the interdisciplinary foundation of Huxley College's approach to

ENVIRONMENTAL STUDIES

the study of the environment. Environmental policy concentrates studies in public policy development, law, and methods and processes of planning and decision making. The specialization elective component of the program is flexible. It allows students to develop an area of special interest, concentrating on a minor in an academic discipline, or to select from a number of thematically oriented clusters of courses.

Why Consider an Environmental Policy Major?

Do you want to use your knowledge and skills to promote positive change in the environment? Do you love solving problems and implementing shared visions in both natural settings and urban communities? Are you interested in the laws and policies that govern environmental change? Then Environmental Policy is the major for you.

How to Declare (Admission and Declaration Process):

You can declare yourself as an Environmental Studies (ENVS) major at any time, and there are several advantages to declaring during your freshman or sophomore year. Once you are declared as a phase I major you are assigned a Huxley faculty advisor based on your interests at the time of declaration. You can then meet with your faculty advisor to discuss which courses to take and when, how to prepare for graduate school or a future career, or simply to get assistance navigating through the Huxley curriculum. Your email is added to an email distribution list for Huxley majors so you will begin to receive notifications and general announcements, as well as information about jobs, internships, or research opportunities.

Some important information about the ENVS major:

1. Most students begin the ENVS major in Phase I, while completing the preparatory classes for ENVS Phase II admission (BIOL 101 or 204, PLSC 250, ECON 206, Math 114 or equivalent, CHEM 121, as well as ENVS 201, 202, and 203). You can declare an ENVS Phase I major at any time by going to the central Huxley College office in Environmental Studies Building 539 and filling out a major declaration card.
2. Admission to Phase II is a competitive process and requires the coursework above and a grade of B- or better in ENVS 201, ENVS 202, and ENVS 203, as well as a satisfactory GPA in all other coursework. You must then submit an application that includes a 1-2 page essay describing your reasons for wanting to enter into one of the five ENVS majors (Environmental Education, Environmental Studies, Geography, Urban Planning, or Policy) as well as a plan of study created with the Huxley admissions advisor and signed by a faculty advisor. Entry into the Environmental Studies major requires the signature of a second departmental faculty member on the plan of study. ENVS Phase II applications are accepted at central Huxley College office in the fall, winter, and spring quarters.
3. Changes to your major, plan of study, or requests for a change of advisor during Phase II require completing a new declaration card.

If you have any questions, please contact an undergraduate advisor at the central Huxley College office in Environmental Studies Building 539, or by phone (360-650-2817), or (360-650-3748).

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

PHASE I

Required Courses (33 credits):

- One course from:
 - BIOL 101 - Introduction to Biology
 - BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- CHEM 121 - General Chemistry I
- ECON 206 - Introduction to Microeconomics
- ENVS 201 - Understanding Environmental Data and Information
- ENVS 202 - Introduction to Environmental Studies and Sustainability
- ENVS 203 - Physical Geography
- MATH 114 - Precalculus I or equivalent or higher
- PLSC 250 - The American Political System

PHASE II

ENVS CORE

Required Courses (17-20 credits):

- One course from:
 - ENVS 303 - Human Ecology and Sustainability
 - ENVS 304 - Environment and Resource Policy
- ENVS 305 - Environmental History and Ethics
- One course from:
 - ENVS 343 - Urbanization: Processes and Patterns
 - ENVS 361 - Introduction to Planning
- One course from:
 - ESCI 302 - Environmental Pollution
 - ESCI 310 - Environmental Systems
 - ESCI 325 - Fundamentals of Ecology
 - ESCI 392 - Introduction to Global Change
- One course from:
 - ESCI 321 - Oceanography
 - ESCI 330 - Natural History of the Pacific Northwest
 - ESCI 333 - Introduction to Environmental Toxicology
 - ESCI 361 - Water Quality
 - ESCI 463 - Wetlands for Wastewater Treatment

Environmental Policy Major

Required Courses (59-65 credits):

- ECON 383 - Environmental Economics
- ENVS 450 - Science in the Policy Process
- ENVS 456 - Environmental Governance
- ENVS 457 - Environmental Dispute Resolution
- One or more 300 level or above natural science courses:
 - ESCI 302 - Environmental Pollution
 - ESCI 310 - Environmental Systems
 - ESCI 315 - Art, Science and Ethics of Flyfishing

ENVIRONMENTAL STUDIES

- ESCI 328 - Introduction to Ecosystem Management
- ESCI 330 - Natural History of the Pacific Northwest
- ESCI 333 - Introduction to Environmental Toxicology
- ESCI 361 - Water Quality
- ESCI 380 - Energy and Environment
- ESCI 392 - Introduction to Global Change
- ESCI 410 - Habitat and Ecology of Pacific Salmon and Trout
- ESCI 462 - Air Pollution
- ESCI 463 - Wetlands for Wastewater Treatment
- ESCI 470 - Ecological Restoration
- ESCI 480 - Applications in Energy Production
- Or other approved 300-400 level or above course
- One course from:
 - ENVS 350 - Energy Policy and Politics
 - ENVS 359 - Greening Business Policy and Practice
 - ENVS 362 - Theory and Practice of Emergency Management
 - ENVS 441 - Society, Space, and Natural Resources
 - ENVS 451 - Natural Resource Policy
 - ENVS 452 - International Environmental Policy
 - ENVS 454 - Environmental Policy Analysis
- One course from:
 - ENVS 455 - Environmental Law
 - ENVS 461 - Land Use Law

Students are required to take one ENVS approved course with a capstone "CPST" attribute during their senior year. A capstone class is a field or project based class that can be taken by students from both departments (ENVS/ESCI). This class is meant to be a culminating experience for the students bringing all the varied disciplines together as applied work on a real world issue. One example of a capstone is ENVS/ESCI 493 Environmental Impact Assessment where students work in groups to conduct an assessment.
- ENVS Capstone - One course from:
 - ENVS 410 - Agroecology and Sustainable Agriculture
 - ENVS 430 - Borderlands: Resource Management
 - ENVS 466 - Greening Business Applications
 - ENVS 474 - Planning for Sustainable Communities
 - ENVS 493 - Environmental Impact Assessment
 - ENVS 496 - Environmental Stewardship
 - ESCI 470 - Ecological Restoration
 - ESCI 490 - Environmental Risk Assessment
 - ESCI 491 - Oceanography of Puget Sound
 - ESCI 493 - Environmental Impact Assessment

Or other ENVS or ESCI approved course with a capstone (CPST) attribute
- One course from: (minimum 10 credits)
 - ENVS 498A - Senior Thesis
 - ENVS 498B - Internship
 - ENVS 498C - Senior Project
 - ENVS 498D - International Study
- 18-19 credits - Specialization electives 300 or 400 level, under advisement.

Environmental Studies, BA

Department of Environmental Studies, Huxley College of the Environment

123-135 credits minimum: Phase I, Phase II, and Major

Introduction

Students, faculty, and staff in the Department of Environmental Studies approach environmental understanding and problem solving through diverse programs that examine interacting social and natural systems. By putting the social sciences, natural sciences, humanities, and environmental professions into direct dialogue, the department's curriculum is designed to help students make the intellectual connections

and gain the practical skills necessary for building socially and environmentally sustainable futures. The department's undergraduate programs include major specializations in environmental education, environmental policy, geography, and urban planning and sustainable development, as well as an interdisciplinary major in environmental studies. Joint programs are also offered in environmental economics and environmental journalism. A range of minors, including Disaster Risk Reduction (DRR), Geographic Information Science (GIS), and Sustainable Design, are also available. These programs direct students to specific environmental career paths or provide an excellent background for advanced study in education, law, natural resource management, public administration, urban and environmental planning, and other fields. The department also offers advanced study through graduate degrees in Environmental Education and Geography.

Why Consider an Environmental Studies Major?

Do you want to use your knowledge and skills to promote positive change in the environment?

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

ENVIRONMENTAL STUDIES

PHASE I

Required Courses (33 credits):

- One course from:
 - BIOL 101 - Introduction to Biology
 - BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- CHEM 121 - General Chemistry I
- ECON 206 - Introduction to Microeconomics
- ENVS 201 - Understanding Environmental Data and Information
- ENVS 202 - Introduction to Environmental Studies and Sustainability
- ENVS 203 - Physical Geography
- MATH 114 - Precalculus I or equivalent or higher
- PLSC 250 - The American Political System

PHASE II

ENVS CORE

Required Courses (17-20 credits):

- One course from:
 - ENVS 303 - Human Ecology and Sustainability
 - ENVS 304 - Environment and Resource Policy
- ENVS 305 - Environmental History and Ethics
- One course from:
 - ENVS 343 - Urbanization: Processes and Patterns
 - ENVS 361 - Introduction to Planning
- One course from:
 - ESCI 302 - Environmental Pollution
 - ESCI 310 - Environmental Systems
 - ESCI 325 - Fundamentals of Ecology
 - ESCI 392 - Introduction to Global Change
- One course from:
 - ESCI 321 - Oceanography
 - ESCI 330 - Natural History of the Pacific Northwest
 - ESCI 333 - Introduction to Environmental Toxicology
 - ESCI 361 - Water Quality
 - ESCI 463 - Wetlands for Wastewater Treatment

Environmental Studies Major (73-82 credits):

The Environmental Studies Major requires:

Two advisors to sign the plan of study BEFORE the beginning of senior year.
Choose two lists from the four below (A, B, C, D); take two courses from each chosen list.

List A - Environmental Education:

- ENVS 381 - Introduction to Education for Environment and Sustainability
- ENVS 484 - The Literature of Nature and Place

List B - Environmental Policy:

- ENVS 450 - Science in the Policy Process
- ENVS 454 - Environmental Policy Analysis
- ENVS 456 - Environmental Governance

List C - Urban Planning and Sustainable Development:

- ENVS 360 - Plan Graphics: Methods in Urban Planning Design Graphics
- ENVS 361 - Introduction to Planning
- ENVS 370 - History of Planning
- ENVS 462 - Planning Theory
- ENVS 470 - Planning Methods

List D - Geography:

ENVS 316 - Explorations in Environmental Studies
 ENVS 326 - Climatology
 ENVS 327 - The Soil Environment
 ENVS 331 - Canada: Society and Environment
 ENVS 332 - The Pacific Northwest: Society and Environment
 ENVS 334 - South Asia: Society and Environment
 ENVS 335 - The Middle East: Society and Environment
 ENVS 340 - Developing World
 ENVS 341 - Population and Resources
 ENVS 342 - Geography of the World Economy

Please note: Prerequisites may be required for some courses.

Students are required to take one ENVS approved course with a capstone "CPST" attribute during their senior year. A capstone class is a field or project based class that can be taken by students from both departments (ENVS/ESCI). This class is meant to be a culminating experience for the students bringing all the varied disciplines together as applied work on a real world issue. One example of a capstone is ENVS/ESCI 493 Environmental Impact Assessment where students work in groups to conduct an assessment.

- ❑ ENVS Capstone - One course from:
 - ENVS 410 - Agroecology and Sustainable Agriculture
 - ENVS 430 - Borderlands: Resource Management
 - ENVS 466 - Greening Business Applications
 - ENVS 474 - Planning for Sustainable Communities
 - ENVS 493 - Environmental Impact Assessment
 - ENVS 496 - Environmental Stewardship
 - ESCI 470 - Ecological Restoration
 - ESCI 490 - Environmental Risk Assessment
 - ESCI 491 - Oceanography of Puget Sound
 - ESCI 493 - Environmental Impact Assessment
 Or other ENVS or ESCI approved course with a capstone (CPST) attribute
- ❑ Minimum 10 credits - ENVS Experiential application - One course from:
 - ENVS 498A - Senior Thesis
 - ENVS 498B - Internship
 - ENVS 498C - Senior Project
 - ENVS 498D - International Study
- ❑ Minimum 30 credits - ENVS 300-400 level (minimum 15 credits 400-level) or approved substitutions, under advisement
- ❑ Minimum 18 credits - 300- or 400-level electives, under advisement

Environmental Studies/Journalism, BA (In Moratorium, see Journalism Department)

Environmental Studies/Journalism, BA (In Moratorium, see Journalism Department)

Geography, BA

Department of Environmental Studies, Huxley College of the Environment

110-114 credits: Phase I, Phase II, and Major

Introduction

Geography is the science of place and space. Geographers ask where things are located on the surface of the Earth, why they are located where they are, how places differ from one another, and how people interact with the environment. Geography links the social sciences and natural sciences together, studying the relationships between human activity and natural systems.

As a geographer, you can make a difference — from teaching to planning, from working for sustainable development to working with geospatial technologies, and more. Graduates of this major have assumed positions in State and National Parks, the Forest Service, college and universities, non-profit organizations, and the private sector. If you are interested in teaching Geography in public schools, see the B.A.

ENVIRONMENTAL STUDIES

Geography/Social Studies or B.A.Ed. Geography/Elementary Education information sheet. Western also offers a Masters in Science in Geography.

Prospective Geography majors are strongly advised to take additional preparatory course work that provides a strong background in several of: chemistry, biology, geology, physics, mathematics, statistics, political science, anthropology, and/or history. The preparatory courses listed for the major, where approved as GUR courses in the catalog, may be used to fulfill both Huxley College and GUR requirements. Students wishing to complete the Geography major in four years should complete all GUR requirements in the first two years. A minor in Geographic Information Science, Geology or an additional language are commonly completed by Geography students. All preparatory courses required for admission should be completed on a lettered or numeric grading scale, not P/NP, and must be completed with a grade of C- or better.

Why Consider a Geography Major?

Are you curious about the world, and its physical and human dimensions? Do you love maps? Are you comfortable with spatial problem solving? If so, then Geography is the major for you.

How to Declare (Admission and Declaration Process):

You can declare yourself as an Environmental Studies (ENVS) major at any time, and there are several advantages to declaring during your freshman or sophomore year. Once you are declared as a phase I major you are assigned a Huxley faculty advisor based on your interests at the time of declaration. You can then meet with your faculty advisor to discuss which courses to take and when, how to prepare for graduate school or a future career, or simply to get assistance navigating through the Huxley curriculum. Your email is added to an email distribution list for Huxley majors so you will begin to receive notifications and general announcements, as well as information about jobs, internships, or research opportunities.

Some important information about the ENVS major:

1. Most students begin the ENVS major in Phase I, while completing the preparatory classes for ENVS Phase II admission (BIOL 101 or 204, PLSC 250, ECON 206, Math 114 or equivalent, CHEM 121, as well as ENVS 201, 202, and 203). You can declare an ENVS Phase I major at any time by going to the central Huxley College office in Environmental Studies Building 539 and filling out a major declaration card.
2. Admission to Phase II is a competitive process and requires completion of the coursework above with a grade of B- or better in ENVS 201, ENVS 202, and ENVS 203, as well as a satisfactory GPA in all other coursework. You must then submit an application that includes a 1-2 page essay describing your reasons for wanting to enter into one of the five ENVS majors (Environmental Education, Environmental Studies, Geography, Urban Planning, or Policy) as well as a plan of study created with the Huxley admissions advisor and signed by a faculty advisor. Entry into the Environmental Studies major requires the signature of a second departmental faculty member on the plan of study. ENVS Phase II applications are accepted at central Huxley College office in the fall, winter, and spring quarters.

3. Changes to your major, plan of study, or requests for a change of advisor during Phase II require completing a new declaration card.

If you have any questions, please contact an undergraduate advisor at the central Huxley College office in Environmental Studies Building 539, or by phone (360-650-2817), or (360-650- 3748)

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

PHASE I

Required Courses (33 credits):

- One course from:
 - BIOL 101 - Introduction to Biology
 - BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- CHEM 121 - General Chemistry I
- ECON 206 - Introduction to Microeconomics
- ENVS 201 - Understanding Environmental Data and Information
- ENVS 202 - Introduction to Environmental Studies and Sustainability
- ENVS 203 - Physical Geography
- MATH 114 - Precalculus I or equivalent or higher.
- PLSC 250 - The American Political System

PHASE II

ENVS CORE

Required Courses (17-21 credits):

- One course from:
 - ENVS 303 - Human Ecology and Sustainability
 - ENVS 304 - Environment and Resource Policy
- ENVS 305 - Environmental History and Ethics
- One course from:
 - ENVS 343 - Urbanization: Processes and Patterns
 - ENVS 361 - Introduction to Planning
- One course from:
 - ESCI 302 - Environmental Pollution
 - ESCI 310 - Environmental Systems
 - ESCI 325 - Fundamentals of Ecology
 - ESCI 392 - Introduction to Global Change
- One course from:
 - ESCI 321 - Oceanography
 - ESCI 330 - Natural History of the Pacific Northwest
 - ESCI 333 - Introduction to Environmental Toxicology
 - ESCI 361 - Water Quality
 - ESCI 463 - Wetlands for Wastewater Treatment

Geography Major

Required Courses (60 credits):

- ENVS 204 - Human Geography
- ENVS 319 - Research and Writing

ENVIRONMENTAL STUDIES

- ❑ ENVS 320 - GIS I: Introduction to Geographic Information Science
- ❑ Human Geography - One course from:
 - ENVS 330 - The United States: Society and Environment
 - ENVS 331 - Canada: Society and Environment
 - ENVS 332 - The Pacific Northwest: Society and Environment
 - ENVS 333 - East Asia: Society and Environment
 - ENVS 334 - South Asia: Society and Environment
 - ENVS 335 - The Middle East: Society and Environment
 - ENVS 340 - Developing World
 - ENVS 341 - Population and Resources
 - ENVS 342 - Geography of the World Economy
 - ENVS 343 - Urbanization: Processes and Patterns
- ❑ Physical Geography - One course from:
 - ENVS 326 - Climatology
 - ENVS 327 - The Soil Environment
 - ENVS 372 - Natural Hazards Planning
- ❑ Five courses (not taken above; minimum three courses 400-level) from:
 - ENVS 321 - GIS II: Computer Cartography
 - ENVS 322 - Analysis of Spatial Data
 - ENVS 325 - Geography of Landforms
 - ENVS 326 - Climatology
 - ENVS 327 - The Soil Environment
 - ENVS 330 - The United States: Society and Environment
 - ENVS 331 - Canada: Society and Environment
 - ENVS 332 - The Pacific Northwest: Society and Environment
 - ENVS 333 - East Asia: Society and Environment
 - ENVS 334 - South Asia: Society and Environment
 - ENVS 335 - The Middle East: Society and Environment
 - ENVS 340 - Developing World
 - ENVS 341 - Population and Resources
 - ENVS 342 - Geography of the World Economy
 - ENVS 343 - Urbanization: Processes and Patterns
 - ENVS 372 - Natural Hazards Planning
 - ENVS 420 - GIS III: Analysis and Modeling
 - ENVS 421 - GIS IV: Advanced GIS Applications
 - ENVS 422 - Advanced Spatial Analysis
 - ENVS 423 - GIS Processing and Analysis
 - ENVS 426 - Water Resources
 - ENVS 427 - Soil Landscapes
 - ENVS 428 - Biogeography
 - ENVS 430 - Borderlands: Resource Management
 - ENVS 431 - Pacific Rim: Environment, Economy and Sustainability
 - ENVS 441 - Society, Space, and Natural Resources
 - ENVS 442 - Regional Environmental and Economic Resource Modeling
 - ENVS 443 - The Urban Environment
 - ENVS 444 - Colonial Landscapes in the Pacific Northwest

Students are required to take one ENVS approved course with a capstone "CPST" attribute during their senior year. A capstone class is a field or project based class that can be taken by students from both departments (ENVS/ESCI). This class is meant to be a culminating experience for the students bringing all the varied disciplines together as applied work on a real world issue. One example of a capstone is ENVS/ESCI 493 Environmental Impact Assessment where students work in groups to conduct an assessment.
- ❑ ENVS Capstone - One course from:
 - ENVS 410 - Agroecology and Sustainable Agriculture
 - ENVS 430 - Borderlands
 - ENVS 466 - Greening Business Applications
 - ENVS 474 - Planning for Sustainable Communities
 - ENVS 493 - Environmental Impact Assessment
 - ENVS 496 - Environmental Stewardship
 - ESCI 470 - Ecological Restoration
 - ESCI 490 - Environmental Risk Assessment
 - ESCI 491 - Oceanography of Puget Sound

- ESCI 493 - Environmental Impact Assessment
Or other ENVS or ESCI approved course with a capstone (CPST) attribute
- ☐ One course from: (minimum 10 credits)
 - ENVS 498A - Senior Thesis
 - ENVS 498B - Internship
 - ENVS 498C - Senior Project
 - ENVS 498D - International Study
- ☐ 6-11 Elective credits (300-400 level) under advisement

Geography/Social Studies, BA

Department of Environmental Studies, Huxley College of the Environment

80-90 credits (Phase I and major)

Introduction/What is the Study of Geography/Social Studies?

Geography/Social Studies at Huxley College provides a breadth of knowledge in Geography, Environmental Studies, History, Economics, Anthropology, and Political Science. As a Geography/Social Studies major you will be prepared to explore a wide variety of career paths. These include planning, education, environmental agencies and NGOs, business, tourism, GIS, government service, transportation, and many more. Majors in this degree program are highly encouraged to include a minor in their plan of study such as: Environmental Studies, GIS, Energy Policy, East Asian or Canadian-American Studies, or areas like a foreign language. In addition, it meets Washington State requirements for a teaching endorsement, Geography/Social Studies can also prepare you for teaching in non-traditional settings with or without the additional certification from Woodring College. Students with a degree in Geography/Social Studies can also go on to graduate work in Geography, Education, or Environmental Education.

Why Consider a Geography/Social Studies Major?

If you are interested in any of the above career paths or you want to teach Geography and Social Studies to children in grades 5-12 in a public or private school setting, this major will provide the subject area requirements. Secondary Education students who wish to be endorsed in Social Studies may choose this major. However, the Geography/Social Studies degree does not require that a student pursue a teaching certificate. Geography/Social Studies majors interested in Secondary certification must apply separately to the certification programs, such as those in Woodring College of Education. Students usually apply to Woodring in their senior year or after they graduate.

To receive a recommendation for state of Washington certification, students must complete the teacher certification program, including the content methods course, SEC 426, which is offered by the Department of Secondary Education as 1) a part of the undergraduate BA degree, or 2) as a post-baccalaureate program, or 3) as part of the Master's in Education degree. See the Secondary Education section of this catalog for program admission, completion, and teaching certification requirements. Completion of this combined major leads to an endorsement in social studies.

How to Declare (Admission and Declaration Process):

You can declare yourself as an Environmental Studies (ENVS) Geography/Social Studies major at any time, and there are several advantages to declaring during your freshman or sophomore year. Once you are declared as a phase I major you are assigned a Huxley faculty advisor based on your interests at the time of declaration. You can then meet with your faculty advisor to discuss which courses to take and when, how to prepare for graduate school or a future career, or simply to get assistance navigating through the Huxley curriculum. Your email is added to an email distribution list for Huxley majors so you will begin to receive notifications and general announcements, as well as information about jobs, internships, or research opportunities.

Those pursuing the Geography/Social Studies BA degree may begin as Phase I majors. Preparatory and major requirements differ from those of the other ENVS majors as outlined below. You can declare Geography/Social Studies Phase I major at any time by going to the central Huxley College office in Environmental Studies Building 539 and filling out a major declaration card. Those interested in information about secondary education programs may request an appointment through Woodring College of Education in Miller Hall 400, phone 360-650-3327, e-mail address Janna.Cecka@wvu.edu.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors. Courses required for a state teaching endorsement must be completed with a grade of C (2.0) or better.

Geography (39-47 credits)

This Geography/Social Studies, BA degree requires 60 upper-level credits.

Phase I courses (10 to 11 credits)

- ENVS 203 - Physical Geography
- ENVS 204 - Human Geography
- One course from:
 - ESCI 101 - Environmental Studies: A Scientific Approach
 - ENVS 202 - Introduction to Environmental Studies and Sustainability
 - ENVS 240 - Geography and World Affairs

Introduction to basic tools of Geography (6 to 7 credits)

- Cartographic Geography, one course from:
 - ENVS 220 - Map Reading and Analysis
 - ENVS 221 - Geographic Information Science Survey
 - ENVS 320 - GIS I: Introduction to Geographic Information Science
- Writing and research:
 - ENVS 319 - Research and Writing

A broad 300-level overview of Human Geography and its analytical tools (12 to 16 credits)

- Four courses from:
 - ENVS 321 - GIS II: Computer Cartography
 - ENVS 322 - Analysis of Spatial Data
 - ENVS 330 - The United States: Society and Environment
 - ENVS 331 - Canada: Society and Environment
 - ENVS 332 - The Pacific Northwest: Society and Environment
 - ENVS 333 - East Asia: Society and Environment

- ENVS 334 - South Asia: Society and Environment
- ENVS 335 - The Middle East: Society and Environment
- ENVS 340 - Developing World
- ENVS 341 - Population and Resources
- ENVS 342 - Geography of the World Economy
- ENVS 343 - Urbanization: Processes and Patterns

Physical Geography: Exploration of Geography's dual nature (4 to 5 credits)

- One course from:
 - ENVS 326 - Climatology
 - ENVS 327 - The Soil Environment
 - ENVS 372 - Natural Hazards Planning

Advanced 400-level seminar courses (7 to 8 credits)

- Two courses from:
 - ENVS 426 - Water Resources
 - ENVS 427 - Soil Landscapes
 - ENVS 428 - Biogeography
 - ENVS 430 - Borderlands: Resource Management
 - ENVS 431 - Pacific Rim: Environment, Economy and Sustainability
 - ENVS 441 - Society, Space, and Natural Resources
 - ENVS 443 - The Urban Environment
 - ENVS 444 - Colonial Landscapes in the Pacific Northwest

Social Studies (41 to 43 credits)

- HIST 103 - Introduction to American Civilization: American History to 1865
- HIST 104 - Introduction to American Civilization: American History Since 1865
- HIST 121 - World History to 500
- HIST 123 - World History, 1500 to the Present
- HIST 391 - History of the Pacific Northwest
- PLSC 250 - The American Political System
- One course from:
 - ECON 206 - Introduction to Microeconomics
 - ECON 446 - Economics for the Teacher
- One course from:
 - ECON 207 - Introduction to Macroeconomics
 - ECON 447 - Methods for Teaching About the National Economy in the Public Schools
- One course from:
 - ANTH 201 - Introduction to Cultural Anthropology
 - SOC 221 - Introduction to Population Issues
 - SOC 251 - Sociology of Deviant Behavior
 - SOC 255 - Social Organization of Criminal Justice
 - SOC 260 - The Family in Society
 - SOC 268 - Gender and Society
 - SOC 269 - Race and Ethnic Relations

Student/Faculty Designed, BA (Huxley College of the Environment)

Department of Environmental Studies, Huxley College of the Environment

Introduction

Students who wish to design their own majors within Huxley College should obtain complete guidelines from the Undergraduate Advisors located in ES 539, the Huxley College office. The major must be developed with faculty advisement and must be approved by two faculty members and the Huxley College Curriculum Committee at least four quarters before the student's anticipated graduation.

Sample Careers

Career choices are determined by the student's interests.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

You can declare yourself as an Environmental Studies (ENVS) Phase I major at any time. There are several advantages to declaring during your freshman or sophomore year. Once you are declared as a Phase I major you are assigned a Huxley faculty advisor based on your interests at the time of declaration. You can then meet with your faculty advisor to discuss which courses to take and when, how to prepare for graduate school or a future career, or simply to get assistance navigating through the Huxley curriculum. Your email is added to an email distribution list for Huxley majors so you will begin to receive notifications and general announcements, as well as information about jobs, internships, or research opportunities.

Some important information about the ENVS major:

1. Most students begin the ENVS major in Phase I, while completing the preparatory classes for ENVS Phase II admission (BIOL 101 or 204, PLSC 250, ECON 206, Math 114 or equivalent, CHEM 121, as well as ENVS 201, 202, and 203). You can declare an ENVS Phase I major at any time by going to the central Huxley College office in Environmental Studies Building 539 and filling out a major declaration card.
2. Admission to Phase II is a competitive process and requires the coursework above and a grade of B- or better in ENVS 201, ENVS 202, and ENVS 203, as well as a satisfactory GPA in all other coursework. You must then submit an application that includes a 1-2 page essay describing your reasons for wanting to enter into one of the five ENVS majors (Environmental Education, Environmental Studies, Geography, Urban Planning, or Policy) as well as a plan of study created with the Huxley admissions advisor and signed by a faculty advisor. Entry into the Urban Planning major also requires a portfolio, and entry into the Environmental Studies major requires the signature of a second departmental faculty member on the plan of study. ENVS Phase II applications are accepted at the central Huxley College office in the fall, winter, and spring quarters.
3. Student Faculty Design Majors must submit their plan of study and a brief written justification to the Huxley Curriculum Coordinating Committee at least four quarters before graduation. Their major must have a unique title and the support of two faculty members. The Academic Coordinating Commission, a standing committee of Western's Faculty Senate, must provide final approval of a Student/Faculty Designed major title.
4. Changes to your major, plan of study or requests for a change of advisor during Phase II require completing a new declaration card.

If you have any questions, please contact an undergraduate advisor at the central Huxley College office in Environmental Studies Building 539, or by phone (360-650-2817), or (360-650-3748).

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Urban Planning and Sustainable Development, BA

Department of Environmental Studies, Huxley College of the Environment

126-131 Credits: Phase I, Phase II, and Major

Introduction

This interdisciplinary program prepares students to enter professional fields concerned with the sustainability of the human and natural environment. The Urban Planning and Sustainable Development program consists of a core, and specialization electives. The core incorporates the interdisciplinary foundation of Huxley College's approach to the study of the environment. Urban planning and sustainable development concentrate studies in public policy development, law, and methods and processes of planning and decision making. The specialization elective component of the program is flexible. It allows students to develop an area of special interest, concentrating on a minor in an academic discipline, or to select from a number of thematically oriented clusters of courses.

Huxley's Urban Planning and Sustainable Development major emphasizes an interdisciplinary approach to solving complex problems that face communities from the local to the global level. The program emphasizes a concern for progressive change that is needed towards the design of equitable, healthful, livable, and sustainable communities for present and future generations. The curriculum combines urban planning, sustainable design, environmental policy, and environmental science to provide students with an understanding of the linkages between urban and natural systems and the multidimensional problems in urban development.

The program prepares students with the knowledge and skills necessary to make positive changes towards sustainability in an increasingly complex world. Graduates are prepared for careers in planning agencies, consulting firms, and nonprofit organizations at the local, state, and federal levels of government, as well as advanced graduate study. Students are accepted into the Urban Planning and Sustainable Design major based on the review of their application and on enrollment limits.

Why Consider a Study of Urban Planning and Sustainable Development Major?

Do you want to use your knowledge and skills to promote positive change in the environment? Do you love solving problems and implementing shared visions in both natural settings and urban communities? Are you interested in the laws and policies that govern environmental change? Then Planning and Sustainable Development is the major for you.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

PHASE I

Required Courses (33 credits):

- One course from:
 - BIOL 101 - Introduction to Biology
 - BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- CHEM 121 - General Chemistry I
- ECON 206 - Introduction to Microeconomics
- ENVS 201 - Understanding Environmental Data and Information
- ENVS 202 - Introduction to Environmental Studies and Sustainability
- ENVS 203 - Physical Geography
- PLSC 250 - The American Political System
- MATH 114 - Precalculus I

PHASE II

ENVS CORE

Required Courses (17-20 credits):

- One course from:
 - ENVS 303 - Human Ecology and Sustainability
 - ENVS 304 - Environment and Resource Policy
- ENVS 305 - Environmental History and Ethics
- One course from:
 - ENVS 343 - Urbanization: Processes and Patterns
 - ENVS 361 - Introduction to Planning
- One course from:
 - ESCI 302 - Environmental Pollution
 - ESCI 310 - Environmental Systems
 - ESCI 325 - Fundamentals of Ecology
 - ESCI 392 - Introduction to Global Change
- One course from:
 - ESCI 321 - Oceanography
 - ESCI 330 - Natural History of the Pacific Northwest
 - ESCI 333 - Introduction to Environmental Toxicology
 - ESCI 361 - Water Quality

ESCI 463 - Wetlands for Wastewater Treatment

Urban Planning and Sustainable Development Major

Required Courses (76-78 credits):

- One course from:
 - ENVS 343 - Urbanization: Processes and Patterns (if not taken above)
 - ENVS 361 - Introduction to Planning (if not taken above)
- ENVS 360 - Plan Graphics: Methods in Urban Planning Design Graphics
- ENVS 370 - History of Planning
- ENVS 372 - Natural Hazards Planning
- ENVS 373 - Transportation Systems and Planning
- One course from:
 - ENVS 450 - Science in the Policy Process
 - ENVS 456 - Environmental Governance
- ENVS 457 - Environmental Dispute Resolution
- ENVS 461 - Land Use Law
- ENVS 462 - Planning Theory
- ENVS 470 - Planning Methods
- ENVS 472 - Planning Studio
- ENVS 473 - Planning Studio II Implement

Students are required to take one ENVS approved course with a capstone "CPST" attribute during their senior year. A capstone class is a field or project based class that can be taken by students from both departments (ENVS/ESCI). This class is meant to be a culminating experience for the students bringing all the varied disciplines together as applied work on a real world issue. One example of a capstone is ENVS/ESCI 493 Environmental Impact Assessment where students work in groups to conduct an assessment.
- ENVS Capstone - One course from:
 - ENVS 410 - Agroecology and Sustainable Agriculture
 - ENVS 430 - Borderlands: Resource Management
 - ENVS 466 - Greening Business Applications
 - ENVS 474 - Planning for Sustainable Communities
 - ENVS 493 - Environmental Impact Assessment
 - ENVS 496 - Environmental Stewardship
 - ESCI 470 - Ecological Restoration
 - ESCI 490 - Environmental Risk Assessment
 - ESCI 491 - Oceanography of Puget Sound
 - ESCI 493 - Environmental Impact Assessment

Or other ENVS or ESCI approved course with a capstone (CPST) attribute
- One course from (minimum of 10 credits):
 - ENVS 498A - Senior Thesis
 - ENVS 498B - Internship
 - ENVS 498C - Senior Project
 - ENVS 498D - International Study
- 20 credits - Specialized electives at the 300- or 400- course level, under advisement.

Bachelor of Arts in Education

Environmental Studies — Elementary, BAE

Department of Environmental Studies, Huxley College of the Environment

51-54 credits (preparatory courses and major)

ENVIRONMENTAL STUDIES

Introduction

This major satisfies the academic major requirement for teacher certification with an endorsement in elementary education and must be accompanied by the professional preparation program in elementary education. See the Elementary Education section of this catalog for program admission, completion, and teaching certification requirements. This program fulfills the academic major requirement for elementary education candidates who wish to have a solid background in studies related to the environment. Although environmental studies itself is not an endorsable area, some of the courses might be counted toward endorsement in other areas. Students should contact a faculty advisor for clarification of course work applications.

Students wishing to complete an Environmental Studies Elementary Education major in four years should complete all GUR requirements in their first two years. The preparatory courses may be used to fulfill both Huxley College and GUR requirements.

Why Consider an Environmental Studies - Elementary Major?

Are you excited about teaching children about the environment? Do you want to teach people to make environmental choices in their lives? Perhaps an Environmental Studies-Elementary major is for you!

Those pursuing the Environmental Studies - Elementary BAE degree may begin as Phase I majors. Preparatory and major requirements differ from those of the other ENVS majors as outlined in this catalog. You can declare an ENVS Phase I major at any time by going to the central Huxley College office in Environmental Studies Building 539 and filling out a major declaration card. Those interested in information about elementary education programs may request an appointment through Woodring College of Education in Miller Hall 262, phone 360-650-3336, email address, Jiasong.Yuen@wwu.edu.

Grade Requirements

A grade of C (2.0) or better is required for courses in the elementary education professional program and all courses required for the endorsement.

All preparatory courses required for admission should be completed on a lettered or numeric grading scale, not P/NP, and must be completed with a grade of C (2.0) or better.

Requirements

Preparatory courses (8-9 credits)

- One course from:
 - BIOL 101 - Introduction to Biology
 - BIOL 204 - Introduction to Evolution, Ecology and Biodiversity
- One course from:
 - ECON 206 - Introduction to Microeconomics
 - PLSC 250 - The American Political System

Major (43-45 credits)

- ENVS 381 - Introduction to Education for Environment and Sustainability
- ENVS 492 - Curriculum for Environment and Sustainability
- ESCI 330 - Natural History of the Pacific Northwest
- Two courses from:
 - ENVS 303 - Human Ecology and Sustainability
 - ENVS 304 - Environment and Resource Policy
 - ENVS 305 - Environmental History and Ethics
- Electives under advisement (23-25 credits)
 - ENVS 300- and 400-level
 - ESCI 300- and 400-level

Additional Requirements

Elementary Education Professional Program Requirements (100-103 credits)

Department of Elementary Education, Woodring College of Education

Introduction

Students seeking a bachelor's degree with teacher certification and an endorsement in elementary education must complete the GURs, an approved academic major, and the professional education course work listed below.

Admission and Declaration Process

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Professional Studies Core (22 credits)

- ELED 303 - Educational Psychology - Development and Learning
- ELED 310 - Education, Culture, and Equity
- ELED 370 - Introduction to Teaching
- I T 344 - Foundations of Technology in Teaching and Learning
- I T 442 - Digital Decisions: Technology for Educators
- SPED 364 - Teaching Each Student

ENVIRONMENTAL STUDIES

Elementary Program — Methods, Curriculum Content, and Field Experiences (78-81 credits)

- One course from:
 - ART 398 - Integrated Arts for Elementary Educators
 - DNC 398 - Integrated Arts for Elementary Educators
 - MUS 398 - Integrated Arts for Elementary Educators
 - THTR 398 - Integrated Arts for Elementary Educators
- One course from:
 - ART 380 - Art Educating the Child
 - DNC 433 - Creative Movement for Educators With Lab
 - MUS 361 - Music for Elementary Teachers
 - THTR 350 - Theatre for Youth
 - THTR 351 - Creative Pedagogy
- ELED 425 - Social Studies for the Elementary School
- ELED 470 - Developing Teaching
- ELED 471 - Documenting Teaching
- ELED 480 - Literacy: Beginning Communicators
- ELED 481 - Literacy: Fluent Communicators
- ELED 491 - September Experience
- ELED 492 - Practicum: Experience in Literacy Methods
- ELED 494 - Internship - Elementary
- HLED 455 - Health Education Grades K-8
- MATH 381 - Teaching K-8 Mathematics I
- MATH 382 - Teaching K-8 Mathematics II
- MATH 383 - Teaching K-8 Mathematics III
- MATH 491 - Internship Seminar - Teaching K-8 Mathematics
- PE 345 - Physical Education for Elementary School
- SCED 480 - Science Methods and Curriculum for the Elementary School
- SCED 490 - Laboratory/Field Experience in Elementary Science

Geography — Elementary, BAE

Department of Environmental Studies, Huxley College of the Environment

66-73 credits (preparatory courses and major)

Introduction

This program is designed to provide necessary depth as well as breadth to teaching majors who wish to specialize in geography in the public school system.

This major satisfies the academic major requirement for teacher certification with an endorsement in elementary education and must be accompanied by the professional preparation program in elementary education. See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements. This program is designed to provide necessary depth as well as breadth to teaching majors who wish to specialize in geography in the public school system.

Students wishing to complete a Geography Elementary Education major should complete the general chemistry series during their freshman year and the general biology series during their sophomore year. Prospective environmental science majors are strongly advised to take additional preparatory course work that provides a strong background in chemistry, biology and mathematics. The preparatory courses may be used to fulfill both Huxley College and GUR requirements.

Why Consider a Geography-Elementary Major?

This major prepares students for a concentration in Geography to accompany their courses in Elementary Education.

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Professional Studies Core (22 credits)

- ELED 303 - Educational Psychology - Development and Learning
- ELED 310 - Education, Culture, and Equity
- ELED 370 - Introduction to Teaching
- I T 344 - Foundations of Technology in Teaching and Learning
- I T 442 - Digital Decisions: Technology for Educators
- SPED 364 - Teaching Each Student

Elementary Program — Methods, Curriculum Content, and Field Experiences (78-81 credits)

- One course from:
 - ART 398 - Integrated Arts for Elementary Educators
 - DNC 398 - Integrated Arts for Elementary Educators
 - MUS 398 - Integrated Arts for Elementary Educators
 - THTR 398 - Integrated Arts for Elementary Educators
- One course from:
 - ART 380 - Art Educating the Child
 - DNC 433 - Creative Movement for Educators With Lab
 - MUS 361 - Music for Elementary Teachers
 - THTR 350 - Theatre for Youth
 - THTR 351 - Creative Pedagogy
- ELED 425 - Social Studies for the Elementary School
- ELED 470 - Developing Teaching
- ELED 471 - Documenting Teaching

- ❑ ELED 480 - Literacy: Beginning Communicators
- ❑ ELED 481 - Literacy: Fluent Communicators
- ❑ ELED 491 - September Experience
- ❑ ELED 492 - Practicum: Experience in Literacy Methods
- ❑ ELED 494 - Internship - Elementary
- ❑ HLED 455 - Health Education Grades K-8
- ❑ MATH 381 - Teaching K-8 Mathematics I
- ❑ MATH 382 - Teaching K-8 Mathematics II
- ❑ MATH 383 - Teaching K-8 Mathematics III
- ❑ MATH 491 - Internship Seminar - Teaching K-8 Mathematics
- ❑ PE 345 - Physical Education for Elementary School
- ❑ SCED 480 - Science Methods and Curriculum for the Elementary School
- ❑ SCED 490 - Laboratory/Field Experience in Elementary Science

Master of Arts

Environmental Studies, MA

Department of Environmental Studies, Huxley College of the Environment

Graduate Faculty

Abel, Troy D., PhD, environmental policy, conservation politics, civic environmentalism, policy analysis, globalization and environment.

Bach, Andrew J., PhD, physical geography, geomorphology, soils and weathering, geoarcheology.

Berardi, Gigi, PhD, resources management, agroecology, international community development, food security, all-hazards planning.

Buckley, Patrick H., PhD, economic and development geography, quantitative methods, GIS, environmental issues in Japan and China, quality of life, transborder environmental issues.

Darby, Kate J., PhD, Social and environmental justice, environmental justice pedagogy in higher education, sustainable food systems and urban socio-ecological systems.

Flower, Aquila, PhD, environmental change from a geographic perspective using a suite of methodological approaches drawn from the fields of dendrochronology, ecology, statistics, and geospatial analysis.

Green, Rebekah, PhD, human ecology, the Disaster Risk Reduction minor, and advises The Planet publication.

Hollenhorst, Steven, PhD, social dimensions of natural resources, wilderness and protected area policy and management.

Kamel, Nabil, PhD., social and environmental justice, post-disaster recovery, political economy of urbanization, sustainable development, critical urban theory, housing and poverty, physical planning, urban design, regional and international development.

Lanning, Tamara (Tammi), PhD, federal land use policy and planning, collaborative planning, community economic development, and the social components of bioenergy development.

Medler, Michael J., PhD, biogeography, GIS, remote sensing, forest fire and wilderness management.

Melious, Jean O., JD, environmental and land use law and policy, international environmental policy.

Myers, O. Eugene, PhD, environmental education, conservation psychology, human ecology, environmental history and ethics.

Neff, Mark W., PhD, environmental governance and policy, environmental studies, sustainability

Rossiter, David A., PhD, Canada, cultural-historical geographies, political ecologies.

Stanger, Nicholas R., PhD, environmental education and exploration of the emotional, ecological, educational, indigenous, and complexity systems

Stangl, Paul A., PhD, pedestrian planning, new urbanism, urban landscapes, memory and meaning; Europe and Berlin.

Wang, Grace A., PhD, natural resource policy, cultural resources management, community-based forestry.

Zaferatos, Nicholas C., PhD, community and environmental planning, sustainable development, European environmental policy, Native American political development.

ENVIRONMENTAL STUDIES

Introduction

The MA degree in Environmental Studies prepares students to address complex environmental problems using a highly interdisciplinary approach. The program prepares students in the analysis, development, conservation, and management frameworks of environmental resources for careers in business, government, planning, consulting, teaching, and research.

Application Information

Deadline: Students generally will be admitted into the MA in Environmental Studies fall quarter only. The Graduate Program Committee will begin reviewing application materials until the enrollment limit is reached or on June 1, whichever comes first. Because maximum student enrollment is limited, all applicants are strongly encouraged to submit application materials by February 1.

TA Deadline: To be considered for a graduate teaching assistantship, applicants must submit their application materials by February 1.

Specific Test Requirements: Graduate Record Exam, General Test; applicants with advanced degrees are not required to submit GRE scores.

Supporting Materials: An application for admission into the MA program in Environmental Studies must include a one- to two-page statement of purpose addressing the following:

1. Which specialization (Geography, Environmental Policy, Urban Planning and Sustainable Development, or General Environmental Studies) you are interested in pursuing and why. How has your prior experience prepared you to work in that?
2. Why do you wish to pursue a graduate degree in Environmental Studies at Huxley College?
3. A plan for coursework you are interested in taking (See University Catalog) towards your specialization and a proposed (tentative) research topic.

Requirements

Students with a 4-year degree in Environmental Studies or related fields, who meet the requirements of the Graduate School and who show evidence of superior scholarship, are encouraged to apply.

Thesis/Project

The thesis option requires satisfactory completion of a research project emphasizing original theoretical or applied research and resulting in a comprehensive written thesis, grounded in the appropriate literature. The candidate will provide a public seminar based on the thesis, after an oral defense and acceptance of the thesis by the candidate's thesis committee. The scale and scope of work for the project option will be commensurate with the scale and scope of work for the thesis option. The project option requires satisfactory completion of an applied project emphasizing a tangible product and a comprehensive individual written report on the project from each candidate. Each candidate will also provide an individual public seminar based on the project, after an oral defense and acceptance of the project by the candidate's project committee.

Committee Makeup

The thesis/project committee will have a minimum of two graduate faculty members from Environmental Studies Graduate Faculty; one will serve as chair. The third member, with approval of the graduate advisor and Graduate School, can come from elsewhere on campus or, another university or can be a professional in the field. Your committee must be formed by the third quarter of residency (Thesis Topic Approval Card). Students must meet monthly with the committee chair to report progress on their thesis/project, and with the entire committee as needed. Failure to make satisfactory progress on the thesis/project over an extended time period may result in the student's termination from the program.

Thesis/Project Proposal Presentation

The student is to make a public presentation of the proposed thesis/project, followed by questions and discussion. The purpose of this presentation is to allow the student to share the proposed thesis/project with a

broader audience than the thesis committee to facilitate further refinement of the work. The presentation will be made as soon as the student and the thesis/project committee have agreed upon a topic, typically in the third quarter of residency. Major changes to the thesis topic will require a new presentation at the discretion of the thesis committee.

Program Requirements (minimum 45 credits)

- ENVS 501 - Research and Projects in Environmental Studies
- ENVS 502 - Environmental Research and Projects Frameworks
- ENVS 503 - Communicating Research Results
- One course from (12 credits):
 - ENVS 690 - Thesis OR
 - ENVS 691 - Field Project
- 10 credits or less of approved 400-level work may be included in the program. No more than 4 elective credits of ENVS 595 (Teaching Practicum) may be used toward the MA degree in Environmental Studies.

Master of Education

Environmental Education, Non-Thesis, MEd

Huxley College of the Environment

Graduate Faculty

Abel, Troy D., PhD, environmental policy, conservation politics, civic environmentalism, policy analysis, globalization and environment.

Bach, Andrew J., PhD, physical geography, geomorphology, soils and weathering, geoarcheology.

Berardi, Gigi, PhD, resources management, agroecology, international community development, food security, all-hazards planning.

Bingham, Brian L., PhD, invertebrate biology, marine ecology, experimental design.

Bodensteiner, Leo R., PhD, fish ecology.

Buckley, Patrick H., PhD, economic and development geography, quantitative methods, GIS, environmental issues in Japan and China, quality of life, transborder environmental issues.

Bunn, Andrew G., PhD, climate change, paleoecology, energy, ecological models.

Bunn, Rebecca, PhD, belowground ecology, toxicology, restoration, energy, the application of statistics

Flower, Aquila, PhD, environmental change from a geographic perspective using a suite of methodological approaches drawn from the fields of dendrochronology, ecology, statistics, and geospatial analysis.

Green, Rebekah, PhD, human ecology, the Disaster Risk Reduction minor, and advises *The Planet* publication.

Helfield, James M., PhD, ecology of rivers and riparian forests, terrestrialaquatic ecosystem linkages, watershed management and restoration.

Homann, Peter S., PhD, biogeochemistry, soil sciences, forest ecology.

Hollenhorst, Steven, PhD, social dimensions of natural resources, wilderness and protected area policy and management.

Landis, Wayne G., PhD, environmental toxicology, population biology, risk assessment.

Love, Brooke, PhD, geochemistry, ocean acidification, hydrothermal systems, chemistry of volatiles in the marine environment.

Matthews, Robin A., PhD, freshwater ecology, aquatic toxicology, statistical ecology.

McLaughlin, John F., PhD, terrestrial ecology, population biology, conservation biology.

Medler, Michael J., PhD, biogeography, GIS, remote sensing, forest fire and wilderness management.

Melious, Jean O., JD, environmental and land use law and policy, international environmental policy.

Miles, John C., PhD, environmental education and history, public lands management.

Miles, Scott B., PhD, sustainable development for risk reduction, social vulnerability, community disaster recovery, local self reliance.

Myers, O. Eugene, PhD, environmental education, conservation psychology, human ecology, environmental history and ethics.

Rossiter, David A., PhD, Canada, cultural-historical geographies, political ecologies.

Rybczyk, John M., PhD, wetland ecology and management, ecosystem modeling, global climate change.

Shull, David H., PhD, structure and function of marine benthic communities, pollution and marine

ENVIRONMENTAL STUDIES

ecosystems.

Sofield, Ruth M., PhD, aquatic toxicology, biochemical and genetic toxicology, environmental chemistry.

Stangl, Paul A., PhD, pedestrian planning, new urbanism, urban landscapes, memory and meaning; Europe and Berlin.

Wallin, David O., PhD, terrestrial ecology, forest ecosystems.

Wang, Grace A., PhD, natural resource policy, cultural resources management, community-based forestry.

Zaferatos, Nicholas C., PhD, community and environmental planning, sustainable development, European environmental policy, Native American political development.

Program Advisor: Dr. John C. Miles

Goals

The non-thesis program serves students who want to develop an individualized applied project as a route to building their qualifications in environmental education.

The philosophy of environmental education at Huxley College is that it is to be broad and inclusive. The goal of environmental education, in the words of the 1976 Belgrade Charter that saw the international spread of the profession, is "to develop a world population that is aware of, and concerned about, the environment and its associated problems, and which has the knowledge, skills, attitudes, motivations and commitment to work individually and collectively toward solutions of current problems and the prevention of new ones." Today environmental education takes has diversified greatly, occurring in formal classrooms, school grounds, nature centers, outdoor and environmental education programs, government agency programs, mass- and social-media venues, and community-based programs in businesses, faith communities, international conservation, or environmental-social justice movements. Environmental education programming may include science, history and cultural or social studies, the arts or many other disciplines. The process may involve inquiry, social learning, or many other varieties of structured or emergent curriculum approaches. Environmental education focused on both the intrinsic development of the learner in his or her culture as it is about the human relationship to nature.

The non-thesis option serves teachers and others who wish to develop background and skill to incorporate environmental education into their educational work. Students develop a focus which requires the application of knowledge to design a field project which suits their vision of environmental education. This program does not provide teacher certification. If desired, that must be pursued separately. All graduate students are expected to develop and implement creative projects that will aid their own practice with the guidance and advice of the program advisor and other teachers.

Prerequisites

All applicants should have experience in the field of environmental education and a basic background in natural history. Each applicant's background will be examined to determine if additional preparation is needed.

Application Information

Deadline: Please refer to Graduate School deadline dates. This program specialization admits students for any quarter, but fall quarter is the best time to begin so that students in this option may go through the core program with students from the Residency option.

Supporting Materials:

- Graduate Record Exam or Miller Analogies Test, official transcript(s) and three letters of reference; applicants with advanced degrees are not required to submit test scores
- One- to two-page statement of purpose

Program Requirements (46-52 credits)

- Core requirements (20 credits)
 - ENVS 501 - Research and Projects in Environmental Studies
 - ENVS 582 - Curriculum in Environmental Education
 - ENVS 585 - Environmental Education Foundations
 - ENVS 587 - Conservation Psychology

ENVS 588 - Assessment, Evaluation and Research in Environment Education

□ Requirements in specialization (6-12 credits)

ENVS 691 - Field Project

□ Electives (20 credits): Courses selected under advisement and including at least 10 credits in environmental studies or environmental sciences.

ENVIRONMENTAL STUDIES

Goals

This Residency program prepares environmental educators to play instructional and managerial roles in not-for-profit organizations rather than the formal classroom.

The philosophy of environmental education at Huxley College is that it is to be broad and inclusive. The goal of environmental education, in the words of the 1976 Belgrade Charter that saw the international spread of the profession, is "to develop a world population that is aware of, and concerned about, the environment and its associated problems, and which has the knowledge, skills, attitudes, motivations and commitment to work individually and collectively toward solutions of current problems and the prevention of new ones." Today environmental education takes has diversified greatly, occurring in formal classrooms, school grounds, nature centers, outdoor and environmental education programs, government agency programs, mass- and social-media venues, and community-based programs in businesses, faith communities, international conservation, or environmental-social justice movements. Environmental education programming may include science, history and cultural or social studies, the arts or many other disciplines. The process may involve inquiry, social learning, or many other varieties of structured or emergent curriculum approaches. Environmental education focused on both the intrinsic development of the learner in his or her culture as it is about the human relationship to nature.

The Residency track involves a close collaboration between Huxley College and the North Cascades Institute (NCI). NCI awards a Certificate in Leadership and Nonprofit Administration for completion of the residency. Northwest Naturalist Certification is also offered. Students in this track produce a portfolio of projects stemming from coursework and the residency, including curriculum design, natural history, nonprofit organization, evaluation, and professional presentation; in addition they must pass a comprehensive exam. This program does not provide teacher certification. If desired, that must be pursued separately. All graduate students are expected to develop and implement creative projects that will aid their own practice, with the guidance and advice of the program advisor and other teachers.

Prerequisites

All applicants should have experience in the field of environmental education and a basic background in natural history. Each applicant's background will be examined to determine if additional preparation is needed.

Application Information

Admit Quarter: This track admits students only in the summer.

Deadline: For priority consideration, applications should be received by February 1.

Supporting Materials:

- Graduate Record Exam or Miller Analogies Test and official transcript(s) and three letters of reference; applicants with advanced degrees are not required to submit test scores
- North Cascades Institute supplemental application and questionnaire <http://ncascades.org/study>

Program Requirements (45 credits)

- Core requirements (20 credits)
 - ENVS 501 - Research and Projects in Environmental Studies
 - ENVS 582 - Curriculum in Environmental Education
 - ENVS 585 - Environmental Education Foundations
 - ENVS 587 - Conservation Psychology
 - ENVS 588 - Assessment, Evaluation and Research in Environment Education
- A written and oral comprehensive exam
- Requirements in specialization (25 credits)
 - ENVS 580 - Place-based Learning in the North Cascades
 - ENVS 581 - Practicum in Teaching Natural and Cultural History
 - ENVS 583 - Natural History and Science of the North Cascades
 - ENVS 584 - Leadership and Nonprofit Administration
 - ENVS 589 - Professional Writing and Presentation

Program Advisor: Dr. Andy Bach, Arntzen Hall 226, (360-650-4774)

Program Goals

The program prepares students in the development and management of environmental resources for careers in business, government, planning, consulting, teaching and research.

The focus of the MS degree in geography is on the development and management of environmental resources. The program is designed to allow students to develop and integrate social and natural science course work in a regional context. Students are provided with an opportunity to understand the spatial, ethical and societal (cultural) basis for the protection and management of resources.

MS Specializations

- **Resource Conservation and Management:** Study of biophysical and socioeconomic processes in natural systems; a variety of perspectives and techniques are used to investigate and assess management and development policies.

ENVIRONMENTAL STUDIES

- **Regional Development and Environmental Policy:** Study of regional economic development processes in the context of development and planning; environmental elements — natural and human — are examined in framing development plans and policies toward improving regional community service
- **Earth Surface Processes:** Study of physical processes occurring at the earth/atmosphere interface; coastal, glacial, hillslope, eolian, fluvial and soil environments are examples of the complex and dynamic systems which are examined under conditions of alteration by human or natural forces

Prerequisites

Students with a degree in geography or allied fields, who meet the requirements of the Graduate School and who show evidence of superior scholarship, are particularly encouraged to apply. Students with degrees in fields other than geography will be considered but must acquire background, under advisement, through course work or other approved methods, in introductory human or cultural geography, introductory physical geography, regional geography, a GIS course, and two upper-division courses or equivalent in physical geography/geographic information science or urban/economic geography. Knowledge of intermediate-level statistics is required of all students as evidenced by satisfactorily completing course work or as assessed by the program advisor. A plan for completion of any outstanding prerequisites must be described in the statement of purpose and approved by the Department of Environmental Studies Graduate Program Committee prior to admission.

Admissions Information

Deadline: Students generally will be admitted into the MS in geography fall quarter only. Admission for subsequent quarters will be considered on a space-available basis. The Graduate Program Committee will begin reviewing application materials until the enrollment limit is reached or on June 1, whichever comes first. Because maximum student enrollment is limited, all applicants are strongly encouraged to submit application materials by February 1.

TA Deadline: To be considered for a graduate teaching assistantship, applicants must submit their application materials by February 1.

Specific Test Requirements: Graduate Record Exam, General Test; applicants with advanced degrees are not required to submit GRE scores.

Supporting Materials: An application for admission into the MS program in geography must include a one- to two page statement of purpose indicating which specialization the applicant is most interested in, explaining why the applicant wishes to pursue graduate studies in geography, and what future expectations she or he has for the MS degree. The statement may indicate a preferred faculty advisor; students are encouraged to review faculty research interests as described on the Huxley website, huxley.wvu.edu/department-overview-page, prior to contacting potential advisors; students are admitted to the program only upon agreement of potential faculty advisors.

Program Requirements (minimum 45 to 69 credits)

- EGEO 501 - History and Philosophy of Geography
- EGEO 502 - Geographic Frameworks for Resource Analysis
- EGEO 503 - Research Problems
- EGEO 504 - Geographic Methods and Techniques
- 17 credits of elective courses selected under advisement
- 12 credits of EGEO 690 - Thesis
- 10 credits or less of approved 400-level work may be included in the program. No more than 4 elective credits of EGEO 595 (teaching practicum) may be used toward the MS degree in geography.

Additional Information

Thesis

The thesis requires satisfactory completion of a research project emphasizing original theoretical or applied research and resulting in a comprehensive written thesis. The candidate will provide a public seminar based on the thesis, after an oral defense and acceptance of the thesis by the candidate's thesis committee.

Committee Makeup

The thesis committee will have a minimum of two graduate faculty members from Huxley College; one will serve as chair. One of these two members is to be a geographer. The third member, with approval of the graduate advisor and Graduate School, can come from elsewhere.

Thesis Proposal Presentation

The student is to make a public presentation of her/his proposed research, followed by questions and discussion. The purpose of this presentation is to allow the student to share his/her proposed research with a broader audience than the thesis committee to facilitate further refinement of the work. The student may be asked to expand the discussion on specific theoretical and/or empirical content of her/his intended thesis, as well as the broader scholarly field. The presentation will be made as soon as the student and the thesis committee have agreed upon a topic, typically in the third quarter of residency. Major changes to the thesis topic will require a new presentation at the discretion of the thesis committee.

Minor

Disaster Risk Reduction Minor

Department of Environmental Studies, Huxley College of the Environment

24-27 credits

Introduction

Huxley College's disaster reduction and emergency planning minor is designed to introduce the student to natural hazards, their impacts on society, and strategies for reducing these impacts. All students at Western may apply for admittance through the Department of Environmental Studies office at any time.

Contact Information

Department Chair

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Applicants should submit a WWU transcript and academic history, a WWU transfer equivalency report, if applicable, and a 500-word essay explaining how the minor would enhance the applicant's major studies and career goals. Admission to the minor is competitive and space is limited.

Grade Requirements

A grade of C- or better is required for all students' minor courses.

Requirements

- ENVS 362 - Theory and Practice of Emergency Management
- ENVS 372 - Natural Hazards Planning
- ENVS 465 - Disaster Risk Reduction
- ENVS 476 - Disaster Reduction and Emergency Planning Studio
- ENVS 203 - Physical Geography (or equivalent course with advisor permission)
- One course from (or equivalent course with advisor permission):
 - ENG 302 - Introduction to Technical and Professional Writing

ENVIRONMENTAL STUDIES

ENVS 319 - Research and Writing

- Select one upper division course of 2 credits or more, from the list below, in consultation with minor advisor:

COMM 322 - Civil Discourse as Learning Interaction
ENVS 340 - Developing World
ENVS 400 - Directed Independent Study
ENVS 419 - Applications in GIS
ENVS 442 - Regional Environmental and Economic Resource Modeling
ENVS 454 - Environmental Policy Analysis
ENVS 457 - Environmental Dispute Resolution
ENVS 470 - Planning Methods
ENVS 497A - Perception of Environmental Risk
ESCI 392 - Introduction to Global Change
FIN 454 - Risk Management and Insurance
JOUR 330 - Principles of Public Relations
PLSC 353 - State and Local Politics
PLSC 390 - The Politics of Development
SOC 340 - Sociology of Organizations
SOC 348 - Global Health

Environmental Education Minor

Department of Environmental Studies, Huxley College of the Environment

29-30 credits

Introduction

The goal of the environmental education minor is that the student understand and be able to use basic environmental education approaches within the context of such careers as environmental science, environmental policy, sustainability, and so on. The minor equips the student with conceptual foundations and beginning methods in environmental education together with natural history and humanistic background for understanding human relations with the environment.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Students must declare their minor in ES 539.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- ENVS 305 - Environmental History and Ethics
- ENVS 381 - Introduction to Education for Environment and Sustainability
- ENVS 492 - Curriculum for Environment and Sustainability
- ESCI 330 - Natural History of the Pacific Northwest
- One course from:

- ESCI 325 - Fundamentals of Ecology
- ESCI 310 - Environmental Systems
- Specialized electives (10 credits):
 - ENVS 300- and 400-level
 - Or other approved 300- and 400- level course

Environmental Policy Minor

How to Declare (Admission and Declaration Process):

Students must declare their minor in ES 539.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- ENVS 304 - Environment and Resource Policy
- One course from:
 - ENVS 202 - Introduction to Environmental Studies and Sustainability
 - ENVS 316 - Explorations in Environmental Studies
- One course from each of the four categories of environmental policy:
 - Law - One course from:**
 - ENVS 343 - Urbanization: Processes and Patterns
 - ENVS 461 - Land Use Law
 - Planning - One course from:**
 - ENVS 361 - Introduction to Planning
 - ENVS 443 - The Urban Environment
 - Policy - One course from:**
 - ENVS 450 - Science in the Policy Process
 - ENVS 451 - Natural Resource Policy
 - ENVS 454 - Environmental Policy Analysis
 - Skills - One course from:**
 - ENVS 456 - Environmental Governance
 - ENVS 457 - Environmental Dispute Resolution

Students must declare their minor in ES 539.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- ENVS 320 - GIS I: Introduction to Geographic Information Science
- ENVS 321 - GIS II: Computer Cartography
- ENVS 420 - GIS III: Analysis and Modeling
- ENVS 421 - GIS IV: Advanced GIS Applications
- Two courses from the following list or by advisement:
 - ENVS 419 - Applications in GIS
 - ENVS 422 - Advanced Spatial Analysis
 - ENVS 423 - GIS Processing and Analysis
 - ESCI 442 - Introduction to Remote Sensing

Geography Minor

Department of Environmental Studies, Huxley College of the Environment

25 credits

Introduction

Geography is the science of place and space, Geographers ask where things are located on the surface of the Earth, why they are located where they are, how places differ from one another, and how people interact with the environment. Geography links the social sciences and natural sciences together, studying the relationships between human activity and natural systems.

Why Consider a Geography Minor?

Are you curious about the world, and its physical and human dimensions? Do you love maps? Are you comfortable with spatial problem solving?

How to Declare (Admission and Declaration Process):

Students must declare their minor in ES 539.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- ENVS 203 - Physical Geography
- ENVS 204 - Human Geography
- 17 Elective credits of upper division courses under departmental advisement from:

ENVIRONMENTAL STUDIES

ENVS 319 - Research and Writing
ENVS 320 - GIS I: Introduction to Geographic Information Science
ENVS 321 - GIS II: Computer Cartography
ENVS 322 - Analysis of Spatial Data
ENVS 326 - Climatology
ENVS 327 - The Soil Environment
ENVS 330 - The United States: Society and Environment
ENVS 331 - Canada: Society and Environment
ENVS 332 - The Pacific Northwest: Society and Environment
ENVS 333 - East Asia: Society and Environment
ENVS 334 - South Asia: Society and Environment
ENVS 335 - The Middle East: Society and Environment
ENVS 340 - Developing World
ENVS 341 - Population and Resources
ENVS 342 - Geography of the World Economy
ENVS 343 - Urbanization: Processes and Patterns
ENVS 419 - Applications in GIS
ENVS 420 - GIS III: Analysis and Modeling
ENVS 421 - GIS IV: Advanced GIS Applications
ENVS 422 - Advanced Spatial Analysis
ENVS 423 - GIS Processing and Analysis
ENVS 426 - Water Resources
ENVS 427 - Soil Landscapes
ENVS 428 - Biogeography
ENVS 430 - Borderlands: Resource Management
ENVS 431 - Pacific Rim: Environment, Economy and Sustainability
ENVS 441 - Society, Space, and Natural Resources
ENVS 442 - Regional Environmental and Economic Resource Modeling
ENVS 443 - The Urban Environment
ENVS 444 - Colonial Landscapes in the Pacific Northwest

Sustainable Design Minor

Combined minor offered by the Department of Environmental Studies, Huxley College of the Environment and the Department of Engineering and Design, College of Science and Engineering

30-34 Credits

Introduction

Huxley College of the Environment and the Department of Engineering Technology jointly offer a minor in Sustainable Design. The goal of the program is to enable students with strengths in design or in environmental studies to gain complementary skills in the other area so as to pursue sustainable design careers more effectively. The program is also open to students from any area that would benefit by the set of concepts and skills offered.

Contact Information	
Department Chair Gigi Berardi Arntzen Hall 204 360-650-2106 Gigi.Berardi@wwu.edu	Huxley College Admissions Advisor Kathryn Patrick Environmental Studies 539 360-650-3520 Kathryn.Patrick@wwu.edu
Major/Career Resources http://www.wwu.edu/careers/students_choosingamajor.shtml	

How to Declare (Admission and Declaration Process)

Students are accepted into the sustainable design minor by application based on their demonstrated affinity to integrate environmental systems knowledge and sustainable design principles, and on enrollment limits. Students submit an application and a portfolio of work. Applications are accepted semi-annually on the third

Friday of fall and spring quarters. See WWU Industrial Design website and the Huxley College of the Environment website.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- ENVS 116 - Sustainability Literacy I
- ENVS 361 - Introduction to Planning
- ENVS 471 - Campus Sustainability Planning Studio
- ENVS 474 - Planning for Sustainable Communities
- ID 110 - Industrial Design Foundation 1
- ID 320 - Industrial Design CAD Skills
- One course from: *
 - ESCI 325 - Fundamentals of Ecology
 - ESCI 380 - Energy and Environment
 - ESCI 392 - Introduction to Global Change
 - ENVS 304 - Environment and Resource Policy
 - ENVS 305 - Environmental History and Ethics
 - FAIR 335N - Visioning Sustainable Futures
 - *or approved substitute
- Electives under advisement (6-8 credits):
 - ACCT 484 - Environmental Accounting/ Sustainability Reporting
 - ECON 383 - Environmental Economics
 - ECON 384 - Energy Economics
 - ESCI 302 - Environmental Pollution
 - ESCI 310 - Environmental Systems
 - ESCI 325 - Fundamentals of Ecology **
 - ID 130 - History of Industrial Design
 - ID 310 - Perspective and Rendering 1
 - **ESCI courses cannot be counted twice

WWU Certificate (Non-Degree)

Geographic Information Science Certificate

Department of Environmental Studies, Huxley College of the Environment

31-33 credits

Introduction

The Geographic Information Science Certificate provides students with in-depth training in Geographic Information Science theory and techniques. Through an intensive series of courses in GIS, statistics, and remote sensing and the completion of original research projects, students will gain advanced skills in the development, management, analysis, and visualization of spatial data. The certificate prepares students for careers as geospatial analysts and GIS technicians, and is a valuable complement to many majors.

Gigi.Berardi@wwu.edu
 Major/Career Resources

ENVIRONMENTAL STUDIES

http://www.wvu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

- Letter of intent stating a) why you are interested in completing the GIS Certificate, b) how your prior education and work experience has prepared you for the GIS Certificate, and c) your career goals.
- Resume outlining your education and professional history.
- Official Transcripts: only required if you previously completed relevant coursework at another institution.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- One course from the following list or by advisement:
 - DSCI 305 - Applied Business Statistics
 - ENVS 322 - Analysis of Spatial Data
 - ESCI 340 - Biostatistical Analysis
 - ENVS 320 - GIS I: Introduction to Geographic Information Science
 - ENVS 321 - GIS II: Computer Cartography
 - ENVS 420 - GIS III: Analysis and Modeling
 - ENVS 421 - GIS IV: Advanced GIS Applications
 - ENVS 422 - Advanced Spatial Analysis
 - ESCI 442 - Introduction to Remote Sensing
 - 3-4 credits from the following list or by advisement:
 - ENVS 419 - Applications in GIS
 - ENVS 423 - GIS Processing and Analysis
 - ENVS 498B - Internship
- *300-level course requirements may be waived in some cases based on the applicant's prior completed courses and work history.

Environmental Studies Courses

ENVS 110 - Ecogastronomy: The Art and Science of Food

An introduction to the art and science of food production through scholarly and journalistic critiques of food systems and cultures. Topics include the Slow Food movement and gastronomical sciences, ecological agriculture, sensory taste science, and the political economy of food.

Credits: 2
Grade Mode: Letter
GUR Attributes: SSC

ENVS 111 - Ecogastronomy Discussion

This is a discussion-oriented class to accompany ENVS 110: An introduction to the art and science of food. The class will include discussion of the regional geography of agriculture and consumption

patters, Slow Food as a social movement, and ideas for sensible food systems in a university setting.

Credits: 1
Grade Mode: Letter
GUR Attributes: SSC

ENVS 116 - Sustainability Literacy I

This course is an introductory course in sustainability literacy. This course reviews emerging issues in global sustainability studies and introduces students to writing and problem solving skills. Emphases are in multidisciplinary approaches that address complex social, environmental, and economic interrelationships in sustainable development.

Credits: 3
Grade Mode: Letter

ENVS 118 - Topics in Environmental Studies - College Quest

Study of various environmental topics. Supported

through Extended Education & Summer Programs, College Quest youth program is offered exclusively to high school students (grades 10-12). Not available to Huxley majors. Repeatable to 4 credits. S/U grading.

Credits: 1-2
Grade Mode: S/U

ENVS 195 - Local Perspectives on Environment and Sustainability (Viking Launch)

Explore climate science through research and field observations, with a special focus on the Nooksack River watershed and examine the environmental impacts of our energy, waste, food and transportation choices. Discover how local schools, governments, non-profit organizations, businesses and individuals are working together to help solve the problems associated with climate change and take action by participating in a service learning project. Acquire carbon footprint analysis training and work with staff at the Washington Department of Ecology Bellingham field office to implement their 'Carbon Smart at Work' program. Document your experience with photographs, field audio and writing to create a culminating presentation. S/U grading.

Credits: 2
Grade Mode: S/U

ENVS 201 - Understanding Environmental Data and Information

This class will help students navigate the complicated intersection of peer-reviewed scientific literature and the popular news media outlets that often report on environmental research and news. The intention of the class is to introduce the basic logical, statistical, and analytical tools necessary for broad participation in environmental fields including both physical and social sciences.

Prerequisites & Notes: Suitable General Math Placement Test score or MATH 112 with a C- or better.

Credits: 3
Grade Mode: Letter
GUR Attributes: QSR

ENVS 202 - Introduction to Environmental Studies and Sustainability

A basic overview of environmental issues in the United States and globally. An emphasis will be placed on environmental and human sustainability in a social science context.

Credits: 3

Grade Mode: Letter
GUR Attributes: SSC

ENVS 203 - Physical Geography

Principles and techniques in analysis of areal distribution in the natural environment; landforms, water, climate, soils, vegetation.

Prerequisites & Notes: Minimum of one university-level natural science GUR.

Credits: 4
Grade Mode: Letter
GUR Attributes: LSCI

ENVS 204 - Human Geography

This course explores regional patterns of population and settlement across the globe and introduces students to concepts and techniques in the spatial analysis of economic, cultural, and political organizations.

Credits: 4
Grade Mode: Letter
GUR Attributes: SSC

ENVS 220 - Map Reading and Analysis

Interpretation of map symbols and content at different scales; introduction to coordinate systems and map projections; analysis of different types of maps and charts.

Credits: 3
Grade Mode: Letter

ENVS 221 - Geographic Information Science Survey

Introduction to computer-based tools for describing, analyzing and providing decision making on geographical issues. Provides a survey of computer- and Web- based tools such as Geographic Information Systems, electronic atlases, thematic mapping systems, computer cartography and remote sensing through lectures and hands-on activities.

Prerequisites & Notes: Suitable Intermediate Math Placement Test score or MATH 112 with a C or better.

Credits: 3
Grade Mode: Letter
GUR Attributes: QSR

ENVS 240 - Geography and World Affairs

Geographical analysis of selected demographic, economic, political and social problems of the contemporary world.

ENVIRONMENTAL STUDIES

Credits: 2

Grade Mode: Letter

GUR Attributes: SSC

ENVS 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ENVS 303 - Human Ecology and Sustainability

The course provides an in-depth look at human and environmental systems interaction. As such, students need familiarity with environmental concepts, either through ENVS 202 or through the Huxley major prerequisites. Some students with self-designed majors or Huxley minors may also be well prepared and can enter through instructor permission.

Prerequisites & Notes: Huxley majors or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 304 - Environment and Resource Policy

An examination of environmental and resource policy in the United States. What is policy, how is it made and how does it change? The history of environmental policy is examined, and current environmental policy surveyed. Federal, state, regional and local jurisdictions and how they interact in the policy arena are examined. Primary forces affecting environmental policy are reviewed and analyzed. Several case studies are presented.

Prerequisites & Notes: Huxley majors or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 305 - Environmental History and Ethics

Inquiry into the historical and ideological origins of socio-environmental dilemmas and responses to them, and examination of ethical assumptions and approaches for determining how to balance the varied interests and risks these dilemmas entail.

Prerequisites & Notes: Huxley major or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 306 - Readings in Env Studies

This is a variable credit, directed readings course. Course will foster critical analysis and independent thought and learning in the field of environmental studies. Students will critically examine data and information used to support a particular point of view. This course is only offered through EESP as correspondence course.

Prerequisites & Notes: ENVS 202 or instructor permission.

Credits: 1-6

Grade Mode: Letter

ENVS 307 - Writing in Environmental Studies

This is a variable credit, directed writing intensive course. Course will foster critical analysis and independent thought and learning in the field of environmental studies. Students will critically examine data and information used to support a particular point of view. The course is designed to enable students to satisfy from one to three upper-division writing proficiency points. This course is only offered through EESP as a correspondence course.

Prerequisites & Notes: ENVS 202 or instructor permission.

Credits: 1-3

Grade Mode: Letter

ENVS 308 - National Parks: History of an American Innovation

Survey of the history, purpose, and meaning of the US national park system; and what the parks reveal about American culture and attitudes toward nature. This course is only offered through EESP as a correspondence course.

Prerequisites & Notes: ENVS 202 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 316 - Explorations in Environmental Studies

Introduction to solving environmental problems in a policy context, applications of analytical, written, verbal and quantitative skills to address environmental concerns in an interdisciplinary manner.

Prerequisites & Notes: Declared Huxley major or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 319 - Research and Writing

Source materials, research and writing techniques; emphasis on the nature and development of geography and planning.

Prerequisites & Notes: ENVS 203, ENVS 204 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 320 - GIS I: Introduction to Geographic Information Science

An introduction to Geographic Information Science concepts and Geographic Information Systems (GIS) technology. Lectures will focus on the nature of spatial data, spatial data sources, and the input, manipulation, analysis, and display of spatial data. Practical experience in GIS applications through lab assignments.

Credits: 4

Grade Mode: Letter

ENVS 321 - GIS II: Computer Cartography

Map layout, design and production using computer techniques. Methods and limitations of graphic communication are emphasized.

Prerequisites & Notes: ENVS 320; or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 322 - Analysis of Spatial Data

Intermediate level statistical techniques commonly used in solving geographic problems.

Prerequisites & Notes: ENVS 201.

Credits: 4

Grade Mode: Letter

ENVS 326 - Climatology

Climatic processes, including patterns of climates at various scales; applied climatology; climatic change.

Prerequisites & Notes: ENVS 203, PHYS 101 or PHYS 114 recommended.

Credits: 4

Grade Mode: Letter

ENVS 327 - The Soil Environment

A soil science perspective on soils as a natural body. Introduction to the physical and chemical characteristics of soil, the description and classification of soils under the USDA system, and the processes of soil formation.

Prerequisites & Notes: ENVS 203 or GEOL 211.

Credits: 4

Grade Mode: Letter

ENVS 330 - The United States: Society and Environment

Topical and regional approaches to selected elements of the physical environment and cultural and economic characteristics of the nation.

Prerequisites & Notes: ENVS 204 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 331 - Canada: Society and Environment

This course explores relationships between people and the environment in the territory that has come to be known as Canada; emphasis is placed upon the history of such relationships. Topics include: physical geography, Aboriginal geographies, Native-Newcomer interactions, evolving and contested political boundaries, resource use and ecological crisis, and urban development. Also offered as C/AM 331.

Prerequisites & Notes: ENVS 203 or ENVS 204 or ENVS 240 or HIST 277 or C/AM 200 or instructor permission.

Credits: 3

Grade Mode: Letter

GUR Attributes: BCGM

ENVS 332 - The Pacific Northwest: Society and Environment

Examination of distribution and character of economic activity, population plus settlement and role of climate, landforms and resources in distributions. Offered alternate years.

Prerequisites & Notes: ENVS 203 or ENVS 204 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 333 - East Asia: Society and Environment

Survey of physical environment, sustainability, peoples, regions and resources of East Asia; problems and prospects. Also offered as EAST 333.

Prerequisites & Notes: One from: ENVS 203 or ENVS 204 or ENVS 221 or ENVS 240 or EAST 201 or EAST 202 or instructor permission.

Credits: 3

Grade Mode: Letter

GUR Attributes: ACGM

ENVIRONMENTAL STUDIES

ENVS 334 - South Asia: Society and Environment

Systematic analysis of the physical and human environment of South Asia; emphasis on developmental problems.

Prerequisites & Notes: ENVS 204 or instructor permission.

Credits: 3

Grade Mode: Letter

GUR Attributes: ACGM

ENVS 335 - The Middle East: Society and Environment

Environments, economies and societies of Southwest Asia and North Africa; emphasis on current problems.

Prerequisites & Notes: ENVS 204 or instructor permission.

Credits: 3

Grade Mode: Letter

GUR Attributes: ACGM

ENVS 340 - Developing World

Analysis of selected geographical problems of major countries and regions of Africa, Asia and Latin America; population pressure, agricultural productivity; resource appraisal and utilization; urban industrial growth; urban and regional planning.

Prerequisites & Notes: ENVS 204.

Credits: 4

Grade Mode: Letter

ENVS 341 - Population and Resources

World distribution of population, patterns of population composition, fertility and mortality. Inter- and Intra- regional migrations; resources and population growth.

Prerequisites & Notes: ENVS 204 or SOC 321.

Credits: 4

Grade Mode: Letter

ENVS 342 - Geography of the World Economy

Location analysis of the geography of global economic activities; interrelationships of resources, development, industry, trade, transportation, culture, demographics, and migration.

Prerequisites & Notes: ENVS 204 or ECON 206 or HNRS 209 or instructor permission.

Credits: 4

Grade Mode: Letter

GUR Attributes: SSC

ENVS 343 - Urbanization: Processes and Patterns

Geographic focus upon the development, functions and problems of the modern city with emphasis on American patterns.

Prerequisites & Notes: ENVS 204.

Credits: 4

Grade Mode: Letter

ENVS 344 - Community Solutions to Climate Change

In this course we examine the ways that North American communities are adapting to climatic change.

Prerequisites & Notes: ENVS 202; ENVS 203; or ENVS 204; or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 350 - Energy Policy and Politics

This course will allow students to understand the history of energy policy within the U.S.; gain an understanding of the major actors in energy policy; and explore the implications for energy policy from local to global levels. A specific focus will be placed on energy issues as they pertain to the Pacific Northwest. Also offered as ENRG 350.

Prerequisites & Notes: Huxley or CBE or CST major or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 359 - Greening Business Policy and Practice

This course will provide both a survey and applications of major U.S. and Washington state policies and practices supporting the greening of business. Also offered as MGMT 359.

Prerequisites & Notes: Completion of Huxley ENVS Major Phase I or ESCI Major or CBE Major or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 360 - Plan Graphics: Methods in Urban Planning Design Graphics

Introduction to the application of graphic design technology to plan design using computer aided design, publication layout, image presentation, and video editing software.

Prerequisites & Notes: Declaration of Major in Urban Planning and Sustainable Development.

Credits: 2

Grade Mode: Letter

ENVS 361 - Introduction to Planning

Principles and practices in urban development and public planning in the United States. Concepts of planning as a community process and professional activity. Evolution of planning ideas in response to changing social, economic, and environmental conditions within the American political framework. Survey of the specialized fields in planning practice, emphasizing the emerging field of environmental planning.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 362 - Theory and Practice of Emergency Management

This course provides a broad introduction to the historical and theoretical perspectives of emergency management policies and practices. Students will learn how theories are used to inform the practice of disaster and emergency management. Fundamental principles of risk, vulnerability, and emergency planning are examined relative to natural, technologic, and health related hazards, from an interdisciplinary perspective. Federal, state, and municipal legislation and regulations will be examined for their implications on mitigation, preparedness, response and recovery. Students will understand the roles and professional responsibilities of emergency managers in preparing and implementing all-hazards plans and policies.

Credits: 4

Grade Mode: Letter

ENVS 368 - Exploring Great Cities

Field methods course examining great cities. Concepts and themes in human geography and urban planning provide a framework for the analysis of the human environments and the forces and efforts that shape them. Course is repeatable up to 12 credits; course may only be taken once for each destination.

Prerequisites & Notes: Instructor permission.

Credits: 1-4

Grade Mode: Letter

ENVS 370 - History of Planning

Survey of the origins, development and significance of the planning movement in the United States and the profession that emerged

from it. The seminal innovators, practices and achievements in American planning.

Prerequisites & Notes: ENVS 361 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 372 - Natural Hazards Planning

This interdisciplinary course emphasizes creation of safer human settlements through application of hazard mitigation strategies in community planning, site selection and layout, infrastructure design, and building design. The course provides a survey of meteorological and geological hazards and discusses the mandates and responsibilities of various levels of government. It integrates insights from environmental design disciplines for minimizing losses from natural hazards such as global warming, severe storms, wildfires, flooding, earthquakes, and landslides. Students obtain an introductory knowledge of routine planning, design, engineering and public policy tools for reducing losses from natural hazards, and facilitating suitable post-disaster redevelopment. Students gain hands-on experience through projects assessing existing mitigation plans, researching case studies, and working in teams to develop natural hazard mitigation strategies for jurisdictions at risk.

Prerequisites & Notes: ENVS 203 or GEOL 211; ENVS 361 or instructor permission.

Credits: 5

Grade Mode: Letter

ENVS 373 - Transportation Systems and Planning

Locational and network analysis and modeling of local, regional and national systems. Also, investigation of alternatives to traditional transportation modes.

Prerequisites & Notes: ENVS 361 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 374 - Land Use Regulation & Technical Writing

This course examines the basic tools used to regulate the development and redevelopment of land. The operation and limits of tools such as zoning, subdivision plats, variances, and growth management will be discussed. Examples, which will be reviewed and critiqued, will be drawn from local and state governments. Participants will write various technical documents and interact with planning professionals responsible for writing and

ENVIRONMENTAL STUDIES

implementing land use regulations.

Prerequisites & Notes: ENVS 361 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 381 - Introduction to Education for Environment and Sustainability

An introduction to environmental education and an examination of current thinking and practices including connections to sustainability. Focus on history, evolution, and need for environmental education, and on its goals and principles, content, settings, methods and processes approached through reading, reflection, discussion and project work.

Prerequisites & Notes: Admission to Huxley College or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ENVS 401 - Cultures of Sustainability

This is a field course examining the cultural dimension of the sustainability movement. The specific topic will vary, but will include an examination a particular practice of sustainability in relation to the goals of the movement, and its relation to other cultural phenomena. There is a special emphasis on direct student engagement in field work, and on discourse analysis. It is likely the course will require a fee, variable on location of field trips. Course is repeatable up to 4 credits, including original course; course may only be taken once for each destination.

Prerequisites & Notes: Instructor Permission Required. Age restrictions may apply to some field trip site visits; exceptions may be granted by instructor.

Credits: 1-4

Grade Mode: Letter

ENVS 404 - Environmental Grant Writing

An introduction to the essential skills required to

identify potential grant sources and prepare effective environmental grant applications.

Prerequisites & Notes: Junior or senior standing or instructor permission.

Credits: 1

Grade Mode: Letter

ENVS 405 - Puget Sound research

Students attend a conference as participants, learning how the scientific community shares information. Students will prepare by reading scientific journal research articles related to the Puget Sound area. Students will also conduct their own review of scientific literature, with the class culminating with a formal student conference.

Prerequisites & Notes: Huxley on the Peninsula major or permission of instructor.

Credits: 3

Grade Mode: Letter

ENVS 406 - Advanced Readings in Environmental Studies

This is a variable credit, advanced readings course allowing interested students to earn from 1 to 6 academic credits through their own personal study of environmental topics. The purpose of the course is to foster independent thought and learning in the field of environmental studies placing most of the responsibility for learning on the student. This course is only offered through EESP as a correspondence course.

Prerequisites & Notes: Junior Standing; ENVS 202 or instructor permission.

Credits: 1-6

Grade Mode: Letter

ENVS 410 - Agroecology and Sustainable Agriculture

Ecological concepts and principles applied to design and management of sustainable food production systems. Consideration given to food and farm politics and economics, as well as the experience of place and policies for relocalization. Includes case studies and laboratory/field experience in sustainable agriculture horticulture and strategies for resilience. Offered alternate years.

Prerequisites & Notes: Senior status.

Credits: 4

Grade Mode: Letter

ENVS 411 - Agroecology Practicum

Field and project work in agroecology and sustainable agriculture design that integrates ecological principles within sociocultural and

economic frameworks. Consideration of soil and plant ecology, tillage systems and erosion control, resource cycling, and integrated nutrient systems that compromise best management practices. Required field trips. Offered in alternate years.

Prerequisites & Notes: ENVS 410 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 412 - Environmental Journalism

Goal is to equip students to report and write clearly, critically and constructively on environmental and natural resource issues. Emphasis on writing articles for publication involves reading, discussion, and much research and writing.

Prerequisites & Notes: JOUR 207; ESCI 101 or ENVS 202.

Credits: 4

Grade Mode: Letter

ENVS 413 - The Planet Staff

Staff writers report, write and revise multiple articles for the quarterly university periodical and its extended online edition, working under the direction of the editor-in-chief and editorial management staff. Staff writers gain practical experience in story querying, reading scientific or policy documents, interviewing specialists and conveying technical information on environmental problems and solutions for a general audience. Class includes some lectures and readings. Repeatable up to 12 credits including original course.

Prerequisites & Notes: Open to all Huxley majors, minors, Journalism pre-majors, majors, and minors; or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 414 - Editing the Planet

Publication editing and development; creating and implementing budget and advising on budget decisions; acting as mentor to assigned staff members; preparing reports and presentations for class and instructor; assisting with and taking part in workshops; office management and security; learning personnel communication skills; using advanced publication software and technology; making self-evaluation and production reports for advisor. Repeatable to a maximum of 15 credits. This course may not be taken concurrently with a staff course.

Prerequisites & Notes: Open to editors only.

Credits: 5

Grade Mode: Letter

ENVS 416 - Field Seminars in Environmental Studies

Study of various environmental topics and issues of the Pacific Northwest. Course is supported through Extended Education & Summer Programs/Continuing Education North Cascades Institute. Specific topics designed for adult learners. Not available to Huxley College majors. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Not available to Huxley majors.

Credits: 1-6

Grade Mode: S/U

ENVS 417 - Science, Management and Outreach of Contaminated Sites

Students select an aspect of contaminated site cleanups in Washington State and develop a project under faculty direction that will address specific questions or needs. Projects may include technical components related to the management of site cleanup and/or products aimed at communicating contaminated site cleanup to specific audiences. Projects will be completed in groups with ESCI 454. Students are expected to bring strong environmental journalism, environmental communication or other project-specific skills to their interdisciplinary project groups.

Prerequisites & Notes: Instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 419 - Applications in GIS

Applied use of GIS software to existing databases for analysis and final outputs as maps, tables and charts. Mastery of the software will be at the beginner's level, master of GIS techniques will be at the thematic mapping level. Data will be drawn from electronic databases and include tabular, cartographic, and remotely sensed.

Prerequisites & Notes: ENVS 320 or permission of instructor.

Credits: 3

Grade Mode: Letter

ENVS 420 - GIS III: Analysis and Modeling

The use of Geographic Information Systems technology for analysis and modeling of spatial data and processes. Focus on the collection, storage, analysis, and display of spatial data.

ENVIRONMENTAL STUDIES

Introduction to the use of models to automate geoprocessing tasks. Practical experience in GIS application through lab assignments.

Prerequisites & Notes: ENVS 321 or instructor permission.
Credits: 4
Grade Mode: Letter

ENVS 421 - GIS IV: Advanced GIS Applications

Analysis and visualization of geospatial data using advanced cartographic methods and Geographic Information Systems techniques. Practical experience in GIS applications through lab assignments.

Prerequisites & Notes: ENVS 420.
Credits: 4
Grade Mode: Letter

ENVS 422 - Advanced Spatial Analysis

Advanced techniques for the analysis and visualization of spatial data. Focus on statistical methods and computer tools for identifying spatial patterns and processes, effective communication of results, and professional development for geospatial analysts. Introduction to open source analytical and cartographic software options, including the development of web maps and online professional portfolios. Students will compete an extensive original research project.

Prerequisites & Notes: ENVS 421.
Credits: 4
Grade Mode: Letter

ENVS 423 - GIS Processing and Analysis

Provides students with an introduction to advanced GIS geoprocessing using spatial models and object-oriented scripting. Intended for students familiar with GIS concepts and computer applications; the course is project based. Through lectures, demonstrations, and hands-on exercises, participants will learn different methods for automating spatial data processing tasks including data management, geoprocessing, analytic workflows and data delivery.

Prerequisites & Notes: ENVS 419 or ENVS 420 or permission of instructor.
Credits: 3
Grade Mode: Letter

ENVS 426 - Water Resources

The role of water in the environment; the nature of water use and resulting problems; processes which underlie comprehensive water resource planning

and basin management; data analysis and presentation. Offered alternate years.

Prerequisites & Notes: ENVS 326 or permission of instructor.
Credits: 4
Grade Mode: Letter

ENVS 427 - Soil Landscapes

Advanced topics in soils, including the functional relationships between climate, soils and vegetation, soil erosion, landscape patterns of soil, and the application of soils in paleoenvironmental reconstruction. Students will undertake research projects in the field.

Prerequisites & Notes: ENVS 327 or permission of instructor.
Credits: 4
Grade Mode: Letter

ENVS 428 - Biogeography

Study of the spatial distribution patterns of organisms through the integration of the many factors that have interacted to determine these patterns. Offered alternate years.

Prerequisites & Notes: ENVS 203; ENVS 326 or ESCI 325 or permission of instructor.
Credits: 3
Grade Mode: Letter

ENVS 429 - Pyrogeography

We will explore the spatial and temporal relationships of fire and society as an integral landscape process with an emphasis on the maintenance of North American ecosystems and the threat of wildfire to the built environment. We will assess historic and contemporary implications of fire management and policies, and where appropriate we will compare fire processes and practices from abroad. The course will end with interdisciplinary group projects delving into specific fire issues and developing proposals and solutions.

Prerequisites & Notes: Huxley senior status or instructor permission.
Credits: 4
Grade Mode: Letter

ENVS 430 - Borderlands: Resource Management

Geographic investigation of cross-border resource management and other issues associated with the growing importance of the United States' cross-border regions, especially our northern border with Canada; selected trans-border environmental, resource management, sustainability, economic,

and urban topics. Also offered as C/AM 430.

Prerequisites & Notes: One from: C/AM 200, ENVS 304, ENVS 330, ENVS 331, ENVS 332, ENVS 341, ENVS 342, ENVS 343, ENVS 350, ESCI 330 or Huxley senior status or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 431 - Pacific Rim: Environment, Economy and Sustainability

Geographic Investigation of the rapidly growing economies, environmental impacts, and issues of sustainability of Pacific Rim nations; special comparative emphasis on East Asia versus North America. Also offered as EAST 431.

Prerequisites & Notes: Any one of: ENVS 303 or ENVS 304 or ENVS 330 or ENVS 331 or ENVS 332 or ENVS 333 or ENVS 340 or ENVS 341 or ENVS 342 or EAST 302; or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 440 - Public and Stakeholder Engagement in Energy, Climate, and Environmental Policymaking

We examine different types of civic engagement in public policymaking about energy, climate, and environment through the lens of deliberative democracy. Students will learn to think critically and creatively about how the public, business, and organized interest groups can be effectively involved in policymaking. Also offered as ENRG 440.

Prerequisites & Notes: ENVS 304 and ENVS 350; or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 441 - Society, Space, and Natural Resources

This course explores natural resource valuation and management across a variety of political, economic, and cultural spaces in North America; Emphasis is placed on the interaction of social and natural processes in producing management regimes. Also offered as C/AM 441.

Prerequisites & Notes: One of the following: C/AM 331, ENVS 308, ENVS 330, ENVS 331, ENVS 341, ENVS 342, ENVS 343, or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 442 - Regional Environmental and Economic Resource Modeling

Spatial resource assessment and planning models, including quality of life, shift-share, input-output and linear programming under resource constraints, and demographic projections.

Prerequisites & Notes: Any one of: ENVS 201; ENVS 361 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 443 - The Urban Environment

Comparative patterns and processes of urban-economic change in the industrial and non-industrial world. Emphasis on urban environmental development issues and conflicts.

Prerequisites & Notes: ENVS 204 and ENVS 343.

Credits: 4

Grade Mode: Letter

ENVS 444 - Colonial Landscapes in the Pacific Northwest

This course provides description and analysis of the impact of European imperialism on the development of Pacific Northwest landscapes; the focus is on Indigenous, British, American, and Canadian geographical actions and territorial claims. Also offered as C/AM 442.

Prerequisites & Notes: One of the following: C/AM 331, ENVS 308, ENVS 330, ENVS 331, ENVS 332, HIST 391 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 449 - Energy Systems Transitions

This course explores the social and technological changes underway to transition from a fossil-fuel based energy system to a low-carbon system. We study the technology involved with existing and evolving electricity, transportation, food, and building energy systems and then interrogate the social, economic, and political structures that substantiate the existing system or promote change to a low carbon future. Also offered as ENRG 449.

Prerequisites & Notes: ENVS 304 and ENVS 350; or permission of the instructor.

Credits: 4

Grade Mode: Letter

ENVS 450 - Science in the Policy Process

This course uses theory and case studies to explore the roles of science in environmental policy and regulatory processes, paying particular attention to controversies. Examples will come primarily from the United States government, but

ENVIRONMENTAL STUDIES

may draw from international examples for comparative purposes. Topics will include a mixture of current events and historical case studies.

Prerequisites & Notes: Any one of: ENVS 201 or ENVS 202 or ENVS 203 or PLSC 250 or ENVS 304 or ENVS 305; or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 451 - Natural Resource Policy

Explores history, policy, conflicts, and current events around natural resources, with a particular emphasis on public lands and resource agencies.

Prerequisites & Notes: ENVS 304 or ENVS 450 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 452 - International Environmental Policy

Examines international environmental issues and national and international ways to address these issues, problems affecting the environmental 'commons' (such as oceans and the atmosphere), and issues relating to sustainable development, including aid and trade.

Prerequisites & Notes: ENVS 304 or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 454 - Environmental Policy Analysis

This course is an introduction to policy analysis as applied to contemporary environmental issues. Topics

include: competing approaches to evaluating public policy, methods for the assessment of environmental policy alternatives, ethics and policy analysis, and the utilization of policy analysis in decision-making.

Prerequisites & Notes: ENVS 201; ENVS 202; ENVS 203; PLSC 250 or ENVS 304 or ENVS 305 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 455 - Environmental Law

In-depth analysis of areas of environmental law that help to illustrate the range and complexity of US approaches to environmental problems. Issues include compensation for harm, enforcement, the best way to ensure compliance, and the underlying assumptions about chemicals in society that inform

the regulatory system.

Prerequisites & Notes: ENVS 304 or ENVS 450 or ENVS 456 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 456 - Environmental Governance

How do/should societies bring about change to improve social and environmental conditions? This course treats environmental governance as comprising the structure and activities of the social, political, and economic institutions that define our interactions with the environment. Students will examine several competing approaches to environmental governance, and readings will expose students to both laudatory and critical perspectives of each.

Prerequisites & Notes: Any one of: ENVS 202; PLSC 250; or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 457 - Environmental Dispute Resolution

Course considers several fact patterns involving disputes over natural resources and environmental issues. Students will study and, in some cases, research the facts and will be assigned roles to represent during dispute resolution sessions. Students have the opportunity to practice a range of dispute resolution techniques which may include negotiation, mediation, and other dispute resolution techniques.

Prerequisites & Notes: ENVS 304 or ENVS 455 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 458 - Environmental Politics

Examination of contending perspectives on environmental problems. Focus on how these perspectives are rooted in political philosophy, their roles in the development of environmental movements, and the implications for public policy. Offered alternate years. Also offered as PLSC 420.

Prerequisites & Notes: ENVS 202 or ENVS 304; PLSC 101 or PLSC 250.

Credits: 5

Grade Mode: Letter

ENVS 459 - Advanced Energy Policy

The goal of this course is to explore policy making and policy implementation in the context of energy technologies. Using case studies we will reveal the multidimensionality and tensions implicit in policy

debates. We will assemble a toolbox that enables us to innovate, assess, and promote policy options. Focus will be placed on policy solutions such as common pool resource management, community-based social marketing, civic dialogue, and analytic-deliberation. Also offered as ENRG 459.

Prerequisites & Notes: ENVS 350 or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 461 - Land Use Law

Land use planning is an attempt to reconcile the conflict between individual property rights and collective environmental goals. This course examines the American legal system's role in framing and resolving this dilemma. It provides an understanding of the legal framework that creates our unique 'bottom up' land use regulatory system. It also examines the practical and philosophical implications of federal constitutional restrictions on local government land use authority, including 'takings' and housing discrimination cases.

Prerequisites & Notes: ENVS 304 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 462 - Planning Theory

Survey of the philosophy, methods, critical thinking, and analytical techniques used in public planning. Synthesis of the theories drawn from several disciplines and applied to planning. Emphasis on the application of explanatory concepts in planning decision-making.

Prerequisites & Notes: ENVS 370 or ENVS 470 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 463 - Native American Planning and Natural Resources Policy

Survey of political and jurisdictional considerations, treaty rights, and social and environmental conditions facing tribal communities in their pursuit of self-governance and sustainability. Historic federal Indian policy, court rulings and the consideration of off-reservation treaty rights in regional planning. Approaches to intergovernmental cooperation for sustainable natural resources management. Offered alternate years.

Prerequisites & Notes: ENVS 304 or ENVS 361 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 464 - Topics in Planning

Survey of diverse roles of professional planners in the public and private sector, including multiple levels of government, non-governmental organizations, and specialized private consulting firms; examination of interaction between these professional planning organizations with broader governmental structures; investigation of their involvement with political, social, economic and environmental issues. Includes regular field trips.

Prerequisites & Notes: ENVS 361 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 465 - Disaster Risk Reduction

This course introduces students to the assessment of disasters, focusing primarily on the social aspects of disasters. The course deals with the question 'What causes a disaster?'

Prerequisites & Notes: ENVS 362; ENVS 372; or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 466 - Greening Business Applications

This course is an experiential capstone combining faculty and student teams from the College of Business and Economics and Huxley College of the Environment. Student groups prepare a Green Business Assessment for a community or campus organization and compile, distribute, and present a final report to the campus and the client organizations. Also offered as MGMT 466.

Prerequisites & Notes: Huxley major or CBE major or instructor permission; priority for majors in Business and Sustainability. Senior status.

Credits: 5

Grade Mode: Letter

ENVS 470 - Planning Methods

Processes in community goal making, analytic techniques and methods of site planning and urban design.

Prerequisites & Notes: ENVS 360, ENVS 361 with concurrency.

Credits: 3

Grade Mode: Letter

ENVS 471 - Campus Sustainability Planning Studio

ENVIRONMENTAL STUDIES

Introduction to campus sustainability planning as applied to the WWU campus community. Project-based learning and research involving stakeholders across campus. Selected research topics relative to Western's master planning process pursuit of sustainability. A studio course emphasizing the application of sustainability principles in campus planning, development and operations. Repeatable to a maximum of 9 credits.

Prerequisites & Notes: ENVS 304, ENVS 361 or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 472 - Planning Studio

Analysis and synthesis of significant socioeconomic biophysical and cultural resources used in planning; preparation of a land-use or other plan for a selected region.

Prerequisites & Notes: ENVS 470.

Credits: 6

Grade Mode: Letter

ENVS 473 - Planning Studio II Implement

This is a methods and applications course in land use planning, engaging students in plan implementation. The course will focus on innovative land use regulations, but will also include work with capital improvements and market-based strategies. New land use regulations will be designed to enable and facilitate the implementation of projects from Studio I. Students will examine the costs of direct public investment required to implement their plans, and the possibility of employing incentive-based strategies or public-private partnerships.

Prerequisites & Notes: ENVS 472.

Credits: 3

Grade Mode: Letter

ENVS 474 - Planning for Sustainable Communities

Synthesis and application of principles, practices and policies in sustainable development and the design of projects, processes, and products using a systems approach to promote social, economic and environmental sustainability. Students apply sustainable design techniques to local regional and international community problems.

Prerequisites & Notes: ENVS 361; Admission to Sustainable Design minor or Huxley College; and instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 475 - Community Development and Participatory Methods

This course introduces students to concepts of community development in the context of urban change in the United States. It explores community development goals, organizations, strategies, tools, and planning processes. The theory and practice of urban development, neighborhood change, and community organizing will be discussed, with a particular focus on affordable housing and industrial facility siting. Social, economic, and environmental justice considerations and community empowerment is emphasized in this course.

Prerequisites & Notes: ENVS 370.

Credits: 3

Grade Mode: Letter

ENVS 476 - Disaster Reduction and Emergency Planning Studio

The course provides students with an opportunity to apply their knowledge and skills in disaster reduction and emergency planning, with an emphasis on community-based approaches. Students will work in groups with a client (or clients) on a quarter-long project of practical significance. Students will be exposed to best practices through case studies across disaster reduction and emergency planning. Project management, client interactions, report writing, and communicating technical information to diverse audiences will be emphasized.

Prerequisites & Notes: ENVS 362, ENVS 372, and ENVS 465 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 483 - Environmental Interpretation

An overview of the field of environmental interpretation and how it relates to environmental education. Focus is on gaining an understanding of the basic elements of the interpretive process and on becoming familiar with interpretive approaches and methods. Introduces design and technical components.

Credits: 4

Grade Mode: Letter

ENVS 484 - The Literature of Nature and Place

Describes and explores the tradition of writing about the outdoors and human-nature relationship in literature. Students read and discuss writings of Thoreau, Burroughs, Muir, Leopold, Carson, Eisley, Lopez, Tempest Williams and others. Students

learn the structure and techniques of nature writing while writing a personal nature essay.

Prerequisites & Notes: Junior standing or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 485 - Natural History for Environmental Education

Classroom and field study of the natural history of the Pacific Northwest as it relates to environmental education. A spring block course.

Prerequisites & Notes: ENVS 381 and ENVS 382.

Credits: 4

Grade Mode: Letter

ENVS 486 - Field Methods in Environmental Education

Students visit environmental learning sites and programs where they observe, critique and participate as instructors. Develop skill in designing effective and engaging lesson plans and delivering them to youth audiences. Includes field leadership, environmental interpretation, and instructional evaluation. A spring block course.

Prerequisites & Notes: ENVS 381 and ENVS 382.

Credits: 5

Grade Mode: Letter

ENVS 487 - Conservation Psychology

Critical examination of the psychological and educational research bases for environmental education. Introduction to theories and methods used to study environmental behavior change, learning about the environment, formation of social-environmental ethics, and social influences across the lifespan.

Prerequisites & Notes: Instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 488 - Outdoor Education

Classroom and field study of outdoor learning methods, emphasizing "using the place" to facilitate learning. Programmatic planning, group facilitation and management techniques, and a holistic conception of the learner are explored through field experience in various outdoor settings. A spring block course.

Prerequisites & Notes: ENVS 381 and ENVS 382.

Credits: 4

Grade Mode: Letter

ENVS 489 - Leadership for a Sustainable Future

Theory and practice of leadership for inspiring and maintaining change toward more ecologically sustainable behaviors through informal and formal learning settings. Emphasis on experiential approaches to environmental education from the backyard to the backcountry; field work required. A spring block course.

Prerequisites & Notes: ENVS 381 and ENVS 382.

Credits: 4

Grade Mode: Letter

ENVS 491 - Environmental Communication

Critical inquiry into communication theory, research, and practice directed toward environmental concerns in the context of diverse communities. Opportunity to develop skill in techniques such as cultural sensitivity and inclusion, community outreach, environmental interpretation, systemic social change, social marketing, digital and physical media, and/or partnerships. Requires working in an interdisciplinary group to examine environmental problems and communication-based approaches to solutions. Repeatable up to 10 credits including original course.

Prerequisites & Notes: Admission into Huxley College and senior status.

Credits: 5

Grade Mode: Letter

ENVS 492 - Curriculum for Environment and Sustainability

Critical review of existing curricula, learning theory and learning objectives are examined and strategies for attaining these objectives are studied and practiced. The qualities of the ideal environmental education curriculum are identified. Students practice curriculum writing and teaching. Students observe in real world classroom and outdoor teaching settings.

Prerequisites & Notes: ENVS 381.

Credits: 4

Grade Mode: Letter

ENVS 493 - Environmental Impact Assessment

Environmental Impact Assessment requires a range of professional qualifications and involves a wide spectrum of disciplines and methodologies. This interdisciplinary capstone course involves class preparation of an impact assessment of a local project, summarizing physical, biological and social aspects of a study area. Review of pertinent

ENVIRONMENTAL STUDIES

laws and EIS documents. Also offered as ESCI 493.

Prerequisites & Notes: Senior standing and Huxley College admission, or instructor permission.

Credits: 5

Grade Mode: Letter

ENVS 495 - Teaching Practicum

Experience in teaching a lecture or laboratory course in environmental studies. Repeatable to a maximum of 4 credits. S/U grading.

Prerequisites & Notes: Admission to Huxley College of the Environment and instructor permission.

Credits: 1-3

Grade Mode: S/U

ENVS 496 - Environmental Stewardship

A field-oriented capstone course for environmental studies majors nearing graduation. Students work in interdisciplinary teams to apply their knowledge and skills to solve complex problems in real world situations.

Prerequisites & Notes: Senior status and admission into Huxley College; or instructor permission.

Credits: 5

Grade Mode: Letter

ENVS 498A - Senior Thesis

A special project carried out under the supervision of a faculty adviser and documented in thesis form according to guidelines supplied by the college. May reflect a single study topic or be part of a major investigation which may take the form of field work, or laboratory, library or community research. Repeatable to a maximum of 15 credits.

Credits: 1-15

Grade Mode: Letter

ENVS 498B - Internship

Supervised work experience relevant to environmental studies and appropriate to the student's program. The one- to three-month experience is documented by a written report prepared according to guidelines supplied by the college. Repeatable to a maximum of 15 credits. S/U grading.

Credits: 1-15

Grade Mode: S/U

ENVS 498C - Senior Project

A special project carried out under supervision of a

faculty adviser and documented in non-thesis form suitable to the project. May take the form of some environmental or community activity having either a physical or programmatic result. Repeatable to a maximum of 15 credits.

Credits: 1-15

Grade Mode: Letter

ENVS 498D - International Study

While enrolled as a major in Huxley College, a student who has undertaken a college-level foreign language study may study for one quarter in a country utilizing that language. International study must be approved in advance and carried out under the supervision of the student's adviser, must follow the international study guidelines for the student's major, and relate to the student's course of study at Huxley College. The result of the study must be reported in written, taped, filmed or graphically portrayed form. Repeatable to a maximum of 15 credits. S/U grading.

Credits: 1-15

Grade Mode: S/U

ENVS 499A - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic covered.

Credits: 1

Grade Mode: S/U

ENVS 499B - Spring Block Planning Seminar

Preparation for Spring Block courses, including understanding the sequence, tasks, partners and expectations for the Spring Block, and forming a functioning group.

Prerequisites & Notes: Instructor permission.

Credits: 1

Grade Mode: S/U

ENVS 499C - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 1

Grade Mode: S/U

ENVS 499D - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 1

Grade Mode: S/U

ENVS 499E - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 1

Grade Mode: S/U

ENVS 499F - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: S/U

ENVS 499G - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: S/U

ENVS 499H - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credits with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites vary depending on topics offered.

Credits: 2

Grade Mode: S/U

ENVS 499I - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: S/U

ENVS 499J - Seminar

Students-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: S/U

ENVS 499K - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: S/U

ENVS 499L - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum. S/U grading.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: S/U

ENVS 499M - Seminar

Student-faculty interaction on topics of general interest.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: S/U

ENVS 499N - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

ENVIRONMENTAL STUDIES

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 1

Grade Mode: Letter

ENVS 4990 - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 1

Grade Mode: Letter

ENVS 499P - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 1

Grade Mode: Letter

ENVS 499Q - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 1

Grade Mode: Letter

ENVS 499R - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 1

Grade Mode: Letter

ENVS 499S - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: Letter

ENVS 499T - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: Letter

ENVS 499U - L.E.A.D. Seminar

Practicum in environmental education. Create and deliver classroom and outdoor environmental education curriculum with local school class.

Prerequisites & Notes: Instructor permission.

Credits: 2

Grade Mode: Letter

ENVS 499V - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: Letter

ENVS 499W - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: Letter

ENVS 499X - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: Letter

ENVS 499Y - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: Letter

ENVS 499Z - Seminar

Student-faculty interaction on topics of general interest. Repeatable for credit with no maximum.

Prerequisites & Notes: Admission to Huxley College or instructor permission. Additional prerequisites will vary depending on topic offered.

Credits: 2

Grade Mode: Letter

ENVS 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ENVS 501 - Research and Projects in Environmental Studies

Introduction to and survey of current trends in and historical contexts of environmental studies as an area of research and project design. Focuses on discursive, ideological, and practical aspects of research and project-based work in Environmental Studies.

Credits: 3

Grade Mode: Letter

ENVS 502 - Environmental Research and Projects Frameworks

Survey current trends and historical contexts of environment research. Investigate and evaluate the theories and analytical frameworks commonly used in environmental research and projects. Identify and develop such frameworks for future research efforts.

Prerequisites & Notes: ENVS 501

Credits: 3

Grade Mode: Letter

ENVS 503 - Communicating Research Results

Theory and practice of communicating research plans and results in written documents and public presentations. Repeatable up to 3 credits including original course.

Credits: 1

Grade Mode: Letter

ENVS 520 - GIS III: Analysis and Modeling

The use of Geographic Information Systems technology for analysis and modeling of spatial data and processes. Focus on the collection, storage, analysis, and display of spatial data. Introduction to the use of models to automate geoprocessing tasks. Practical experience in GIS application through lab assignments and an original research project.

Prerequisites & Notes: ENVS 321 or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 521 - GIS IV: Advanced GIS Applications

Analysis and visualization of geospatial data using advanced cartographic methods and Geographic Information Systems techniques. Practical experience in GIS applications through lab assignments.

Prerequisites & Notes: ENVS 520 or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 522 - Advanced Spatial Analysis

Advanced techniques for the analysis and visualization of spatial data. Focus on statistical methods and computer tools for identifying spatial patterns and processes, effective communication of results, and professional development for geospatial analysts. Introduction to open source analytical and cartographic software options, including the development of web maps and online professional portfolios. Students will complete an extensive original research project.

Prerequisites & Notes: ENVS 521 or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 526 - Understanding Soil Data

A soil science perspective on soil as a natural body. This course will describe the physical and chemical characteristics of soil and how to access existing soil data sets. Soil description and classification of soils will be explored through the USDA system. Theories of soil formation will be surveyed and process of pedogenesis will be examined.

Prerequisites & Notes: Graduate status and instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 528 - Advanced Topics in Biogeography

ENVIRONMENTAL STUDIES

Study of the spatial distribution patterns of organisms through the integration of the many factors that have interacted to determine these patterns.

Prerequisites & Notes: ENVS 203; ENVS 326 or ESCI 325; or instructor permission.

Credits: 3

Grade Mode: Letter

ENVS 529 - Pyrogeography

Graduate students will explore the spatial and temporal relationships of fire and society as an integral landscape process with an emphasis on the maintenance of North American ecosystems and the threat of wildfire to the built environment. We will assess historic and contemporary implications of fire management and policies, and where appropriate we will compare fire processes and practices from abroad. The course will end with interdisciplinary group projects delving into specific fire issues and developing proposals and solutions. Graduate students are expected to take a lead role in the development of group projects and development of final products.

Credits: 4

Grade Mode: Letter

ENVS 530 - Borderlands: Resource Management

Geographic investigation of cross-border resource management and other issues associated with the growing importance of the United States' cross-border regions, especially our northern border with Canada; selected trans-border environmental, sustainability, economic, and urban topics.

Prerequisites & Notes: ENVS 501 or ESCI 501 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 531 - Pacific Rim: Environment, Economy, and Sustainability

Geographic Investigation of the economies, environmental impacts, and issues of sustainability of Pacific Rim nations; special comparative emphasis on East Asia versus North America.

Prerequisites & Notes: ENVS 501 or ESCI 501 or instructor permission.

Credits: 4

Grade Mode: Letter

ENVS 540 - Advanced Public and Stakeholder Engagement in Energy, Climate, and Environmental Policymaking

We examine different types of civic engagement in public policymaking about energy, climate, and environment through the lens of deliberative democracy. Students will learn to think critically and creatively about how the public, business, and organized interest groups can be effectively involved in policymaking.

Prerequisites & Notes: ENVS 304 or ENVS 350 or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 545 - American Environmental History

Readings seminar focusing on the literature on the history of the interaction of nature and society in America. Concentration on methods in environmental history. Also offered as HIST 553.

Prerequisites & Notes: Graduate status in Department of Environmental Studies or Environmental Sciences or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 546 - World Environmental History

The organizing theme of this seminar will be that of 'exchange' - biological and cultural - of organisms and ideas about what to do with them. By focusing on the problem of the history of exchanges of organisms and ideas about the environment around the globe, the seminar will at the same time illuminate other themes in world environmental history. Also offered as HIST 554.

Prerequisites & Notes: Graduate status in Department of Environmental Studies or Environmental Sciences or permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 549 - Energy Systems Transitions

This course explores the social and technological changes underway to transition from a fossil-fuel based energy system to a low-carbon system. We study the technology involved with existing and evolving electricity, transportation, food, and building energy systems and then interrogate the social, economic, and political structures that substantiate the existing system or promote change to a low carbon future.

Prerequisites & Notes: Permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 550 - Environmental Politics and Policy

Survey of the field of environmental politics and policy. Examination of how social scientists have addressed environmental issues by focusing on questions raised, methods used and conclusions reached. Approach will be comparative in examining research on different political and policy dynamics of regional case studies.

Credits: 5

Grade Mode: Letter

ENVS 551 - Natural Resource Policy

The course addresses history, politics, conflicts, and current events (e.g. Malheur NWR) around natural resources, with a particular emphasis on public lands.

Credits: 4

Grade Mode: Letter

ENVS 559 - Advanced Energy Policy

The goal of this course is to explore policy making and policy implementation in the context of energy technologies. Using case studies we will reveal the multidimensionality and tensions implicit in policy debates. We will assemble a toolbox that enables us to innovate, assess, and promote policy options. Focus will be placed on policy solutions such as common pool resource management, community-based social marketing, civic dialogue, and analytic-deliberation.

Prerequisites & Notes: Permission of instructor.

Credits: 4

Grade Mode: Letter

ENVS 580 - Place-based Learning in the North Cascades

Explores learning and teaching about the natural and cultural history of a place using the Skagit River watershed and North Cascades mountains as the classroom and focus of inquiry. This is an intensive, field-based, experiential learning process which introduces place through the lenses of socio-ecological issues, development of environmental responsibility, and how educators can use place in environmental education curricula.

Prerequisites & Notes: Admission to M.Ed. in Environmental Education Residency.

Credits: 6

Grade Mode: Letter

ENVS 581 - Practicum in Teaching Natural and Cultural History

Supervised field experience in teaching about natural and cultural history in an environmental learning center setting.

Prerequisites & Notes: ENVS 580.

Credits: 5

Grade Mode: Letter

ENVS 582 - Curriculum in Environmental Education

Examination of all aspects of curriculum for environmental education, especially in the non-formal setting of environmental learning centers, nature centers and outdoor schools. Curriculum theory and methodology appropriate to these settings will be studied, as will processes of curriculum design. Current programs and materials will be reviewed. Students will practice the skills of preparing curriculum and learning materials.

Credits: 5

Grade Mode: Letter

ENVS 583 - Natural History and Science of the North Cascades

Studies the natural history of the North Cascades to understand the basic ecological, hydrological, and geological principles operating there. Explores diverse processes of scientific inquiry that have been applied to study the landscape. Includes examination of how natural history and scientific inquiry into natural processes may be incorporated into interdisciplinary environmental education programs.

Prerequisites & Notes: ENVS 580; ENVS 581; ENVS 582.

Credits: 4

Grade Mode: Letter

ENVS 584 - Leadership and Nonprofit Administration

Examination of the nature and qualities of nonprofit educational organizations and of models of nonprofit administration. Leadership, management, and partnership principles and strategies will be studied. Topics will include all aspects of running an educational nonprofit organization, including financial management, fundraising, and organizational development and evaluation. Working with public and private sector partners will be explored.

Prerequisites & Notes: ENVS 580; ENVS 581; ENVS 582; ENVS 583.

Credits: 5

Grade Mode: Letter

ENVS 585 - Environmental Education Foundations

Examination of the principles and processes of education about and for the environment. Review

ENVIRONMENTAL STUDIES

of theory and practice of environmental education in a variety of programmatic settings.

Credits: 4

Grade Mode: Letter

ENVS 587 - Conservation Psychology

Critical examination of the psychological and educational research bases for environmental education. Introduction to theories and methods used to study environmental behavior change, learning about the environment, and formation of ecological social-environmental ethics, and social influences across the lifespan.

Credits: 4

Grade Mode: Letter

ENVS 588 - Assessment, Evaluation and Research in Environment Education

Covers assessment in the instructional context; evaluation of programming; and evidence-based practice. The main focus is on program evaluation in EE and its value, principles and methods. How can the gathering of useful and accurate information be integrated throughout program life-cycle and organizational culture? A beginner level of competence in designing and conducting simple and useful applied research will be facilitated through case studies and group projects. Study and practice of methods will be balanced with broader discussion of evaluation purposes and guiding questions.

Credits: 4

Grade Mode: Letter

ENVS 589 - Professional Writing and Presentation

Capstone course for students completing master's work in environmental education, Residency Track. Reflection on program; writing and presentation of research and curriculum projects during the course of the master's program.

Prerequisites & Notes: ENVS 580; ENVS 501; ENVS 581; ENVS 582; ENVS 583; ENVS 584; ENVS 585; ENVS 587.

Credits: 5

Grade Mode: Letter

ENVS 590 - Graduate Colloquium

Current trends and issues in geographic and environmental studies research. Repeatable up to 3 credits including original course.

Credits: 1

Grade Mode: Letter

ENVS 593 - Environmental Impact Assessment Practicum

Preparation of an objective assessment description of a real natural area including the search for public documentation, evaluation of coverage and specific new analyses. Coordinating role in task group data assembly and editorial review of draft project summaries. Experience directly related to professional responsibilities in the environmental field. Review of assessment utilization in the EIS format and of significant legislation.

Prerequisites & Notes: Graduate status.

Credits: 4

Grade Mode: Letter

ENVS 595 - Teaching Practicum

Experience in teaching a lecture or laboratory course in environmental studies. Repeatable. S/U grading

Prerequisites & Notes: Graduate status, relevant coursework and permission of instructor.

Credits: 1-3

Grade Mode: S/U

ENVS 598 - Research Project

Individualized research experience in the field, not including research related to thesis of field project. Repeatable up to 6 credits including original course.

Prerequisites & Notes: Completion of 15 credits 500-level courses toward MA in Environmental Studies or MEd in Environmental Education.

Credits: 2-6

Grade Mode: Letter

ENVS 599 - Graduate Environmental Studies Seminar

Selected topics across the spectrum of environmental studies (e/g/. toxicology, watershed studies, applied ecology, geography, environmental education, etc.). Repeatable to a maximum of 6 credits, including original course. S/U grading.

Credits: 1-2

Grade Mode: S/U

ENVS 690 - Thesis

Thesis research in environmental studies under faculty direction. Repeatable up to 36 credits, including original course. S/U grading.

Prerequisites & Notes: Advancement to candidacy for the Master's degree and appointment

of thesis advisor and thesis committee. Permission of instructor.

Credits: 1-12

Grade Mode: S/U

ENVS 691 - Field Project

Development of an application of knowledge in practical context. This may take the form of an environmental program in the student's area of graduate work, such as preparation of curriculum or other educational materials; policy analysis or implementation; planning or design portfolio, or other project. Repeatable to a maximum of 12 credits, including original course. S/U grading.

Prerequisites & Notes: Completion of 15 credits at the 500-level and approval of the student's committee in a Master's program in the Department of Environmental Studies. Permission of instructor.

Credits: 1-12

Grade Mode: S/U

Geography Courses

EGEO 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

EGEO 501 - History and Philosophy of Geography

Study of geography as a core discipline; its origins and trends in the understanding of multifaceted environmental problems.

Credits: 3

Grade Mode: Letter

EGEO 502 - Geographic Frameworks for Resource Analysis

Examination of the geographic theories and analytical frameworks used in the study of the environment.

Prerequisites & Notes: EGEO 501

Credits: 4

Grade Mode: Letter

EGEO 503 - Research Problems

Formulation and development of hypotheses for a thesis, and the development of the necessary methodology; preparation of bibliography and review of literature.

Prerequisites & Notes: EGEO 501, EGEO 502

Credits: 4

Grade Mode: Letter

EGEO 504 - Geographic Methods and Techniques

Advanced methods of gathering and analyzing data and information for the solution of geographic, regional planning, and landscape problems.

Prerequisites & Notes: EGEO 305 or equivalent, EGEO 501, EGEO 502

Credits: 5

Grade Mode: Letter

EGEO 533 - Climate and Biophysical Processes

Investigation into the role and nature of biophysical processes and their significance to the spatial and temporal patterns at various scales. Topics examine the functional relationships between climate, soils, landforms and vegetation.

Prerequisites & Notes: Graduate status.

Credits: 4

Grade Mode: Letter

EGEO 535 - Environmental Problems and Regional Development

Cities and regions as complex systems of interdependent natural and human elements; key problems and approaches to their solution through planning.

Prerequisites & Notes: 5 credits graduate-level

Credits: 5

Grade Mode: Letter

EGEO 551 - Research Problems

Formulation and development of hypotheses for a thesis. Development of the necessary methodology; preparation of bibliography and review of literature.

Credits: 4

Grade Mode: Letter

EGEO 552 - Advanced GIS

Analysis and application of cartographic techniques and geographic information systems to practical mapping and resource management projects.

ENVIRONMENTAL STUDIES

Prerequisites & Notes: instructor permission

Credits: 4

Grade Mode: Letter

EGEO 590 - Graduate Colloquium

Current trends and issues in geographic research.

Credits: 1

Grade Mode: Letter

EGEO 690 - Thesis

Thesis research in geography under faculty direction. Repeatable up to 36 credits. S/U grading.

Prerequisites & Notes: Advancement to candidacy for the master's degree and appointment of thesis advisor and thesis committee.

Credits: 1-12

Grade Mode: S/U

Woodring College of Education

Introduction

Dr. Francisco Rios, Dean

Mission and Vision Statement of the College

Mission: The Woodring College of Education mission statement provides context and purpose for our actions.

Woodring College of Education facilitates life-long learning through exemplary teaching to prepare education, health, and human services professionals for democratic citizenship and meaningful careers. As a College that serves the state, nation, and the world, we:

- Construct, transform, and convey knowledge by integrating research, theory and practice;
- Cultivate student growth through extensive community and school engagement in collaboration with exemplary practicing professionals;
- Act with respect for individual differences including taking a strengths-based view;

Academic Programs Leading to Undergraduate and Graduate Degrees

Elementary Education	BAE, MEd
Secondary Education (For information regarding academic majors and endorsements for elementary and secondary education, see departmental listings)	MIT
Special Education	BAE, MEd
Education Administration (Principal and Superintendent administrator certificate programs offered)	MEd
Human Services	BA
Nursing	BSN
Rehabilitation Counseling	MA
Adult and Higher Education	MEd

Overview: Departments and Programs

Department of Elementary Education

Dr. David Carroll, Chair

Programs Offered

- Elementary Education/Certification
- Language, Literacy, and Cultural Studies Major

- Develop collaborative partnerships that promote the learning and well-being of individuals, families, and the community; and,
- Evaluate processes and outcomes to ensure continual program improvements

Vision: The vision of Woodring College of Education frames our future.

Woodring College of Education fosters community relationships and a culture of learning that advance knowledge, honor diversities, and promote social justice.

Accreditation and Program Approval

Professional educator preparation programs in the Woodring College of Education are accredited by the National Council of Accreditation of Teacher Education (now the Council for the Accreditation of Educator Preparation), and approved by the Washington State Professional Educator Standards Board. The Rehabilitation Counseling program is accredited by the Council on Rehabilitation in Education. The RN-to-BSN program is approved by the Washington Nursing Care Quality Assurance Commission and accredited by the Commission on Collegiate Nursing Education. All Woodring programs are designed to prepare graduates to be thoughtful, knowledgeable, and effective educators or professionals for a diverse society.

- Early Childhood Education/Non-Certification Option
- Early Childhood Education (P-3)/Certification
- Early Childhood Education (P-3) and Elementary Education/Certification Option
- Bilingual Education Endorsement
- Bilingual Education Minor
- English Language Learner Endorsement
- Reading (P-12) Endorsement

WOODRING COLLEGE OF EDUCATION

- Teaching English to Speakers of Other Languages
- Teaching English to Speakers of Other Languages Minor
- Literacy - Master's

Department of Health and Community Studies

Dr. Raine Dozier, Chair

Programs Offered

- Adult and Higher Education
- Human Services
- Nursing: RN-to-BSN
- Rehabilitation Counseling

Department of Secondary Education

Dr. Kevin Roxas, Chair

Programs Offered

- Secondary Education/Certification — Undergraduate/Post-baccalaureate
- Secondary Education/Certification — Master in Teaching
- Middle Level — Humanities Endorsement
- Education and Social Justice Minor

Department of Special Education & Education Leadership

Dr. Gail Coulter, Chair

Programs Offered

- Early Childhood Special Education (P-3) and Early Childhood Education (P-3) (Dual Endorsement)/Certification
- Exceptionality and Disability
- Special Education (P-12) and Elementary Education (Dual Endorsement)/ Certification
- Special Education (P-12) with Secondary Education/ Certification
- Special Education (P-12) plus Content Endorsement/Certification
- Special Education - Master's (in moratorium)
- Educational Administration
 - Master's
 - Residency Principal Certification
 - Professional Administrator Certification (in moratorium)
 - Initial Superintendent Certification

Teacher Education Outreach Programs

Dr. Laurence Antil, Assistant Dean for Outreach Programs

Programs Offered

- Elementary Education/Certification with Special Education (P-12) Major
- Elementary Education/Certification - Post-baccalaureate
- Special Education (P-12) Endorsement for Teachers
- Elementary Education Endorsement for Teachers

Other College Information

Educator Certification Requirements

Teacher certification requirements are outlined in the Elementary Education, Secondary Education, Special Education and Teacher Education Outreach Programs sections of this catalog. Administrator certification requirements are outlined in the Graduate School section of this catalog. See the Certification & Accreditation Office for details: wce.wvu.edu/cert/certification-accreditation.

Reasonable Accommodation Policy

It is the policy of Western Washington University to provide reasonable accommodation to the known physical or mental limitations of otherwise qualified individuals except where such accommodation would impose undue hardship on the institution. Students with documented disabilities who are enrolled at the University and seek reasonable accommodation should contact Disability Resources for Students for assistance and advice. Students with disabilities who are covered under this policy include those who, with or without auxiliary aids or removal of barriers, can meet the essential eligibility requirements of the program.

Administrative Services

- Dr. Karen McLean Dade, Associate Dean
- Dr. Laurence Antil, Assistant Dean, Outreach Programs
- Peter Johnson, Director, Educator Certification
- Dr. Laura Wellington, Director, Teacher Education Admissions and Field Experience
- Debbie Corsino, Specialist, Diversity Recruitment and Retention
- Lisa Moulds, Specialist, Learning in Communities and Schools (LinCs)

Resource Centers

- Center for Education, Equity, and Diversity
- Ershig Assistive Technology Resource Center
- Educational Institute for Democratic Renewal
- Northwest Center for Holocaust, Genocide and Ethnocide Education
- Pacific Northwest Children's Literature Clearinghouse
- Technology Education Center

Graduate Programs in Education

The Woodring College of Education offers various master's degrees. For a complete description of these programs, see the Graduate School section of this catalog.

EDUC courses

Education (EDUC) courses are offered through the Woodring College of Education as classes for the preparation of teachers, and for the advanced professional development of educators as continuing education or as requirements for the MEd degree. Go to information on EDUC courses.

Education

Education (EDUC) courses are offered through the Woodring College of Education as classes for students exploring careers in education, the preparation of teachers, and for the advanced professional development of educators as continuing education or as requirements for the MEd degree.

Education Courses

EDUC 101 - Rethinking Schools in Communities

Explores the influence of personal identity and relationships of well-being in school, family, and community systems. This course includes readings, guided explorations and activities in schools and communities for understanding child and youth development and learning.

Credits: 5

Grade Mode: Letter

EDUC 108 - Purposeful Learning

Seminar course designed for enhancing student understanding and application of the meta-cognitive process of lifelong learning.

Prerequisites & Notes: Permission of instructor.

Credits: 2

Grade Mode: Letter

EDUC 109 - Scholarship of Teaching and Learning

Survey of concepts foundational to effective teaching and learning from history, sociology, psychology, political science, communication arts and law. Explores the interdependent and synergistic relationship between various academic disciplines and the scholarship of teaching and learning.

Credits: 4

Grade Mode: Letter

GUR Attributes: SSC

EDUC 110 - Future Scholars Seminar

This course uses readings, videos, guest presentations, field observations and extra-curricular activities to more fully familiarize first quarter freshmen designated as Future Woodring Scholars with academic and student support programs, and to explore career opportunities in the fields of teaching and human services.

Prerequisites & Notes: Appointment by Dean of WCE as a Future Woodring Scholar.

Credits: 2

Grade Mode: Letter

EDUC 111 - Critical Multicultural Analysis of Children's Literature

This course has been designed to develop a critical understanding of current issues of educational equity within the U.S. context through children's literature. Through research-based discussions, participation in workshops and lectures students will engage and grapple with their own development of critical consciousness and critically analyze children's literature. S/U grading.

Prerequisites & Notes: Students must be enrolled in College Quest.

Credits: 1

Grade Mode: S/U

EDUC 115 - Introduction to Contemporary Education Issues

Introduction to contemporary social, political, and policy issues in education and related fields. Exploration of education-related careers and career pathways. Independent field study or service-learning fieldwork required.

Prerequisites & Notes: Acceptance as a Woodring Future Scholar or permission of instructor.

Credits: 4

Grade Mode: Letter

GUR Attributes: SSC

EDUC 204 - Systems for School and Community Renewal

Engage in critical inquiry of interprofessional systems influencing school and community innovation and renewal with a focus on social justice for well-being.

Prerequisites & Notes: EDUC 101 or permission of the instructor.

Credits: 5

Grade Mode: Letter

EDUC 205 - Disability, Diversity, and the Mass Media

Introduction to the experience and perspective of those with disabilities in the context of diversity and how that experience is understood by the general public. Students will learn about disabilities from an historical view and how the media both reflects and influences the narrative. Media throughout the past century will be used to examine critical issues.

Credits: 4
Grade Mode: Letter
GUR Attributes: BCGM

EDUC 280 - Climate Change, Social Justice, & Public Education

Through research, examination of current available materials, and guest presentations, students in this course will be involved in a three-prong study including: 1) the projected societal impacts of climate change, 2) vulnerable populations and, 3) the response of public education in the United States.

Prerequisites & Notes: Sophomore standing or instructor permission.

Credits: 4
Grade Mode: Letter
GUR Attributes: SSC

EDUC 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

EDUC 309 - Storytelling: Oral Narrative in History, Culture, and Society

Current trends and interdisciplinary applications of storytelling. Selection, adaptation and presentation of stories for various settings and audiences, with focus on the history of oral narrative traditions, cultural perspectives, and societal impact.

Credits: 4
Grade Mode: Letter
GUR Attributes: BCOM

EDUC 320 - Reader's Theatre in the Classroom

Adaptation of fiction and nonfiction into script form for K-12 classroom. Emphasis on teaching creative writing, literature appreciation, teamwork and oral skills development.

Prerequisites & Notes: LIBR 405 or ENG 441 recommended
Credits: 4
Grade Mode: Letter

EDUC 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

EDUC 405 - Children's Literature: Appreciation and Presentation of Literature for Children and Adolescents

The course emphasizes the reading of various genres, book selection, dramatic presentation and innovative uses of literature. The primary focus is on enhancing appreciation for literature in a way that promotes: diverse learning, lifelong reading, using oral interpretation, reader's theater and storytelling techniques. Repeatable up to a maximum of 8 credits.

Credits: 4
Grade Mode: Letter

EDUC 407 - Introduction to Education for Sustainability

Strategies for using education as a tool to address contemporary challenges that involve the interconnectedness of social justice, ecological, economic and systems. Theoretical and practical foundations; historical roots; current and emerging trends in education for sustainability. Emphasis on agency, activism, learner-centered pedagogies, and professional teaching practices applicable in formal and non-formal educational contexts.

Prerequisites & Notes: Declaration of Education and Social Justice Minor; or declaration of Sustainability Minor; or instructor permission.

Credits: 4
Grade Mode: Letter

EDUC 409 - Advanced Storytelling

Training in public storytelling performance in community and educational settings. Emphasizes personal performance development, practical public experience, storytelling teaching methods, and advanced study of the history and current trends in the growing field of storytelling.

Prerequisites & Notes: EDUC 309 or permission of instructor.

Credits: 3
Grade Mode: Letter

EDUC 411 - Education and Social Justice

EDUCATION

Theoretical and practical foundation of education for social justice, exploring historical roots and the contemporary constructions of social justice issues and traditions as they play out in diverse educational contexts with emphasis on disruption of cultural reproduction of oppression through agency and activism.

Prerequisites & Notes: AMST 301 or FAIR 366E; and declaration of Education and Social Justice minor or permission of instructor.

Credits: 4

Grade Mode: Letter

EDUC 412 - Seminar in Educational Equity

This course has been designed to develop a critical understanding of current issues of educational equity and social justice within the U.S. context. Through research based discussions and participation in symposia, workshops, seminars, and film viewings students will engage and grapple with their own development of critical consciousness and the implications for educators. Also offered as AMST 412.

Prerequisites & Notes: Junior standing or permission of instructor. Preference to students in the Education and Social Justice Minor.

Credits: 4

Grade Mode: Letter

EDUC 413 - Bridge Barriers w/Migrants

Course explores the barriers migrant students face in graduating from high school and going on to higher education. Course combines theoretical study with a service learning experience focused on supporting migrant youth to overcome the educational challenges they face. All students will take leadership roles in planning, implementing, and evaluating the effectiveness of the Migrant Youth Leadership Conference and outreach efforts with Migrant partner programs. Repeatable up to 8 credits, including original course. Also offered as AMST 413.

Prerequisites & Notes: Declaration of Education and Social Justice Minor or permission of instructor.

Credits: 4

Grade Mode: Letter

EDUC 414 - Topics in Social Justice Education

Specific issues in social justice education will be used as lenses for analyzing, evaluating and transforming interlocking systems of power, privilege, oppression and discriminatory institutional structures and cultural practices and social behavior. Also offered as FAIR 414D.

Prerequisites & Notes: AMST 301; EDUC 411; and FAIR 375I

Credits: 4

Grade Mode: Letter

EDUC 501 - Introduction to Educational Research

Introduction to the concepts and procedures of contemporary education research. Locating and interpreting research literature; formulating research problems and hypotheses. Selecting research designs, including quantitative and qualitative approaches. Use of correlational, causal comparative, quasi-experimental, experimental, single subject, descriptive, case study, and various qualitative methodologies.

Prerequisites & Notes: Graduate status or permission of instructor; must take within first 12-16 credit hours under advisement.

Credits: 4

Grade Mode: Letter

EDUC 505 - Creating Classrooms for Learning

Advanced studies in culturally responsive curriculum, instruction and assessment.

Prerequisites & Notes: EDUC 501.

Credits: 4

Grade Mode: Letter

EDUC 534 - Assessing Educational Quality

Developing criteria and designing procedures for measuring input process and product resulting from special or innovative programs, community factors, options in administrative and instructional organization; for coordinators and research workers in the public schools.

Prerequisites & Notes: EDUC 501 or permission of instructor.

Credits: 3

Grade Mode: Letter

EDUC 690 - Thesis

Research study under the direction of a faculty committee. Repeatable to a maximum of 5 credits. S/U grading.

Prerequisites & Notes: Advancement to candidacy and approval of the student's committee.

Credits: 1-5

Grade Mode: S/U

EDUC 691 - Research Seminar and Inquiry Project

Research study under the direction of a faculty committee. Repeatable to a maximum of 5 credits. S/U grading.

Prerequisites & Notes: Advancement to candidacy and approval of the student's graduate committee.

Credits: 1-5

Grade Mode: S/U

Elementary Education

Introduction

The Department of Elementary Education offers professional education programs that lead to recommendation to the Office of the Superintendent of Public Instruction for residency teacher certification in the state of Washington. Students are encouraged to visit the departmental offices in Miller Hall 301 for information on program offerings that meet their individual needs.

The programs in elementary education are designed to prepare thoughtful, knowledgeable, and effective educators for a diverse society. Consistent with national and state standards for what teachers should know and be able to do, the elementary education curriculum offers carefully sequenced professional programs that are firmly backed by current research on effective teaching and learning.

Information

Individuals interested in teacher education can obtain information from the Website at wce.wvu.edu/admission. Inquiries should be directed to Woodring College Teacher Education Admissions, Student Services, Miller Hall 150, phone 360-650-3313, e-mail address TeacherEd.Admission@wwu.edu. Written inquiries may be addressed to Teacher Education Admissions, Western Washington University, MS-9090, 516 High St., Bellingham, WA 98225-9090.

Information about elementary education programs may be obtained by visiting the department Website at wce.wvu.edu/eled/elementary-education. Applicants who wish to speak with a faculty advisor may request an appointment through the elementary education department office in Miller Hall 300, phone 360-650-3336.

Those persons interested in graduate programs should consult the Graduate School section of this catalog or contact one of the Graduate Advisors for the Masters in Education: Literacy and Language, Dr. Tracy Coskie tracy.coskie@wwu.edu or Dr. Marsha Riddle Buly marsha.riddle.buly@wwu.edu. The Graduate School can also be contacted directly for more general questions, phone 360-650-3170, e-mail gradschool@wwu.edu. Written inquiries may be addressed to the Graduate School, Old Main 530, MS-9037, Western Washington University, 516 High St., Bellingham, WA 98225-9037.

Faculty

DAVID CARROLL (2001) Chair and Professor. BA, Antioch College; MA, Leslie College; PhD, Michigan State University.

JOANNE CARNEY (2003) Professor. BA, MA, Gannon University; PhD, University of Washington.

MARILYN CHU (2008) Associate Professor. BA, University of Michigan- Ann Arbor; MA, Western Washington University; EdD, Nova Southeastern University, Florida.

TRACY COSKIE (2003) Professor. BA, University of Rochester; MEd, PhD, University of Washington.

PAULA DAGNON (2007) Associate Professor. BA, Whitman College; MA, University of Connecticut, Storrs; PhD, University of Connecticut, Storrs.

MARIA TIMMONS FLORES (2008) Associate Professor. MEd, Western Washington University; PhD, University of Colorado Boulder.

KRISTEN FRENCH (2007) Associate Professor, BA, Western Washington University; MA, University of Massachusetts-Amherst; EdD, University of Massachusetts-Amherst.

JENNIFER GREEN (2012) Assistant Professor, BA, Gustavus Adolphus College; MAT, School for International Training; PhD, University of Connecticut.

EILEEN HUGHES (2005) Professor. BS, Whittier College; MS, University of Wisconsin, Madison; PhD, University of Oregon.

MITCHELL JANCIC (2006) Senior Instructor. MA, California State University; PhD, University of California-Santa Barbara.

ANNA LEES (2015) Assistant Professor. BA, Spring Arbor University; MA, Marygrove College; EdD, Loyola University Chicago.

DIANE MAJORS (1994) Senior Instructor. MA, University of Oregon.

MATTHEW MILLER (2005) Associate Professor. BA, St. Olaf College; MA, University of Arizona; MEd, University of Minnesota; PhD, University of Washington.

CHRIS OHANA (1999) Professor. BA, University of California-Berkeley; MA, University of Oregon; PhD, Iowa State University.

MARSHA RIDDLE BULY (1999) Professor. BA, Western Washington University; MA, California State University; PhD, University of Washington.

PATRICIA SKILLMAN (1988) Senior Instructor. Director TESOL Program. BA, Stanford University; MEd, Western Washington University.

KATHRYN WAYNE (1992) Associate Professor. BA, University of Oregon; PhD, University of Oregon, Stanford.

JOY WIGGINS (2011) Senior Instructor. BA, Texas Tech University; MEd, Western Washington University; PhD, Ohio State University, Columbus., Ohio

Elementary Education Programs

The Department of Elementary Education offers the following programs, majors, endorsements, and minors:

- Elementary Education (Undergraduate and Post-Baccalaureate) – This program leads to a recommendation to the state of Washington for a teaching certificate with an Elementary Education endorsement. Requirements include completion of the Elementary Education Professional Program, a major in an approved area, and a one-year internship experience that includes one quarter of full-time teaching.
- Language, Literacy, and Cultural Studies Major – This departmental major is one of 15 approved academic majors that students may choose from to accompany the Elementary Education Professional Program. The Bachelor of Arts in Education: Language, Literacy, and Cultural Studies Major responds to the growing diversity in the state's schools and supports the Woodring College of Education's efforts to embrace diversity and promote social justice. The major focuses on research-based and experience-validated knowledge to help elementary school teachers reach all students. The LLC major includes preparation toward a Reading Endorsement and an ELL and/or Bilingual Endorsement program in addition to the K-8 endorsement.
- Reading Endorsement – This program leads to an additional endorsement in Reading K-12 when accompanied by a first endorsement in another content area. The Reading Endorsement is offered for students who wish to have the opportunity to further their knowledge and skills for literacy instruction. Students will deepen their knowledge of effective, evidence-based language and literacy assessment, instruction, and programming while building their capacity to support all students to move forward as readers, writers, and language users. A passing score on the NES Reading and demonstration of the state competencies for reading are required.
- Bilingual Education Endorsement – This program leads to an additional endorsement in Bilingual Education when accompanied by a first endorsement in another content area. Also required is a cultural studies course taught in the language of that culture or demonstration of equivalent experience. Expected proficiency is equivalent to a major in the language other than English, and oral and written proficiency at the American Council on the Teaching of Foreign Languages (ACTFL) mid-advanced level. Each required course must be completed with a grade of B- (2.7) or better. A passing score on the Bilingual Education WEST-E and the ACTFL tests are required by the state.
- English Language Learner Endorsement - This program leads to an additional endorsement in English Language Learners based on Washington state English Language Learners endorsement competencies, when accompanied by a first endorsement in another content area. Students must demonstrate study of another culture (gained through experience, or the minimum of 3 credits of approved course work) and the equivalent of one year of college-level foreign language study. A passing score on the ELL WEST-E is required by the state.
- Early Childhood Education (Undergraduate) — The Early Childhood Education Program offers three options to students. All options are for candidates seeking a profession in early childhood education and specialization in working with young children and their families. The Non-certification option is designed for individuals who want to work in positions specific to the birth to eight years age-range in childcare, HeadStart or with school-age children in after-school programs. The P-3 option is designed for students wanting to specialize in early childhood education (birth through third grade) and seek a teaching endorsement to work in the public schools. The Dual Endorsement option is for candidates who seek two teaching endorsements to work in the public schools (P-3rd and Elementary Grades).
- Bilingual Education Minor – Undergraduates may complete a 32-credit minor in Bilingual Education. To declare the Bilingual Education minor, students must complete a cultural studies course taught in the language of that culture, or demonstrate the equivalent in experience. The bilingual endorsement can be earned in conjunction with the bilingual minor. Students must complete the minor with a minimum GPA of 2.7 in minor course work. Either the Bilingual Education Minor or the TESOL Minor with a focus on P-12 learners may be declared, but not both.
- Teaching English to Speakers of Other Languages Minor – The TESOL minor is available to undergraduate students in the TESOL certificate program with a focus on adult learners. Students earning an ELL

ELEMENTARY EDUCATION

endorsement may choose to complete either 27-credit TESOL minor with a focus on P-12 learners or the 33-credit Bilingual Education minor, but not both. To declare the TESOL minor, students must demonstrate study of another culture (gained through experience, or the minimum of 3 credits of approved course work) and the equivalent of one year of college-level foreign language study.

- Teaching English to Speakers of Other Languages Certificate – The TESOL Program focuses on preparing participants to work with English language learners to develop their English language skills. Works is most often in international language schools, community language school settings for new or recent immigrants, and community college ESL classes. Completion of the 27-credit sequence of courses results in a TESOL Certificate.

The Department of Special Education and Education Leadership offers the following integrated dual endorsement program:

- Special Education and Elementary Education — This program leads to a recommendation to the state of Washington for a teaching certificate endorsed in Special Education and Elementary Education. Requirements include completion of the professional studies core, major in special education, and elementary program curriculum and methods, and two internships, each one quarter in length. See the Special Education section of this catalog for further information.

Per ESSA, districts are no longer required to identify and document Highly Qualified Teachers. Moving forward, the state of Washington will continue to monitor teacher qualifications and collect data about certification, endorsements, teaching assignments, and years of experience. Districts may still maintain previous requirements that impact eligibility for certain middle school teaching assignments in a core academic subject(s). Candidates are responsible for consulting with an advisor for further information on what endorsement will best fit their teaching career goals.

Certification

The Washington Administrative Code specifies the requirements for earning a Washington state teacher certificate. State-approved preparation programs and certification requirements align with state learning goals and essential academic

learning requirements, and require candidates to demonstrate that they have made a positive impact on student learning. First-level residency certification programs are designed around the standards of effective teaching, professional development, and teaching as a profession.

State requirements for teacher certification at the time of completion of a student's program will supersede those outlined in this catalog.

These changes may affect the time it takes for a student to complete the teacher education program.

Residency Teacher Certification

The first-level Residency certificate is awarded to new teachers upon the completion of these generally stated requirements:

- A baccalaureate or higher-level degree from a regionally accredited college or university
- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodology, and an internship
- Evidence of good moral character and personal fitness
- External assessments of content knowledge and teacher performance as required by Washington State

Candidates for Residency certification must pass a content knowledge assessment: the Washington Educator Skills Test - Endorsements (WEST-E) or National Evaluation Series (NES) test, and if applicable, ACTFL proficiency tests, to qualify for an endorsement. WWU requires submission of a passing content test score for each endorsement to be earned, before commencement of the full-time student teaching internship. For current information on test requirements, registration, fees, and test dates and locations, refer to Content Test Resource Website, wce.wwwu.edu/cert/content-test-resource-site. Candidates for Residency certification must also pass the Teacher Performance Assessment (edTPA), which is completed during the student teaching internship. Application for the Residency certificate is made to Woodring College Certification Office, Student Services, Miller Hall 150, phone 360-650-4930, no later than three months prior to the start of the full-time internship.

The first-issue Residency certificate has no defined expiration date. It is valid until the teacher completes at least 1.5 years of successful teaching experience accumulated over a minimum of two years in a state-approved public, private or state-operated education program. A three-year residency certificate is then issued by the state.

The timeline for earning a second level professional certificate begins with the re-issued residency certificate.

Professional Teacher Certification

The second-level Professional certificate is awarded to experienced teachers who hold a valid Residency certificate, and who pass the Washington ProTeach Portfolio assessment or earn National Board Certification. Professional certification requirements are designed around the standards of effective teaching, professional development, and professional contributions. For further information, contact the Woodring College of Education certification officer at 360-650-4630, Miller Hall 150.

Endorsements

An endorsement identifies the subject matter in which a teacher is prepared and authorized by the State to teach. One qualifying endorsement is required for residency certification. Courses required for a teaching endorsement and the professional education sequence must be completed with a grade of C (2.0) or better. Elementary education students complete an approved major and the professional program designed specifically for elementary education candidates to earn a Residency certificate endorsed in Elementary Education. Approved academic majors are listed below under Choosing an Academic Major. Early childhood education students complete the professional program and the Early Childhood Education (P-3) Major or the Early Childhood Education (P-3) and Elementary Education major to earn a Residency certificate endorsed in Early Childhood Education (P-3). Students may earn an additional endorsement in Bilingual Education, English Language Learner, or Reading through the Department of Elementary Education or other endorsement through an academic department.

For information on other additional endorsement programs offered throughout the University, contact the Woodring College of Education certification officer at 360-650-4630, Miller Hall 150.

Choosing an Academic Major

Students who wish to earn a teacher certificate endorsed in Early Childhood Education must also complete the early childhood education major or the early childhood education with elementary education major.

Students who wish to earn a teacher certificate endorsed in Elementary Education must also complete an approved academic major. The

following majors are currently approved for elementary education; additional majors are possible under advisement: anthropology; art; communication; environmental studies; foreign language (French, German, and Spanish); general science; general science-middle level; geography; geology (earth science); history; language, literacy, and cultural studies; mathematics; psychology (human development); sociology. While information on each of these majors is available throughout this catalog, it is important to seek advisement from faculty in the appropriate department before beginning work on an academic major. Other majors may be considered with department approval.

Professional Program Requirements

Program Length

While it is possible to earn a bachelor's degree and initial teaching certificate with certain majors in four academic years, most students require slightly longer. Following acceptance by the Woodring College of Education, which requires at least sophomore status, the student should expect to take seven to eight quarters to complete the teacher certification program. During these remaining quarters, the student has time to work on the academic major and General University Requirements (GURs). Students who enter the Woodring College of Education as Juniors (e.g., many transfer students) should have satisfied nearly all of the GURs and should have a good start on their academic major.

Declaration Process

All applicants to the Woodring College of Education undergraduate and post-baccalaureate teacher education programs must be formally admitted to and currently enrolled at Western Washington University or must apply to Western for the same quarter they apply to teacher education. Woodring College teacher education program application materials are available in Miller Hall 150 and are also printable from wce.wvu.edu/admission.

The requirements listed below are minimum application criteria. Enrollment restrictions apply to teacher education programs. Meeting the following requirements makes the applicant eligible for admission consideration but does not guarantee admission. Students who meet all criteria are further evaluated to determine the most qualified applicants. Students will be evaluated on all information provided with the application, including required copies of transcripts from all prior colleges.

ELEMENTARY EDUCATION

Application criteria:

- Completion of at least 45 quarter credits of college-level course work
- Cumulative grade point average of 2.75 or higher overall college-level work or over the last 45 credits
- Meet the West-B basic skills requirement. This may be met by: a) passing the West-B exam, b) SAT minimum scores, or c) ACT minimum scores. See the Woodring Admissions website: wce.wvu.edu/admissions/west-b-requirement and the West-B website for details: www.west.nesinc.com
- Completion of an English composition course with a grade of B- (2.7) or higher
- Experiences with children, strong interpersonal communication skills, and other skills helpful in teaching are given special emphasis.

Program Continuation

Students admitted to the Woodring College of Education must meet specified requirements throughout the course of their teacher education program in order to remain in the program.

Requirements upon Program Admission

- Completion of a Pre-Residency Clearance through the Office of Superintendent of Public Instruction (OSPI) E-Certification system, and a fingerprint background check as described below under Character and Fitness.
- Woodring College of Education Professional Orientation
- Woodring College of Education Prevention of Sexual Harassment Training
- Woodring College of Education Blood-Borne Pathogens Training

Character and Fitness

The Washington Administrative Code requires applicants for teacher certification to give evidence of "good moral character and personal fitness." Students provide evidence of character and fitness through two separate but related processes:

- A Pre-Residency Clearance through OSPI Instructions for completion of this application will be provided upon acceptance into the program. The application requires candidates to answer questions regarding professional fitness, criminal history and personal conduct. Students with "yes" responses must be

cleared by OSPI before participating in any courses that include field experiences.

- Washington State Patrol and FBI background checks are completed through a fingerprinting process. Teacher candidates admitted to an Early Childhood Education endorsement program complete a background check through the DEL, and submit the results to OSPI. Procedures and fee information are provided to students upon acceptance into the program

No student in a teacher education program may participate in a University-sponsored activity in the public schools until cleared by the DEL, Washington State Patrol, or in some cases, investigated and then cleared by the OSPI. Clearances are valid for two years. Students must maintain character and fitness clearance until they have been recommended for a Residency teacher certificate following completion of the teacher education program.

In addition to the Washington State character and fitness requirements noted above, students must abide by the Woodring College of Education conduct policies acknowledged in the Student Conduct Requirements and Agreement, which is submitted with program application materials.

General Retention Requirements

- Students must maintain at least a 2.75 GPA, beginning with the quarter they are notified of admission to Elementary Education. This requirement applies even to quarters where no education courses are being taken. Students who fail to meet this standard will be asked to meet with the department chair for advising and this may result in being dropped from the program. Grade point average for the academic major or minor may differ among academic departments.
- Students must earn a grade of C (2.0) or better in both the professional education sequence and in all courses required for the endorsement.
- Students must understand and demonstrate a high level of competence in the English language. Those who have difficulty in their verbal and/or written communications should expect to seek remediation before beginning the internship.
- Students who interrupt enrollment in a teacher education program for more than two consecutive quarters (summer quarter not included) must meet all program admission, completion and certification requirements in place for the quarter in which they expect to return.

Other Departmental Information

Program Completion

To qualify for program completion and recommendation for state of Washington Residency certification, students must complete the following requirements and assessments:

- A baccalaureate or higher-level degree from a regionally accredited college or university.
- Successful completion (grade of C or better) of all Woodring coursework and trainings, including preparation in an endorsable subject area and teaching methodologies.
- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodologies, and an internship.
- Evidence of good moral character and personal fitness.
- Passing scores as set by the State of Washington on the content knowledge test(s) for each endorsement.
- Passing scores as set by the State of Washington on the Teacher Performance Assessment (edTPA).
- Successful completion of the student teaching internship as shown by performance on the WWU Intern Development and Evaluation System (IDES).

Internship

An important experience for teacher certification candidates is the student teaching internship. Students spend two quarters taking final classes in the program along with time in their assigned classroom preparing for quarter three when they are teaching full-time under the direct supervision of a certificated teacher in a school setting. This internship involves intensive practice in integrating methods, content area knowledge, and classroom organizational strategies.

Students will be able to work part time during two quarters of the three quarter internship. However, one quarter of the internship involves full-time teaching responsibilities. It is our advice that candidates NOT work during the full-time internship so they may gain maximum benefit from the experience and perform at his or her highest ability.

Because the internship should be completed in a single classroom for all three quarters, it is likely that internship placement will be in a school site

within Whatcom and Skagit counties. Exceptions to this rule will be made for students approved by the department to enroll in the Global Student Teaching Program.

The Office of Field Experiences (OFE) is the support office of the Woodring College of Education that oversees student teaching placements and supervision. Students must apply for their student teaching internship according to the timeline and directions posted on the OFE webpage at wce.wvu.edu/ofe/apply-student-teach.

Before commencement of the fulltime portion of the internship, passing scores on state required content exam(s) for each endorsement must be submitted, all pre-internship endorsement and program course work completed, and fingerprint/character and fitness clearance must be valid. Students who interrupt enrollment for a quarter or more must meet the deadline for filing a returning student application.

OFE does not guarantee placements. Placement in a school is contingent upon:

- Fulfillment of all program requirements (satisfactory academic work, education and endorsement program course work and training, practica, and faculty recommendations)
- Submission of passing scores on the content knowledge test(s) for each endorsement
- Availability of placements and supervision in specific subjects and grade levels
- Acceptance by P-12 school personnel
- Fingerprint/character and fitness clearance through the point of certification

Students are required to interview with the public school teacher to whom they will be assigned, for final approval of placement. OFE will make every effort to arrange up to three initial interviews but does not guarantee an interview.

Any subsequent placement after a voluntary or non-voluntary withdrawal from an internship will be granted only by faculty recommendation following a case conference.

For further information, contact the Woodring College Office of Field Experiences, Student Services, phone 360-650-3310, Miller Hall 150.

Instructional Technology

The Instructional Technology program offers instruction and research opportunities in the use of instructional technology in education and training, including effective use of emerging and mobile technologies. The program's offerings are designed

ELEMENTARY EDUCATION

for those who wish to improve or develop their abilities to select, use, adapt, and create learning materials incorporating technology. This program provides teachers and trainers with background necessary to integrate instructional technology into their lessons.

For further information, contact the program office in Miller Hall 301D, phone 360-650-7948.

Teaching English to Speakers of Other Languages Certificate Program

The TESOL Certificate Program focuses on preparing participants to work with English language learners who are interested in developing their skills in English. Work is most often in international language schools, community language school settings for new or recent immigrants, and community college ESL classes. Students earning the TESOL certificate must demonstrate competencies for teaching adults in language programs.

Completion of the 27 credit sequence of courses results in a TESOL Certificate awarded by Western Washington University. This certificate can be used both domestically and internationally as evidence of in-depth training in Teaching English to Speakers of Other Languages (TESOL).

Developing effective skills to work cross-linguistically and cross-culturally is a central objective of the program course work. Coursework includes several service-learning components with English language learners in the community, necessitating the completion of a background check prior to commencing the program. Non-native speakers of English are required to have a TOEFL score of 550 or higher prior to beginning the program. Completion of the certificate and the minor requires cross-cultural study and study of a foreign language. The cross-cultural and foreign language requirements may be satisfied through

previous course work or experience, or concurrently with the program, at the discretion of the program director.

Completion of the certificate and the minor requires cross-cultural study (gained through experience, or the minimum of 3 credits of approved course work) and the equivalent of one year of college-level foreign language study.

The program course work is offered in two formats: online and face-to-face. Many students choose to take late afternoon courses during fall, winter and spring quarters or combine these with the intensive summer option. Others choose to take the certificate courses online. Still others combine courses from face-to-face and online options. Students fully admitted to Western may integrate a concentration in TESOL into the course work of several majors, such as linguistics and American cultural studies, recognizing that the TESOL certificate is offered through Extended Education and requires a different type of registration.

All applicants should contact the Elementary Education office for advising on the admissions process, which will include an application to the TESOL program, and formal admission to the University. TESOL information is available by phone at 360-650-3336, or visit the website at wce.wvu.edu/tesol/teaching-english-speakers-other-languages.

Graduate Study

The Department of Elementary Education offers a Master of Education in Literacy designed for educators who want to deepen their knowledge and practice in literacy instruction. Contact the graduate advisors for more information, Dr. Tracy Coskie, tracie.coskie@wwu.edu, or Dr. Marsha Riddle Buly, marsha.riddle.buly@wwu.edu.

Bachelor of Arts in Education

Early Childhood Education P-3 Option, BAE

Department of Elementary Education, Woodring College of Education

123 credits (major and professional program)

Introduction

The program in early childhood education consists of an academic major in Early Childhood Education and a sequence of professional certification courses that lead to teacher licensure Pre-K through third grade. Upon completion of the program, candidates can work in childcare centers, preschools, Head Start programs, and

primary grades in public schools. The course work offers a combination of theory, methods, and field experiences in a variety of early childhood education.

Students seeking a bachelor's degree with teacher certification and an endorsement in early childhood education (P-3) must complete the General University Requirements, the Early Childhood Education (P-3) Major, and the professional education coursework.

Why Consider an Early Childhood Education P-3 Option Major?

The Early Childhood Education (P-3) major has several unique program features:

- Students attend classes with other early childhood education students as a cohort group throughout the program.
- Students gain experience in teaching children in three age groups (infant/toddlers, pre-primary and primary) and in a variety of settings.
- Students are taught to understand and respect intercultural/familial diversity as they learn to develop partnerships with families.
- Students learn to use inquiry tools and process for developing meaningful and integrated learning experiences for young children.

Sample Careers
Elementary Education Teacher (P-3) | Head Start | Childcare
Major/Career Resources
http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Admission to both Western Washington University and Early Childhood Education are required before a student may begin taking courses in the professional sequence. Requirements for consideration of an application include:

- completion of a minimum of 45 credits
- cumulative grade point average of 2.75 or higher for the last 45 credits
- Meet the West-B basic skills requirement. This may be met by: a) passing the West-B exam, b) SAT minimum scores, or c) ACT minimum scores. See the Woodring admissions website: wce.wwu.edu/admissions/west-b-requirement and the West-B website: www.west.nesinc.com
- completion of an English composition course with grade of B- or higher

Enrollment restrictions apply in all teacher education programs. Meeting the above criteria makes the applicant eligible for admission, but does not guarantee admission. Applications from students who meet all the criteria are evaluated to determine those most qualified. All applicants are then rank-ordered, and a final list created based on available openings. For further information, visit Teacher Education Admissions, Miller Hall 150, 360/650-3313 or visit the website at <http://www.wce.wwu.edu/admiss>. Retention in the program requires continuous demonstration of competence in standard oral and written English in all course work. Retention also requires maintenance of a 2.75 quarterly GPA for each quarter upon admission to Early Childhood Education. Courses required for a state teaching endorsement and for the professional sequence must be completed with grades of C (2.0) or better.
Student Advisement

ELEMENTARY EDUCATION

Prospective Early Childhood students are invited to meet with an advisor for more information about the program. The office is in Miller Hall 300 and the phone number is (360) 650-3336. Once admitted to the program, students are assigned a faculty advisor with whom they will stay in contact throughout their program.

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the early childhood education professional program and in all courses required for the endorsement.

Requirements

Required courses (43 credits)

- ECE 390 - Infant and Toddler Practicum and Seminar
- ECE 391 - Preschool Practicum and Seminar
- ECE 430 - Creativity & Play in ECE
- ECE 431 - Fundamentals of Early Childhood Education
- ECE 434 - Environments for Early Learning
- ECE 435 - Child Abuse and Neglect
- ECE 436 - Child Guidance: Principles and Practices
- ECE 438 - Family and Community Relationships
- ECE 439 - Curriculum Planning in Early Childhood Education
- SPED 443 - Early Development Variations
- SPED 444 - Assessment and Intervention in Early Childhood Special Education

Additional Requirements

Early Childhood Education Professional Program (80 credits)

- ECE 380 - Foundations of Literacy for Early Childhood Education
- ECE 495 - Internship - Preschool
- ECE 496 - Internship - Primary
- ECE 498 - Seminar in Early Childhood Education (2 credits with ECE 495)
- ELED 310 - Education, Culture, and Equity
- ELED 425 - Social Studies for the Elementary School
- ELED 470 - Developing Teaching
- ELED 471 - Documenting Teaching
- ELED 480 - Literacy: Beginning Communicators
- ELED 491 - September Experience
- I T 344 - Foundations of Technology in Teaching and Learning
- I T 442 - Digital Decisions: Technology for Educators
- MATH 381 - Teaching K-8 Mathematics I
- MATH 382 - Teaching K-8 Mathematics II
- MATH 383 - Teaching K-8 Mathematics III
- PE 345 - Physical Education for Elementary School
- SCED 480 - Science Methods and Curriculum for the Elementary School
- SCED 490 - Laboratory/Field Experience in Elementary Science
- SPED 364 - Teaching Each Student

Early Childhood Education P-3 with Elementary Education Option, BAE

Department of Elementary Education, Woodring College of Education

133 credits (major and professional program)**Introduction**

The program in early childhood education consists of an academic major in Early Childhood Education and a sequence of professional certification courses that lead to dual endorsements for teacher licensure Pre-K through third grade and K-8th grade. Upon completion of the program, candidates can work in childcare centers, preschools, Head Start programs, and primary grades in public schools. The course work offers a combination of theory, methods, and field experiences in a variety of early childhood education settings.

Students seeking a bachelor's degree with teacher certification and an endorsement in early childhood education (P-3) and K-8th grade licensure must complete the General University Requirements, the Early Childhood Education (P-3) Major, and the professional education coursework.

Why Consider an Early Childhood Education P-3 with Elementary Education Option Major?

The Early Childhood Education (P-3) major has several unique program features:

- Students attend classes with other early childhood education students as a cohort group throughout the program.
- Students gain experience in teaching children in three age groups (infant/toddlers, pre-primary and primary) and in a variety of settings.
- Students are taught to understand and respect intercultural/familial diversity as they learn to develop partnerships with families.
- Students learn to use inquiry tools and process for developing meaningful and integrated learning experiences for young children.

How to Declare (Admission and Declaration Process):

Admission to both Western Washington University and Early Childhood Education are required before a student may begin taking courses in the professional sequence. Requirements for consideration of an application include:

- completion of a minimum of 45 credits
- cumulative grade point average of 2.75 or higher for the last 45 credits
- Meet the West-B basic skills requirement. This may be met by: a) passing the West-B exam, b) SAT minimum scores, or c) ACT minimum scores. See the Woodring admissions website: wce.wwu.edu/admissions/west-b-requirement and the West-B website: www.west.nesinc.com
- completion of an English composition course with grade of B- or higher

Enrollment restrictions apply in all teacher education programs. Meeting the above criteria makes the applicant eligible for admission, but does not guarantee admission. Applications from students who meet all the criteria are evaluated to determine those most qualified. All applicants are then rank-ordered, and a final

ELEMENTARY EDUCATION

list created based on available openings. For further information, visit Teacher Education Admissions, Miller Hall 150, (360) 650-3313 or visit the website at <http://www.wce.wvu.edu/admiss>. Retention in the program requires continuous demonstration of competence in standard oral and written English in all course work. Retention also requires maintenance of a 2.75 quarterly GPA for each quarter upon admission to Early Childhood Education. Courses required for a state teaching endorsement and for the professional sequence must be completed with grades of C (2.0) or better.
Student Advisement

Prospective Early Childhood students are invited to meet with an advisor for more information about the program. The office is in Miller Hall 300 and the phone number is (360) 650-3336. Once admitted to the program, students are assigned a faculty advisor with whom they will stay in contact throughout their program.

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the early childhood education major and in all courses required for the endorsements.

Early Childhood Education — Non Certification, BAE

Department of Elementary Education, Woodring College of Education

92 credits

Introduction

The program in early childhood education consists of an academic major in Early Childhood Education and a sequence of professional courses. Upon completion of the program, candidates can work in childcare centers, preschools, Head Start programs, and in after-school programs for school-age children. The course work offers a combination of theory, methods, and field experiences in a variety of early childhood education settings. This program is for candidates who are not seeking certification to work in the public schools.

Students seeking a bachelor's degree with the academic major in Early Childhood Education - Non Certification must complete the General University Requirements - and the Early Childhood Education Non Certification Major, and the required professional education coursework.

Why Consider an Early Childhood Education - Non Certification Major?

The Early Childhood Education - Non Certification major has several unique program features:

- Students attend classes with other early childhood education students as a cohort group throughout the program.
- Students gain experience in teaching children in three age groups (infant/toddlers, pre-primary and primary) and in a variety of settings.
- Students are taught to understand and respect intercultural/familial diversity as they learn to develop partnerships with families.
- Students learn to use inquiry tools and process for developing meaningful and integrated learning experiences for young children.

Language, Literacy, and Cultural Studies, BAE

Department of Elementary Education, Woodring College of Education

45-54 credits**Introduction**

The Bachelor of Arts in Education: Language, Literacy, and Cultural Studies major responds to the growing diversity in the state's schools and supports the Woodring College of Education's efforts to embrace diversity and promote social justice. The major focuses on research-based and experience-validated knowledge to help elementary school teachers reach all students. This includes increasing teacher candidates' cultural competency and capacity to teach English language learners. Graduates receive WWU's recommendation for a Residency Teaching Certificate with endorsements in Elementary Education, Reading, and English Language Learners (ELL) or Bilingual Education (BE).

Why Consider a Language, Literacy and Culture Major?

The LLC major was designed in response to requests from schools for elementary teachers to have the dispositions, knowledge, and skills to work with an increasingly diverse elementary student population and their families. Prior to entering the program, undergraduates will complete most or all of their general university requirements (GURs). After completion of the GURs, it will usually take eight or nine quarters to graduation, given a course load of 15-17 credits. Post-baccalaureate students must have completed a major from the approved list (see below) or call (360) 650-3336 for further advisement.

Retention in the program requires continuous demonstration of competence in standard oral and written English in all coursework. Retention also requires maintenance of a 2.75 quarterly GPA for each quarter upon

ELEMENTARY EDUCATION

admission to Elementary Education. Courses required for a state teaching endorsement and for the professional education sequence must be completed with a grading of C (2.0) or better.

Student Advisement

Prospective elementary education students are invited to meet with an advisor for more information about the program. The main office is in Miller Hall 300 and the phone number is (360) 650-3336. Once admitted to the program, students are assigned a faculty advisor with whom they will stay in contact throughout their program.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Requirements

- ELED 456 - Literacy Assessment
- ELED 486 - Literacy Difficulties in the K-12 Classroom
- ELED 401 - Writing Instruction in the Elementary Classroom
- ELED 405 - Culturally Relevant Materials for Diverse Learners
- ELL 431 - Second Language Acquisition Theory and Policy for P-12 Teachers
- ELL 432 - Introduction to English Linguistics for P-12 Teachers
- ELL 433 - Understanding Bilingual Learners in a Sociocultural Context
- ELL 434 - Methods And Materials For Teaching Beginning ELLs in Grades P-12
- ELL 436 - Seminar and Practicum for ELL or Bilingual P-12 Teachers
- ELL 438 - Methods and Programming for P-12 Bilingual Classrooms (for students seeking a bilingual endorsement)
- Choose two from the following (no more than one of which may be a 400 level course):
 - AMST 202 - The American Indian Experience
 - AMST 203 - The Hispano/a-American Experience
 - AMST 204 - The African-American Experience
 - AMST 205 - The Asian-American Experience
 - AMST 314 - Contemporary Latino/A Issues
 - AMST 315 - Contemporary American Indian Issues
 - AMST 316 - Contemporary African American Issues
 - AMST 362 - Asian-American History
 - AMST 412 - Seminar in Educational Equity
 - AMST 413 - Bridging Barriers with Migrant Youth
 - AMST 464 - Multicultural Education for Teachers

Additional Requirements

Elementary Education Professional Program Requirements (100-103 credits)

Department of Elementary Education, Woodring College of Education

Introduction

Students seeking a bachelor's degree with teacher certification and an endorsement in elementary education must complete the GURs, an approved academic major, and the professional education course work listed below.

Admission and Declaration Process

See the Elementary Education section of this catalog for program admission, completion, and teacher certification requirements.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Professional Studies Core (22 credits)

- ELED 303 - Educational Psychology - Development and Learning
- ELED 310 - Education, Culture, and Equity
- ELED 370 - Introduction to Teaching
- I T 344 - Foundations of Technology in Teaching and Learning
- I T 442 - Digital Decisions: Technology for Educators
- SPED 364 - Teaching Each Student

Elementary Program — Methods, Curriculum Content, and Field Experiences (78-81 credits)

- One course from:
 - ART 398 - Integrated Arts for Elementary Educators
 - DNC 398 - Integrated Arts for Elementary Educators
 - MUS 398 - Integrated Arts for Elementary Educators
 - THTR 398 - Integrated Arts for Elementary Educators
- One course from:
 - ART 380 - Art Educating the Child
 - DNC 433 - Creative Movement for Educators With Lab
 - MUS 361 - Music for Elementary Teachers
 - THTR 350 - Theatre for Youth
 - THTR 351 - Creative Pedagogy
- ELED 425 - Social Studies for the Elementary School
- ELED 470 - Developing Teaching
- ELED 471 - Documenting Teaching
- ELED 480 - Literacy: Beginning Communicators
- ELED 481 - Literacy: Fluent Communicators
- ELED 491 - September Experience
- ELED 492 - Practicum: Experience in Literacy Methods
- ELED 494 - Internship - Elementary
- HLED 455 - Health Education Grades K-8
- MATH 381 - Teaching K-8 Mathematics I
- MATH 382 - Teaching K-8 Mathematics II
- MATH 383 - Teaching K-8 Mathematics III
- MATH 491 - Internship Seminar - Teaching K-8 Mathematics
- PE 345 - Physical Education for Elementary School
- SCED 480 - Science Methods and Curriculum for the Elementary School
- SCED 490 - Laboratory/Field Experience in Elementary Science

Additional Endorsement

Bilingual Education — Endorsement

Department of Elementary Education, Woodring College of Education

32 credits

NOTE: The Bilingual Endorsement is only for those who are already P-12 teachers or in a P-12 teacher education program and who are working toward or already bilingual.

ELEMENTARY EDUCATION

Introduction

This program leads to an additional endorsement in Bilingual Education; when accompanied by a professional teacher education program and a first endorsement in another content area. Also required is a cultural studies course taught in the language of that culture or demonstration of equivalent experience. Expected proficiency is equivalent to a major in the language other than English, and oral proficiency at the ACTFL mid-advanced level. Each required course must be completed with a grade of B- (2.7) or better. A passing score on the Bilingual WEST-E and an assessment in the non-English language of instruction is required by the state.

Why Consider an Endorsement in Bilingual Education?

Teachers with the endorsement in Bilingual Education from Western Washington University possess in-depth understandings of the role of cultural and linguistic diversity in each student's education and the demonstrated ability to use research-based instruction when teaching in English and also in a non-English target language. The numbers of bilingual schools continue to grow across the United States as research documents the benefits of quality programs. Our program includes study of a variety of models for bilingual education, including two-way, dual, one-way, and early exit models. In addition, current issues related to bilingual education are explored. Teachers who earn the bilingual endorsement can also apply for the English Language Learner Endorsement.

The Bilingual Education endorsement prepares you to:

- Obtain the WA state endorsement for Bilingual Education
- Teach standards-based content in a target language other than English
- Work with families from various cultures
- Serve as a resource for other teachers
- Instruct using effective methods including strategies from the Guided Language Acquisition Design (GLAD)
- Thrive in culturally and linguistically diverse settings

How to Declare (Admission and Declaration Process):

Application and information on the application process for the Bilingual Education Endorsement is available in MH 300. More information on the program and application requirements is available at:

<https://wce.wwu.edu/sites/wce.wwu.edu/files/ELED%20-%20Bilingual%20Endorsement%20for%20P-12%20Teachers.pdf>.

Grade Requirements

Each required course must be completed with a grade of B- (2.7) or better.

Requirements

- ELL 431 - Second Language Acquisition Theory and Policy for P-12 Teachers
- ELL 432 - Introduction to English Linguistics for P-12 Teachers
- ELL 433 - Understanding Bilingual Learners in a Sociocultural Context
- ELL 434 - Methods And Materials For Teaching Beginning ELLs in Grades P-12
- ELL 435 - Methods and Materials for Academic Language Proficiency in Grades P-12
- ELL 436 - Seminar and Practicum for ELL or Bilingual P-12 Teachers
- ELL 438 - Methods and Programming for P-12 Bilingual Classrooms

English Language Learner Endorsement

Department of Elementary Education, Woodring College of Education

27 credits

Note: The ELL endorsement is only for those who are already P-12 teachers or in a P-12 teacher education program. If you are interested in teaching or working with language learners in a non P-12 school, you may be interested in the Teaching English as a Second Language (TESL) certificate (see TESL Certificate handout or consult www.wvu.edu/tesol).

Introduction

The Department of Elementary Education offers teacher endorsement programs in both English Language Learners (ELL) and in Bilingual Education. While an undergraduate can add both an ELL and a bilingual endorsement, only one minor can be declared; TESOL P-12 focus or bilingual education.

This program leads to an additional endorsement in English Language Learners based on Washington state English Language Learners endorsement competencies, when accompanied by a professional teacher education program and a first endorsement in another content area. Students must demonstrate study of another culture (gained through experience, or the minimum of 3 credits of approved course work) and the equivalent of one year of college-level language study world language other than English. A passing score on the ELL WEST-E is required by the state.

Why Consider an English Language Learner Endorsement?

Students who are English language learners are the fastest growing student population in the public school system. Statewide, approximately 10% of all P-12 students are ELLs, but in some districts that percentage is much, much higher. In order to meet the needs of this diverse population in the regular classroom and as an ELL specialist, we need teachers at all grade levels and content areas who have the ELL endorsement. For many schools, this is a highly recommended endorsement.

Teachers with the endorsement in English Language Learners (ELL) from Western Washington University possess in-depth understandings of the role of cultural and linguistic diversity in each student's education. Our program focuses on developing the mainstream P-12 classroom teacher's ability to shelter and support the instruction of language learners in mainstream classrooms, who are at all levels of fluency, as they work to achieve state expectations in subject matter content. Some teachers with ELL endorsements go on to become school ELL Specialists. ELL Specialists are usually experienced teachers who have taught language learners successfully for several years and have previously earned the ELL endorsement. Many earn a master's degree or National Board certification in ELL prior to becoming a school or district ELL Specialist.

The ELL endorsement program prepares you to:

- Obtain the WA state endorsement for English Language Learners.
- Teach a range of language learners in a mainstream classroom.
- Work with families from various cultures and home languages.
- Serve as a resource for other teachers.
- Plan instruction using the Sheltered Instruction Observation Protocol (SIOP).
- Instruct using effective methods including strategies from the Guided Language Acquisition Design (GLAD).
- Thrive in culturally and linguistically diverse settings.

How to Declare (Admission and Declaration Process):

Once you are admitted into an education program in Woodring, you will need to fill out a pink ELL endorsement application form prior to register for any of the ELL courses. This is not a competitive process. If you made it into an education program, you can be in the ELL endorsement program. If you have questions about the form, please contact Margaret Gegenhuber at margaret.gegenhuber@wwu.edu.

Grade Requirements

Each required course must be completed with a grade of B- (2.7) or better.

Requirements

- ELL 431 - Second Language Acquisition Theory and Policy for P-12 Teachers
- ELL 432 - Introduction to English Linguistics for P-12 Teachers
- ELL 433 - Understanding Bilingual Learners in a Sociocultural Context
- ELL 434 - Methods And Materials For Teaching Beginning ELLs in Grades P-12
- ELL 435 - Methods and Materials for Academic Language Proficiency in Grades P-12
- ELL 436 - Seminar and Practicum for ELL or Bilingual P-12 Teachers

ESOL Endorsement for Teachers

Department of Elementary Education, Woodring College of Education

27 credits

Introduction

The ESOL Endorsement for Teachers (ESLT) program has been developed for practicing teachers who wish to learn more about supporting English language learners (ELLs) in their classroom and developed skills needed to become ESOL specialist in the future. The program is designed to meet the needs of the working teacher. The cohort-model program is a 13-month program that is a mix of online learning and face-to-face meetings where the teachers are. In other words, the program travels to the teachers rather than making teachers travel to Bellingham. We understand that teachers come to this program with skills, knowledge, and experiences that will deepen everyone's learning.

The ESOL Endorsement for Teachers (ESLT) program has two tracks. The first is an endorsement program that can be fully rolled into the Masters of Education in Language and Literacy at Western Washington University. The classes are all 500-level courses. The second track has 400-level courses. Teachers enrolled in both tracks will take the courses together and learn from each other.

For more information on the program go to wwu.edu/esol.

Why Consider an ESOL Endorsement for Teachers?

Students who are English language learners are the fastest growing student population in the public school system. Statewide, approximately 10% of all P-12 students are ELLs, but in some districts that percentage is much, much higher. In order to meet the needs of this diverse population in the regular classroom and as an ELL specialist, we need teachers at all grade levels and content areas who have the ELL endorsement. For many schools, this is a highly recommended endorsement.

Teachers with the endorsement in English Language Learners (ELL) from Western Washington University possess in-depth understandings of the role of cultural and linguistic diversity in each student's education. Our program prepares classroom teachers to be able to support ELLs more successfully. This program also prepares classroom teachers to become ELL specialists.

The ELL endorsement program prepares you to:

- Obtain the WA state endorsement for English Language Learners.
- Teach a range of language learners in a mainstream classroom.
- Support ELLs as an ELL specialist
- Work with families from various cultures and home languages.
- Serve as a resource for other teachers.
- Plan instruction using the Sheltered Instruction Observation Protocol (SIOP).
- Instruct using effective methods including strategies from the Guided Language Acquisition Design (GLAD).
- Thrive in culturally and linguistically diverse settings.

Teachers will apply through Extended Education.

Grade Requirements

A grade of C or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Track 1

- ELL 560 - Sociocultural Theory and Policy Sequence for P-12 Teachers
- ELL 561 - Second Language Acquisition and Linguistics for P-12 Teachers
- ELL 562 - Assessment of Culturally and Linguistically Diverse Learners for P-12 Teachers
- ELL 563 - English Grammar and Academic Language for P-12 Teachers
- ELL 564 - Methods for Teaching Beginning ELLs for P-12 Teachers
- ELL 565 - Supporting ELLs Across the Content Areas for P-12 Teachers
- ELL 566 - Capstone for the ESLT Program

Minimum of 4 observations using the SIOP protocol (2 in ELL 564 and 2 in ELL 565).

P-12 certification.

Currently teaching or has access to a classroom and curriculum materials to complete assignments.

Foreign Language - 3 years of high school, 1 year of college, or equivalent experience.

Track 2

- ELL 460 - Sociocultural Theory and Policy Sequence for P-12 Teachers
- ELL 461 - Second Language Acquisition and Linguistics for P-12 Teachers
- ELL 462 - Assessment of Culturally and Linguistically Diverse Learners for P-12 Teachers
- ELL 463 - English Grammar and Academic Language for P-12 Teachers
- ELL 464 - Methods for Teaching Beginning ELLs for P-12 Teachers
- ELL 465 - Supporting ELLs Across the Content Areas for P-12 Teachers
- ELL 466 - Capstone for the ESLT Program

Minimum of 4 observations using the SIOP protocol (2 in ELL 464 and 2 in ELL 465).

P-12 certification.

Currently teaching or has access to a classroom and curriculum materials to complete assignments.

Foreign Language - 3 years of high school, 1 year of college, or equivalent experience.

ELEMENTARY EDUCATION

Reading — P-12 Additional Endorsement

Department of Elementary Education, Woodring College of Education

24-27 credits

NOTE: The Reading endorsement program is only for those who are already P-12 teachers or in a P-12 teacher education program.

Introduction

This program, combined with a performance-based assessment of competencies, leads to an additional endorsement in Reading when accompanied by a professional education program and a qualifying endorsement in another content area.

Why Consider a P-12 Additional Endorsement in Reading?

The competencies that lead to a reading endorsement on your certificate provide you with the opportunity to further your knowledge and skills for literacy instruction. You will deepen your knowledge of language and literacy learning, while building your capacity for helping all children achieve as readers, writers, and language users. Some teachers with Reading endorsements go on to become school Reading Specialists. Reading Specialists are usually experienced teachers who have successfully taught in mainstream classrooms for several years and have previously earned the Reading endorsement. Many earn a master's degree or National Board certification in Reading prior to becoming a school or district Reading Specialist.

The Reading endorsement program prepares you to:

- Obtain the WA state endorsement for Reading.
- Develop and work with P-12 students and their families.
- Serve as a resource for other teachers.

How to Declare (Admission and Declaration Process):

Application and information on the application process for the P-12 Reading Endorsement is available in MH 300. More information on the program and application requirements is available at:
<https://wce.wwu.edu/sites/wce.wwu.edu/files/ELED%20-%20Reading%20Endorsement.pdf>.

Grade Requirements

All coursework and demonstration of state-required competencies must be completed with a grade of B (3.0) or better and within a five-year span, based on the application date for the reading endorsement.

Requirements

- One course from:
 - ELED 456 - Literacy Assessment
 - ELED 538 - Current Issues in Assessment and Evaluation in Elementary Literacy Educationor equivalence upon approval by advisor
- One course from:
 - ELED 480 - Literacy: Beginning Communicators

- ELED 587 - Improvement of Instruction in Literacy
or equivalence upon approval by advisor
- ❑ One course from:
 - ELED 481 - Literacy: Fluent Communicators
 - ELED 584 - Teaching the Integrated Language Arts
or equivalence upon approval by advisor
- ❑ One course from:
 - ELED 486 - Literacy Difficulties in the K-12 Classroom
 - ELED 586 - Seminar for Literacy Specialists
or equivalence upon approval by advisor
- ❑ One course from:
 - ELL 432 - Introduction to English Linguistics for P-12 Teachers
 - TESL 401 - Introduction to English Linguistics for TESOL
or equivalence upon approval by advisor
- ❑ One course from:
 - ELED 405 - Culturally Relevant Materials for Diverse Learners
 - ELED 583 - Literacy and Children's Literature
or equivalence upon approval by advisor

Romano, Rosalie, PhD.
Riddle Buly, Marsha, PhD.
Timmons Flores, Maria, PhD.
Wayne, Kathryn, PhD.

Graduate Program Advisors: Dr. Tracy Coskie, Miller Hall 305A, 360-650-2164; Dr. Marsha Riddle Buly, Miller Hall 305B, 360-650-7348.

Program Description

The MEd – Language and Literacy has four main components: foundations, core study, independent research, and study in a concentration area. May provide Washington state additional endorsement in reading, ELL, or bilingual education.

Program Application/Admission Requirements

Candidates must meet the requirements of the Graduate School (see pages 58-59) in addition to the following departmental requirements:

ELEMENTARY EDUCATION

- **Specific Test Requirements:** Miller Analogies Test or Graduate Record Exam, General Test.
- **Supporting Materials:**
 - A résumé
 - A statement of purpose for seeking the MEd, not to exceed one page
 - An on-campus interview (only if requested by the department)
 - In limited cases, students who do not meet the departmental requirements for full admission may be granted provisional admission by the Graduate School.

Students' applications are first reviewed by the Graduate School before consideration for admission to a specific program. No graduate Record Exams (GRE) or Miller Analogies Test (MAT) is required if an applicant holds an advanced degree.

Program Requirements (47 credits minimum)

Non-Thesis: Research Paper and General Comprehensive Exam

- Foundations (12 credits)
 - EDUC 501 - Introduction to Educational Research
 - EDUC 691 - Research Seminar and Inquiry Project
 - I T 515 - Emerging Technologies and New Literacies
- Core (15-16 credits)
 - ELED 521 - Seminar in Elementary Curriculum
 - ELED 535 - Research Analysis of Current Issues in Elementary Education
 - ELED 538 - Current Issues in Assessment and Evaluation in Elementary Literacy Education
or ELL 562 - Assessment of Culturally and Linguistically Diverse Learners for P-12 Teachers
 - ELED 587 - Improvement of Instruction in Literacy
- Concentration Electives (19-20 credits): Concentration electives will generally be selected, by advisement, from elementary and early childhood education, literacy, TESOL, ELL, Bilingual Education, and special education courses. Contact the department office for requirements within the various concentrations.

Advancement to Candidacy

Advancement to candidacy is formal recognition that the student has completed all admission requirements and has demonstrated satisfactory performance in at least 12 credits of graduate study. In addition to the above requirements, the department requires students to submit a proposal for a research paper (EDUC 691) for approval by the student's committee.

Research Paper

The research paper plus comprehensive exams (EDUC 691) represent the independent research component of the program. Students design and carry out independent research under the direction of a faculty committee. Two faculty are required for the committee directing the research paper (EDUC 691).

Additional Information

Competency in Instructional Technology

Students admitted to programs in the Woodring College of Education are required to possess competence in the use of instructional technology in education prior to completion of their program and, when applicable, prior to being recommended for certification. Procedures for demonstrating or developing competence are available in Miller Hall 204.

Transfer from ESOL Endorsement for Teachers Program

Students who are currently enrolled in or who have completed the WWU ESLT program may transfer up to 27 credits earned into the M.Ed. - Language and Literacy program. The 27 credits must fall within other graduate school guidelines (e.g., taken within the last five years, no more than 10 400-level credits, etc.) and be accepted by the program advisors.

Comprehensive Assessment Woodring

College of Education students in the Non-Thesis option are required to complete a comprehensive assessment. The format, timeline and criteria are defined by specific departments. For procedures, students should see their graduate advisors.

Second Master's Degree

Enrollment must be for a single MEd, MA or MIT program. Students who have earned an MEd or MIT may apply for admission to another MEd program but all requirements of the second program must be met (with possible allowance for some course work taken in the first program). However, all programs must be completed with the minimum number of required credits.

Note: Due to a review and revision process which may affect Woodring College of Education programs and courses, the information contained in the Education section of this catalog is subject to change.

Post-baccalaureate candidates interested in combining teacher certification and master's degree study should contact the Teacher Education Admissions office or the Graduate Office.

Some programs include an internship. A Washington State Patrol/FBI fingerprint check is required of most students prior to the internship. Students should check with their department advisor for details.

Some programs include an internship. A Washington State Patrol/FBI fingerprint check is required of most students prior to the internship. Students should check with their department advisor for details.

Minor

Bilingual Education Minor

Department of Elementary Education, Woodring College of Education

32 credits

Note: The Bilingual Education Minor is for undergraduate students in a P-12 teacher education program who are working toward or already fluent in a language in addition to English.

Introduction

Undergraduates may complete a 32-credit minor in Bilingual Education. To declare the Bilingual Education minor, students must complete a cultural studies course taught in the language of that culture, or demonstrate the equivalent in experience. Students must also be recommended by the department of Modern and Classical Languages prior to enrolling in the seminar and practicum in Bilingual Education or declaring the minor. Students must complete the minor with a minimum GPA of 2.7 in minor course work.

Why Consider a Bilingual Education Minor?

Teachers with a Bilingual Education Minor from Western Washington University possess in-depth understandings of the role of cultural and linguistic diversity in each student's education and the demonstrated ability to use research-based instruction when teaching in English and also in a non-English target language. The numbers of bilingual schools continue to grow across the United States as research documents the benefits of quality programs. Our program includes study of a variety of models for bilingual education, including two-way, dual, one-way, and early exit models. In addition, current issues related to bilingual education are explored. Teachers who earn the Bilingual Education Minor may also be able to seek the state English Language Learner and Bilingual Education endorsement (check current state requirements).

The Bilingual Education Minor program prepares you to:

- Teach standards-based content in a target language other than English.
- Work with families from various cultures.
- Serve as a resource for other teachers.
- Instruct using effective methods including strategies from the Guided Language Acquisition Design (GLAD).
- Thrive in culturally and linguistically diverse settings.

- ELL 438 - Methods and Programming for P-12 Bilingual Classrooms

Teaching English to Speakers of Other Languages Minor

Department of Elementary Education, Woodring College of Education

27 credits

Introduction

The TESOL minor is available to undergraduate students in both the TESOL certificate program and the ELL endorsement program. The TESOL adult focus minor includes 27 credits of TESOL coursework, while the TESOL P-12 focus includes 27 credits of ELL coursework for students in teacher-certification programs. Students completing the TESOL adult focus minor may also earn a certificate in TESOL.

Students earning an ELL and/or Bilingual Education endorsement may choose to complete either the 27-credit TESOL minor with a focus on P-12 learners or the 33-credit Bilingual Education minor, but not both. To declare the TESOL minor, students must demonstrate study of another culture (gained through experience, or the minimum of 3 credits of approved course work) and the equivalent of one year of college-level foreign language study.

Why Consider a Teaching English to Speakers of Other Languages Minor?

TESOL adult focus minor: There is a growing demand around the world for trained TESOL professionals. Successful completion of Western's TESOL Program provides a minor (for students enrolled in a Bachelor's degree program at Western), an international certificate, and the skills to thrive in settings that are culturally and linguistically diverse. The TESOL certificate demonstrates evidence of in-depth training, opening doors to opportunities to teach English internationally and nationally. Employment may be found at international language schools and community language settings for recent immigrants.

TESOL P-12 focus minor: Students who are English language learners are the fastest growing student population in the public school system. Statewide, approximately 10% of all P-12 students are ELLs, but in some districts that percentage is much, much higher. In order to meet the needs of this diverse population in the regular classroom and as an ELL specialist, we need teachers at all grade levels and content areas who have the TESOL P-12 focus minor. For many schools, this is a highly recommended qualification.

The cross-cultural, cross-linguistic, and presentation skills developed in the program are valued in a variety of careers that involve working with diverse populations.

TESOL P-12 focus minor: Classroom teacher P-12; ELL specialist

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

Grade Requirements

Students must complete the minor with a minimum GPA of 2.7 in minor course work.

Requirements

Adult focus for TESOL Certificate Students:

- TESL 401 - Introduction to English Linguistics for TESOL
- TESL 404 - Understanding English Grammar for TESOL
- TESL 405 - Methods for Teaching English Grammar
- TESL 410 - Second Language Acquisition Theory for TESOL
- TESL 420 - Methods and Materials for Basic Communication
- TESL 421 - Methods and Materials for Academic Language Proficiency
- TESL 432 - Seminar in TESOL
- TESL 435 - Practicum in TESOL

or

P-12 Focus for ELL Endorsement Students:

- ELL 431 - Second Language Acquisition Theory and Policy for P-12 Teachers
- ELL 432 - Introduction to English Linguistics for P-12 Teachers
- ELL 433 - Understanding Bilingual Learners in a Sociocultural Context
- ELL 434 - Methods And Materials For Teaching Beginning ELLs in Grades P-12
- ELL 435 - Methods and Materials for Academic Language Proficiency in Grades P-12
- ELL 436 - Seminar and Practicum for ELL or Bilingual P-12 Teachers

WWU Certificate (Non-Degree)**TESOL Certificate**

Department of Elementary Education, Woodring College of Education

27 credits

Introduction

Completion of the 27 credit sequence of courses results in a TESOL certificate awarded by Western Washington University. This certificate can be used both domestically and internationally as evidence of in-depth training in Teaching English to Speakers of Other Languages (TESOL). The program is academically rigorous and experientially rich. TESOL students must successfully complete TESOL track coursework in methodology and linguistics with a minimum GPA of 2.7, demonstrate study of another culture (gained through experience, or the minimum of 3 credits of approved course work) and the equivalent of one year of college-level foreign language study. TESOL certificate candidates accumulate 100 hours of teaching experience with English language learners through classroom tutoring and a supervised and mentored teaching practicum.

ELEMENTARY EDUCATION

Why Consider a TESOL Certificate?

There is a growing demand around the world for trained TESOL professionals. Successful completion of Western's TESOL Program provides a minor (for students enrolled in a Bachelor's degree program at Western), an international certificate, and the skills to thrive in settings that are culturally and linguistically diverse. The TESOL certificate demonstrates evidence of in-depth training, opening doors to opportunities to teach English internationally and nationally. Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Review the following eligibility requirements and application process for currently enrolled Western students and for prospective students not yet formally admitted to the University. Additional information can be found on the "How to Apply" section of the TESOL webpage at <https://wce.wwu.edu/tesol/how-apply>.

Eligibility

- Applicants must have completed at least 45 credits of college-level coursework with a preferred minimum GPA of 3.0.
- Non-native English speakers are required to have a TOEFL score of 550 or higher.
- Successful completion of a criminal background check.

Students currently admitted/enrolled at Western

- Submit the TESOL Program Application.
- Once admitted to the TESOL program, you will be provided with registration information.

Prospective students not currently enrolled at Western

- Submit WWU Admissions Application, transcripts and fee.
- Submit the TESOL Program Application.
- Once formally admitted to Western and to the TESOL program, you will be provided details on how to register.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- TESL 401 - Introduction to English Linguistics for TESOL
- TESL 404 - Understanding English Grammar for TESOL
- TESL 405 - Methods for Teaching English Grammar
- TESL 410 - Second Language Acquisition Theory for TESOL
- TESL 420 - Methods and Materials for Basic Communication
- TESL 421 - Methods and Materials for Academic Language Proficiency
- TESL 432 - Seminar in TESOL
- TESL 435 - Practicum in TESOL

State Issued Certificate Preparation (Non-Degree)

Elementary Education Professional Program

Department of Elementary Education, Woodring College of Education

100-103 credits

Introduction

Students seeking a bachelor's degree with teacher certification and an endorsement in elementary education must complete the GURs, an approved academic major, and the professional education course work listed below.

Why Consider an Elementary Education Professional Program?

Elementary teachers have a unique opportunity to make a difference in their communities by laying the foundation for both future academic learning and for future participation in democratic society. By helping students learn how to learn, develop problem-solving capacities, cultivate stamina, and learn the value of practice, they set the stage for successful life-long learning. By introducing students to key understandings and inquiry processes of subject matter disciplines, they set the stage for deeper learning through subsequent schooling. By helping students learn to appreciate each other, value their differences, and collaborate successfully, they help build healthy, sustainable, globally interconnected communities for tomorrow. By doing all of these things, they help address existing inequities and promote the well-being of our society.

Elementary Education Professional Program — Outreach Program

Department of Elementary Education, Woodring College of Education

99 credits

Introduction

Students who have completed a bachelor's degree in an approved academic major and are seeking teacher certification with an endorsement in elementary education through Teacher Education Outreach Programs should complete the Elementary Education Professional Program - Outreach Program requirements. Program coursework listed below includes some special education content and is delivered through a cohort-based integrated model designed specifically for outreach program sites.

Contact Information

Assistant Dean

Larry Antil
Miller Hall 256B

Larry.Antil@wwu.edu

Program Manager

Joanna Reynoso
Miller Hall 256C
360-650-2725
Joanna.Reynoso@wwu.edu

How to Declare (Admission and Declaration Process):

Before students may begin taking courses in education, they must be admitted to both Western Washington University and Teacher Education Outreach Programs. Admission to our programs occurs once a year in the fall. Program admission requirements include:

- Bachelor of Arts or Science in an approved academic major (see below)

- Minimum grade point average of 2.75 overall or for the most recent 45 quarter credit hours
- State minimum scores on the Washington Educator Skills Test Basic (WEST-B). This test is offered 6 times a year at various sites in the state. Visit the Woodring admissions website: wce.wvu.edu/admissions/west-b-requirement and the WEST-B website: www.west.nesinc.com
- English composition course, completed with a B- or better
- Three letters of recommendation
- Reflective essay

For more details about program admission, please see the Frequently Asked Questions page at www.wce.wvu.edu/depts/teop.

Enrollment restrictions apply in all teacher education programs. Meeting the above criteria makes the applicant eligible for admission, but does not guarantee admission. Students who meet all criteria are further evaluated by the department to determine the most qualified applicants. Retention in the program requires continuous demonstration of competence in standard oral and written English in all coursework. Retention also requires maintenance of a 2.75 quarterly GPA for each quarter after admission. The State of Washington requires students to earn a "C" or better in all major endorsement and most education courses.

See the Teacher Education Outreach Programs section of this catalog for program admission, completion, and teacher certification requirements.

Advisement

Prospective elementary education students are invited to meet with an advisor for more information about the program (see above for site contacts). At all TEOP sites, the student advisor is the Academic Program Director. Students will be assisted and monitored by their advisors and their program coordinator on a regular basis throughout their program.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Requirements

- ART 380 - Art Educating the Child
- SPED 301 - Educational Psychology I: Development and Individual Differences

- ❑ SPED 467 - Curriculum-Based Evaluation

Early Childhood Education Courses

ECE 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ECE 380 - Foundations of Literacy for Early Childhood Education

Examines research-based literacy development for children, pre-Kindergarten through grade three. Topics include theoretical perspectives on literacy development; influence of language and culture on literature development; and research-based literacy instruction and materials. Emphasis on assessment of early literacy development.

Prerequisites & Notes: Admission to Woodring College of Education or permission of instructor

Credits: 4

Grade Mode: Letter

ECE 390 - Infant and Toddler Practicum and Seminar

Child development theories, learning principles and processes for infants and toddlers. Includes observations in early childhood settings to document actions of infants/toddlers to understand how and what children learn. Weekly seminar and practicum.

Prerequisites & Notes: Admission to Woodring College of Education or instructor permission

Credits: 4

Grade Mode: Letter

ECE 391 - Preschool Practicum and Seminar

Child development for the ages of three years to eight years. Theories, learning principles and processes for children three to eight years. Includes observations in early childhood settings to document children's actions and words to understand how and what children learn. Weekly

seminar and practicum.

Prerequisites & Notes: Admission to Woodring College of Education or instructor permission

Credits: 4

Grade Mode: Letter

ECE 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ECE 430 - Creativity & Play in ECE

Developing the skills and techniques for working with children in the arts. Includes visual art, music, drama, and dance/movement. Emphasis on cognitive and literacy development in the context of play.

Prerequisites & Notes: ECE 434 or Permission of Instructor

Credits: 4

Grade Mode: Letter

ECE 431 - Fundamentals of Early Childhood Education

Introduction to the field of early childhood education. Includes historical perspectives, philosophical bases, major theories, professional ethics, developmentally appropriate practices, curricular approaches, types of early childhood settings, role of the teacher and educational issues.

Prerequisites & Notes: Admission to Woodring College of Education or instructor permission

Credits: 4

Grade Mode: Letter

ECE 434 - Environments for Early Learning

Elements important to the design of learning environments for young children. Covers the principles that transform space into engaging learning environments. Includes work in early childhood classroom settings to integrate current theory, principles, and early childhood education

practices.

Prerequisites & Notes: ECE 390 or ECE 391 or Permission of Instructor

Credits: 4

Grade Mode: Letter

ECE 435 - Child Abuse and Neglect

Examines multiple issues related to the identification and reporting of young children where abuse and neglect are suspected. Study of child maltreatment, family dynamics and preventive strategies for child, family and community. Examination of ecological perspective and a risk/resilience framework.

Prerequisites & Notes: Admission to Woodring College of Education or instructor permission

Credits: 4

Grade Mode: Letter

ECE 436 - Child Guidance: Principles and Practices

This course will examine the theories, principles and practices for developmentally and culturally appropriate guidance for young children. Emphasis is placed on guidance strategies and intervention to facilitate young children's autonomy and self-discipline while promoting development of self-concept, identity and pro-social behaviors and relationships. Effect of adult-child interaction on child guidance, development and learning will be examined.

Prerequisites & Notes: ECE 390

Credits: 3

Grade Mode: Letter

ECE 438 - Family and Community Relationships

Examines the importance of family partnerships in a variety of early childhood education programs and describes family-centered principles and approaches. Emphasis on the role of families in educational programs, diversity in families, family systems, communication with families, community resources, and conferencing with families.

Prerequisites & Notes: Admission to Woodring College of Education or instructor permission

Credits: 4

Grade Mode: Letter

ECE 439 - Curriculum Planning in Early Childhood Education

Approaches for planning integrated and meaningful curriculum in early childhood programs, PreK-primary.

Prerequisites & Notes: ECE 430; Co-requisite: ECE 495; or permission of instructor.

Credits: 4

Grade Mode: Letter

ECE 495 - Internship - Preschool

Supervised teaching experience to develop and demonstrate teaching competence at the preschool level. S/U grading.

Prerequisites & Notes: Recommendation for supervised teaching

Credits: 6

Grade Mode: S/U

ECE 496 - Internship - Primary

Supervised teaching experience to develop and demonstrate teaching competence at the primary level. S/U grading.

Prerequisites & Notes: Recommendation for supervised teaching

Credits: 10

Grade Mode: S/U

ECE 498 - Seminar in Early Childhood Education

Seminar synthesizes the internship experience by providing a forum for discussion of internship objectives and topics. Repeatable once for credit. Must be taken with both ECE 495 and ECE 496. S/U grading.

Prerequisites & Notes: Corequisite ECE 495 or ECE 496

Credits: 2

Grade Mode: S/U

Elementary Education Courses

ELED 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ELED 303 - Educational Psychology - Development and Learning

ELEMENTARY EDUCATION

Course will explore principles of human development, individual differences, motivation, and learning as they relate to both academic and non-academic functioning. The course will emphasize the implications of these principles for early childhood and elementary settings.

Prerequisites & Notes: Admission to Elementary Education Professional Program or permission of department chair. Co-requisite: ELED 370, ELED 310.

Credits: 5

Grade Mode: Letter

ELED 310 - Education, Culture, and Equity

Issues of culture and social justice as they impact education, schools, and teaching. Includes a service learning component.

Prerequisites & Notes: Admission to Elementary Education Professional Program or permission of department chair. Co-requisites: ELED 303, ELED 370, or permission of department chair.

Credits: 4

Grade Mode: Letter

ELED 370 - Introduction to Teaching

Exploring theoretical and practical approaches to culturally responsive teaching and planning for instruction which engages diverse students in substantive, worthwhile learning. Includes practicum experiences in an elementary or middle school classroom.

Prerequisites & Notes: Admission to Elementary Education Professional Program or permission of department chair. Co-requisites: ELED 303, ELED 310.

Credits: 5

Grade Mode: Letter

ELED 372 - Introduction to Teaching Seminar

Exploring theoretical and practical approaches to culturally responsive teaching and planning for instruction which engages diverse students in substantive, worthwhile learning. Not open to students who have received credit for ELED 370.

Prerequisites & Notes: Admission to Woodring College's Elementary Teacher Outreach Programs. Co-requisite: ELED 373

Credits: 4

Grade Mode: Letter

ELED 373 - Introduction to Teaching - Practicum

Practicum experiences in an elementary or middle school classroom related to the content of ELED

372. Not open to students who have received credit for ELED 370. S/U grading.

Prerequisites & Notes: Admission to Woodring College's Elementary Teacher Education Outreach Programs. Co-Req: ELED 372

Credits: 1

Grade Mode: S/U

ELED 380 - Literacy I: Foundations

Terminology and concept development of the language of literacy; introduction to assessment, curriculum, and instruction of literacy teaching and learning.

Prerequisites & Notes: ELED 370

Credits: 4

Grade Mode: Letter

ELED 386 - Practical Assessment in the Elementary Classroom I

Develop skills in using assessment methodology to enhance teaching. Topics include assessment models, basic premises, the value of sound assessment procedures, and an examination of the thought processes of educational evaluation.

Prerequisites & Notes: Admission to Woodring College Elementary Teacher Education Outreach Programs.

Credits: 2

Grade Mode: Letter

ELED 387 - Practical Assessment in the Elementary Classroom II

Refine skills in using assessment methodology to enhance teaching. Topics include application of assessment models and analysis of student performance using sound assessment procedures.

Prerequisites & Notes: Admission to Woodring College Elementary Teacher Education Outreach Programs; ELED 386.

Credits: 2

Grade Mode: Letter

ELED 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ELED 401 - Writing Instruction in the Elementary Classroom

Focus on writing development and processes. Methods for assessment and instruction for writing in the elementary school.

Prerequisites & Notes: Admission to Elementary Education Department or instructor permission.

Credits: 5

Grade Mode: Letter

ELED 405 - Culturally Relevant Materials for Diverse Learners

This course focuses on P-12 educators' development of a critical eye when selecting and evaluating culturally relevant materials, including media and technology resources. The course includes a wide reading of culturally relevant resources, guidance in the selection and analysis of such materials, and instruction in how to use them in innovative ways. Correlation to current state and national standards is included.

Credits: 4

Grade Mode: Letter

ELED 424 - Language Arts in the Elementary Curriculum

Functions and programs of language arts in the curriculum including reading, writing, speaking, listening.

Prerequisites & Notes: SPED 420

Credits: 4

Grade Mode: Letter

ELED 425 - Social Studies for the Elementary School

Social studies methods, resources, multicultural literature, curriculum, objectives, planning and exposure to contributions of social sciences. Includes practicum experiences in an elementary or middle school classroom.

Prerequisites & Notes: ELED 370, ELED 481, and SCED 490; or permission of instructor.

Credits: 5

Grade Mode: Letter

ELED 426 - Social Studies Methods

Social studies methods, resources, multicultural literature, curriculum, objectives, planning and exposure to contributions of social sciences. No practicum experience is included in this course.

Prerequisites & Notes: SPED 420

Credits: 4

Grade Mode: Letter

ELED 456 - Literacy Assessment

Explores classroom-based literacy assessment, with a focus on reading, writing, and oral language; includes 20 hour practicum.

Prerequisites & Notes: ELED 480 and ELED 481 or permission of instructor. Co-requisite: ELED 486.

Credits: 4

Grade Mode: Letter

ELED 464 - Multicultural Education for Teachers

Preparation for teaching in a multicultural society. Participants will learn how to design a curriculum that reflects diversity and an instructional methodology that promotes the learning of diverse students. Also offered as AMST 464.

Credits: 4

Grade Mode: Letter

ELED 470 - Developing Teaching

Strengthening teaching understandings, skills, and dispositions with an emphasis on learners and learning in classroom contexts, subject matter knowledge and pedagogy, and developing and sustaining a productive and inclusive classroom culture and organization. Includes practicum experiences in an elementary or middle school classroom.

Prerequisites & Notes: ELED 370, ELED 481, SCED 490; or permission of instructor. For ECE Pre-3 and dual endorsement students: ECE 390 and ECE 391.

Credits: 5

Grade Mode: Letter

ELED 471 - Documenting Teaching

Capstone experience for the preparation of a Teacher Performance Assessment documenting the candidate's ability to design and implement standards-based instruction, assess student learning and reflect on the teaching and learning process. Includes practicum experience in an elementary or middle school classroom and participation in a collegial learning community.

Prerequisites & Notes: ELED 470

Credits: 5

Grade Mode: S/U

ELED 472 - Developing Teaching Seminar

ELEMENTARY EDUCATION

Strengthening teaching understandings, skills, and dispositions with an emphasis on learners and learning in classroom contexts, subject matter knowledge and pedagogy, and developing and sustaining a productive and inclusive classroom culture and organization. Not open to students who have received credit for ELED 470.

Prerequisites & Notes: Admission to Woodring College's Teacher Education Outreach Programs; ELED 372 and ELED 373; Co-requisite: ELED 473
Credits: 3
Grade Mode: Letter

ELED 473 - Developing Teaching - Practicum

Practicum experiences in an elementary or middle school classroom related to the content of ELED 472. Not open to students who have received credit for ELED 470. S/U grading.

Prerequisites & Notes: Admission to Woodring College's Teacher Education Outreach Programs; ELED 372 and ELED 373; Co-requisite: ELED 472.
Credits: 2
Grade Mode: S/U

ELED 474 - Documenting Teaching Seminar

Capstone experience for the preparation of a final electronic portfolio documenting experiences in learning to teach and the ability to impact elementary student growth and learning. Not open to students who have received credit for ELED 471.

Prerequisites & Notes: Admission to Woodring College's Teacher Education Outreach Programs; Completion of ELED 472 and ELED 473; and Co-requisite: ELED 475
Credits: 3
Grade Mode: Letter

ELED 475 - Documenting Teaching - Practicum

Practicum experiences in an elementary or middle school classroom related to the content of ELED 474 and participation in a collegial learning community. Not open to students who have received credit for ELED 471. S/U grading.

Prerequisites & Notes: Admission to Woodring College's Teacher Education Outreach Programs; ELED 472 and 473; Co-requisite: ELED 474.
Credits: 2
Grade Mode: S/U

ELED 478 - Literacy: Fluent Communicators Seminar

Understanding the components and structure of a comprehensive literacy program for addressing

reading, writing, listening, and speaking in the elementary classroom, with a particular focus on developing and supporting fluent communicators. Not open to students who have received credit for ELED 481.

Prerequisites & Notes: Admission to Woodring College's Teacher Education Outreach Programs; ELED 380; Co-requisite: ELED 479.
Credits: 4
Grade Mode: Letter

ELED 479 - Literacy: Fluent Communicators - Practicum

Practicum experiences in an elementary or middle school classroom related to the content of ELED 478. Not open to students who have received credit for ELED 481. S/U grading.

Prerequisites & Notes: Admission to Woodring College Elementary Teacher Outreach Programs; ELED 380. Co-requisite: ELED 478.
Credits: 2
Grade Mode: S/U

ELED 480 - Literacy: Beginning Communicators

Application of theoretical and research-based concepts of literacy. Teaching and learning of emergent/beginning communicators in a pluralistic society. Includes practicum experiences in an elementary school.

Prerequisites & Notes: ENG 370, LING 201 or ELL 432 (or other linguistics course by approval) for ELED and ECE Dual Endorsement students; ELED 370 or ECE 391 for ECE majors; SPED 420 or ECE 391 for ECSE majors.
Credits: 5
Grade Mode: Letter

ELED 481 - Literacy: Fluent Communicators

Understanding the components and structure of a comprehensive literacy program for addressing reading, writing, listening, and speaking in the elementary classroom, with a particular focus on developing and supporting fluent communicators. Includes practicum experiences in an elementary or middle school classroom.

Prerequisites & Notes: ELED 480
Credits: 5
Grade Mode: Letter

ELED 483 - Literacy Workshop: Reading, Writing, and Language Learners

Students will deepen and apply knowledge of literacy learning by developing and teaching

theoretically-sound and research-based instructional strategies and units of study appropriate for a multilingual "mainstream" learning environment.

Prerequisites & Notes: ELED 480 and ELL 434; Co-requisite ELL 435 or permission of instructor.

Credits: 2

Grade Mode: Letter

ELED 486 - Literacy Difficulties in the K-12 Classroom

Analysis, correction and prevention of literacy difficulties in K-12 classrooms; refinement of group and informal assessment; supervised practicum with pupils having mild difficulties in reading, writing, and/or oral language.

Prerequisites & Notes: Permission of instructor.

Credits: 4

Grade Mode: Letter

ELED 490 - Teaching Laboratory

Diagnosis of students, lesson preparation, videotaped peer teaching, analysis of teaching, lesson redesign. Repeatable up to 8 credits, including original course.

Prerequisites & Notes: ELED 472 or ELED 470.

Credits: 1-4

Grade Mode: S/U

ELED 490A - September Experience

Observation and participation in the opening of school. S/U grading.

Prerequisites & Notes: department permission

Credits: 2 TO 3

Grade Mode: S/U

ELED 491 - September Experience

Observation and participation in the opening of school. S/U grading.

Prerequisites & Notes: Department permission.

Credits: 2

Grade Mode: S/U

ELED 492 - Practicum: Experience in Literacy Methods

In-school experience observing and teaching reading and language arts. S/U grading.

Prerequisites & Notes: ELED 480 and 481.

Credits: 4

Grade Mode: S/U

ELED 494 - Internship - Elementary

Supervised teaching experience to develop and demonstrate teaching competence at the primary and/or intermediate grades. Repeatable to 32 credits. S/U grading.

Prerequisites & Notes: Admission to a Woodring Teacher Education Program and permission of department.

Credits: 2-16

Grade Mode: S/U

ELED 496 - Elementary Intern Study Group

Support school internship experience and students' efforts to engage in ambitious teaching practices that support diverse learners.

Prerequisites & Notes: ELED 470

Credits: 1-2

Grade Mode: S/U

ELED 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ELED 505 - Books and Materials: Use and Evaluation

Study and selection of children's and adolescent literature (fiction and poetry). Literary criticism. Use of various media.

Prerequisites & Notes: ELED 405 or permission

Credits: 4

Grade Mode: Letter

ELED 518 - Current Issues in Education

Examination and discussion of several current issues in Elementary Education. Repeatable to a maximum of 5 credits.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 1-5

Grade Mode: Letter

ELED 521 - Seminar in Elementary Curriculum

Advanced study of curriculum planning and development, including design, materials and

ELEMENTARY EDUCATION

problems in curriculum change. Independent research is expected.

Prerequisites & Notes: Completion of teaching certification requirement; elementary K-8 teaching endorsement

Credits: 4

Grade Mode: Letter

ELED 530 - Play and the Child

Examination of the nature and role of play in the cognitive, affective, physical and social development of the child. Attention given to the educative functions of play and implications of those functions for curriculum and instruction.

Prerequisites & Notes: graduate standing or teaching experience

Credits: 4

Grade Mode: Letter

ELED 531 - Seminar in Early Childhood Education

In-depth exploration of programs, theories and significant recent research in early childhood education.

Prerequisites & Notes: Permission of instructor

Credits: 4

Grade Mode: Letter

ELED 531A - Advanced Seminar in Early Childhood Education

Specific problems are drawn from the field and content organized according to student need.

Prerequisites & Notes: ELED 531, ELED 596A

Credits: 4

Grade Mode: Letter

ELED 533 - Advanced Seminar in Elementary Education

Advanced study of individual research topics in elementary education.

Prerequisites & Notes: advancement to candidacy

Credits: 4

Grade Mode: Letter

ELED 535 - Research Analysis of Current Issues in Elementary Education

Examination and analysis of research underlying current issues and problems in elementary education.

Prerequisites & Notes: completion of teaching

certification requirement; elementary K-8 teaching endorsement; EDU 501

Credits: 4

Grade Mode: Letter

ELED 538 - Current Issues in Assessment and Evaluation in Elementary Literacy Education

Examines current theory, research, and practice in classroom-based literacy assessment and evaluation; includes supervised practicum.

Prerequisites & Notes: ELED 480 and ELED 481 or instructor permission

Credits: 4

Grade Mode: Letter

ELED 539 - Master's Seminar

Preparation and presentation of a seminar paper on a problem or issue in education.

Prerequisites & Notes: completion of teaching certification requirements; elementary K-8 endorsement; advancement to candidacy; ELED 501, ELED 521, ELED 535; EDF 512, EDF 513

Credits: 4

Grade Mode: Letter

ELED 555 - Middle School Curriculum Designs and Instructional Strategies

Current trends in middle-level education; includes a review of developing curriculum ideas endorsed by the National Middle School Association. Physical, social and emotional growth of early adolescents; instructional strategies for middle-level schools; requires topical or action research project.

Credits: 4

Grade Mode: Letter

ELED 569A - Issues in Inclusive Early Education

Current issues and best practices in early childhood program design and implementation. Emphasis on family-centered, play-based interagency models that serve children of all abilities. Applied research focus.

Prerequisites & Notes: admission to graduate school or instructor permission

Credits: 3

Grade Mode: Letter

ELED 569B - Assessment of Young Children (Birth-8 Years)

Issues and resources for accurate and appropriate assessment of young children. Current best

practices in instructionally relevant assessment, monitoring child progress and evaluating overall program success. Alternative strategies for assessing the very young child, family needs and special populations. Emphasis on critical evaluation of instruments, psychometric adequacy and technical aspects of test development.

Prerequisites & Notes: admission to graduate school or instructor permission

Credits: 4

Grade Mode: Letter

ELED 569C - Inclusive Curriculum in Early Childhood

Curriculum development and adaptation for infants, toddlers, and preschool children. Includes available resources, best practices with the developmentally young and play-based criteria. Focus on model program curricular approaches, the use of daily routines and parent-child interaction as a context and content for curriculum, and peer-mediated learning strategies. Emphasis on efficacy research and the impact of various curricular models.

Prerequisites & Notes: admission to graduate school or instructor permission

Credits: 3

Grade Mode: Letter

ELED 583 - Literacy and Children's Literature

Teaching basic reading skills through the use of children's books; selection and analysis of children's books in order to teach literacy, from beginning or pre-word recognition levels through junior/senior high level.

Prerequisites & Notes: teaching experience

Credits: 4

Grade Mode: Letter

ELED 584 - Teaching the Integrated Language Arts

Teaching activities designed to foster continuing development of literacy, in part, through stressing interrelationships between the various forms of language.

Prerequisites & Notes: graduate standing or teaching experience

Credits: 4

Grade Mode: Letter

ELED 585 - Seminar in Literacy Education

Literacy education research and its application to classroom practices, to individual problems in the teaching of reading, to supervision and

administration of reading programs.

Prerequisites & Notes: Permission of instructor

Credits: 3-4

Grade Mode: Letter

ELED 586 - Seminar for Literacy Specialists

Summary course in the Masters in Literacy, focuses on the role of the future literacy specialist in the analysis, correction, and prevention of literacy difficulties. Designed to refine the teacher leader's knowledge of assessment, evaluation, planning, and teaching of readers, writers, and language users. Includes a 20 hour practicum.

Prerequisites & Notes: ELED 518 or permission of instructor.

Credits: 5

Grade Mode: Letter

ELED 587 - Improvement of Instruction in Literacy

Teaching developmental reading; methods, materials, theory.

Prerequisites & Notes: minimum of one previous course in teaching of reading or teaching experience

Credits: 4

Grade Mode: Letter

ELED 589 - Language Acquisition and Literacy Development

Exploration of current theories in language acquisition, linguistics and psycholinguistics, and implications for early childhood education and literacy instruction.

Prerequisites & Notes: graduate standing or teaching experience

Credits: 4

Grade Mode: Letter

ELED 594E - Practicum in Reading Diagnosis and Remediation

Assessment and correction of reading difficulties: supervised practica in use of diagnostic reading tests.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4

Grade Mode: Letter

ELED 594F - Practicum in Reading Diagnosis and Remediation

Remedial instruction of children with reading

ELEMENTARY EDUCATION

problems: clinical practicum.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4

Grade Mode: Letter

ELED 690 - Thesis

Research study under the direction of a faculty committee. Repeatable to a maximum of 9 cr. S/U grading

Prerequisites & Notes: advancement to candidacy; student's graduate committee approval

Credits: 1-9

Grade Mode: S/U

ELED 691 - Research Seminar

Graduate research under the direction of a program advisor/committee. Repeatable to a maximum of 6 cr. S/U grading.

Prerequisites & Notes: student's graduate committee/program advisor approval

Credits: 1-6

Grade Mode: S/U

English Language Learners Courses

ELL 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ELL 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ELL 431 - Second Language Acquisition Theory and Policy for P-12 Teachers

Provides a historical, legal, theoretical and policy foundation to understand experiences of Bilingual students in US public schools. Examines sociocultural and equity issues related to the education of language minority students from global to local contexts. Explores theory and research on second language acquisition and learning drawn from sociocultural, linguistic, psychological, neurological, and sociolinguistic traditions that inform current practice. Course presents research on program models and effective school practices with English language learners. Students will become familiar with language development standards across domains of reading, writing, listening and speaking as these interact with content standards across program models and instructional approaches.

Prerequisites & Notes: Admission to ELL Endorsement Program or permission of Program Director.

Credits: 4

Grade Mode: Letter

ELL 432 - Introduction to English Linguistics for P-12 Teachers

Students are introduced to the structure, history and use of English with emphasis on their application to the teaching of P-12 level language learners within the P-12 school system. Includes an outline of basic linguistic aspects of language (phonology, morphology, syntax, semantics, and pragmatics) and their historical, geographical, and social variation. The theory of English grammar, including parts of speech, syntactic structure, coordination, subordination, and discourse patterns will also be covered.

Prerequisites & Notes: Permission of program director.

Credits: 5

Grade Mode: Letter

ELL 433 - Understanding Bilingual Learners in a Sociocultural Context

Provides a foundation for teachers to understand and address the relevant cultural and equity issues that linguistically diverse students face in US public schools. Emphasis is on culturally and linguistically sustaining approaches to instruction, assessment, professional collaboration, and partnerships with families and communities to benefit students. Specific attention is given to culturally relevant teaching, equity pedagogy and differentiated instruction for ELL. Course provides an introduction to assessment from theory to practice for linguistically diverse students. A joint practicum with ELL 434 allows teacher candidates to develop abilities to observe, reflect and employ informal assessments to better understand and support the

learning and development of an English Learner.

Prerequisites & Notes: ELL 431 and ELL 432 or permission of instructor; co-requisite: ELL 434.

Credits: 4

Grade Mode: Letter

ELL 434 - Methods And Materials For Teaching Beginning ELLs in Grades P-12

Theoretical and practical concerns in teaching English as a second language to students with beginning to low-intermediate proficiency in English in P-12 schools. Emphasis on innovative approaches to the teaching of listening, speaking, reading, writing, and culture within a communicative framework. Guidance in the evaluation of students; use of standards; development and use of creative materials, including media-based materials. Required participation in a joint embedded practicum ELL 433 with English language learners with demonstration and practice in instructing students in English, evaluation, development, and use of creative materials, including media-based materials and state requirements.

Prerequisites & Notes: ELL 431 and ELL 432 or permission of instructor; co-requisite: ELL 433.

Credits: 5

Grade Mode: Letter

ELL 435 - Methods and Materials for Academic Language Proficiency in Grades P-12

An expansion on theoretical and practical concerns in teaching English as an additional language to students in grades P-12 with intermediate to advanced proficiency in English. Emphasis is on innovative approaches to the teaching of language and literacy within a communicative framework and academic register. Provides guidance in the evaluation, development, and use of creative materials, including media-based materials. Requires participation in an embedded practicum experience with English language learners.

Prerequisites & Notes: ELL 434 or permission of Program Director.

Credits: 5

Grade Mode: Letter

ELL 436 - Seminar and Practicum for ELL or Bilingual P-12 Teachers

Provides a forum for reflection and sharing of the teaching of ELL's in P-12 schools. Includes research-based lesson planning and advocacy, linking to WA state and Federal laws. Provides practice working collaboratively with colleagues and the community. Bilingual option includes supervised bilingual teaching in English and second

language of instruction in P- 12 bilingual program for 5 credits. S/U grading.

Prerequisites & Notes: Completion of all required ELL/Bilingual courses. Permission of Program Director.

Credits: 4

Grade Mode: S/U

ELL 438 - Methods and Programming for P-12 Bilingual Classrooms

Participants extend their knowledge of second language acquisition, instructional methods, and assessment techniques to effectively teach bilingual models of instruction in P-12 schools. Course content includes further development of the concepts of bilingualism and biculturalism, and leads into a focus on the development and assessment of bi-literacy and content area instruction with culturally and linguistically diverse students. Includes embedded or arranged practicum.

Prerequisites & Notes: ELL 435 or permission of Program Director.

Credits: 5

Grade Mode: Letter

ELL 460 - Sociocultural Theory and Policy Sequence for P-12 Teachers

This course provides a historical, legal, theoretical and policy foundation to understand experiences of Bilingual students in U.S public schools. We will examine issues related to the education of language minority students from global to local contexts. Students will understand sociocultural and equity issues of schooling for English learners in the U.S. We will explore sociocultural theory, family and community engagement and the laws and policies regarding teaching English to speakers of other languages. The course presents research on program models and effective school practices with culturally and linguistically diverse students. Students will become familiar with language development standards across domains of reading, writing, listening and speaking as these interact with content standards across program models and instructional approaches.

Prerequisites & Notes: Admitted to the ESLT program or approval of the ELL Endorsement Program Director. Co-requisite: ELL 561 or ELL 461.

Credits: 4

Grade Mode: Letter

ELL 461 - Second Language Acquisition and Linguistics for P-12 Teachers

This course explores the theory and research on

ELEMENTARY EDUCATION

second language acquisition, drawing from sociocultural, linguistic, psychological, neurological, and sociolinguistic traditions that inform current practice. Experienced teachers reinforce their understanding of the structure, history and use of English with emphasis on their application to the teaching of P-12 level language learners within the P-12 school system. This class includes an outline of basic linguistic aspects of language (phonology, morphology, syntax, semantics, and pragmatics) and their historical, geographical, and social variation. Individual research and course presentations are expected of graduate students.

Prerequisites & Notes: Admitted to the ESLT program or approval of the ELL Endorsement program director. Co-requisite: ELL 560 or ELL 460.

Credits: 4

Grade Mode: Letter

ELL 462 - Assessment of Culturally and Linguistically Diverse Learners for P-12 Teachers

This course provides a foundation for teachers to understand and address the relevant cultural and equity issues that linguistically diverse students face in US public schools. The emphasis is on culturally and linguistically sustaining approaches to instruction, assessment, and professional collaboration. Specific attention is given to culturally relevant teaching, equity pedagogy and differentiated instruction for ELL. The course provides an introduction to assessment from theory to practice for linguistically diverse students. Participating in a case study analysis allows practicing teachers to develop abilities to observe, reflect and employ informal assessments to better understand and support the learning and development of an English learner.

Prerequisites & Notes: Admitted to the ESLT program; ELL 560 and ELL 561 or ELL 460 and ELL 461. Co-requisite: ELL 563 or ELL 463.

Credits: 3

Grade Mode: Letter

ELL 463 - English Grammar and Academic Language for P-12 Teachers

Experienced teachers reinforce their understanding of the structure and use of English with emphasis on their application to the teaching of P-12 level language learners within the P-12 school system. The theory of English grammar, including parts of speech, syntactic structure, coordination, subordination, and discourse patterns will also be covered. Students will begin to explore the theory and use of functional linguistics in the classroom to support academic language.

Prerequisites & Notes: Admitted to the ESLT program; ELL 560 and ELL 561 or ELL 460 and ELL 461. Co-requisite: ELL 562 or ELL 462.

Credits: 3

Grade Mode: Letter

ELL 464 - Methods for Teaching Beginning ELLs for P-12 Teachers

The course addresses theoretical and practical concerns in teaching English as an additional language to students with beginning to low-intermediate proficiency in English in P-12 schools. Emphasis on innovative approaches to the teaching of listening, speaking, reading, writing, and culture within a communicative framework. Instructor will provide guidance in the evaluation of students; use of standards; development and use of creative materials, including media-based materials. Requires teaching in a classroom with English language learners.

Prerequisites & Notes: Admitted to the ESLT program; ELL 562 or ELL 462; and ELL 563 or ELL 463.

Credits: 6

Grade Mode: Letter

ELL 465 - Supporting ELLs Across the Content Areas for P-12 Teachers

An expansion on theoretical and practical concerns in teaching English as an additional language to students in grades P-12 with intermediate to advanced proficiency in English. Emphasis is on innovative approaches to the teaching of language and literacy within a communicative framework and academic register. Provides guidance in the evaluation, development, and use of creative materials, including media-based materials. Requires teaching in a classroom with English language learners.

This course will offer teachers methods and strategies to refine communication abilities across multiple settings while focusing primarily on academic language, literacy and identity development taught through engaging and relevant content. We will build on the techniques introduced in ELL 464/564 but shift the emphasis to elements of academic language; specifically vocabulary, form, function, and fluency of language across domains of reading, writing, listening and speaking.

Prerequisites & Notes: Admitted to the ESLT program; ELL 564 or ELL 464.

Credits: 6

Grade Mode: Letter

ELL 466 - Capstone for the ESLT Program

The Capstone Project provides the opportunity for students to take what they have learned throughout the endorsement program and apply it to examine a specific outcome. Students will be informed of the project expectations during their first course. As the program gets underway, students will choose to extend one or more course assignments (including but not limited to case studies, community asset mapping, family engagement projects, legal rights brochures, and SIOP lesson plans) and transform them into their capstone project. S/U grading.

Prerequisites & Notes: Admitted to the ESLT program; ELL 565 or ELL 465.

Credits: 1

Grade Mode: S/U

ELL 531 - Second Language Acquisition Theory and ELL Policy for K-12 Teachers

This course provides a historical, legal, theoretical and policy foundation to understand experiences of Bilingual students in U.S. public schools. We will examine issues related to the education of language minority students from global to local contexts. Students will understand sociocultural and equity issues of schooling for English learners in the US. We will explore theory and research on second language acquisition and learning drawn from sociocultural, linguistic, psychological, neurological, and sociolinguistic traditions that inform current practice. The course presents research on program models and effective school practices with English language learners. Students will become familiar with language development standards across domains of reading, writing, listening and speaking as these interact with content standards across program models and instructional approaches. This is a 500 level course so you will have extra assignments and readings as compared to peers in ELL 431.

Prerequisites & Notes: Admission to the ELL Endorsement program or approval by the director.

Credits: 4

Grade Mode: Letter

ELL 532 - English Linguistics for P-12 Teachers of English Language Learners

Experienced teachers reinforce their understanding of the structure, history and use of English with emphasis on their application to the teaching of P-12 level language learners within the P-12 school system. Includes an outline of basic linguistic aspects of language (phonology, morphology, syntax, semantics, and pragmatics) and their historical, geographical, and social variation. The theory of English grammar, including parts of speech, syntactic structure, coordination, subordination, and discourse patterns will also be

covered. Individual research and course presentation are expected of graduate students.

Prerequisites & Notes: Graduate status in WCE or permission of instructor

Credits: 5

Grade Mode: Letter

ELL 533 - Understanding Bilingual Learners in a Socio-Cultural Context and Assessment

This course provides a foundation for teachers to understand and address the relevant cultural and equity issues that linguistically diverse students face in U.S. public schools. The emphasis is on culturally and linguistically sustaining approaches to instruction, assessment, professional collaboration, and partnerships with families and communities to benefit students. Specific attention is given to culturally relevant teaching, equity pedagogy and differentiated instruction for ELL. The course provides an introduction to assessment from theory to practice for linguistically diverse students. A service learning experience allows teacher candidates to develop abilities to observe, reflect and employ informal assessments to better understand and support the learning and development of an English learner. This is a 500 level course so you will have extra assignments and readings as compared to peers in ELL 433.

Prerequisites & Notes: ELL 431 or ELL 531; ELL 432 or ELL 532. Co-requisite: ELL 434 or ELL 534.

Credits: 4

Grade Mode: Letter

ELL 534 - Instructional Methods for Teachers of P-12 Early English Language Learners

Theoretical and practical concerns for P-12 master educators in teaching English as a second language to students with beginning to low-intermediate proficiency in English in P-12 schools. Emphasis on innovative approaches to the teaching of listening, speaking, reading, writing, and culture within a communicative framework. Guidance in the evaluation of students; use of standards; development and use of creative materials, including media-based materials. Required participation in a practicum with English language learners with demonstration and practice in English evaluation, development, and use of creative materials, including media-based materials and state requirements.

Prerequisites & Notes: Graduate status in WCE or permission of instructor

Credits: 5

Grade Mode: Letter

ELL 535 - Instructional Methods for Academic Language Proficiency in Grades P-12

ELEMENTARY EDUCATION

An expansion on theoretical and practical concerns for P-12 master educators in teaching English as an additional language to students in grades P-12 with intermediate to advanced proficiency in English. Emphasis is on innovative approaches to the teaching of language and literacy within a communicative framework and academic register. Provides guidance in the evaluation, development, and use of creative materials, including media-based materials. Requires participation in an embedded practicum experience with English language learners or reflection of teaching in their own classroom. This course will offer teachers methods and strategies to refine communication abilities across multiple settings while focusing primarily on academic language, literacy and identity development taught through engaging and relevant content. We will build on the techniques introduced in ELL 534 but shift the emphasis to elements of academic language; specifically vocabulary, form, function, and fluency of language across domains of reading, writing, listening and speaking.

Prerequisites & Notes: ELL 534 or ELL 434 or permission of the program director.

Credits: 5

Grade Mode: Letter

ELL 536 - Seminar and Practicum for ELL Endorsement for P-12 Teachers

ELL 536 provides a forum for reflection and sharing of the teaching of ELLs in P-12 schools. In this course, students will have the opportunity to practice research-based lesson planning and delivery, to advocate for ELLs using state and federal laws, and to work collaboratively with colleagues and community. Bilingual option for this course includes supervised bilingual teaching in English and second language of instruction in P- 12 bilingual program for 5 credits. S/U grading.

Prerequisites & Notes: ELL 431 or ELL 531; ELL 432 or ELL 532; ELL 433 or ELL 533; ELL 434 or ELL 534; ELL 435 or ELL 535 or ELED 481.

Credits: 4

Grade Mode: S/U

ELL 560 - Sociocultural Theory and Policy Sequence for P-12 Teachers

This course provides a historical, legal, theoretical and policy foundation to understand experiences of Bilingual students in U.S. public schools. We will examine issues related to the education of language minority students from global to local contexts. Students will understand sociocultural and equity issues of schooling for English learners in the U.S. We will explore sociocultural theory, family and community engagement and the laws and policies regarding teaching English to speakers

of other languages. The course presents research on program models and effective school practices with culturally and linguistically diverse students. Students will become familiar with language development standards across domains of reading, writing, listening and speaking as these interact with content standards across program models and instructional approaches.

Prerequisites & Notes: Admitted to the ESLT program or approval of the ELL Endorsement Program Director. Co-requisite: ELL 561 or ELL 461.

Credits: 4

Grade Mode: Letter

ELL 561 - Second Language Acquisition and Linguistics for P-12 Teachers

This course explores the theory and research on second language acquisition, drawing from sociocultural, linguistic, psychological, neurological, and sociolinguistic traditions that inform current practice. Experienced teachers reinforce their understanding of the structure, history and use of English with emphasis on their application to the teaching of P-12 level language learners within the P-12 school system. This class includes an outline of basic linguistic aspects of language (phonology, morphology, syntax, semantics, and pragmatics) and their historical, geographical, and social variation. Individual research and course presentations are expected of graduate students.

Prerequisites & Notes: Admitted to the ESLT program or approval of the ELL Endorsement program director. Co-requisite: ELL 560 or ELL 460.

Credits: 4

Grade Mode: Letter

ELL 562 - Assessment of Culturally and Linguistically Diverse Learners for P-12 Teachers

This course provides a foundation for teachers to understand and address the relevant cultural and equity issues that linguistically diverse students face in U.S. public schools. The emphasis is on culturally and linguistically sustaining approaches to instruction, assessment, and professional collaboration. Specific attention is given to culturally relevant teaching, equity pedagogy and differentiated instruction for ELL. The course provides an introduction to assessment from theory to practice for linguistically diverse students. Participating in a case study analysis allows practicing teachers to develop abilities to observe, reflect and employ informal assessments to better understand and support the learning and development of an English learner.

Prerequisites & Notes: Admitted to the ESLT program; ELL 560 or ELL 460; and ELL 561 or ELL 461. Co-requisite: ELL 563 or ELL 463.

Credits: 3

Grade Mode: Letter

ELL 563 - English Grammar and Academic Language for P-12 Teachers

Experienced teachers reinforce their understanding of the structure and use of English with emphasis on their application to the teaching of P-12 level language learners within the P-12 school system. The theory of English grammar, including parts of speech, syntactic structure, coordination, subordination, and discourse patterns will also be covered. Students will begin to explore the theory and use of functional linguistics in the classroom to support academic language.

Prerequisites & Notes: Admitted to the ESLT program; ELL 560 or ELL 460; and ELL 561 or ELL 461. Co-requisite: ELL 562 or ELL 462.

Credits: 3

Grade Mode: Letter

ELL 564 - Methods for Teaching Beginning ELLs for P-12 Teachers

The course addresses theoretical and practical concerns in teaching English as an additional language to students with beginning to low-intermediate proficiency in English in P-12 schools. Emphasis on innovative approaches to the teaching of listening, speaking, reading, writing, and culture within a communicative framework. Instructor will provide guidance in the evaluation of students; use of standards; development and use of creative materials, including media-based materials. Requires teaching in a classroom with English language learners.

Prerequisites & Notes: Admitted to the ESLT program; ELL 562 or ELL 462; and ELL 563 or ELL 463.

Credits: 6

Grade Mode: Letter

ELL 565 - Supporting ELLs Across the Content Areas for P-12 Teachers

An expansion on theoretical and practical concerns in teaching English as an additional language to students in grades P-12 with intermediate to advanced proficiency in English. Emphasis is on innovative approaches to the teaching of language and literacy within a communicative framework and academic register. Provides guidance in the evaluation, development, and use of creative materials, including media-based materials. Requires teaching in a classroom with English language learners. This course will offer teachers

methods and strategies to refine communication abilities across multiple settings while focusing primarily on academic language, literacy and identity development taught through engaging and relevant content. We will build on the techniques introduced in ELL 464/564 but shift the emphasis to elements of academic language; specifically vocabulary, form, function, and fluency of language across domains of reading, writing, listening and speaking.

Prerequisites & Notes: Admitted to the ESLT program; ELL 564 or ELL 464.

Credits: 6

Grade Mode: Letter

ELL 566 - Capstone for the ESLT Program

The Capstone Project provides the opportunity for students to take what they have learned throughout the endorsement program and apply it to examine a specific outcome. Students will be informed of the project expectations during their first course. As the program gets underway, students will choose to extend one or more course assignments (including but not limited to case studies, community asset mapping, family engagement projects, legal rights brochures, and SIOP lesson plans) and transform them into their capstone project. S/U grading.

Prerequisites & Notes: Admitted to the ESLT program; ELL 565 or ELL 465.

Credits: 1

Grade Mode: S/U

Instructional Technology Courses

I T 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

I T 344 - Foundations of Technology in Teaching and Learning

Students use critical thinking skills and apply digital tools to gather, evaluate, and use information. S/U grading.

ELEMENTARY EDUCATION

Credits: 1

Grade Mode: S/U

I T 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

I T 442 - Digital Decisions: Technology for Educators

Examines theoretical perspectives of technology integration, digital citizenship, skills for professional learning, and tools to engage and inspire all learners.

Prerequisites & Notes: IT 344

Credits: 3

Grade Mode: Letter

I T 443 - Digital Decisions: Technology for Educators

Examines theoretical perspectives of technology integration, digital citizenship, skills for professional learning, and tools to engage and inspire all learners. Successful completion satisfies the Woodring College of Education instructional technology education competency requirement.

Prerequisites & Notes: IT 344

Credits: 3

Grade Mode: Letter

I T 444 - Classroom Use of Instructional Technology (Secondary)

Learn and improve skills necessary to effectively integrate technology for teaching and learning into professional teaching practices, including planning, assessment, and classroom management. Lab course tied to practicum experience.

Prerequisites & Notes: IT 344.

Credits: 2

Grade Mode: Letter

I T 458 - Instructional Design

Introduction to the process of instructional design. Topics include task analysis, competency specification, instructional strategies, media selection, user interface, rapid prototyping, formative evaluation and project management.

Prerequisites & Notes: IT 442 or IT 443 or IT 444; or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 459 - Distance Education: Theory and Practice

Examines the concepts, technologies and issues related to the design, development, delivery, policy-making and evaluation of distance education courses and programs. Course includes online learning environment development.

Prerequisites & Notes: IT 442 or IT 443 or IT 444; IT 458; or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 461 - Multimedia Tools and Applications

An overview of the tools required for the creation of interactive multimedia. The tools are organized into three categories: authoring systems, hypermedia authoring environments, and media production (such as graphics production, video and sound).

Prerequisites & Notes: IT 442, IT 443, IT 444; or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 463 - Techniques and Tools in Graphic Design

Principle, techniques and tools used in the creation and manipulation of digital graphic elements and products. Topics include elements of design and photography, application of artistic concepts, issues related to graphic representation, and modes of delivery with an emphasis on web-based development.

Prerequisites & Notes: IT 442 or IT 443 or IT 444; IT 458 and IT 459; or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 465 - Development of Web-Based Learning Environments

Design and develop web-based instruction and materials; study various forms of web-based instruction with emphasis on online learning technologies. Integrates appropriate methods, curricular resources, assessments, and Internet delivery systems.

Prerequisites & Notes: IT 442 or IT 443 or IT 444; IT 458 and IT 459; or permission of

instructor.

Credits: 4

Grade Mode: Letter

I T 466 - Authoring for Multimedia Development

Techniques and procedures for authoring when developing multimedia. Scripting required in implementation of concepts.

Prerequisites & Notes: IT 461 or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 467 - Creating Modules for Electronic Delivery

Design and develop technology-enhanced interactive learning objects for teaching and training. Focus on using multimedia and instructional design for online learning. Students explore concepts and findings identified in the multimedia and distance educational literature.

Prerequisites & Notes: IT 442 or IT 443 or IT 444; IT 458 and IT 459; or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 468 - Interactive Multimedia Systems

An introductory study of interactive multimedia systems. Includes videodiscs, computer interfacing, CD ROM and multimedia authoring software.

Prerequisites & Notes: IT 442 or IT 443 or IT 444; or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 470 - The Internet in Education

Studies the use of the Internet and the World Wide Web in educational settings, including strategies for effective student and teacher use. Topics include e-mail, Web browsing, videoconferencing, implementation, ethics and issues. Examines alternatives in web development.

Prerequisites & Notes: IT 442 or IT 443 or IT 444; or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be

arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

I T 503 - Designing Instruction and Selecting Technologies for Learning

Systematic analysis, design, development and evaluation of instructional practices. Class discussions and projects apply instructional design principles in P-12 classrooms and emphasize the appropriate integration of technologies at relevant stages of the learning process.

Prerequisites & Notes: IT 442 or IT 443 or IT 444 or equivalent; graduate status; EDAD 501; or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 515 - Emerging Technologies and New Literacies

This course focuses on emerging technologies and new, multimodal literacies. This course will provide students with theoretical and practical knowledge of new literacies with an emphasis on how these new literacies can be employed at the P-12 level. Students will work individually and collectively in a participatory culture to apply their theoretical understandings to practical experiences by way of producing media. Students will also do original research into emerging technologies and literacies, publishing their findings online.

Prerequisites & Notes: Graduate Status or permission of instructor

Credits: 4

Grade Mode: Letter

I T 518 - Current Issues in Education

Examination and discussion of several current and controversial issues in education. Repeatable with no maximum.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 1-5

Grade Mode: Letter

I T 544 - Instructional Technology and Education

A study in the use of technological tools for instruction; for teaching, training, and student learning; for presentation and development; and

ELEMENTARY EDUCATION

for administration and management. Incorporates distance delivery procedures and effective planning for the use of Instructional Technology. Satisfies the Woodring College of Education instructional technology and education competency requirement. Emphasis on K-12 education.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 546 - Instructional Technology and Digital Literacy

A study in the use of technological tools for instruction; for teaching, training, and student learning; for presentation and development; and for administration and management. Incorporates distance delivery procedures and effective planning for the use of instructional technology. Satisfies the Woodring College of Education instructional technology and education competency requirement. Emphasis on the Adult and Higher Education Master's program.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 550 - Technology Leadership: Policies, Planning and Administration

Problems and principles in establishing and maintaining the use of instructional technologies in educational institutions, including establishing school and district policies for technology, developing budgets, managing resources, maintaining facilities and technology infrastructure.

Prerequisites & Notes: IT 442 or IT 443 or IT 444, or equivalent; graduate status; IT 503 and IT 571 and IT 572; or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 551 - Seminar in Instructional Technology

Analysis of issues affecting present and future implementations of instructional technology.

Prerequisites & Notes: 20 credits in the program; permission of instructor.

Credits: 4

Grade Mode: Letter

I T 552 - Instructional Design: Strategies

Survey of strategies for delivering instruction, including large-scale strategies such as cooperative learning, lectures and technology; and

microstrategies such as feedback, advance organizers, teaching procedures and questioning strategies.

Prerequisites & Notes: IT 560 or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 558 - Distance Education: Theory and Practice

Examines the concepts, technologies and issues related to the design, development, delivery, policy-making and evaluation of distance education courses and programs. Course includes development of online learning environments.

Prerequisites & Notes: I T 546; I T 560 or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 560 - Instructional Design

Introduction to the process of instructional design. Topics include task analysis, competency specification, instructional strategies, media selection, user interface, prototyping, formative evaluation and project management.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 561 - Designing Computer-Based Instruction

Addresses the design, development and evaluation of computer-based instructional software. Covers the steps in creating an effective CBI lesson, designing effective displays, use of graphics and illustrations, use of color, analyzing questions, learner control, and storyboarding.

Prerequisites & Notes: IT 560; IT 566 or IT 567; or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 563 - Techniques and Tools in Multimedia Development

Create digital media (e.g., graphics, video, audio); identify properties, strengths and weaknesses of digital media in different learning contexts; analyze its use in a variety of settings including distance delivery.

Prerequisites & Notes: IT 544 or IT 546 or equivalent; IT 558 and IT 560; or permission of

instructor.

Credits: 4

Grade Mode: Letter

I T 565 - Development of Web-Based Learning Environments

Design and develop web-based instruction and materials; study of various forms of web-based instruction with emphasis on online learning technologies. Integrates appropriate methods, curricular resources, assessments, and Internet delivery systems.

Prerequisites & Notes: IT 544 or 546 or equivalent; IT 558 and IT 560; or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 566 - Authoring for Multimedia Development

Techniques and procedures for authoring when developing multimedia. Scripting required in implementation of concepts.

Prerequisites & Notes: IT 461 or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 567 - Creating Modules for Electronic Delivery

Design and develop technology-enhanced interactive learning objects for teaching and training. Focus on using multimedia and instructional design for online learning. Students explore concepts and findings identified in the multimedia and distance education literature.

Prerequisites & Notes: IT 544 or IT 546 or equivalent; IT 558 and IT 560; or permission of instructor.

Credits: 4

Grade Mode: Letter

I T 568 - Advanced Design of Multimedia Instruction

Advanced issues in the design and development of interactive multimedia instructional lessons. Covers design issues related to the use of multimedia for instruction and is organized around individual student projects. Repeatable to a maximum of 6 credits.

Prerequisites & Notes: IT 566 or IT 567 or permission of instructor.

Credits: 3-6

Grade Mode: Letter

I T 571 - Implementing Technology-Enhanced Learning Activities

Implement an instructional plan that integrates appropriate methods, curricular resources, assessments, and technology in a classroom setting; gather data to evaluate the plan's effectiveness. Develop a learning object; do usability testing and analysis. Begin development of an electronic portfolio.

Prerequisites & Notes: IT 442 or IT 443 or IT 444 or equivalent; graduate status; IT 503; or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 572 - Advanced Technology Tools and Classroom Applications

Develop advanced skills in information and communication technologies, assistive technologies, and productive tools. Employ one of these technologies in creating a prototype to be used for research. Develop materials and methods for teaching of software applications.

Prerequisites & Notes: IT 442 or IT 443 or IT 444 or equivalent; graduate status; IT 503 and IT 571; or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 573 - Emerging Issues: the Social, Ethical, Legal and Human Implications of Technology

Consideration of a wide range of human and social issues relating to the use of technology, including equitable access, social and cognitive effects of various technologies, appropriateness of technologies for students with diverse learning needs, gender and cultural bias, copyright, and health concerns.

Prerequisites & Notes: IT 442 or IT 443 or IT 444 or equivalent; graduate status; IT 503 and IT 571 and IT 572; or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 574 - Educational Technology Research, Evaluation and Assessment

Research the effectiveness of technology products and processes, selecting appropriate technology tools for assessment, and evaluating learner and program outcomes.

Prerequisites & Notes: IT 442 or IT 443 or IT 444 or equivalent; graduate status; IT 503 and IT 571 and IT 572; or permission of instructor.

ELEMENTARY EDUCATION

Credits: 3

Grade Mode: Letter

I T 575 - Designing, Implementing and Evaluating Professional Development

Identify research-based models for professional development, implement them effectively in particular settings, and evaluate participant outcomes. Emphasis on diffusion of innovations and facilitating change.

Prerequisites & Notes: IT 442 or IT 443 or IT 444 or equivalent; graduate status; IT 503 and IT 571 and IT 572; or permission of instructor.

Credits: 3

Grade Mode: Letter

I T 640 - Current Topics in Education

Studies of current topics in learning resources/library science or instructional technology. Repeatable with no maximum.

Prerequisites & Notes: Master's degree; permission of instructor.

Credits: 1-5

Grade Mode: Letter

I T 690 - Thesis

Research study under the direction of a faculty committee. Repeatable to a maximum of 9 credits. S/U grading.

Prerequisites & Notes: Advancement to candidacy; graduate committee approval.

Credits: 1-9

Grade Mode: S/U

I T 691 - Research Seminar

Repeatable to a maximum of 6 credits. S/U grading.

Prerequisites & Notes: Graduate committee or program advisor approval.

Credits: 1-6

Grade Mode: S/U

Teaching English/Second Language Courses

TESL 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed

Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

TESL 401 - Introduction to English Linguistics for TESOL

Students are introduced to the structure, history and use of English with emphasis on their application to the teaching of ESL. Includes an outline of basic linguistic aspects of language (phonology, syntax, semantics and pragmatics) and their historical, geographical and social variation.

Credits: 4

Grade Mode: Letter

TESL 403 - Applications of Linguistics to TESOL

A one-credit version of TESOL 401 for students who have successfully completed an equivalent course in introductory linguistics. S/U grading.

Prerequisites & Notes: Permission of program director.

Credits: 1

Grade Mode: S/U

TESL 404 - Understanding English Grammar for TESOL

Theory of English grammar including parts of speech, syntactic structure, coordination, subordination, and discourse patterns.

Prerequisites & Notes: TESL 401 or TESL 403 or permission of instructor.

Credits: 3

Grade Mode: Letter

TESL 405 - Methods for Teaching English Grammar

Demonstration and practice in explaining key structures in English. Creating and teaching lesson plans with explicit English grammar components. Participation in an embedded practicum with English language learners required. Not eligible for students who have taken TESL 402.

Prerequisites & Notes: TESL 401 or TESL 403, or permission of instructor; and TESL 404 or ENG 436, or concurrent.

Credits: 2

Grade Mode: Letter

TESL 410 - Second Language Acquisition Theory for TESOL

The insights of modern linguistic and psychological theory into the process of second language learning, with special reference to the acquisition of English by speakers of other languages. Emphasis on why certain aspects of English structure pose particular difficulty for the non-native speaker.

Prerequisites & Notes: Admission to TESOL program or permission of instructor; TESL 401 recommended.

Credits: 4

Grade Mode: Letter

TESL 412 - Spanish for Educators

Prepares educators to communicate with Spanish-speaking students and their families through Spanish language study. Guided investigation of Spanish-language academic resources and development of academic language in Spanish in chosen content area to support student learning. Seminar component (in English) undertakes contrastive analysis of the Mexican and US educational systems providing an example of how cultural and socioeconomic factors influence educational opportunities. Repeatable up to 10 credits, including original course.

Credits: 5

Grade Mode: Letter

TESL 420 - Methods and Materials for Basic Communication

Theoretical and practical concerns in teaching English as a second language to students with beginning to low-intermediate proficiency in English. Emphasis on innovative approaches to the teaching of listening, speaking, and culture within a communicative framework. Guidance in the evaluation, development, and use of creative materials, including media-based materials. Required participation in embedded practicum with English language learners.

Prerequisites & Notes: Admission to TESOL program or permission of instructor; TESL 401 recommended.

Credits: 5

Grade Mode: Letter

TESL 421 - Methods and Materials for Academic Language Proficiency

An expansion on theoretical and practical concerns in teaching English as a second language to students with intermediate to advanced proficiency in English. Emphasis on innovative approaches to the teaching of literacy within a communicative framework, with particular focus on structure, reading, writing, and culture in academic content

areas. Guidance in the evaluation of textbooks and the development and use of creative materials, including media-based materials. Required participation in embedded practicum with English language learners.

Prerequisites & Notes: TESL 420 or permission of instructor; TESL 401 recommended.

Credits: 5

Grade Mode: Letter

TESL 432 - Seminar in TESOL

Provides a forum for reflection and sharing of the diverse practicum teaching experiences of a co-requisite practicum course. Research resolves current classroom needs in classroom management. Provides practice working collaboratively to deliver professional development to colleagues and the community. Repeatable to a maximum of 4 credits, including original course. S/U grading.

Prerequisites & Notes: TESL 404; TESL 405; TESL 420; TESL 421; TESL 410 or concurrent; Co-req TESL 435.

Credits: 2

Grade Mode: S/U

TESL 435 - Practicum in TESOL

Supervised TESOL practicum teaching English language learners. International placements available.

Prerequisites & Notes: TESL 401 or TESL 403; TESL 405; TESL 420; TESL 421 (or permission of instructor); TESL 410 or concurrent; Co-req TESL 432 (or permission of instructor).

Credits: 2-3

Grade Mode: S/U

Health and Community Studies

Introduction

The Department of Health and Community Studies is comprised of two undergraduate (B.A. and B.S.) programs: a Human Services Bachelor of Arts and an RN to Bachelor of Science in Nursing (RN-to-BSN); and two graduate programs; a Master of Education in Adult and Higher Education (M.Ed.) and Master of Arts in Rehabilitation Counseling (M.A.). Each program is committed to an academic learning experience that integrates theory and practice using a strengths-based model of professional practice and a shared commitment to equity and social justice. For more information on these programs, please visit www.wvu.edu/hcs.

Faculty

RAINE DOZIER (2008) Chair and Associate Professor. BA State University of New York; MA, PhD, University of Washington.

JACQUELYN BAKER SENNETT (2000) Professor. AB, Occidental College; PhD, Cornell University.

ANNE BLANCHARD (1997) Senior Instructor. BA, MEd Western Washington University; PhD, University of Washington.

ELIZABETH BOLAND (2004) Professor. Academic Program Director of Rehabilitation Counseling. BBA, University of Wisconsin-Whitewater; MS, PhD, University of Wisconsin-Madison.

SAMIT BORDOLOI (2013) Assistant Professor. BA, Hindu College; MSW, Tata Institute of Social Sciences; MS, Kansas State University; PhD, University of Connecticut.

DANA BRICKHAM (2014) Assistant Professor and RC Clinical Coordinator. BA, University of Wisconsin - Oshkosh; MS, PhD, University of Wisconsin - Madison.

DEVYANI CHANDRAN (2014) Assistant Professor. BA, Lady Shri Ram College; MSW, Tata Institute of Social Sciences; PhD, University of Kansas.

HOPE CORBIN (2013) Assistant Professor. BA, State University of New York at Plattsburgh; MPhil, PhD, University of Bergen.

SONDRA CUBAN (2013) Professor. Academic Program Director of Adult and Higher Education. BA, Sonoma State University; MILS, University of Hawaii-Manoa; PhD, University of Wisconsin-Madison.

STANFORD GOTO (2004) Associate Professor. BA, MA, PhD, University of California-Berkeley.

JOHN KORSMO (2006) Associate Professor. BA, Portland State University; MS, PhD, University of Wisconsin-Milwaukee.

KATHE MATRONE (2004) Senior Instructor. BA, Idaho State University; MS, Utah State University;

PhD, Michigan State University.

JILL MOUNT (2012) Assistant Professor. BA, Earlham College; BSN, University of San Francisco; MSN, University of North Carolina; PhD, University of Washington.

TRULA NICHOLAS (1994) Associate Professor. BA, MS, Western Washington University; EdD, Nova Southeastern University.

Human Services

www.wvu.edu/hs

The Human Services major (B.A.) attracts students with a strong commitment to social and economic justice, human dignity, self-determination, and the desire to affect change through direct and indirect service delivery. Since the program's inception in the mid 1970s, Western has graduated thousands of human services majors who have committed their careers to the helping professions. Graduates work in a variety of settings as case managers, advocates, grant writers, youth workers, volunteer coordinators, human resource specialists, fundraisers, trainers, para-educators or advocacy specialists for victims of child abuse, domestic violence, homelessness, or other social issues. Many graduates pursue advanced study in social work, education, public policy, law, nonprofit management or counseling.

Course of Study

The faculty is committed to the idea that undergraduate preparation in human services requires both a strong academic foundation and a solid experiential base. Students who are enrolled in the major become members of an interdisciplinary and inter-professional community of learners who engage in classroom and field-based inquiry with WWU faculty, practicing professionals, and community members.

The Human Services curriculum is designed to meet National Standards in Human Services education as outlined by the Council for Standards in Human Services Education (www.cshse.org). The major provides students with an opportunity to build a deep understanding of the human services profession within dynamic and collaborative learning environments. Built on a liberal arts foundation, the core of the curriculum examines the profession within the context of self, individuals and small groups, organizations, communities, and global systems. Additionally, students gain knowledge and experience in interviewing and interventions, human development, diversity and social justice, applied research, agency management, and program planning and evaluation. Partnering with community based human services agencies and organizations, the major incorporates several quarters of field study, including three supervised

internships, that integrates theory, knowledge, and skills with professional practice. Together, classroom and field-based study prepares graduates to confront the challenges of the 21st century. For additional information visit: www.wvu.edu/hs.

Declaration Process

Human Services program applicants must have a 2.75 GPA or higher overall in college level work (with some exceptions as noted below) and must submit the following materials to be considered for admission to the major:

- A completed Human Services program application, including required essays
- A completed self-assessment of essential functions
- A criminal history background check, which may also include fingerprinting
- A signed contract indicating an understanding and intention to comply with the program's expectations for academic and professional performance

Interviews may be required for admission to the program. Prospective students are encouraged to seek information online at www.wvu.edu/hs or in Miller Hall 318, 360-650-7759, prior to submitting an application. Please contact the program for application deadlines. Students with a Washington state transferable Associate of Arts degree must apply to both Western and the major.

Provisional Program Acceptance and Admission Exceptions

Human Services applicants with a cumulative GPA below 2.75 may contact the department to discuss possible exceptions. A personal interview may be required.

Additionally, applicants who expect to be within 10 credits of completing Western's GURs or within 5 credits of receiving a Direct Transfer Agreement (DTA) Associate Degree from a Washington state community college at the time they begin taking Human Services classes are eligible to apply to the major. Contact the department for details.

A minor in Human Services is not available. Non-matriculated students, undeclared majors, and/or students from other majors at Western are able to enroll in electives and some required courses on a space available basis, with permission of the department.

Technology Competency and Access

Many courses in the major have an online learning component. Therefore, students admitted to the

Human Services major are expected to maintain regular internet access and possess competence in the use of word processing, spreadsheet, and database applications.

Program Offerings and Tuition

The Human Services major is offered in Bellingham, Everett, and via distance delivery (with staff and advising support available in Bellingham, Everett, and Bremerton). Some courses in Bellingham and Everett are hybrid, combining both face-to-face and online class sessions. Students enrolling in the Distance program are able to take all courses online.

Program Retention and Completion

Retention in the Human Services program is dependent upon each student's ability to meet university requirements and the program's essential functions and expectations for academic and professional performance. Prior to entering an internship placement, all students are required to successfully complete HSP 340 and a benchmark examination.

Questions

For additional information on the Human Services major, see www.wvu.edu/hs, call 360-650-7759, or e-mail hsp.info@wvu.edu.

Nursing

www.wvu.edu/bsn

The Nursing BSN (RN-to-BSN) degree is a BSN completion program that includes 45 upper division credits to be completed at WWU. As an exclusively transfer degree at this time, it builds on and provides credit for previous GUR and nursing credits completed in an Associate Degree pre-licensure program along with WWU credits.

The RN-to-BSN program is specifically designed for nurses who have completed an Associate's or Diploma nursing program, currently have their RN licensure or are eligible to take the NCLEX-RN exam.

This innovative program of study will prepare nurses with the professional competencies necessary for the increasing complexities of healthcare. It has been guided by national standards for nursing as well as the WWU Student Learning Objectives:

1. AACN Essentials of Baccalaureate Education for Professional Nursing Practice (2008)
www.aacn.nche.edu/education-resources/essential-series

HEALTH AND COMMUNITY STUDIES

2. Quality and Safety Education in Nursing (QSEN) Competencies
www.qsen.org
3. QUAD Council Competencies for Public Health Nursing
quadcouncilphn.org/
4. WWU General Education Requirements: Student Learning Objectives:
www.wvu.edu/vpue/gened/index.shtml

WWU RN-to-BSN Program will prepare graduates to:

- Assimilate theories and concepts learned through the sciences and humanities into professional nursing practice.
- Access, appraise and synthesize credibility of varied sources of evidence to inform clinical judgment and organizational decision-making for optimal healthcare delivery.
- Promote a culture of evidence-based practice by integrating clinical expertise and diverse perspectives that support patient-centered care and optimal health outcomes.
- Advocate for access to and delivery of equitable health care services with an understanding of the influences of individual, socio-cultural, legal and policy factors.
- Apply principles of leadership, systems theory, quality improvement, and interdisciplinary communication to promote patient safety and quality care in a variety of settings.
- Advocate for and practice health promotion and disease prevention strategies to enhance the well-being of individuals, families, communities and populations.
- Coordinate the delivery of healthcare services through effective professional communication, patient care technology, and interdisciplinary collaboration.
- Provide BSN generalist care within the context of evolving professional standards and a commitment to life-long learning.

Admission Expectations

RN-to-BSN applicants with a GPA below 2.75 may contact the program to discuss the admissions

Bachelor of Arts

Human Services, BA

Department of Health and Community Studies, Woodring College of Education

exceptions policy. A personal interview will be required.

Technology Competency and Access

Many courses in the major have an online learning component. Therefore, students admitted to the Department of Health and Community Studies are expected to maintain regular internet access and possess competence in the use of word processing, spreadsheet and database applications.

Adult and Higher Education

wce.wvu.edu/ahe/adult-and-higher-education

The Adult and Higher Education program is designed to prepare both entry-level and advanced practitioners as teachers, trainers, educators and administrators, particularly in community college and continuing education settings. Upon graduation, competence is expected in such areas as leadership, program development, instructional technology, teaching, research, policy making, curriculum development, assessment and program planning.

The program office is located in Miller Hall 417B, phone: 360-650-3190, email: ahe.info@wvu.edu.

Rehabilitation Counseling

www.wvu.edu/rc

The Rehabilitation Counseling program (M.A.) prepares dedicated and qualified rehabilitation counselors who will partner with individuals with disabilities to enhance their lives, including self-determination, independence, meaningful employment, and full community participation. Graduates work in a variety of public and private settings and are eligible to sit for the Certified Rehabilitation Counselor Examination that is required by many organizations. The program includes a combination of delivery modes, with some classes offered at the program's outreach site located at Everett Community College and other courses offered via distance in a web-based format.

The program office is located in 251 Gray Wolf Hall at the Everett University Center, phone: 425-405-1644, email: rc.everett@wvu.edu.

76 credits**Introduction**

The Human Services Program prepares students to work in a variety of settings as case managers, advocates, grant writers, youth workers, volunteer coordinators, human resource specialists, fundraisers, trainers, para-educators or advocacy specialists for victims of child abuse, domestic violence, homelessness, or other social issues.

The program has a social justice orientation, engaging students in critical analysis and reflection as they examine social issues at the individual, group, organization, community, and global level. The program emphasizes community engagement and requires 380 hours of field experience that allows students to integrate theory, knowledge, and skills through work in human services organizations.

Why Consider a Human Services Major?

Are you interested in a career working to enhance the well-being of individuals, families, communities and organizations? Do you learn effectively through student-centered activities that encourage collaborative inquiry and active engagement to address real world challenges? If so, you may want to consider a major in Human Services. The Human Services major attracts students from diverse backgrounds with a strong commitment to social and economic justice, human dignity, self-determination, and the desire to facilitate change. Thousands of Western's Human Services Program graduates are currently working in meaningful positions in nonprofit, government, and community-based services.

How to Declare (Admission and Declaration Process):

Applicants to Human Services must have a cumulative GPA of 2.75 or higher (with some exceptions as noted below) and must submit the following materials to be considered for admission to the major:

- A completed Human Services program application, including required essay
- A completed self-assessment of essential functions
- A criminal history background check, which may also include fingerprinting
- A signed contract indicating an understanding and intention to comply with the program's expectations for academic and professional performance

Interviews may be required for admission to the program. Prospective students are encouraged to seek information online at wce.wwu.edu/hs/human-services or in Miller Hall 318, 360-650-7759, prior to submitting an application. Please contact the program for application deadlines. Students with a transferable Associate of Arts degree from an accredited institution in Washington State must apply both to Western and the major.

Admission Expectations

Applicants to the major in Human Services with a GPA below 2.75 may contact the department to discuss the admissions exceptions policy. A personal interview may be required.

HEALTH AND COMMUNITY STUDIES

Applicants must be within 10 credits of completing Western's GURs or be within 5 credits of completing a direct transfer degree (AA) from a Washington state community college by the start of program classes, or have completed their direct transfer degree (AA) from a Washington state community college.

A minor in Human Services is not available. Non-matriculated students, undeclared majors, and/or students from other majors at Western are able to enroll in some courses on a space available basis, with permission of the department.

Technology Competency and Access

Many courses in the major have an online learning component, or require use of technology. Therefore, students admitted to the Department of Health and Community Studies are expected to maintain regular high speed internet access and possess competence in the use of word processing and database applications.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- ❑ Required Systems Courses (20 credits):
 - HSP 301 - Human Services Professionals and Personal Systems
 - HSP 303 - Interpersonal and Small Group Systems
 - HSP 402 - Inequity in U.S. Policy and Institutions: Implications for Human Services Professionals
 - HSP 404 - Human Services Professionals and Community Systems
 - HSP 406 - Human Services Professionals and Global Systems
- ❑ Other required courses (28 credits):
 - HSP 302 - Introduction to Human Services
 - HSP 315 - Human Development and Human Services
 - HSP 325 - Interviewing and Interventions for Human Services
 - HSP 385 - Applied Research Methods
 - HSP 435 - Human Services and Management
 - HSP 455 - Diversity & Social Justice Dynamics
 - HSP 485 - Program Planning and Evaluation
- ❑ Field study (16 credits):
 - HSP 340 - Introduction to Field Studies
 - HSP 440 - Internship and Seminar (12 credits required; repeatable to 16 credits)
Students spend 12 hours per week gaining professional experience in an approved human services setting.
- ❑ Electives in Human Services (12 credits required)
 - HSP 323 - Conflict Resolution in Human Services
 - HSP 331 - Children, Families, and Communities
 - HSP 356 - Narrative in Human Services
 - HSP 371 - Issues and Concepts in Human Services
 - HSP 410 - Mental Health: Individuals and Systems
 - HSP 430 - Readings and Projects in Human Services
 - HSP 443 - Disability: Individuals and Systems
 - HSP 450 - Survey of Addictions and Dependencies
 - HSP 484 - Grant Writing
 - Other electives in Human Services under program advisement.

Bachelor of Science in Nursing

Nursing (RN-to-BSN), BSN

Department of Health and Community Studies, Woodring College of Education

45 credits

Introduction

The RN-to-BSN program is specifically designed for nurses who have completed a pre-licensure associate degree or diploma nursing program and currently have their RN licensure or are eligible to take the NCLEX-RN exam.

The innovative program of study will prepare nurses with the professional competencies necessary for the increasing complexities of healthcare. It has been guided by national standards for nursing as well as WWU Student Learning Objectives:

1. AACN Essentials of Baccalaureate Education for Professional Nursing Practice (2008): www.aacn.nche.edu/education-resources/essential-series
2. Quality and Safety Education in Nursing (QSEN) Competencies: www.qsen.org/
3. QUAD Council Competencies for Public Health Nursing: quadcouncilphn.org
4. WWU General Education Requirements: Student Learning Objectives: www.wvu.edu/vpue/gened/index.shtml

WWU RN-to-BSN Program will prepare graduates to:

- Assimilate theories and concepts learned through the sciences and humanities into professional nursing practice.
- Access, appraise and synthesize credibility of varied sources of evidence to inform clinical judgment and organizational decision-making for optimal healthcare delivery.
- Promote a culture of evidence-based practice by integrating clinical expertise and diverse perspectives that support patient-centered care and optimal health outcomes.
- Advocate for access to and delivery of equitable health care services with an understanding of the influences of individual, socio-cultural, legal and policy factors.
- Apply principles of leadership, systems theory, quality improvement, and interdisciplinary communication to promote patient safety and quality care in a variety of settings.
- Advocate for and practice health promotion and disease prevention strategies to enhance the well-being of individuals, families, communities and populations.
- Coordinate the delivery of healthcare services through effective professional communication, patient care technology, and interdisciplinary collaboration.
- Provide BSN generalist care within the context of evolving professional standards and a commitment to life-long learning.

Community Health Nursing | Public Health Nursing | Outpatient Clinic Services | Leadership and Management
 | Pathway to graduate programs including Nurse Practitioner

Major/Career Resources

http://www.wvu.edu/careers/students_choosingamajor.shtml
www.wvu.edu/bsn

How to Declare (Admission and Declaration Process):

Admission requirements

- Associate degree (A.D.N.) or diploma in nursing
- Completion of at least 90 transferrable quarter-system credits including the following nursing pre-requisite courses:
 - English Composition (5 credits)
 - Chemistry with lab (5 credits)
 - Anatomy & Physiology with lab (10 credits)
 - Microbiology (5 credits)

HEALTH AND COMMUNITY STUDIES

- Introduction to Psychology (5 credits)
- Life span psychology (5 credits)
- Statistics (5 credits)
- Humanities electives (5-10 credits)
- Applicants must show evidence of good academic standing with a grade of 2.0 or higher for each RN-to-BSN program prerequisite and a cumulative GPA of 2.75 or higher.
- Successful completion of NCLEX-RN examination: [hwww.ncsbn.org/nclex.htm](http://www.ncsbn.org/nclex.htm).
NOTE: Pre-licensure nursing students may apply if graduating before the RN-to-BSN program start date. New graduates may be offered provisional admission pending successful NCLEX examination and RN licensure. Successful completion of the NCLEX examination provides 30 upper-division credits and 15 lower-division elective credits awarded towards the BSN degree.
- Verification of current licensure to practice as a registered nurse in Washington State.
NOTE: Applicants licensed in other U.S. states or in other countries will need to visit the Washington State Nursing Care Quality Assurance Commission (NCQAC) website for information on how to become licensed in Washington State:
www.doh.wa.gov/AboutUs/ProgramsandServices/HealthSystemsQualityAssurance/Nursing

Application process

Consideration for program acceptance will be given to applicants submitting all of the following requirements by the priority deadline:

- WWU Transfer Application and non-refundable application fee:
admissions.wvu.edu/transfer/t_instructions.html
- Official transcript from all colleges and universities attended
- Nursing Program Application including goal statement and resume
- Academic and professional references (3)

Major Declaration Process

Offers of admission to the RN-to-BSN program satisfies the major declaration process.

Upon acceptance and continuation in BSN Major

- Declaration of all Center for Disease Control and Prevention (CDC) recommended immunizations for Health Care Provider (HCP):
 - Measles, Mumps & Rubella (MMR)
 - Hepatitis B
 - TDap
 - Varicella (Chicken Pox)
 - Influenza
 - Annual two-step testing for tuberculosis (PPD or IGRA)
- Healthcare Provider CPR
- Background Check
- Malpractice/Liability Insurance
- Personal Health Insurance
- Essential Functions Agreement to maintain nursing professional behaviors for admission, progression and graduation
- Drug Screening
- Additional requirements for clinical practice experience placement will be completed during the first quarter of the program.

Grade Requirements

A grade of C or better is required for a Nursing student's major or minor courses, and supporting courses for majors and minors.

Program Requirements

- NURS 301 - Information Literacy to Support Academic Discourse

- ❑ NURS 305 - Social Justice and Healthcare
- ❑ NURS 401 - Transitions in Professional Nursing Practice
- ❑ NURS 402 - Translational Research for Evidence-Based Practice
- ❑ NURS 412 - Policy, Leadership and U.S. Healthcare
- ❑ NURS 422 - Organizational Change for Quality and Safety in Healthcare
- ❑ NURS 432 - Community-Based Care for Vulnerable Populations
- ❑ NURS 433 - Community-Based Care for Vulnerable Populations Practice Experience
- ❑ NURS 442 - Interdisciplinary Care Coordination
- ❑ NURS 443 - Interdisciplinary Care Coordination Practice Experience
- ❑ NURS 452 - Global Health Inequities and Interventions

Master of Arts

Rehabilitation Counseling, Non-Thesis, MA

Department of Health and Community Studies, Woodring College of Education

Graduate Faculty

Boland, Elizabeth, PhD

Brickham, Dana, PhD

Program Director: Dr. Elizabeth Boland, 425-405-1645, Elizabeth.Boland@wwu.edu.

Program Information

Rehabilitation Counseling is a systematic process that partners with persons with physical, sensory, mental, developmental, cognitive, and emotional disabilities while emphasizing the holistic nature of human function. Rehabilitation counselors are competent to provide an assessment of abilities and functional limitations, develop plans consistent with individual needs, and partner with clients in achieving their goals through a variety of modalities including individual and group counseling, vocational training and education, and job development and placement. Rehabilitation counseling is a dynamic, exciting field with excellent employment opportunities in both the public and private sectors, including state and federal rehabilitation agencies, nonprofit agencies, veteran's programs, workers' compensation agencies, hospitals, and universities.

The 72-credit degree program is completed through a combination of classroom-based and distance learning coursework. Classroom-based courses are offered at the program's off-campus site located at the Everett University Center on the Everett Community College campus. The program is accredited by the Council on Rehabilitation Education (CORE).

For further information, see the Rehabilitation Counseling program website at wce.wwu.edu/rc/rehabilitation-counseling.

Goals

The mission of the Master of Arts in Rehabilitation Counseling program is to prepare dedicated and qualified rehabilitation counselors who will partner with individuals with disabilities to enhance their lives, including self-determination, independence, meaningful employment, and full community participation.

The objectives of the program are:

- To offer a quality curriculum that prepares master's level rehabilitation counselors with the knowledge and skills necessary to ethically and competently serve and advocate with individuals with disabilities.
- To recruit and retain qualified students for a viable program that includes persons from diverse racial and cultural backgrounds and individuals with disabilities.
- To promote an inclusive learning community that enriches student experience and education and promotes full participation of all students.
- To create opportunities for student interaction with individuals with disabilities as well as individuals from culturally diverse backgrounds.

HEALTH AND COMMUNITY STUDIES

- To efficiently and effectively enhance the program by obtaining regular and timely feedback from students, the advisory committee, field experience site supervisors, consumers, graduates, and employers

Application Information

Admit Quarters: Fall

Application Deadlines: Priority deadline: April 1; Final deadline: June 1

Supporting Materials:

Candidates must meet the requirements of the Graduate School in addition to the following departmental requirements:

- The Miller Analogies Test (MAT) is preferred or the Graduate Record Exam, General Test; test scores are not required if an applicant holds an advanced degree from an accredited college or university
- Three current references
- A current résumé
- A typed personal statement outlining the rationale for applying to the program. The statement should address career objectives, rationale for choosing this program, professional and personal strengths as they apply to the field of rehabilitation counseling, related work experiences, the way in which personal and professional life experiences have converged to motivate application to the program, a statement of goals and interests which demonstrates and illustrates the applicant's personal value system, computer competence, and other insights as deemed appropriate by the applicant
- A personal interview
- A signed statement indicating an understanding and intention to comply with the program's essential functions and expectations for academic and professional performance.
- Successful completion of the program background check.
- Access to computer, necessary software, and computer competencies are required

Please upload supporting materials with the application.

Admission

Successful candidates must demonstrate their commitment to working with individuals with disabilities to assist them to adjust to the psychological, social, medical, and vocational impact of a disability on their lives. The commitment may be demonstrated by either work or volunteer experiences with persons with disabilities. Applicants are expected to demonstrate strong writing skills.

Retention

In addition to Graduate School and University policies, retention in the Rehabilitation Counseling program is dependent upon the development of professional competencies in interaction with clients and other professionals, especially as related to the program's essential functions and expectations for academic and professional performance. Development of professional competencies is monitored and evaluated on a yearly basis by the faculty of the program and will serve as a basis for retention of the student in the Rehabilitation Counseling program.

Program of Study

Requirements (minimum 72 credits)

Core (52 credits)

- RC 501 - Rehabilitation Research
- RC 579 - Human Growth, Development, and Disability
- RC 580 - Theory of Rehabilitation Counseling
- RC 582 - Introduction to Rehabilitation Counseling
- RC 583 - Practice of Rehabilitation Counseling

- ❑ RC 584 - Group Counseling Techniques in Rehabilitation
- ❑ RC 585 - Social, Psychological and Attitudinal Aspects of Disability
- ❑ RC 586 - Medical Aspects of Disability
- ❑ RC 587 - Utilization of Tests and Evaluation Tools
- ❑ RC 588 - Career Development and Job Placement
- ❑ RC 589 - Case Management in Rehabilitation
- ❑ RC 594 - Introduction to Psychiatric Rehabilitation
- ❑ RC 595 - Cognitive Disabilities in Rehabilitation
- ❑ Practicum/Internship: (20 credits)
 - RC 591 - Practicum in Rehabilitation Counseling
 - RC 592 - Internship in Rehabilitation Counseling

Comprehensive Examination

Students are required to pass a comprehensive examination prior to graduation during the last quarter in the program.

Additional Information

Competency in Instructional Technology

Students admitted to programs in the Woodring College of Education are required to possess competence in the use of instructional technology in education prior to completion of their program and, when applicable, prior to being recommended for certification. Procedures for demonstrating or developing competence are available in Miller Hall 204.

Comprehensive Assessment

Woodring College of Education students in Option II are required to complete a comprehensive assessment. The format, timeline and criteria are defined by specific departments. For procedures, students should see their graduate advisors.

Second Master's Degree

Enrollment must be for a single MEd, MA or MIT program. Students who have earned an MEd or MIT may apply for admission to another MEd program but all requirements of the second program must be met (with possible allowance for some course work taken in the first program). However, all programs must be completed with the minimum number of required credits.

NOTE: Due to a review and revision process which may affect Woodring College of Education programs and courses, the information contained in the Education section of this catalog is subject to change.

Post-baccalaureate candidates interested in combining teacher certification and master's degree study should contact the Teacher Education Admissions office or the Graduate Office.

Some programs include an internship. Successful completion of a criminal background check that may involve fingerprinting is required of all students prior to the internship. Students with questions should check with their department advisor for details.

Master of Education

Adult and Higher Education, Non-Thesis, MEd

Department of Health and Community Studies, Woodring College of Education

HEALTH AND COMMUNITY STUDIES

Graduate Faculty

Cuban, Sondra, PhD
Goto, Stanford, PhD
Dagnon, Paula, PhD

Program Director: Dr. Sondra Cuban, Miller Hall 417D, 360-650-2977, Sondra.Cuban@wwu.edu

Program Information

The Master's in Adult and Higher Education program is designed for those who desire to teach, consult, or administer education programs, materials and policies targeted to diverse adult populations. The Adult and Higher Education curriculum links theories to practice, policies, research and evaluation. It prepares students for competency and knowledge in the areas of instructional technology, e-learning, research methods, teaching methodologies, adult literacy, diversity issues, curriculum development, leadership and management, policy issues, assessment and evaluation, adult learning, and program development. Graduates will work in settings such as community/technical colleges, universities, government agencies, non-profit organizations and business and industry.

The 52 credit course work is offered through a blended (hybrid) format (with some course sessions on the main campus in Bellingham).

The program is designed for working adults. Completion time for the program is designed for two years on a part-time basis.

Students may choose all of their elective credits from the AHE degree or apply up to ten credits of 400 level TESOL coursework toward the AHE degree.

For more information see the Adult and Higher Education website at: wce.wwu.edu/AHE/adult-and-higher-education.

Goals

The program prepares both entry-level and advanced practitioners as teachers, trainers, educators, policy-makers, consultants, administrators in diverse educational, human resource, business, and healthcare settings for adults. The approach emphasizes a social justice and a progressive approach to the adult and higher education field; academic, critical, and digital literacies; inquiry-based learning with action research; and issues of identity, reflection, and diversity.

Application Information

Admit Quarters: Fall and spring quarters

Deadline: Application deadlines are June 1 and February 1

Supporting Materials:

Applicants must meet the requirements of the Graduate School in addition to the following departmental requirements:

- The Miller Analogies Test (MAT) is preferred or the Graduate Record Exam, General Test; test scores are not required if an applicant holds an advanced degree from an accredited college or university
- Three current references
- A current résumé
- Two-page statement which addresses relevant experiences, interests, learning objectives, and career goals
- Access to computer, necessary software, and computer competence are required
- Signed Essential Functions for AHE form
- An interview may be requested

Please collect all application materials and submit them through Western's Graduate School online application.

Program Requirements (52 credits)

Core Courses: (36 credits)

- AHE 501 - Understanding Educational Research
- AHE 571 - Research and Evaluation Methods
- AHE 576 - Leadership and Management of Educational Programs
- AHE 577 - Learning in Adulthood
- AHE 580 - Teaching and Instructional Design
- AHE 588 - Portfolio and Applied Research Proposal
- AHE 592 - Field Experience
- I T 546 - Instructional Technology and Digital Literacy
- One course from:
 - AHE 554 - Foundations of Adult Education and Diversity
 - AHE 555 - Foundations of Higher Education and Diversity
- Electives under advisement: (16-24)
- Comprehensive assessment

Adult and Higher Education Courses

AHE 375 - Diversity in Higher Education

An introduction to the study of diversity issues within the context of services and programs in higher education. Emphasis on the relationship between growth in diversity of students and the range and complexity of services and programs designed to ensure their academic and personal success.

Credits: 4
Grade Mode: Letter

AHE 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

AHE 501 - Understanding Educational Research

Introduction to genres, uses, strengths, and limitations of human subjects research. Emphasis on understanding and critiquing research in adult and higher education. Students will determine the effectiveness by analyzing existing quantitative and qualitative studies.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4
Grade Mode: Letter

AHE 518 - Current Issues in Education

Examination and discussion of several current and controversial issues in education. Repeatable with no maximum limit.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4
Grade Mode: Letter

AHE 554 - Foundations of Adult Education and Diversity

This course is an introduction to the understanding of adult education as a discipline and a field. Topics include the scope, structure, philosophy, history, and issues related to diversity as well as other current factors influencing the practice of adult education.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4
Grade Mode: Letter

AHE 555 - Foundations of Higher Education and Diversity

This course will introduce students to research, theory, policy and practice related to diversity topics in the field of higher education and encourage students to develop their own understandings of historical and contemporary issues.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4
Grade Mode: Letter

AHE 556 - The Community College

HEALTH AND COMMUNITY STUDIES

History, objectives, organization and role of the public community college; special attention to the expanding system in the State of Washington.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 570 - Issues in Adult Literacy

This course explores theory and research in adult literacy. Taking a broad view of literacy, we will consider issues of literacy use and acquisition in light of various social, cultural, and organizational issues. Particular emphasis will be placed on implications for ABE, GED, ESL, and workplace/workforce education. The class will provide a conceptual foundation for educators who promote adult literacy, but this is not an instructional methods course per se.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 571 - Research and Evaluation Methods

Qualitative and quantitative methods for conducting human subjects research and program evaluation in adult and higher education. Understanding distinctions between research and evaluation. Choosing strategies for data collection and analysis that are appropriate for a given purpose, context, and population.

Prerequisites & Notes: Admission to the AHE program or permission of instructor and AHE 501.

Credits: 4

Grade Mode: Letter

AHE 574 - Experiential Learning

Designed to provide theory and practice in the use of educational strategies that enhance the learner's ability to translate research into usable knowledge.

Prerequisites & Notes: Admission to the AHE program or permission of instructor. This course is, essentially, an advanced/specialty course in curriculum design. It is recommended that you take AHE 571 or AHE 580 prior to or concurrently with AHE 574.

Credits: 4

Grade Mode: Letter

AHE 576 - Leadership and Management of Educational Programs

A study of contemporary theories of leadership and their application in private, public and nonprofit agencies.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 577 - Learning in Adulthood

Study of the ways adults learn and the factors related to their motivation, participation and achievement. Application of theory to practice.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 578 - Program Development

This course focuses on the skills and knowledge as well as practice in program planning and development for persons who have the responsibility of designing educational and or/training programs for adults in a variety of public and private organizations and agencies.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 579 - Power, Politics and Policies

This course is designed to give an overview of the dynamic between power, politics and policies in adult education institutions and organizations.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 580 - Teaching and Instructional Design

Study and practice in teaching methodologies and assessments for adult and higher education settings. Special emphasis on facilitating student learning and applied classroom practice.

Prerequisites & Notes: Admission to the AHE program or permission of instructor; AHE 577.

Credits: 4

Grade Mode: Letter

AHE 581 - Readings in Adult and Higher Education

This is a supervised study involving readings and discussions on topics in the fields of adult education, higher education, and human services. Repeatable up to 8 credits including original course.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 584 - Fund Development and Grant Writing

A study of the practices of raising funds for educational programs and writing grants for projects.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 585 - Organizational Change in Educational Settings

Exploration and application of various models for bringing about change in an organization and the development of visions and strategies for changes in training and staff development.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 586 - Teaching in E-Learning and Blended Environments

Instructional strategies used with adult learners in online and blended environments. Students will practice configuring and using an electronic course management system.

Prerequisites & Notes: AHE 580 or instructor permission.

Credits: 4

Grade Mode: Letter

AHE 588 - Portfolio and Applied Research Proposal

Students should be in final two quarters of the program with all required coursework completed. In this course students complete capstone projects including a portfolio of work demonstrating proficiency in AHE learning outcomes and a research proposal. S/U grading.

Prerequisites & Notes: Admission to AHE program or permission of instructor.

Credits: 4

Grade Mode: S/U

AHE 590 - Global Perspectives in Education

An examination of how cultural, political, social, and economic factors impact adult education from

a global perspective.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: Letter

AHE 592 - Field Experience

Field-based project is an aspect of adult and higher education to enhance theory/practice integration such as: teaching, leadership, project development, curriculum development and distance education design. S/U grading.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 4

Grade Mode: S/U

AHE 691 - Research Seminar

Graduate research under the direction of program advisor or instructor. Repeatable to a maximum of 6 credits, including original course. S/U grading.

Prerequisites & Notes: Admission to the AHE program or permission of instructor.

Credits: 1-6

Grade Mode: S/U

Human Services Courses

HSP 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

HSP 301 - Human Services Professionals and Personal Systems

Provides an introduction to Systems thinking and explores personal systems in relation to other systems with an emphasis on motives, values, personal communication, and self-determination.

Prerequisites & Notes: Admission to major, or permission of Human Services Program.

Credits: 4

Grade Mode: Letter

HSP 302 - Introduction to Human Services

HEALTH AND COMMUNITY STUDIES

A conceptual foundation of human services, with an emphasis on history, policy, current theoretical models, and ethical considerations for professionals.

Credits: 4

Grade Mode: Letter

HSP 303 - Interpersonal and Small Group Systems

Investigates interpersonal and small group systems in relation to other systems, with an emphasis on communication models and theories of group dynamics.

Prerequisites & Notes: HSP 301 or instructor permission

Credits: 4

Grade Mode: Letter

HSP 304 - Portfolio Learning in Human Services

Must be taken in the first 5 credits of the major. Reading, writing, and discussion elaborating on the portfolio processes for learning, assessment and professional development in the human services field. An emphasis is placed on benchmark assessment in relationship to CSHSE National Standards and a survey of writing styles of the human services profession. Portfolios will be finalized in HSP 495 - Capstone Portfolio. S/U grading.

Credits: 1

Grade Mode: S/U

HSP 305 - Human Services Professionals and Small Group Systems

A study of small groups in relation to other systems, with emphasis on theories of group dynamics, process, facilitation, and leadership.

Prerequisites & Notes: HSP 303 or instructor permission

Credits: 4

Grade Mode: Letter

HSP 311 - Health Care and Human Services

Examines societal, cultural, and economic factors that affect characteristics of the healthcare system, analyzes policies, and assesses different organizational models that impact the skills and knowledge necessary for human services professionals to advocate for client access to the health care system and to influence health care policy.

Credits: 4

Grade Mode: Letter

HSP 315 - Human Development and Human Services

An interdisciplinary examination of human development across the lifespan, with an emphasis on issues that are relevant to providing effective human services delivery. Topics examine theories related to physical, cognitive, social, and emotional development, normative and non-normative developmental processes, and the relationship between public policy, human services, and human development.

Credits: 4

Grade Mode: Letter

HSP 323 - Conflict Resolution in Human Services

A multidisciplinary survey of the nature of conflict and models of conflict resolution including mediation, negotiation, arbitration, conciliation, and collaborative problem solving as they apply to the human services profession.

Credits: 4

Grade Mode: Letter

HSP 325 - Interviewing and Interventions for Human Services

Addresses the theory and practice of interviewing and interventions in a variety of human services settings. Examines ethics and professional skill development.

Prerequisites & Notes: Entrance to the Human Services major or permission of instructor.

Credits: 4

Grade Mode: Letter

HSP 331 - Children, Families, and Communities

Explores theories, research, and practices of child and family-centered development with an emphasis on child and family-centered support practices, home-school-community collaborations, interprofessional practices, and integrated services.

Credits: 4

Grade Mode: Letter

HSP 340 - Introduction to Field Studies

An introduction to field-based learning, with an emphasis on professional and ethical expectations, liability and malpractice, confidentiality and boundaries, health and safety, and observation

and reflection. Supervised field experience is included. S/U grading.

Prerequisites & Notes: HSP 301; HSP 302 or concurrent.

Credits: 4

Grade Mode: S/U

HSP 341 - Practicum and Seminar II

Practicum learning and accompanying seminar, with an emphasis on establishing client/professional relationships; understanding and following agency policies, procedures, and protocol; and professional growth through observation and reflection. Supervised field experience is included. S/U grading.

Prerequisites & Notes: HSP 340

Credits: 4

Grade Mode: S/U

HSP 345 - Case Management and Interventions

Models and theories of case management, intake assessment, service planning and coordination, monitoring, documentation and use of technology, and termination of services. Continuum of interventions, (i.e., prevention, treatment, maintenance, aftercare) are addressed within the context of a spectrum of service settings and ethical and culturally appropriate responses.

Credits: 4

Grade Mode: Letter

HSP 356 - Narrative in Human Services

Interdisciplinary study of the uses of narrative in social science research, psychological theory, cultural and individual identity, and the professional practice of human services.

Credits: 4

Grade Mode: Letter

HSP 371 - Issues and Concepts in Human Services

Discuss and analyze selected issues and concepts in human services. Repeatable up to 4 times, including original course.

Prerequisites & Notes: Admission to the major or program approval.

Credits: 4

Grade Mode: Letter

HSP 373 - Law and Human Services

Study in the interaction of legal systems with human services delivery systems, and the roles of

the courts in impacting social change in society. Examine the institutional sources of law that affect individual and group rights and duties, criminal justice models and systems, and major issues in criminal and civil law.

Credits: 4

Grade Mode: Letter

HSP 385 - Applied Research Methods

An introduction to quantitative and qualitative research methods relevant to the human services profession. Includes an overview of research designs, analysis techniques, and methods of interpretation, dissemination and application.

Credits: 4

Grade Mode: Letter

HSP 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

HSP 402 - Inequity in U.S. Policy and Institutions: Implications for Human Services Professionals

This course critically examines the role of U.S. policy and institutions in creating and reproducing inequity in society, while exploring processes for change.

Prerequisites & Notes: HSP 455 or instructor permission.

Credits: 4

Grade Mode: Letter

HSP 404 - Human Services Professionals and Community Systems

This course provides an examination of the dynamics of communities through the critical analysis of economic, political/policy, social and cultural systems while emphasizing potential processes for creating change.

Prerequisites & Notes: HSP 455 or instructor permission.

Credits: 4

Grade Mode: Letter

HEALTH AND COMMUNITY STUDIES

HSP 406 - Human Services Professionals and Global Systems

This course examines the dynamics of global systems through the critical analysis of economic, political/policy, social and cultural systems while emphasizing potential processes for creating change.

Prerequisites & Notes: HSP 455 or instructor permission.
Credits: 4
Grade Mode: Letter

HSP 410 - Mental Health: Individuals and Systems

A survey of diagnostic criteria and an overview of theory and research describing the interactions of biological, environmental, psychosocial, cognitive and socio-cultural factors that relate to the development and maintenance of mental health. An emphasis is placed on understanding the major models used to integrate prevention, maintenance, and intervention, reduce recidivism and promote healthy functioning. Integrated services and resource referral practices are examined within the context of mental health services and general human services delivery.

Credits: 4
Grade Mode: Letter

HSP 430 - Readings and Projects in Human Services

Supervised reading and projects on selected contemporary topics that impact human services. Repeatable to a maximum of 8 credits.

Credits: 1-4
Grade Mode: Letter

HSP 435 - Human Services and Management

Fundamentals of management in public and nonprofit organizations with a social justice orientation. Topics include governance structure, stakeholder engagement, strategic planning, financial management, and advocacy.

Prerequisites & Notes: Admission to major.
Credits: 4
Grade Mode: Letter

HSP 440 - Internship and Seminar

Includes seminar and 120 hours of supervised field experience to meet professional standards. S/U grading. Repeatable to a maximum of 16 credits including original course.

Prerequisites & Notes: HSP 340.
Credits: 4
Grade Mode: S/U

HSP 443 - Disability: Individuals and Systems

An exploration of disability issues relating to work in human services, including historical, legal, ethical, medical, psychosocial, employment, and independent living issues; review of specific disabilities.

Credits: 4
Grade Mode: Letter

HSP 450 - Survey of Addictions and Dependencies

Examines the etiology of chemical dependency and other compulsive behaviors and the impact of these behaviors on societal systems such as family, legal, education, work, social, and health services. Discusses roles of human services professionals in prevention and intervention.

Credits: 4
Grade Mode: Letter

HSP 455 - Diversity & Social Justice Dynamics

Examination of the current complexity and historical context of diversity in relationship to human services systems. Topics include responses to institutional oppression and privilege as manifested in societal systems.

Credits: 4
Grade Mode: Letter

HSP 484 - Grant Writing

Investigating optimum sources for funding the delivery of human services programs with an emphasis on planning, writing, marketing, and evaluating funding proposals. Determining funding strategies, selecting funding methods, researching grant funds, interpreting funding guidelines, and preparing grant proposals.

Prerequisites & Notes: Admission to major; open to non-majors at Phase 2.
Credits: 4
Grade Mode: Letter

HSP 485 - Program Planning and Evaluation

Fundamentals of program planning and evaluation including conducting needs assessments, program development within a logic model framework, and applying evaluation research methods.

Prerequisites & Notes: HSP 385

Credits: 4
Grade Mode: Letter

HSP 486 - Human Resources in Human Services

Overview of the human resources knowledge and skills required of human services professionals

Credits: 4
Grade Mode: Letter

HSP 487 - Leadership

Modern theories of administration, management and leadership. Interdisciplinary exploration of theories, models, principles, research, and skills as they relate to personal and organizational leadership.

Credits: 4
Grade Mode: Letter

HSP 495 - Capstone Portfolio

Must be taken in the last 5 credits of the major. Assess integrated learning through discussion and writing related CSHSE National Standards. Review and revise capstone essay and writing samples; review, select and revise portfolio artifacts. Finalize student capstone portfolio to complete benchmark assessment in the Human Services major.

Credits: 4
Grade Mode: Letter

HSP 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

Nursing Courses

NURS 301 - Information Literacy to Support Academic Discourse

Focuses on developing the ability to utilize technologies to access and evaluate the credibility of information, consider the strength of varied perspectives, and develop skills of academic discourse necessary for a reasoned analysis of current issues in health care and health care professions.

Prerequisites & Notes: ENG 101 and admission to the RN-to-BSN program or permission of instructor.

Credits: 5
Grade Mode: Letter
GUR Attributes: BCOM

NURS 305 - Social Justice and Healthcare

Explores the principal themes and issues relating to social justice and health disparities. Examines how oppression, racism and privilege shape patient care. Provides opportunities to support social justice in healthcare using increased self-awareness, theories of justice, and research findings to promote equitable patient care.

Prerequisites & Notes: Admission to the RN-to-BSN program or permission of instructor.

Credits: 5
Grade Mode: Letter
GUR Attributes: HUM

NURS 307 - Writing Across the Curriculum

This is a hybrid course that emphasizes strategies and ongoing practice in critical reading, writing and thinking skills that enhance student success in developing clear, informed, analytic and persuasive academic papers. Students may take one credit per quarter, repeatable up to 5 credits maximum, including original course. May be taken concurrently with any core RN to BSN course.

Prerequisites & Notes: Admission to the RN-to-BSN program or permission of instructor.

Credits: 1
Grade Mode: S/U

NURS 401 - Transitions in Professional Nursing Practice

Throughout the 5 credits of this course, students will establish a professional nursing presence through self-assessment and identification of academic, professional and personal goals. Students will examine select issues within professional nursing practice. Each quarter, course objectives increase in depth and complexity.

Prerequisites & Notes: Admission to the RN-to-BSN program.

Credits: 1-2
Grade Mode: S/U

NURS 402 - Translational Research for Evidence-Based Practice

Utilizes the elements of the research process and analytic skills necessary to evaluate, translate and apply current systematic inquiry to inform nursing practice and promote optimal clinical outcomes. This course requires 30 hours of service learning

HEALTH AND COMMUNITY STUDIES

with a community mentor. The targeted goal of this service learning experience is completing a project proposing an evidence-based practice change.

Prerequisites & Notes: NURS 301

Credits: 5

Grade Mode: Letter

NURS 412 - Policy, Leadership and U.S. Healthcare

Examines health care policy, finance and regulatory environments that directly and indirectly influence the health care system. Utilizes a systems-leadership approach in advocacy for patients, families, communities and healthcare professionals to promote social justice and equity in our system of care.

Prerequisites & Notes: NURS 402 or permission of instructor.

Credits: 5

Grade Mode: Letter

GUR Attributes: SSC

NURS 422 - Organizational Change for Quality and Safety in Healthcare

Examines and applies theories of organizational behavior, systems thinking, and leadership to quality improvement strategies that minimize errors and optimize positive clinical outcomes. Participation in selected patient safety and quality improvement initiatives provide opportunity to apply and evaluate the relevance of theoretical concepts to real-world health care challenges. This course requires 30-hours of service learning with a community mentor. The targeted goal of this service learning experience is completing a project proposing a blueprint for implementation of a practice change idea to include organizational assessment for readiness for change, quality assurance measures, and a plan for sustainability of the change.

Prerequisites & Notes: NURS 402

Credits: 5

Grade Mode: Letter

NURS 432 - Community-Based Care for Vulnerable Populations

Emphasizes population focused healthcare including the assessment of risk, predictive and protective factors that influence health and well-being of groups, communities and aggregate populations. Integrates and applies principles of social justice, health promotion, disease and injury prevention in providing services to vulnerable populations in the community-context.

Prerequisites & Notes: NURS 412; NURS 422 or concurrent or instructor permission. Co-req: NURS 433.

Credits: 3

Grade Mode: Letter

GUR Attributes: BCGM

NURS 433 - Community-Based Care for Vulnerable Populations Practice Experience

Community-Based Care Clinical Practice experience of 30 hours taken in conjunction with NURS 432 course. Students establish community partnerships and apply theoretical foundations. Washington State RN license required. S/U grading.

Prerequisites & Notes: NURS 412; NURS 422 or concurrent or instructor permission. Co-req: NURS 432.

Credits: 2

Grade Mode: S/U

NURS 442 - Interdisciplinary Care Coordination

Integrates knowledge, skills and attitudes necessary to promote community based patient/family centered health care coordination through effective use of appropriate technologies, interdisciplinary communication, teamwork and collaboration.

Prerequisites & Notes: NURS 432; NURS 452 or concurrent or instructor permission. Co-req: NURS 443.

Credits: 3

Grade Mode: Letter

NURS 443 - Interdisciplinary Care Coordination Practice Experience

Interdisciplinary Care Coordination Practice Experience of 30 hours taken in conjunction with NURS 442 course. Students establish community partnerships and apply theoretical foundations. Washington State RN license required. S/U grading.

Prerequisites & Notes: NURS 432; NURS 452 or concurrent or instructor permission. Co-req: NURS 442.

Credits: 2

Grade Mode: S/U

NURS 452 - Global Health Inequities and Interventions

Examines major problems and policy issues in global health from multiple perspectives. Focuses on understanding the historical, political, social, cultural, environmental and economic determinants of adverse health conditions in developing countries. Provides a knowledge base

for healthcare professionals to promote social justice by improving global health disparities.

Prerequisites & Notes: NURS 432 or permission of instructor.

Credits: 5

Grade Mode: Letter

GUR Attributes: ACGM

Rehabilitation Counseling Courses

RC 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

RC 501 - Rehabilitation Research

An overview of research including: design and analysis; criteria for reading and interpreting existing studies; practice in identifying issues suitable for research; formulating hypotheses and appropriate methods; and guidance in preparing a program evaluation. Emphasis is on the application of research in clinical and rehabilitation settings.

Credits: 4

Grade Mode: Letter

RC 519 - Current Issues in Rehabilitation Counseling

Examination of several current and controversial issues in rehabilitation. Topics change. Repeatable to a maximum of 6 cr.

Credits: 3

Grade Mode: Letter

RC 546 - Relapse Prevention and Rehabilitation

Addresses personal, family and social rehabilitation issues that emerge first five from addiction. Discusses the processes and behaviors leading to relapse and theoretical models for prevention and promoting recovery.

Credits: 3

Grade Mode: Letter

RC 579 - Human Growth, Development, and Disability

Examines human growth and development in the context of rehabilitation counseling. Provides a review of human development theories across the lifespan and their implications and applications with persons with disabilities.

Credits: 4

Grade Mode: Letter

RC 580 - Theory of Rehabilitation Counseling

An introduction to major counseling theories and their application in rehabilitation settings. Emphasis on understanding and demonstrating basic helping skills in a counseling relationship with individuals with disabilities.

Credits: 4

Grade Mode: Letter

RC 581 - Readings and Projects in Rehabilitation

Supervised readings and projects on selected contemporary topics that impact rehabilitation counseling. Repeatable to a maximum of 6 credits.

Credits: 2-4

Grade Mode: Letter

RC 582 - Introduction to Rehabilitation Counseling

An overview of the principles and practices of rehabilitation counseling, including history, philosophy, ethics, legislative influences, organizational structures, and service-delivery models. Explores various specialties within the field of rehabilitation counseling.

Credits: 4

Grade Mode: Letter

RC 583 - Practice of Rehabilitation Counseling

Application of concepts and techniques that have been introduced from major counseling theories in RC 580. Emphasis on continued development and refinement of counseling skills through advanced role-play and actual counseling with individuals with disabilities.

Prerequisites & Notes: RC 580 or permission of instructor

Credits: 4

Grade Mode: Letter

RC 584 - Group Counseling Techniques in Rehabilitation

HEALTH AND COMMUNITY STUDIES

A didactic and experiential course to introduce students to the dynamics of group counseling. Purpose, process and techniques related to various types of groups.

Prerequisites & Notes: RC 583 or permission of instructor.

Credits: 4

Grade Mode: Letter

RC 585 - Social, Psychological and Attitudinal Aspects of Disability

An examination of the impact of disability on the individual, the individual's environment, significant others, and society in general. The adjustment process that individuals and their families experience is compared and contrasted within developmental and environmental contexts.

Credits: 4

Grade Mode: Letter

RC 586 - Medical Aspects of Disability

An examination of the etiology, prognosis, treatment and vocational implications of major disabling conditions with an emphasis on physical and sensory impairments. Includes an introduction to medical specialties, therapeutic services, restorative techniques, medical terminology, and rehabilitation engineering.

Credits: 4

Grade Mode: Letter

RC 587 - Utilization of Tests and Evaluation Tools

Gathering, analyzing, and synthesizing of vocationally relevant information for use in the rehabilitation process. Advantages and limitations of traditional psychological inventories, as well as various situational assessment tools. Emphasis on collaborative, client-centered approach to assessment.

Credits: 4

Grade Mode: Letter

RC 588 - Career Development and Job Placement

Examines career development theories, occupational information, labor market trends, and meaningful employment with a career focus. Includes job analysis, employment techniques, accommodations, and legislation.

Credits: 4

Grade Mode: Letter

RC 589 - Case Management in Rehabilitation

Examines techniques and procedures related to individualized case management and caseload management. Explores case management issues of various disability groups, including educational and vocational community resources.

Credits: 4

Grade Mode: Letter

RC 590 - Employment Strategies and Job Placement

Explores the process and techniques of work adjustment, job development, job maintenance, and building relationships with employers. Includes job analysis, employment techniques, labor market trends, accommodations, and legislation.

Prerequisites & Notes: RC 588 or instructor permission

Credits: 3

Grade Mode: Letter

RC 591 - Practicum in Rehabilitation Counseling

Demonstration of counseling skills with individuals with disabilities in a rehabilitation agency. Supervision by agency personnel. S/U grading.

Prerequisites & Notes: RC 582, B or better in RC 583 and instructor permission.

Credits: 4

Grade Mode: S/U

RC 592 - Internship in Rehabilitation Counseling

Demonstration of counseling skills in a rehabilitation agency with primary supervision by agency personnel. Students are required to spend significant time within an agency functioning as a professional counselor. Repeatable to a maximum of 16 credits. S/U grading.

Prerequisites & Notes: RC 591 and permission of instructor.

Credits: 1-8

Grade Mode: S/U

RC 593 - Introduction to Assistive Technology

Understand the ecology of assistive technology for people with disabilities. Emphasis is on the functional assessment and relation to assistive technology needs and the physical, psychosocial, environmental and legal domains of assistive technology. Covers the use of various devices and their implications on an individual's rehabilitation

program.

Credits: 3

Grade Mode: Letter

RC 594 - Introduction to Psychiatric Rehabilitation

Understanding major psychiatric disorders, principles and practices of psychiatric rehabilitation. Examines the role of the rehabilitation counselor as an integral part of the treatment team.

Credits: 4

Grade Mode: Letter

RC 595 - Cognitive Disabilities in Rehabilitation

An examination of the etiology, prognosis, treatment, and vocational implications of cognitive disabilities.

Credits: 4

Grade Mode: Letter

RC 596 - Advanced Assessment in Rehabilitation

Application of medical, vocational, and assessment knowledge and skills to the planning, selection, and interpretation of the rehabilitation process for individuals with disabilities.

Prerequisites & Notes: RC 587 or permission of instructor.

Credits: 3

Grade Mode: Letter

RC 598 - The Family and Rehabilitation Counseling

A theoretical understanding of how to work with families for achieving maximum outcomes in the rehabilitation counseling process.

Prerequisites & Notes: RC 583 or permission of instructor.

Credits: 3

Grade Mode: Letter

RC 599 - Advanced Practice of Rehabilitation Counseling

A didactic and experiential course which emphasizes in-depth practice of the theories, concepts, and techniques introduced in RC 580 and 583. Continued development and refinement of counseling skills with proficiency as a desired outcome.

Prerequisites & Notes: RC 580 and RC 583 or instructor permission.

Credits: 3

Grade Mode: Letter

Student Affairs Administration Courses

SAA 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SAA 340 - Paraprofessional Advisement

Emphasizes the helping relationship in various student affairs advising, educational and residential program areas. Repeatable with different topics.

Prerequisites & Notes: Permission of instructor and anticipated employment in campus-based student services.

Credits: 2-4

Grade Mode: Letter

SAA 341 - Practicum in Paraprofessional Advisement

Supervised practicum for students to work in university student services programs. Repeatable with various experiences to a maximum of 6 credits. S/U grading.

Prerequisites & Notes: SAA 340; permission of instructor.

Credits: 1-4

Grade Mode: S/U

SAA 375 - Diversity in Higher Education and Student Affairs

An introduction to the study of diversity issues within the context of services and programs in higher education and student affairs. Emphasis on the relationship between growth in diversity of students and the range and complexity of services and programs designed to ensure their academic and personal success.

Credits: 4

Grade Mode: Letter

HEALTH AND COMMUNITY STUDIES

SAA 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SAA 420 - Foundations of Student Leadership: Theory and Practice

Introduces leadership theories and facilitates student understanding of their leadership styles and strategies as emerging leaders.

Prerequisites & Notes: Permission of instructor.

Credits: 3

Grade Mode: Letter

Secondary Education

Introduction

The Department of Secondary Education offers professional education programs that lead to recommendation from the Office of the Superintendent of Public Instruction for residency teacher certification in the state of Washington, for candidates who wish to teach at the secondary level (middle and high school). The programs in Secondary Education are firmly backed by current research of effective teaching and promoting student learning, and provides multiple field experiences (including service-learning, practica, and student internship).

To learn about the core values that guide our teacher preparation program, visit our website to read the Secondary Education Department's Guiding Principles. The Woodring College of Education vision fosters community relationships and a culture of learning that advances knowledge, embraces diversity, and promotes social justice. This vision establishes the educational values that guide the College. Woodring College has had a long-standing commitment to preparing teachers and producing highly capable, effective educators who strive for ambitious goals in teaching; teaching that is ambitious both in its intellectual goals and in its concern for the learning and well-being of all students.

Information

Advising related to the academic major or endorsement will take place in the academic major department, and individuals interested in teacher certification are encouraged to seek early advising by contacting their advisor. Additional contacts are below.

- Secondary Education Department: wce.wwu.edu/sec, 360-650-3327, Christina.Carlson@wwu.edu, Miller Hall 400.
- Undergraduate and Post-Baccalaureate, Woodring College Admissions: wce.wwu.edu/admission, 360-650-3313, TeacherEd.Admission@wwu.edu, Miller Hall 150. Mail to: Teacher Education Admissions, WWU, Miller Hall 150, 516 High St., Bellingham, WA 98225-9090.
- Master in Teaching, Graduate School: wwu.edu/gradschool, 360-650-3170, gradschool@wwu.edu. Mail to: Graduate School, WWU, Old Main 530, 516 High St., Bellingham, WA 98225-9037.

VERÓNICA VÉLEZ (2013) Assistant Professor. BA, Stanford University; PhD, University of California Los Angeles.

MOLLY WARE (2007) Associate Professor. BS, Principia College; MEd, PhD, University of Georgia.

Secondary Education Programs

The Department of Secondary Education offers two programs which lead to teacher certification by the state of Washington.

- Secondary Education Undergraduate and Post-Baccalaureate Professional Program
 - This Secondary Education program leads to a recommendation to the state of Washington for a teaching certificate endorsed in at least one subject area. This program requires completion of the Secondary professional education course sequence, a baccalaureate degree and academic preparation for a qualifying endorsement, and a fourteen-week internship.
- Master in Teaching with Residency Certification (MIT)
 - This program is designed for candidates who have already completed a baccalaureate degree and academic preparation for a qualifying endorsement and who wish to complete a master's degree

SECONDARY EDUCATION

while gaining teacher certification. The MIT program is available on the Western campus or at the off-campus site in Everett.

Certification

The Washington Administrative Code specifies the requirements for earning a Washington state teacher certificate. State-approved preparation programs and certification requirements align with Washington State K-12 Learning Standards, and require candidates to demonstrate that they have made a positive impact on student learning. First-level Residency certification programs are designed around the standards of foundational knowledge, effective teaching, and professionalism. Teacher certificates are issued by the state, upon the recommendation of the regionally accredited college or university where the candidate completed a state-approved preparation program.

State requirements for teacher certification at the time of completion of a candidate's program will supersede those outlined in this catalog. These changes may affect the time it takes for a candidate to complete the teacher education program.

Residency Teacher Certification

The first-level Residency certificate is awarded to new teachers upon the completion of these general requirements:

- A baccalaureate or higher-level degree from a regionally accredited college or university
- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodology, and an internship
- Evidence of good moral character and personal fitness
- External assessments of content knowledge and teacher performance as required by Washington State

Candidates for Residency certification must pass a content knowledge test to earn an endorsement. WWU requires submission of a passing content test score for each endorsement to be earned, before commencement of the student teaching internship. For current information on test requirements, registration, fees, and test dates and locations, refer to Content Test Resource Website, wce.wvu.edu/cert/content-test-resource-site. Candidates for Residency certification must also complete the state of Washington education Teacher Performance Assessment (edTPA) during the student teaching internship. Application for the

residency certificate is made to Woodring College Teacher Certification, Student Services, Miller Hall 150, 360-650-4930, no later than three months prior to the start of student teaching.

The first-issue Residency certificate has no defined expiration date. It is valid until the teacher completes at least 1.5 years of successful teaching experience accumulated over a minimum of two years in a state-approved public, private or state-operated education program. A three year residency certificate is then issued by the state. The timeline for earning a second level professional certificate begins with the reissued residency certificate

Professional Teacher Certification

The second-level professional certificate is awarded to experienced teachers who hold a valid residency certificate and who pass the Washington ProTeach Portfolio assessment or earn national board certification through the National Board of Professional Teaching Standards. Professional certification requirements are designed around the standards of effective teaching, professional development, and professional contributions. For further information, contact the Woodring College of Education certification officer at 360-650-4630, Miller Hall 150.

Endorsements

An endorsement identifies the subject matter in which a teacher is prepared and authorized by the state to teach. One qualifying endorsement is required for Residency certification. Courses required for a state teaching endorsement and the professional education sequence must be completed with a grade of C (2.0) or better. Secondary Education candidates earn a qualifying endorsement by completing a state-approved program delivered through an academic major or approved equivalent. Candidates completing a major in theatre arts, physical education and health, music, special education, visual arts or world languages (Spanish, French, German or Japanese) will be prepared to teach grade levels P-12. The remaining majors prepare candidates to teach at the secondary level (typically grades 6-12). The Secondary Education Department also offers an additional endorsement in Middle Level Humanities. Content methods courses are required for all endorsements. For specific course numbers and schedule information, candidates are advised to contact their academic department advisor. For information on additional endorsement programs offered throughout the University, contact the Woodring College of Education certification officer at 360-650-4630, Miller Hall 150.

Choosing an Academic Major/Endorsement

Secondary Education graduates are in high demand as teachers in many fields and grade levels. Areas of greatest demand fluctuate. Students who are interested in a teaching career are encouraged to visit the Career Services Center, Old Main 280, for information as to which endorsements are in greatest demand. Certain academic majors require sequences of classes in the first two years of college in order to complete a baccalaureate degree in four years. Per ESSA (Every Student Succeeds Act), districts are no longer required to identify Highly Qualified Teachers. Moving forward, the state of Washington will continue to monitor teacher qualifications and collect data about certification, endorsements, teaching assignments, and years of experience. Districts may still maintain previous requirements that impact eligibility for certain middle school teaching assignments in a core academic subject(s). Candidates are responsible for consulting with an advisor for further information on what endorsement will best fit their teaching career goals. The following Western Washington University majors or approved equivalent meet content requirements for a qualifying teaching endorsement:

Secondary Level (Middle and High School)

- English-Literature Emphasis
- Mathematics - Secondary
- Sciences:
 - Biology
 - Chemistry
 - Chemistry/Biology - Secondary
 - Chemistry/Mathematics - Secondary
 - Chemistry/Physics - Secondary
 - Earth Science - Secondary
 - Earth Science/Science - Secondary
 - Physics/Mathematics - Secondary
 - General Science - Secondary
- Social Studies:
 - Anthropology/Social Studies
 - Economics/Social Studies
 - Geography/Social Studies
 - History/Social Studies
 - Political Science/Social Studies
 - Sociology/Social Studies

All Levels (P-12)

- Art - P-12 Specialist
- French with a Teaching Endorsement
- German with a Teaching Endorsement
- Japanese with a Teaching Endorsement

- Music Education - P-12 Choral, General or Instrumental
- Physical Education & Health - P-12
- Spanish with a Teaching Endorsement
- Special Education - P-12
- Theatre, BA (Educational Theatre)

Character and Fitness

The Washington Administrative Code requires applicants for teacher certification to give evidence of "good moral character and personal fitness." Candidates provide evidence of character and fitness through two separate but related processes:

- A Pre-Residency Clearance through OSPI. Instructions for completion of this application will be provided upon acceptance in the program. The application for certification requires candidates to answer questions regarding professional fitness, criminal history and personal conduct. Candidates with "yes" responses must be cleared by OSPI before participating in any courses that include field experiences.
- Washington State Patrol and FBI background checks are completed through a fingerprinting process. Procedures and fee information are provided to candidates upon acceptance into the program.

No candidate in a teacher education program may participate in a University-sponsored activity in the public schools until cleared by the Washington State Patrol, or in some cases, investigated and then cleared by the Washington State Office of Superintendent of Public Instruction. Clearances are validated for two years. Candidates must maintain character and fitness clearance until they have been recommended for a Residency teacher certificate following completion of the teacher education program.

In addition to the Washington State character and fitness requirements noted above, candidates must abide by the Woodring College of Education conduct policies acknowledged in the Student Conduct and Requirements Agreement submitted with program application materials.

Undergraduate and Post-Baccalaureate Certification Program

All applicants to the Undergraduate and Post-Baccalaureate Certification Program must be formally admitted to and currently enrolled at Western Washington University, or post-baccalaureate applicants must apply to Western for

SECONDARY EDUCATION

the same quarter they apply to teacher education. Application materials are available in Miller Hall 150 and printable from wce.wvu.edu/admission.

Applicants must meet the admission requirements of Woodring College noted below. Enrollment restrictions apply to teacher education programs. Meeting the following requirements makes the applicant eligible for admission consideration but does not guarantee admission. Consideration will be given to those applicants with endorsements in academic areas of current critical need.

Applicants to the Undergraduate and Post-baccalaureate Certification Program usually complete the certification sequence in three academic quarters plus a one-quarter internship. Undergraduate students may take selected certification courses while completing their academic major during their junior and senior years with department approval. Prior to applying, undergraduates must have satisfied all of the General University Requirements. Undergraduate and post-baccalaureate applicants must have no more than 10 endorsement credits remaining, or have special permission from the department. Applicants seeking a Music or Health/Fitness endorsement should speak to their advisor to know when to apply to the Secondary Education program. Post-baccalaureates who have a minimum 3.0 GPA are encouraged to consider the Master's in Teaching program (see MIT catalog page for other program information).

Application Requirements

- Academic preparation for a qualifying endorsement with no more than 10 credits remaining in endorsement coursework, or have special permission from the department. See the list of qualifying endorsements at wce.wvu.edu/cert/endorsements.
- Post-baccalaureate must have a baccalaureate degree in the academic major (endorsement) and/or no more than 10 credits remaining in endorsement coursework, or have special permission from the department.
- A 2.75 undergraduate grade point average.
- Completion of an approved English composition course, with a grade of B or higher.
- Meet the Washington Education Skills Test - Basic (WEST-B) requirement. This may be met by a) passing the WEST-B exam, b) SAT minimum scores, or c) ACT minimum scores. For details, see the WEST-B Requirement website for more information, wce.wvu.edu/admissions/west-b-

requirement. Passing scores must be on file by the application due date.

- Transcripts.
- Application form.
- Essays and statement of purpose.
- Two letters of reference.
- Important Application Dates:
- Applications and supporting materials must be received by the following deadlines:
 - Fall quarter: February 1, for Master in Teaching program
 - Fall quarter: March 1, for Undergraduate/Post-Bac. program
 - Winter quarter: September 1, both MIT and UG/PB programs
- How to apply: Visit the Woodring Admissions website for more information, wce.wvu.edu/admissions/secondary-education.

Program Continuation

Students admitted to the Woodring College of Education must meet specified requirements throughout the course of their teacher education program in order to remain in the program.

Requirements Upon Program Admission

Upon acceptance, each candidate is assigned an education faculty advisor. All newly accepted Secondary candidates must attend the mandatory orientation and advising session before beginning first quarter classes. Candidates may be dropped from Secondary Education for failing to attend the required orientation. Candidates admitted to the Woodring College of Education must meet specified requirements throughout the course of their teacher education program in order to remain in the program.

- Completion of a Pre-Residency Clearance through the Office of Superintendent of Public Instruction and a fingerprint check as described in Character and Fitness.
- Completion of the Woodring College of Education Prevention of Sexual Harassment Training.
- Completion of the Woodring College of Education Blood-Borne Pathogens Training.

General Retention Requirements

- Candidates must maintain at least a 2.75 GPA beginning with the quarter they are notified of admission to Secondary Education. This requirement applies even to quarters where no education courses are being taken. Candidates who fail to meet this standard will receive a letter advising

them that they have been dropped from the program.

- Candidates must earn a grade of C (2.0) or better in both the professional education sequence and in all courses required for the endorsement.
- Candidates must successfully complete a minimum of one certification course each calendar year.
- Candidates must demonstrate a high level of competence in the English language. Those who have a difficulty in their verbal and/or written communications should expect to seek remediation before beginning the internship.
- Candidates are responsible for compiling a portfolio illustrating the quality of their work in each professional education class.
- Candidates must complete all certification and endorsement course work.
- Candidates are required to conduct themselves in a professional manner, in terms of moral code, use of written or verbal language, abstention from sexual harassment, gender, ethnic and racial bias.

Program Completion

To qualify for program completion and recommendation for state of Washington residency certification, candidates must complete the following requirements and assessments:

- A baccalaureate or higher-level degree from a regionally accredited college or university.
- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodology, and an internship.
- Evidence of good moral character and personal fitness.
- Passing scores as set by the State of Washington on the state-required content knowledge test(s) for each endorsement.
- Passing scores as set by the State of Washington on the education Teacher Performance Assessment (edTPA).
- Successful completion of the student teaching internship as shown by performance on the WWU Intern Development and Evaluation System (IDES).
- Candidates who interrupt enrollment in a teacher education program for more than two consecutive quarters (summer quarter not included) must meet all program admission, completion and certification requirements in place for the quarter in which they expect to return.

Internship

All Secondary student teaching internships are 14 weeks in length and require candidates to teach under the direct supervision of a certified teacher in a school setting. Student teaching internships are full-time school-based placements where the candidate assumes increasing levels of independent teaching responsibilities.

Teaching internships will begin upon completion of all certification course work and upon a recommendation of the Secondary faculty. The Secondary faculty review the list of interns for the forthcoming quarter internship and review the portfolios of any candidates whom they feel may not be competent to student teach.

Recommendation by the Secondary faculty is based on an evaluation of the candidate's competence in the following:

- Written communication.
- Verbal communication.
- Presentation skills.
- Working with students from racial and ethnic populations other than his/her own, and with special needs students.
- Academic major requirements.
- Student portfolio.
- Washington Standards for Beginning Teachers.

Should the faculty question the readiness of the candidate for the internship, a conference with a faculty review committee will be arranged, at which time faculty concerns will be presented to the candidate. The candidate will have the opportunity to defend the materials viewed by the faculty and bring forth any supporting evidence. Following the conference the faculty will make one of the following decisions: 1) approval to begin the internship, 2) develop a plan for monitoring specific behaviors during the internship, 3) develop a plan for remediation, delaying the internship, or 4) drop the candidate from the program.

Candidates must successfully complete the entire 14 weeks to receive credit for the internship and recommendation for certification.

Application for Internship

The Office of Field Experiences (OFE) is the service agency of the College of Education which seeks placements for prospective interns. Candidates must have completed a residency teacher certificate application packet including endorsement evaluation, and Washington State Patrol/FBI fingerprinting before OFE will seek an internship placement.

SECONDARY EDUCATION

Before commencement of the internship, passing scores on the state-required content knowledge test(s) for each endorsement must be submitted, all education and endorsement course work and practica must be completed, and fingerprint/character and fitness clearance must be valid. Candidates who interrupt enrollment for a quarter or more must meet the deadline for filing a returning student application.

OFE does not guarantee placements and reserves the right to place candidates anywhere within the WWU service area.

Placement in a school is contingent on:

- Fulfillment of all requirements (satisfactory academic work, education and endorsement program course work, and practica).
- Submission of passing scores on the WEST-E tests in their endorsement areas.
- Availability of placements and supervision in specific subjects, grade levels, and specific geographic area.
- Acceptance by P-12 school personnel.
- Fingerprint clearance, and character and fitness clearance through the end of the internship.

Candidates are required to interview with the certified teacher and/or school administrator at the school where the placement is being considered. A maximum of three interviews for an internship placement are arranged by OFE. Any subsequent placement after a voluntary or non-voluntary withdrawal from an internship is granted only by faculty recommendation following a case conference.

Time commitment to the internship requires seven clock hours daily Monday through Friday plus preparation time, seminars, and responsibilities outside the school. Candidates should not register for other course work, hold jobs, or obligate themselves to time-demanding commitments without the approval of the department chair and OFE.

Candidates must submit an application for an internship placement to OFE prior to the internship. All out-of-area or special placement requests require a petition. Applications, placement locations, petitions, and other information are available in the Office of Field Experiences, Student Services, Miller Hall 150.

Additional Endorsement

Humanities — Middle Level — Additional Endorsement

Department of Secondary Education, Woodring College of Education

39-51 credits

Introduction

This additional endorsement program must be accompanied by the professional preparation program in Secondary Education, and preparation for an English Language Arts or Social Studies endorsement. Professional education program admission, completion, and teacher certification requirements are provided within this Secondary Education section of the catalog.

Secondary Education students who complete this program will build on their preparation for an English Language Arts or Social Studies endorsement to earn an additional endorsement in Middle Level Humanities. The Middle Level-Humanities endorsement prepares individuals to teach these core subjects and an integrated language arts/social studies core block classroom in the middle and junior high school.

Master of Education

Master in Education, MEd

Woodring College of Education

This program is not currently accepting new students. For further information contact the Graduate School, Western Washington University, 516 High St., Bellingham, WA 98225-9037, 360-650-3170, gradschool@wwu.edu.

Master in Teaching

Master in Teaching, Non-Thesis, MIT

Secondary Education, Woodring College of Education

68 Credits

Graduate Faculty

Burgess, Donald, PhD.

Harwood, Angela, PhD, graduate advisor.

Larson, Bruce, PhD.

McClanahan, Lauren, PhD, graduate advisor.

Nolet, Victor, PhD.

Psycher, Tracey, PhD.

Roxas, Kevin, PhD.

Ware, Molly, PhD.

Program Information

The Master in Teaching (MIT) program is designed for candidates who wish to complete a master's degree while gaining state of Washington residency certification to teach at the secondary level (middle and high school). Our comprehensive MIT program is firmly backed by current research of effective teaching and promoting student learning. The MIT program can be completed in five quarters, including the student teaching (internship).

The MIT program is available at the Bellingham campus and at our Everett site.

Bellingham program: wce.wvu.edu/sec/master-teaching-mit-bellingham

Everett program: wce.wvu.edu/teop/master-teaching

Secondary Education: 360-650-3327, Christina.Carlson@wvu.edu, Miller Hall 400

Graduate School: 360-650-3170, gradschool@wvu.edu, wvu.edu/gradschool

See the Department of Secondary Education catalog page for additional program and teacher certification information. In particular, review the following headings: Certification, Endorsements, Character and Fitness, and Internships.

Program Application

Applicants must meet the admission requirements of the Graduate School and the Secondary Education department requirements below. Note: the GRE is not an application requirement for this graduate program. Before applying, review the endorsement website (wce.wvu.edu/cert/endorsements) to determine your readiness to apply. You may send unofficial transcripts with the name of your endorsement(s) to request an evaluation to Peter.Johnson@wvu.edu. To apply, create an online application account with the Graduate School and upload all supporting documents by the application deadline.

Application Requirements

- A 3.0 grade point average; see Graduate School eligibility requirements.
- Completion of an approved English composition course, with a grade or B of higher.
- English language proficiency.

Test requirement:

- Meet the Washington Education Skills Test- Basic (WEST-B) requirement. This may be met by a) taking the WEST-B exam, b) SAT minimum scores, or c) ACT minimum scores. See the WEST-B Requirement website for more information, wce.wvu.edu/admissions/west-b-requirement. Passing scores must be on file by the application due date.

Essays and statement of purpose.

Letters of reference.

Interview by Secondary Education faculty. Details will be provided after application deadline.

Important Application Dates:

- Bellingham location
 - Fall quarter: February 1
 - Winter quarter: September 1
- Everett location
 - February 1: In odd-numbered years (e.g., 2017, 2019) cohorts start in the Summer; In even numbered years (2018, 2020) cohorts start in the Fall.
 - This program is located on the Everett Community College campus.
 - Late applications accepted on a space-available basis.

SECONDARY EDUCATION

Requirements Upon Program Admission

Upon acceptance, each candidate is assigned an education graduate faculty advisor. All newly accepted teacher education candidates must attend the mandatory orientation and advising session before beginning first quarter classes. Candidates may be dropped from Secondary Education for failing to attend the required orientation. Candidates admitted to the Woodring College of Education must meet specified requirements throughout the course of their teacher education program in order to remain in the program.

- Completion of a Pre-Residency Clearance through the Office of Superintendent of Public Instruction and a fingerprint background check as described in Character and Fitness (see catalog page for Secondary Education).
- Completion of the Woodring College of Education Prevention of Sexual Harassment Training.
- Completion of the Woodring College of Education Blood-Borne Pathogens Training.
- Completion of the Secondary Education Supplemental Application/Student Conduct Requirements and Agreement.

General Retention Requirements

- Candidates must maintain at least a 3.0 GPA, beginning with the quarter they are notified of admission to Secondary Education and all required courses. This requirement applies even to quarters where no education courses are being taken. Candidates who fail to meet this standard will receive a letter advising them that they have been dropped from the program.
- Candidates must earn a grade of B (3.0) or better in the professional education sequence, and a C (2.0) or better in all courses required for the endorsement. See Woodring College and the Graduate School policies for more information.
- Candidates must successfully complete a minimum of one MIT program course each calendar year.
- Candidates must complete all certification and endorsement course work.
- Candidates are required to conduct themselves in a professional manner, in terms of moral code, use of written or verbal language, abstention from sexual harassment, gender, ethnic and racial bias.

Program Completion

To qualify for program completion and recommendation for state of Washington residency certification, candidates must complete the following requirements and assessments:

- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodology, and an internship.
- Evidence of good moral character and personal fitness.
- Pass a content test for each endorsement to be earned. The content tests are Washington Educator Skills Test (WEST-E), National Evaluation Series (NES), and American Council on the Teaching of Foreign Language (ACTFL).
- Pass the education Teacher Performance Assessment (edTPA).
- Successful completion of the student teaching internship as shown by performance on the WWU Intern Development and Evaluation System (IDES).
- Candidates who interrupt enrollment in a teacher education program for more than two consecutive quarters (summer quarter not included) must meet all program admission, completion and certification requirements in place for the quarter in which they expect to return.
- The Graduate School policy is for program requirements to be completed within five years. While it is possible to earn the Residency teaching certificate without completing the final requirements for the MIT degree, it is not possible to earn the MIT without earning the Residency teaching certificate.

Required Program Courses

- Research and Foundations — 12 credits
 - SEC 501 - Introduction to Educational Research Inquiry for Secondary Teachers
 - SEC 512 - Seminar in Educational Philosophy
 - SEC 513 - Seminar in Education, Culture, and Equity
- Secondary Master's Requirements — 34 credits
 - SEC 433 - Teaching and Learning Laboratory

- SEC 435 - Secondary Practicum I
- SEC 436 - Secondary Practicum II
- SEC 510 - Teacher As Communicator
- SEC 525 - Content Reading, Writing and Communication in Secondary Schools
- SEC 531 - Teaching Adolescents
- SEC 532 - Curriculum and Instruction in Secondary Schools
- SEC 533 - Assessment and Professional Development in Secondary Schools
- SEC 534 - Management, Motivation and Discipline in the Secondary Schools
- SPED 510 - Secondary Students With Special Needs
- I T 544 - Instructional Technology and Education
- ☐ Internship (18 credits)
 - SEC 595 - Graduate Internship
- ☐ Research Course (4 credits)
 - SEC 691 - Research Seminar

Additional Information

Competency in Instructional Technology

Students admitted to programs in the Woodring College of Education are required to possess competence in the use of instructional technology in education prior to completion of their program and, when applicable, prior to being recommended for certification.

Non-Thesis Assessment

Master in Teaching candidates are in the non-thesis option and are required to complete a final research seminar (SEC 691) after candidates have received their Washington State Teaching Certificate. The course uses online technology to allow for candidates to complete the requirement off-site.

Second Master's Degree

Enrollment must be for a single MEd, MA or MIT program. Students who have earned an MEd or MIT may apply for admission to another MEd program but all requirements of the second program must be met (with possible allowance for some course work taken in the first program). However, all programs must be completed with the minimum number of required credits.

NOTE: Due to a review and revision process which may affect Woodring College of Education programs and courses, the information is subject to change.

Minor

Education and Social Justice Minor

Combined minor offered by Woodring College of Education, Fairhaven College of Interdisciplinary Studies and American Cultural Studies Program

32 Credits

Introduction

The Education and Social Justice Minor helps prepare youth workers, professional educators, counselors, and community organizers to understand and effectively use social justice frameworks, critical reflection and praxis to address equity issues in formal and informal educational settings, nonprofit, public service, and private organizations.

Key concepts that thread through the program include: critical and decolonizing theories and pedagogies, studies of the social and political context of education in its broadest sense, the construction of individual and

SECONDARY EDUCATION

collective identities, systems and mechanisms of social and cultural reproduction, critical consciousness, and resources, forms of resistance and processes of empowerment.

Program Requirements

Core (12 Credits)

- EDUC 411 - Education and Social Justice
- FAIR 314E - Critical Pedagogy
- One of the following:
 - AMST 301 - Comparative Cultural Studies
 - FAIR 366E - Comparative Cultural Studies

Electives (At least 16 Credits)

Choose at least 1 course from each category under advisement

Social/Political Context

ANTH 484 - Intercultural Education
EDUC 407 - Introduction to Education for Sustainability
FAIR 319B - Current Issues in Law (topic approved by advisor)
FAIR 336B - Topics in Social Issues (topic approved by advisor)
SOC 361 - Sociology of Education

One course from:

ELED 310 - Education, Culture, and Equity
SEC 310 - Education, Culture, and Equity
SPED 310 - Education, Culture, and Equity

Equity Pedagogy

FAIR 311C - Alternatives in Education
FAIR 336B - Topics in Social Issues (topic approved by advisor)

One from:

EDUC 412 - Seminar in Educational Equity
AMST 412 - Seminar in Educational Equity

One from:

EDUC 413 - Bridge Barriers w/Migrants
AMST 413 - Bridging Barriers with Migrant Youth

One from:

ELED 464 - Multicultural Education for Teachers
AMST 464 - Multicultural Education for Teachers

Children & Youth in Society

FAIR 322M - Memoirs and Memory: Childhood in America
 FAIR 336B - Topics in Social Issues (topic approved by advisor)
 FAIR 448T - Risk and Resilience in Adolescent Girls: Development, Culture and Identity
 HSP 315 - Human Development and Human Services
 PSY 332 - Adolescent Development
 SOC 380 - Sociology of Youth
 ECE 435 - Child Abuse and Neglect

Identity in Culture

AMST 314 - Contemporary Latino/A Issues
 AMST 316 - Contemporary African American Issues
 ANTH 481 - Childhood and Culture
 COMM 260 - Communication, Identity and Difference
 FAIR 312E - Transgender Identities and Histories
 FAIR 313E - Queer Issues in Education
 FAIR 336B - Topics in Social Issues (topic approved by advisor)
 FAIR 374B - The Cultural Creation of Identity
 FAIR 436B - Advanced Topics in Social Issues (topic approved by advisor)
 HSP 455 - Diversity & Social Justice Dynamics
 PSY 119 - Psychology of Gender
 AHE 375 - Diversity in Higher Education
 SOC 369 - Sociology of Race and Ethnicity

One from:

AMST 315 - Contemporary American Indian Issues
 FAIR 399B - Contemporary American Indian Issues

One course from:

ELED 310 - Education, Culture, and Equity
 SEC 310 - Education, Culture, and Equity
 SPED 310 - Education, Culture, and Equity

Praxis/Capstone (at least 4 credits)

EDUC 400 - Directed Independent Study
 EDUC 414 - Topics in Social Justice Education
 FAIR 400 - Directed Independent Study
 FAIR 414D - Special Topics in Social Justice Education

State Issued Certificate Preparation (Non-Degree)

Secondary Education Undergraduate and Post-Baccalaureate Professional Program

Department of Secondary Education, Woodring College of Education

58 credits

Introduction

The Secondary Education program is designed for those who want to become a teacher at the middle or high school level. The program leads to a recommendation to the state of Washington for a teaching certificate endorsed in at least one subject area. This program requires completion of the Secondary professional education course sequence, a baccalaureate degree with academic preparation for a qualifying endorsement, and a student teaching internship.

SECONDARY EDUCATION

Why Consider a Secondary Education Undergraduate and Post-Baccalaureate Professional Program?

Teaching today is more and more focused on ensuring student learning. The benchmark of great teaching is student learning. However, this is a challenge. Teaching and learning are collaborative and reciprocal; it is an on-going process, requiring openness to new ideas. No other profession allows you to engage with a subject matter that you enjoy every day, and work with youth to help them think and learn with you. Teachers have opportunities to go beyond content, and create a classroom environment that fosters students to learn and share diverse viewpoints and perspectives about the content and skills they are learning. Plus, you are able to see firsthand when students understand for the first time a new idea or phenomenon. We hope to prepare teachers who are able to foster creativity, transform the status quo, and develop a classroom community of learners. Teaching will transform you and serve the next generation of citizens in our democracy.

Secondary level (middle or high school) teacher

Major/Career Resources

http://www.wvu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

See the Department of Secondary Education catalog for program admission, completion, and teacher certification information.

Grade Requirements

Students must earn a grade of C (2.0) or better in the Secondary Education professional program and in all courses required for the endorsement.

Requirements

- SEC 303 - Teaching Adolescents: Development and Identity
- SEC 310 - Education, Culture, and Equity
- SEC 410 - Dynamics of Teaching
- SEC 411 - Philosophical Foundations of Education
- SEC 425 - Developmental Reading, Writing and Learning in Secondary Schools
- SEC 430 - Secondary School Methods I - Instructional Strategies, Daily Planning, and Standards
- SEC 431 - Secondary School Methods II-Assessment and Long Term Planning
- SEC 432 - Secondary School Methods III - Management, Motivation and Discipline
- SEC 433 - Teaching and Learning Laboratory
- SEC 435 - Secondary Practicum I
- SEC 436 - Secondary Practicum II
- I T 444 - Classroom Use of Instructional Technology (Secondary)
- SEC 495 - Internship - Secondary
- SPED 363 - Secondary Students With Special Needs

Academic content methods courses are required for all major endorsement areas. For specific course numbers and schedule information, students are advised to contact their academic major department advisor.

Secondary Education Courses

SEC 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SEC 303 - Teaching Adolescents: Development and Identity

Study of adolescents in educational and community settings. Application of current theories of adolescent development in secondary classrooms and community contexts. Engage with the wide range of issues that affect the developing adolescent, including language, culture, identity, inequity, racism, media, family, and community factors. Develop skills to collaborate with families and community agencies to support student learning. Includes service-learning component.

Prerequisites & Notes: Admission to Woodring College of Education or permission of department chair.

Credits: 4

Grade Mode: Letter

SEC 310 - Education, Culture, and Equity

Issues of culture and social justice as they impact education, schools, and teaching. Includes a service learning component.

Prerequisites & Notes: Admission to Woodring College of Education or permission of instructor or department chair.

Credits: 4

Grade Mode: Letter

SEC 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SEC 410 - Dynamics of Teaching

Focus on ideas for communicating effectively in schools/classrooms. Oral, visual, and listening communication skills will be examined as part of the teaching/learning process.

Prerequisites & Notes: Admission to Secondary Education.

Credits: 2

Grade Mode: Letter

SEC 411 - Philosophical Foundations of Education

This course examines the central concepts, basic premises and historical underpinnings that frame contemporary ideas of education and teachings practice.

Prerequisites & Notes: SEC 410

Credits: 4

Grade Mode: Letter

SEC 425 - Developmental Reading, Writing and Learning in Secondary Schools

Developmental reading, writing and learning skills and strategies specific to content area instruction in the secondary school. Includes techniques for assessing texts, students' literacy levels; designing appropriate instruction; evolution of literacy definitions, academic language, and the integration of reading and writing with current K-12 Content Standards for instruction and assessment. May include field experience.

Credits: 4

Grade Mode: Letter

SEC 426 - Social Studies for the Secondary School

Social studies methods, resources, curriculum, objectives, planning. For secondary certification.

Prerequisites & Notes: SEC 431 or SEC 533 or permission of instructor.

Credits: 4

Grade Mode: Letter

SEC 430 - Secondary School Methods I - Instructional Strategies, Daily Planning, and Standards

An exploration of secondary curricula, lesson planning, instructional strategies and their relationship to assessment and classroom management. Introduces methods to infuse multicultural perspective into instruction and use of multicultural educational resources.

SECONDARY EDUCATION

Prerequisites & Notes: Admission to Secondary Education, co-req: SEC 410.

Credits: 4

Grade Mode: Letter

SEC 431 - Secondary School Methods II - Assessment and Long Term Planning

Develop professional practices that align long-range planning with assessment strategies. Develop unit plans and collect evidence of student learning through formative and summative assessment. Articulate that planning and assessment are linked to: classroom and time management; differentiating instruction; problem-based learning and culminating projects; and, community contexts. Discuss field experiences.

Prerequisites & Notes: SEC 410 and SEC 430 (or equivalent); co-requisite: SEC 425 and SEC 435.

Credits: 4

Grade Mode: Letter

SEC 432 - Secondary School Methods III - Management, Motivation and Discipline

Study of theories of behavior management, motivation, and disciplinary approaches. Exploration of family and community contexts and their implications for student behavior.

Prerequisites & Notes: SEC 430, SEC 431; co-requisite: SEC 436.

Credits: 4

Grade Mode: Letter

SEC 433 - Teaching and Learning Laboratory

Opportunities to collaborate, co-teach, deepen understanding of school culture, and actively facilitate student learning through peer, instructor, and self-evaluations. S/U grading.

Credits: 1

Grade Mode: S/U

SEC 434 - Service Learning

Introduction to the pedagogy of service learning. Addresses the definition, rationale, service-learning techniques, and assessment. Students articulate their own proposed service-learning curriculum. A 2-credit option for the course includes field-based practicum working with a school that is implementing a service-learning program. S/U grading.

Credits: 1-2

Grade Mode: S/U

SEC 435 - Secondary Practicum I

Assigned placement in middle or high school with opportunities to collaborate, co-teach, deepen understanding of school culture, build relationships with students, and actively facilitate student learning. S/U grading.

Prerequisites & Notes: SEC 425 or SEC 525, SEC 431 or SEC 533; or permission of instructor.

Credits: 2

Grade Mode: S/U

SEC 436 - Secondary Practicum II

Assigned placement in middle or high school with opportunities to collaborate, co-teach, deepen understanding of school culture, build relationships with students, and actively facilitate student learning. S/U grading.

Prerequisites & Notes: Co-requisites: SEC 432 or SEC 534; or instructor permission.

Credits: 1

Grade Mode: S/U

SEC 450 - Introduction to Middle Schools

Designed to give students an overview of middle school curriculum and instruction. Examines various forms of curricula currently used in middle schools, developmental issues concerning middle school students and appropriate instructional strategies. Provides an opportunity to closely examine issues through on-site visits to middle schools in the area.

Credits: 4

Grade Mode: Letter

SEC 451 - Curriculum and Instruction in Middle Schools

Interdisciplinary middle school curricula; team planning strategies; thematic unit and lesson development; instructional and skill building strategies.

Prerequisites & Notes: EDF 310, PSY 351; PSY 316 or PSY 352 or PSY 353; (SEC 410 for SEC students)

Credits: 4

Grade Mode: Letter

SEC 452 - Intensive Middle School Practicum

In-school observation with a focus on the needs of early adolescents; assisting teachers in their classrooms. Reflective journal writing and individual inquiry projects required. S/U grading.

Prerequisites & Notes: Admission to Woodring College of Education and SEC 450.

Credits: 3
Grade Mode: S/U

SEC 464 - Multicultural Education for Teachers

Preparation for teaching in a multicultural society. Participants will learn how to design a curriculum that reflects diversity and an instructional methodology that promotes the learning of diverse students.

Credits: 4
Grade Mode: Letter

SEC 495 - Internship - Secondary

Supervised teaching experience to develop and demonstrate teaching competence at the junior high/middle school or senior high school level. Interact with diverse students and utilize planning and teaching strategies which attend to needs of diverse populations. S/U grading.

Prerequisites & Notes: recommended for supervised teaching
Credits: 18
Grade Mode: S/U

SEC 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SEC 501 - Introduction to Educational Research Inquiry for Secondary Teachers

History, paradigms, and theories of action research in school settings. Examining and interpreting information about student performance; designing and planning school-based inquiry to improve professional teaching practice. May include community service.

Prerequisites & Notes: SEC 531 or permission of instructor.
Credits: 4
Grade Mode: Letter

SEC 510 - Teacher As Communicator

Methods and means of becoming a more effective communicator. Examination and practice of oral, visual and listening communication skills as part of

the teaching/learning process. Review of current research in the area of teaching communication practice.

Prerequisites & Notes: Admission to graduate program or permission of program advisor; co-requisites: SEC 531 and SEC 532

Credits: 2
Grade Mode: Letter

SEC 512 - Seminar in Educational Philosophy

Examines the central concepts, basic premises and underlying assumptions of controversial issues in contemporary educational practice.

Prerequisites & Notes: Admit to Secondary MIT or instructor permission
Credits: 4
Grade Mode: Letter

SEC 513 - Seminar in Education, Culture, and Equity

This seminar examines the larger cultural issues affecting education within social, political and social justice frameworks.

Credits: 4
Grade Mode: Letter

SEC 524 - Seminar in Secondary School Language Arts Curriculum

Planning and developing curriculum in language, literature and composition. Advanced study in specialized curriculum design and materials.

Credits: 2-4
Grade Mode: Letter

SEC 525 - Content Reading, Writing and Communication in Secondary Schools

Techniques for integrating state and national standards in reading, writing and communication into the various subject areas taught in secondary schools. Strategies for assessing, teaching, and supporting students of diverse skill levels in literacy and with special needs through the context of content-area courses. May include a supervised field experience.

Prerequisites & Notes: Co-requisites: SEC 533 and SEC 435; or permission of instructor.
Credits: 4
Grade Mode: Letter

SEC 531 - Teaching Adolescents

Advanced study of adolescents in educational settings. Application of the biopsychosocial

SECONDARY EDUCATION

theories of development of the adolescent to secondary classroom teaching and learning. Define and examine multicultural issues and their effect on the developing adolescent. Communicate and interact with parents and community agencies to support student learning. Includes community service learning component.

Prerequisites & Notes: Program advisor permission; co-requisites: SEC 510 and SEC 532.

Credits: 4

Grade Mode: Letter

SEC 532 - Curriculum and Instruction in Secondary Schools

Planning and development of curriculum. Advanced study of curriculum design, instructional strategies, unit planning and lesson design. Emphasis on current studies and trends. Introduces methods to infuse multicultural perspective into instruction and the use of multicultural educational resources. Independent research.

Prerequisites & Notes: Admission to Secondary MIT or permission of instructor; co-requisites: SEC 510 and SEC 531.

Credits: 4

Grade Mode: Letter

SEC 533 - Assessment and Professional Development in Secondary Schools

Design effective lessons, study a variety of assessment strategies. Create curricula and assessments that address and support the many aspects of diversity. Student portfolio review, certification requirements, legal rights and responsibilities of the profession.

Prerequisites & Notes: SEC 532; co-requisites: SEC 435 and SEC 525; or permission of instructor.

Credits: 4

Grade Mode: Letter

SEC 534 - Management, Motivation and Discipline in the Secondary Schools

Theories of adolescent development, including issues of diversity as a basis for creating effective learning environments. Emphasis on classroom models of management, creating an individual management plan, and the importance of student motivation.

Prerequisites & Notes: SEC 533; co-requisite: SEC 436; or instructor permission.

Credits: 4

Grade Mode: Letter

SEC 555 - Middle School Curriculum Designs and Instructional Strategies

Current trends in middle-level education; includes a review of developing curriculum ideas endorsed by the National Middle School Association.

Physical, social and emotional growth of early adolescents; instructional strategies for middle-level schools; requires topical or action research project.

Prerequisites & Notes: SEC 531; co-requisite: SEC 452 or SEC 434

Credits: 4

Grade Mode: Letter

SEC 580 - Seminar in Secondary Curriculum

Historical and philosophical perspectives on school curriculum as these relate to modern curricula.

Credits: 4

Grade Mode: Letter

SEC 582 - Analysis of Research in Secondary Education

Examination and analysis of research related to contemporary issues in secondary education.

Prerequisites & Notes: EDU 501

Credits: 4

Grade Mode: Letter

SEC 590 - Seminar in Analyzing Teaching and Supervision

Advanced studies in the principles of supervision; utilization of instructional resources and the evaluation and improvement of teaching.

Prerequisites & Notes: SEC 481 or department permission

Credits: 3

Grade Mode: Letter

SEC 595 - Graduate Internship

Supervised teaching experience to develop and demonstrate teaching competence at the middle or senior high school level. Interact with diverse students and utilize planning and teaching strategies which attend to needs of diverse populations. S/U grading.

Prerequisites & Notes: department permission

Credits: 18

Grade Mode: S/U

SEC 598 - Advanced Practicum: Secondary Education

Supervised teaching performance. Participants develop plans and procedures designed for the improvement of instruction and submit a plan to

the course instructor and appropriate public school authority for classroom implementation and evaluation. Repeatable to a maximum of 12 cr. S/U grading.

Prerequisites & Notes: graduate advisor permission

Credits: 2-12

Grade Mode: S/U

SEC 639 - Current Topics in Education

Studies of current topics in Secondary Education.

Prerequisites & Notes: MA degree; instructor permission

Credits: 1-5

Grade Mode: Letter

SEC 690 - Thesis

Research study under the direction of a faculty committee. S/U grading.

Prerequisites & Notes: advancement to candidacy; graduate committee approval

Credits: 1-9

Grade Mode: S/U

SEC 691 - Research Seminar

Graduate research under the direction of a program advisor/committee. S/U grading.

Prerequisites & Notes: Graduate committee/program advisor approval.

Credits: 4

Grade Mode: S/U

Special Education and Education Leadership

Introduction

The Department of Special Education & Education Leadership is comprised of three components: Special Education Programs, Educational Administration Programs, and Compass 2 Campus (C2C), a mentoring component.

The courses of study in the Department of Special Education and Education Leadership are designed to prepare thoughtful, knowledgeable, and effective special education teachers, district and school leaders, and community leaders for a diverse society. Consistent with state and national standards, the curricula for the programs are carefully sequenced, grounded in current research on effective teaching, learning, and leadership.

Special Education offers professional education programs that lead to recommendation to the Office of the Superintendent of Public Instruction (OSPI) for residency teacher certification in the state of Washington. The programs include the following: (a) Special Education and Elementary Education (Dual Endorsement), (b) Special Education and Content (Dual Endorsement), (c) Early Childhood Special Education P-3 and Early Childhood Education P-3 (Dual Endorsement), and (d) Special Education and Content Endorsement for Post-baccalaureates. Practical experience with children and youth is emphasized throughout the programs through a series of carefully designed and sequenced practica. Special Education programs include a significant amount of training in best practices with focus upon Curriculum-Based Evaluation (CBE) and Response to Intervention (RtI).

Special Education also offers two additional non-certification Bachelor of Arts in Education: (a) Early Childhood Special Education, BAE and (b) Exceptionality and Disability, BAE. Furthermore, Special Education offers an endorsement option. (Please see program descriptions for further information.)

Educational Administration is composed of masters and/or residency administrator programs that focus upon application of theory to the building-based environment. The programs are highly relational and professionally supportive. The programs emphasize leadership and management related to curriculum, school instruction, personnel, staff/community relations, financial, and legal matters. Masters and residency administrator certificate (principal) programs are

offered in Bellingham, Bremerton, Everett, and Seattle. The initial administrator certificate (superintendent) program is offered in Everett. Candidates are directed to the Graduate School section of this catalog for more information. The program office is located in Miller Hall 417, phone 360-650-3708, toll-free 866-913-3323; e-mail EdAdmin@wwu.edu.

The Western Washington University Compass 2 Campus program is designed for University students to gain understanding of education systems and the role education plays in a diverse society through course work and the mentor process. Furthermore, Compass 2 Campus is designed to increase access to higher education by providing an opportunity for 5th-12th grade students from traditionally underrepresented and diverse backgrounds in Whatcom and Skagit counties to be mentored by university students.

We, in the Department of Special Education and Education Leadership at Western Washington University, believe that all people can live, learn, play, and work together in inclusive communities. Our mission is consistent with the mission of Woodring College of Education:

- Construct, transform, and convey knowledge by integrating research, theory, and practice,
- Cultivate student growth through extensive community and school engagement in collaboration with exemplary practicing professionals,
- Act with respect for individual differences, including taking a strengths-based view,
- Develop collaborative partnerships that promote the learning and well-being of individuals, families, and the community,
- Evaluate processes and outcomes to ensure continual program improvements.

Information

Individuals interested in teacher certification can obtain information from the website at wce.wwu.edu/admission. Inquiries should be directed to Woodring College Teacher Education Admissions, Student Services, Miller Hall 150, phone 360-650-3313, e-mail address TeacherEd.Admission@wwu.edu. Written inquiries may be addressed to Teacher Education Admissions, Western Washington University, MS-9090, 516 High St., Bellingham, WA 98225-9090.

Information about special education programs may be obtained by visiting the department website at wce.wwu.edu/sped/special-education. Interested applicants are encouraged to visit the faculty regarding these programs. Appointments can be made by phone (360-650-3330), by visiting the

department in Miller Hall 200, or by e-mail to Pam.Hamilton@wwu.edu.

Information about Educational Administration Programs may be obtained by contacting Kimberly Caulfield, Program Manager at 360-650-3708 or at Kimberly.Caulfield@wwu.edu. Information can also be found on the program's website at wce.wwu.edu/edad/educational-administration.

Graduate programs in Special Education are currently in moratorium. Those persons interested in graduate programs in special education should consult the Graduate School section of this catalog or contact the Graduate School at 360-650-3170, e-mail graduate.school@wwu.edu. Written inquiries may be addressed to the Graduate School, Old Main 530, MS-9037, Western Washington University, 516 High St., Bellingham, WA 98225-9037.

Faculty

GAIL COULTER (2008) Chair and Professor. BA, MA, California State University-Chico; PhD, University of Oregon.

WARREN ALLER (1993) Senior Instructor. BS, University of Idaho; MEd, Western Washington University.

TIM BRUCE (2016) Assistant Professor. BA, Whitworth College; M.Ed, Whitworth College; PhD, Gonzaga University.

AUMONY DAHL (1999) Senior Instructor. B.A., Western Washington University; M.Ed, Western Washington University.

RICHARD HANSON (2009) Senior Instructor. B.A., University of Puget Sound; BAE, MA, Western Washington University.

JOSEPH HUNTER (2012) Assistant Professor. BSEd, MSED, Southern Oregon State College; EdD, Portland State University.

KEITH J. HYATT (2002) Professor. BS, MS, University of Idaho; EdS, EdD, University of Nevada-Las Vegas.

BRIDGET KELLEY (1995) Associate Professor. BS, University of Pittsburgh; MEd, Arizona State University; PhD, University of Washington.

CHUCK LAMBERT (2004) Professor. BEd, Gonzaga University; MA, San Francisco State University; PhD, Ohio State University.

DONALD E. LARSEN (2005) Professor & Director of Education Administration (2005) BA, Seattle Pacific University; MA, Pacific Lutheran University; PhD, Washington State University.

JENNY PARKER (2003) Senior Instructor. BA, University of Washington; MEd, Antioch University, Seattle; EdD, University of Washington.

AARON PERZIGIAN (2015) Assistant Professor. BS, Edgewood College, MS, PhD, University of Wisconsin-Madison.

WAYNE T. ROBERTSON (1992) Senior Instructor. BAE, MEd, Central Washington University; EdD,

University of Washington.

LEANNE K. ROBINSON (2002) Professor. BAE, Central Washington University; MEd, Western Washington University; PhD, Washington State University.

ROGER H., SASNETT (2012) Assistant Professor, MEd, Central Washington University, PhD., Ohio State University.

LINDA SCHLEEF (1997) Senior Instructor. BAE, MEd, Western Washington University.

BETH STICKLEY (2003) Senior Instructor. BA, University of Northern Iowa; MEd, Western Washington University.

TRACY THORNDIKE (2005) Associate Professor. BA, MS, Western Washington University; PhD, University of Nebraska-Lincoln.

Special Education Programs

Students at Western Washington University may choose from five initial teacher preparation options that result in residency certification with an endorsement to teach special education in the state of Washington or from two non-teacher certification options.

Non-teacher certification options

The below programs do not lead to teacher certification. Graduates typically seek employment in private child development centers, government agencies, or in school district positions that do not require certification.

- **Early Childhood Special Education BAE**
Completion of this program results in a BA in Education only. Students in this major typically seek employment in private child development centers and governmental agencies; they do not qualify for a teaching certificate
- **Exceptionality & Disability BAE**
Completion of this program results in a BA in Education. Students who complete this major typically seek employment in non-school settings, such as health and human services and non-profit organizations; they do not qualify for a teaching certificate.

Teacher certification options

- **Early Childhood Special Education P-3 & Early Childhood Education P-3 (Dual Endorsement), BAE**
Completion of this major and required professional education courses results in BA in Education with recommendation for a

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

Washington State teaching certificate endorsed in Early Childhood Special Education P-3 and Early Childhood Education P-3.

- **Special Education P-12 & Elementary Education (Dual Endorsement), BAE**
Completion of this program results in BA in Education with recommendation for a Washington State teaching certificate endorsed in Special Education P-12 and Elementary Education K-8
- **Special Education P-12 plus Content Endorsement, BAE**
Completion of this program results in BA in Education with recommendation for a Washington State teaching certificate endorsed in Special Education P-12 and a content endorsement (students must earn a second endorsement in an area other than Special Education, Early Childhood Special Education, Bilingual Education, or English Language Learner). View the list of options.
- **Special Education & Content Endorsement for post-baccalaureates**
Completion of this program results in recommendation for a Washington State teaching certificate with an endorsement in Special Education P-12 and a content endorsement (students must earn a second endorsement in an area other than Special Education, Early Childhood Special Education, Bilingual Education, or English Language Learner). View the list of options.

Teachers who hold a valid and endorsable Washington State certificate may earn an endorsement in Special Education (P-12) by completing core coursework requirements.

The Special Education and Early Childhood Education Special Education Majors are academically rigorous programs aligned with the content and performance standards of the Council for Exceptional Children.

Certification

The Washington Administrative Code specifies the requirements for earning a Washington state teacher certificate. State-approved preparation programs and certification requirements align with Washington State K-12 Learning Standards, and require candidates to demonstrate that they have made a positive impact on student learning. First-level residency certification programs are designed around the standards of foundational knowledge, effective teaching and professionalism. Second-level professional certification programs are designed around the standards of effective

teaching, professional development, and professional contributions. Teacher certificates are issued by the state, upon the recommendation of the regionally accredited college or university where the candidate completed a state-approved preparation program.

State requirements for teacher certification at the time of completion of a student's program will supersede those outlined in this catalog. These changes may affect the time it takes for a student to complete the teacher education program.

Residency Teacher Certification

The first-level residency certificate is awarded to new teachers upon the completion of these general requirements:

- A baccalaureate or higher-level degree from a regionally accredited college or university
- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodology, and an internship
- Evidence of good moral character and personal fitness

Candidates for residency certification must pass a content knowledge test to earn an endorsement. WWU requires submission of a passing content test score for each endorsement to be earned, before commencement of the student teaching internship. For current information on test requirements, registration, fees, and test dates and locations, refer to the Content Test Resource Website, wce.wwu.edu/cert/content-test-resource-site. Candidates for residency certification must also complete the state of Washington edTeacher Performance Assessment (edTPA) during the student teaching internship. Application for the residency certificate is made to Woodring College Teacher Certification, Student Services, Miller Hall 150, 360-650-4930, no later than three months prior to the start of the internship.

The first-issue residency certificate has no defined expiration date. It is valid until the teacher completes at least 1.5 years of successful teaching experience accumulated over a minimum of two years in a state-approved public, private or state-operated education program. A three-year residency certificate is then issued by the state. The timeline for earning a second level professional certificate begins with the re-issued residency certificate.

Professional Teacher Certification

The second-level professional certificate is awarded to experienced teachers who hold a valid residency certificate, and who pass the Washington ProTeach Portfolio assessment or earn national board certification through the National Board for Professional Teaching Standards. For further information on professional certification requirements contact the Woodring College of Education certification officer at 360-650-4630, Miller Hall 150.

Endorsements

An endorsement identifies the subject matter a teacher is prepared and authorized by the state to teach. One qualifying endorsement is required for residency certification. Courses required for a teaching endorsement and the professional education sequence must be completed with a grade of C (2.0) or better.

Program Length

Time to completion varies according to the program. For example, the Exceptionality and Disability, BAE is approximately six quarters after completion of the General University Requirements (GURs). Special Education teacher certification programs after completion of all General University Requirements (GURs) or an Associate of Arts degree from a state of Washington community college, ranges from two to three years. Students earning both Special Education P-12 and Elementary Education endorsements should plan on approximately 10 academic quarters for completion. Western students who apply to Teacher Education programs should have satisfied most of the GURs. Transfer students from a community college should have satisfied all of the GURs and preferably have received an AA degree.

Admission Requirements

All applicants to the Woodring College of Education undergraduate and post-baccalaureate teacher education programs must be formally admitted to and currently enrolled at Western Washington University or must apply to Western for the same quarter they apply to teacher education. Woodring College teacher education program application materials are available in Miller Hall 150 and are also printable from wce.wvu.edu/admission.

The requirements listed below are minimum application criteria. Enrollment restrictions apply to teacher education programs. Meeting the following requirements makes the applicant eligible for admission consideration but does not guarantee admission. Students who meet all criteria are

further evaluated to determine the most qualified applicants. Students will be evaluated on all information provided with the application, including required copies of transcripts from all prior colleges.

Application criteria:

- Completion of at least 45 quarter credits of college-level course work
- Cumulative grade point average of 2.75 or higher overall college-level course work or over the last 45 credits.
- Meet the basic skills requirement. This may be met by: a) Taking the Washington Educator Skills Test-Basic (WEST-B), b) SAT minimum scores, c) ACT minimum scores. See the WEST-B website for details: wce.wvu.edu/admissions/west-b-requirement. Passing scores must be on file by the application due date.
- Completion of an English composition course with a grade of B- (2.7) or higher
- It is recommended that all students seek advisement from the special education department prior to submitting an application to best satisfy the admissions criteria. Experiences with children, strong interpersonal communication skills, and other skills helpful in teaching children are considered.

Advisement and Orientation

Upon acceptance, each student is assigned an advisor. **Additionally, all accepted students must attend required orientations.** Students may be dropped from Special Education Programs for failing to attend the required orientation.

Program Continuation

Students admitted to the Woodring College of Education must meet specified requirements throughout the course of their teacher education program in order to remain in the program. These include all clearances and background checks.

Requirements Upon Program Admission

- Institutional Application for a Teacher's Certificate and Character and Fitness Supplement, and fingerprinting by the Washington State Patrol as described below under Character and Fitness
- Woodring College of Education Professionalism Orientation
- Woodring College of Education Prevention of Sexual Harassment Training

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

- Woodring College of Education Blood-Borne Pathogens Training

Character and Fitness

The Washington Administrative Code requires applicants for teacher certification to give evidence of "good moral character and personal fitness." Students provide evidence of character and fitness through two separate but related processes:

- Institutional Application for a Teacher's Certificate and Character and Fitness Supplement, provided to students upon acceptance into the program. The application for certification requires candidates to answer questions regarding professional fitness, criminal history and personal conduct. Students with "yes" responses must report to the certification officer in Miller Hall 150 and gain character and fitness clearance before registering for classes.
- Washington State Patrol and FBI background checks through a fingerprinting process. Procedures and fee information are provided to students upon acceptance into the program

No student in a teacher education program may participate in a University-sponsored activity in the public schools until cleared by the Washington State Patrol, or in some cases, investigated and then cleared by the Washington State Office of the Superintendent of Public Instruction.

Clearances are valid for specified time frames. Students must maintain character and fitness clearance until they have been recommended for a residency teacher certificate following completion of the teacher education program.

In addition to the Washington state character and fitness requirements noted above, students must abide by the Woodring College of Education conduct policies acknowledged in the Student Conduct Requirements and Agreement, which is submitted with program application materials. Students must also abide by the Department of Special Education Professionalism Expectations document provided at the mandatory orientation.

General Retention Requirements

- Students must maintain at least a 2.75 quarterly GPA beginning the quarter they are notified of admission to Special Education. This requirement applies even to quarters when no education courses are being taken. Students who fail to meet this

standard will receive a letter advising them they have been dropped from the program

- Students must earn a grade of C (2.0) or better in the professional education sequence and in all courses required for the endorsement and the academic major. If a grade earned is below a "C" in endorsement or major courses, the student will need to retake the course. It will be based on a space available during Phase III
- Students must understand and demonstrate a high level of competence in use of the English language. Those who have difficulty in their verbal and/or written communications should expect to seek remediation before beginning the internship
- Students must complete all certification and endorsement course work prior to the internship
- Students who interrupt enrollment in a teacher education program for more than two consecutive quarters (summer quarter not included) must meet all program admission, completion and certification requirements in place for the quarter in which they expect to return

Program Completion

To qualify for program completion and recommendation for state of Washington residency certification, students must complete the following requirements and assessments:

- A baccalaureate or higher-level degree from a regionally accredited college or university
- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodology, and an internship
- Evidence of good moral character and personal fitness
- Passing score on the state-required content knowledge test(s) for each endorsement, such as West E and/or NES
- Completion of the education Teacher Performance Assessment (edTPA).
- Successful completion of the student teaching internship as shown by performance on the WWU Intern Development and Evaluation System (IDES)

Other Special Education Information

Internship

An important experience for teaching certification candidates is the student teaching internship. During the internship, students teach under the direct supervision of a certified teacher in a school setting. The internship(s) involve intensive practice in integrated methods, content area knowledge, and classroom organizational strategies.

Early Childhood Special Education majors seeking certification are required to complete one quarter of internship for 16 credits.

Students completing the Special Education and Elementary Education Dual Endorsement program must complete two internships, one in a Special Education setting and one in a general Elementary education classroom. The one-quarter Elementary internship is completed **after** the one-quarter Special Education internship.

Students completing SPED plus Content Endorsement, complete one internship.

The Office of Field Experiences (OFE) is the service agency of the Woodring College of Education that seeks placements for prospective interns. Students apply for their internship around January prior to a fall internship start quarter, or April prior to a winter or spring internship start quarter. Specific dates for informational meetings and application deadlines are published on the OFE website, wce.wvu.edu/ofe/office-field-experiences.

Students must have completed Prevention of Sexual Harassment Training, blood-borne pathogens training, a residency teacher certificate application packet including credit evaluation, and Washington State Patrol/FBI fingerprinting before OFE will seek an internship placement.

Before commencement of the internship, passing scores on the WEST-E or NES for each endorsement must be submitted, all education and endorsement course work and practica must be completed, and fingerprint/character and fitness clearance must be valid. Students who interrupt enrollment for a quarter or more must meet the deadline for filing a returning student application.

OFE does not guarantee placements. Placement in a school is contingent upon the following:

- Fulfillment of all program requirements (satisfactory academic work, education and endorsement program course work and training, practica, and faculty recommendations, satisfactory completion

of Assistive Technology E-Portfolio and required professional activities)

- Submission of passing scores on the state-required content knowledge test(s) for each endorsement
- Availability of placements and supervision in specific subjects and grade levels
- Acceptance by P-12 school personnel
- Fingerprint/character and fitness clearance through the point of certification

Students are required to interview with the public school teacher to whom they will be assigned, for final approval of placement. OFE will make every effort to arrange up to three initial interviews but does not guarantee an interview.

Any subsequent placement after a voluntary or non-voluntary withdrawal from an internship will be granted only by faculty recommendation following a case conference.

Time commitment to the internship requires seven clock hours daily Monday through Friday plus class preparation time, seminars and responsibilities outside of school. Students may not register for other course work or hold jobs or other time-demanding commitments without the approval of the department and OFE.

Placement locations are listed on the map available in the department office or the Office of Field Experiences. OFE reserves the right to place students anywhere within the WWU service area.

For further information, contact the Woodring College of Education, Office of Field Experiences, Student Services, phone 360- 650-3310, Miller Hall 150.

Educational Administration Programs

The Educational Administration Programs are designed to prepare principals, superintendents, and effective P-12 district level leaders for a diverse society. Upon successful completion of the program, candidates receive a master's degree and/or are recommended for Residency Administrator Certificate (Principal), or the Initial Administrator Certificate (Superintendent). Consistent with national and state standards for P-12 school administrators, the program emphasizes leadership and management related to curriculum, school instruction, personnel, staff/community relations, financial and legal matters. Master's and residency administrator certificate (principal) programs are offered in Bellingham, Bremerton and Seattle; the initial administrator certificate (superintendent) programs is offered in Everett. Candidates are directed to the Graduate School section of this catalog for more information; the program office is located in Miller Hall 417, phone

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

360-650-3708, toll-free 866-913-3323; e-mail
EdAdmin@wwu.edu.

Note: Evidence of good moral character and personal fitness is required if the candidate does not hold a valid Washington educator certificate at

the time of recommendation for the administrator certificate. Instructions and forms for a Pre-Residency Clearance and Fingerprinting Background Check are available through the certification office: wce.wwu.edu/cert/character-and-fitness.

Bachelor of Arts in Education

Early Childhood Special Education P-3 and Early Childhood Education P-3 (Dual Endorsement), BAE

Department of Special Education, Woodring College of Education

157-159 credits

Introduction

Special Educators need to have extensive knowledge in four areas: they need to know about students and how they learn; they need to know about effective instruction; they need to know about the content of the lessons they will teach; and, they need to know about the context (social, legal, and political) in which they will work. Therefore, training to become a Special Educator will include work in each of these areas. The program includes coursework and extensive supervised practicum experiences in the public schools. The program is rigorous and the expectations are high. However, the rewards are also high. This program will prepare you to be an excellent teacher in whatever position you eventually choose. Our graduates are actively recruited by school districts to work in a variety of rewarding special education settings.

This plan of study is designed to prepare personnel to work with children from birth through eight years who have been identified as at-risk for developmental delay and disability and with their families. The major combines studies in Early Childhood and Special Education and leads to recommendation for a Washington State teaching certificate with endorsement in Early Childhood Special Education, Preschool through Grade 3 (P-3). Students may choose to complete additional coursework required to add the P-12 Special Education endorsement or the Early Childhood Education (P-3) endorsement.

Why Consider a Dual Endorsement in Early Childhood Special Education P-3 and Early Childhood Education P-3 Major?

There are two definitions of Special Education. One is the education of students with disabilities. The other is the application of exceptional teaching. We in the Special Education Program at Western Washington University believe very strongly in the second definition. We think that it is our mission to prepare exceptional teachers and, while students who have disabilities often require the services of such teachers, we also believe that there are many other students who can benefit from high quality instruction. We also think that there is much satisfaction to be gained from the acquisition of the highest levels of teaching skill and that the teachers trained in our program benefit professionally and personally from the acquisition of these skills. That is why the word "Special" in our title is a source of pride to us and to our graduates.

How to Declare (Admission and Declaration Process)

Admission to Western Washington University and admission to the Department of Special Education are required before a student may begin taking courses in education. Requirements include:

- completion of a minimum of 45 credits (see list of recommended GUR courses),
- cumulative grade point average of 2.75 or higher for the last 45 credits,
- completion of an English composition course, with grade of B- or higher,
- Meet the Washington Education Skills Test-Basic (WEST-B) requirement. This may be met by a) passing the West-B exam, b) SAT minimum scores, c) ACT minimum scores. See the WEST-B Requirement website for more information, wce.wvu.edu/admissions/west-b-requirement. Passing scores must be on file by the application due date.

Enrollment restrictions apply in all teacher education programs. Meeting the above criteria makes the applicant eligible for admission, but does not guarantee admission. Students who meet all criteria are further evaluated by the department to determine the most qualified applicants. For more information on the application process, contact Teacher Education Admissions in Miller Hall 150, call 360.650.3313, or visit the website at wce.wvu.edu/admissions/teacher-education.

Retention in the program requires continuous demonstration of competence in standard oral and written English in all coursework. Retention also requires maintenance of a 2.75 quarterly GPA including the quarter in which the application was reviewed by the Department of Special Education. The State of Washington requires students to earn a "C" or better in all major endorsement and education courses.

See the Special Education and Education Leadership section of this catalog for program admission and completion requirements.

Certification Advisement

Each student will be assigned an adviser when admitted to the Department of Special Education; the adviser for the Early Childhood major is Dr. Keith Hyatt. Students will be assisted and monitored by Dr. Hyatt on a regular basis throughout their program.

Grade Requirements

Students must earn a grade of C (2.0) or better in the special education professional program and in all courses required for the endorsement.

Requirements

Major — Early Childhood Special Education (P-3): 85-87 credits

- One course from:
 - ECE 380 - Foundations of Literacy for Early Childhood Education
 - ELED 480 - Literacy: Beginning Communicators
- ECE 390 - Infant and Toddler Practicum and Seminar
- ECE 391 - Preschool Practicum and Seminar
- ECE 430 - Creativity & Play in ECE
- ECE 431 - Fundamentals of Early Childhood Education
- One course from:
 - ECE 434 - Environments for Early Learning
 - ECE 436 - Child Guidance: Principles and Practices
- ELED 426 - Social Studies Methods
- SPED 360 - Introduction to Special Education
- SPED 443 - Early Development Variations
- SPED 444 - Assessment and Intervention in Early Childhood Special Education
- SPED 460 - Interventions for Classroom Management
- SPED 464 - Disability Law and IEP
- SPED 465 - Assessment for Special Education and General Education Teachers

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

- SPED 467 - Curriculum-Based Evaluation
- SPED 468 - Effective Collaboration with Families, Professionals and Community
- SPED 472 - Behavior Assessment and Intervention
- SPED 474 - Students With Complex Needs
- SPED 480 - Practicum III - Individual/Group Intervention, Reading
- SPED 483 - Reading Instruction for Students With Special Needs
- SPED 484 - Designing Written Expression Interventions
- SPED 485 - Designing Math Interventions
- SPED 486 - Case Study Applications in Special Education

Professional Studies Core: 31 credits

- ECE 435 - Child Abuse and Neglect
- SPED 301 - Educational Psychology I: Development and Individual Differences
- SPED 302 - Educational Psychology II: Motivation, Learning and Assessment
- SPED 310 - Education, Culture, and Equity
- I T 443 - Digital Decisions: Technology for Educators
- MATH 381 - Teaching K-8 Mathematics I
- SPED 420 - Effective Teaching
- SPED 440 - Practicum I - General Education

Early Childhood Elementary Courses: 19 credits

- MATH 382 - Teaching K-8 Mathematics II
- MATH 383 - Teaching K-8 Mathematics III
- PE 345 - Physical Education for Elementary School
- SCED 480 - Science Methods and Curriculum for the Elementary School
- SCED 490 - Laboratory/Field Experience in Elementary Science

Public School Practica and Internship — Special Education: 22 credits

- SPED 481 - Practicum VI - Individual/Group Intervention, Written Expression
- SPED 482 - Practicum VII - Individual/Group Intervention, Math
- SPED 496 - Internship - Exceptional Children/Early Childhood

Early Childhood Special Education, BAE

Department of Special Education and Education Leadership, Woodring College of Education

116-118 credits

Introduction

This plan of study is designed to prepare personnel to work with children from birth through eight years who have been identified as at-risk for developmental delay and disability and with their families. The major combines studies in Early Childhood and Special Education.

Students in this major typically seek employment in private child development centers and governmental agencies; they do not qualify for a teaching certificate.

Why consider an Early Childhood Special Education major?

There are two definitions of Special Education. One is the education of students with disabilities. The other is the application of exceptional teaching. We in the Special Education Program at Western Washington University believe very strongly in the second definition. We think that it is our mission to prepare exceptional teachers and, while students who have disabilities often require the services of such teachers, we also believe that there are many other students who can benefit from high quality instruction. We also think that there is

much satisfaction to be gained from the acquisition of the highest levels of teaching skill and that the teachers trained in our program benefit professionally and personally from the acquisition of these skills. That is why the word "Special" in our title is a source of pride to us and to our graduates.

Exceptionality and Disability, BAE

Department of Special Education and Education Leadership, Woodring College of Education

80-85 credits

Introduction

Completion of this major and the required professional education courses results in a BA in Education. Students who complete this major typically seek employment in non-school settings, such as health and human services and non-profit organizations; they do not qualify for a teaching certificate.

Why consider the Exceptionality and Disability Major?

Many professionals work with persons with disabilities in a variety of venues other than schools and do not require the same pedagogical knowledge base expected of special education teachers. However, to effectively advocate for and to work with individuals with disabilities, it is imperative that professionals have a solid background in a variety of topics central to the provision of supports for individuals with disabilities. We, in the Department of Special Education, believe that professionals should support individuals with disabilities in accessing inclusive community opportunities that are available to persons without disabilities. A major in Exceptionality and Disability provides foundational knowledge to professionals who interface across a variety of settings, including school, home, agencies, and community.

139-142 credits (professional program and major)

Introduction

Special Educators need to have extensive knowledge in four areas: they need to know about students and how they learn; they need to know about effective instruction; they need to know about the content of the lessons they will teach; and, they need to know about the context (social, legal, and political) in which they will work. Therefore, training to become a Special Educator will include work in each of these areas. The program includes coursework and extensive supervised practicum experiences in the public schools. The program is rigorous and the expectations are high. However, the rewards are also high. This program will prepare you to be an excellent teacher in whatever position you eventually choose. Our graduates are actively recruited by school districts to teach in both elementary classrooms and special education settings.

Students seeking a bachelor's degree with teacher certification and an endorsement in Special Education - P-12 through Teacher Education Outreach Programs located in Bremerton, Everett and Seattle must complete the Elementary Education Professional Program - Outreach Program and the Special Education (P-12) - Outreach Program requirements. Program coursework listed below is delivered through a cohort-based, integrated model designed specifically for outreach program sites. Graduates may earn an endorsement in special education by completing a second internship (16 credits) through the special education additional endorsement program. Courses must be completed with a grade of C (2.0) or better.

How to Declare (Admission and Declaration Process):

Before students may begin taking courses in education, they must be admitted to both Western Washington University and Teacher Education Outreach Programs. Admission to our programs occurs once a year in the fall. Program admission requirements include:

- Transferable A.A. degree from a Washington state community college, or satisfaction of Western's General Education Requirements
- Minimum grade point average of 2.75 overall or for the most recent 45 quarter credit hours

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

- Meet the West-B basic skills requirement. This may be met by: a) Taking the West-B exam, b) SAT minimum scores, c) ACT minimum scores. See the West-B webpage for details: wce.wvu.edu/admissions/west-b-requirement.
- English composition course, completed with a B- or better
- Three letters of recommendation
- Reflective essay

For more details about program admission, please see the Frequently Asked Questions page at wce.wvu.edu/teop/teacher-education-outreach-programs.

Enrollment restrictions apply in all teacher education programs. Meeting the above criteria makes the applicant eligible for admission, but does not guarantee admission. Students who meet all criteria are further evaluated by the department to determine the most qualified applicants. Retention in the program requires continuous demonstration of competence in standard oral and written English in all coursework. Retention also requires maintenance of a 2.75 quarterly GPA for each quarter after admission. The State of Washington requires students to earn a "C" or better in all major endorsement and most education courses.

See the Teacher Education Outreach Programs section of this catalog for program admission, completion, and teacher certification requirements.

Advisement

Prospective elementary education students are invited to meet with an advisor for more information about the program (see above for site contacts). At all TEOP sites, the student advisor is the Academic Program Director. Students will be assisted and monitored by their advisors and their program coordinator on a regular basis throughout their program.

Grade Requirements

Students must earn a grade of C (2.0) or better in the elementary education professional program and in all courses required for the endorsement.

Requirements

Elementary Education Professional Program – Outreach Program: 99 credits

- ART 380 - Art Educating the Child

Special Education — P-12 plus Content Endorsement, BAE

Department of Special Education and Education Leadership, Woodring College of Education

109 credits (major and professional program)
(plus 20-98 credits depending on content endorsement)

Introduction

Special Educators need to have extensive knowledge in four areas: they need to know about students and how they learn; they need to know about effective instruction; they need to know about the content of the lessons they will teach; and, they need to know about the context (social, legal, and political) in which they will work. Therefore, training to become a Special Educator will include work in each of these areas. The program includes coursework and extensive supervised practicum experiences in the public schools. The program is rigorous and the expectations are high. However, the rewards are also high. This program will prepare you to be an excellent teacher in whatever position you eventually choose. Our graduates are actively recruited by school districts to work in a variety of rewarding special education settings.

Effective September 1, 2016, teacher candidates who are earning an endorsement in Special Education are required by Washington State to earn a second endorsement in an area other than Special Education, Early Childhood Special Education, Bilingual Education, or English Language Learner.

Students seeking a bachelor's degree with recommendation for a Washington State teacher certificate and an endorsement in Special Education must complete the Special Education (P-12) major, the Professional Studies Core, the internship, and a content area endorsement under advisement. Graduates may not provide direct instruction in core academic subjects for which they do not hold a content endorsement unless they provide evidence of meeting federal Highly Qualified Teacher (HQT) requirements to teach that subject. They may, however, serve as a consultant to the teacher of record.

Why Consider a Special Education P-12 Plus Content Endorsement Major?

There are two definitions of Special Education. One is the education of students with disabilities. The other is the application of exceptional teaching. We in the Special Education Program at Western Washington University believe very strongly in the second definition. We think that it is our mission to prepare exceptional teachers and, while students who have disabilities often require the services of such teachers, we also believe that there are many other students who can benefit from high quality instruction. We also think that there is much satisfaction to be gained from the acquisition of the highest levels of teaching skill and that the teachers

trained in our program benefit professionally and personally from the acquisition of these skills. That is why the word "Special" in our title is a source of pride to us and to our graduates.

How to Declare (Admission and Declaration Process):

Admission to Western Washington University and admission to the Department of Special Education are required before a student may begin taking courses in education. Requirements include:

- completion of a minimum of 45 credits (see list of recommended GUR courses),
- cumulative grade point average of 2.75 or higher for the last 45 credits,
- completion of an English composition course, with grade of B- or higher,
- Meet the Washington Education Skills Test-Basic (WEST-B) requirement. This may be met by a) passing the West-B exam, b) SAT minimum scores, c) ACT minimum scores. See the WEST-B Requirement website for more information, wce.wwu.edu/admissions/west-b-requirement. Passing scores must be on file by the application due date.

Enrollment restrictions apply in all teacher education programs. Meeting the above criteria makes the applicant eligible for admission, but does not guarantee admission. Students who meet all criteria are further evaluated by the Department to determine the most qualified applicants. For more information on the application process, contact Teacher Education Admissions in Miller Hall 150, call 360.650.3313, or visit the website at wce.wwu.edu/admissions/teacher-education.

Retention in the program requires continuous demonstration of competence in standard oral and written English in all coursework. Retention also requires maintenance of a 2.75 quarterly GPA including the quarter in which the application was reviewed by the Department of Special Education. The State of Washington requires students to earn a "C" or better in all major endorsement and education courses.

See the Special Education and Education Leadership section of this catalog for program admission, completion, and teacher certification requirements.

Certification Advisement

Each student will be assigned an adviser when admitted to the Department of Special Education. Students will be assisted and monitored by their adviser on a regular basis throughout their program.

Grade Requirements

Students must earn a grade of C (2.0) or better in the special education professional program and in all courses required for the endorsement.

Major — Special Education: 60 credits

- SPED 360 - Introduction to Special Education
- SPED 460 - Interventions for Classroom Management
- SPED 464 - Disability Law and IEP
- SPED 465 - Assessment for Special Education and General Education Teachers
- SPED 467 - Curriculum-Based Evaluation
- SPED 468 - Effective Collaboration with Families, Professionals and Community
- SPED 471 - Interventions for Learning and Achievement in a Diverse Classroom

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

- SPED 472 - Behavior Assessment and Intervention
- SPED 474 - Students With Complex Needs
- SPED 480 - Practicum III - Individual/Group Intervention, Reading
- SPED 481 - Practicum VI - Individual/Group Intervention, Written Expression
- SPED 482 - Practicum VII - Individual/Group Intervention, Math
- SPED 483 - Reading Instruction for Students With Special Needs
- SPED 484 - Designing Written Expression Interventions
- SPED 485 - Designing Math Interventions
- SPED 486 - Case Study Applications in Special Education

Professional Studies Core: 33 credits

- SPED 301 - Educational Psychology I: Development and Individual Differences
- SPED 302 - Educational Psychology II: Motivation, Learning and Assessment
- SPED 310 - Education, Culture, and Equity
- HLED 455 - Health Education Grades K-8
- I T 443 - Digital Decisions: Technology for Educators
- MATH 381 - Teaching K-8 Mathematics I
- SPED 420 - Effective Teaching
- SPED 440 - Practicum I - General Education
- ELED 424 - Language Arts in the Elementary Curriculum

Internship — Special Education: 16 credits

- One course from:
 - SPED 498 - Internship - Special Education
 - SPED 499 - Internship - Exceptional Children/Secondary

Note(s): Post-baccalaureate teacher certification with Special Education endorsement has essentially the same requirements as the undergraduate teacher certification program in Special Education, including the Professional Studies Core and internship requirements.

Content Endorsement: Variable credits (20-98 credits)

Students must earn a second endorsement in an area other than Special Education, Early Childhood Special Education, Bilingual Education, or English Language Learner. Information on all endorsement programs delivered through Western Washington University is available on the Woodring College of Education Endorsement Programs resource site.

Master of Education

Educational Administration, Instructional Technology, MEd (In Moratorium)

Department of Educational Leadership

This program is not currently accepting new students. For further information contact the Graduate School, Western Washington University, 516 High St., Bellingham, WA 98225-9037, 360-650-3170, gradschool@wwu.edu.

Educational Administration, Thesis, MEd

Graduate Faculty

Bruce, Tim, PhD.
Hunter, Joseph, EdD.
Larsen, Donald E., PhD.

Graduate Program Advisor: Dr. Donald Larsen, Miller Hall 418D, 360-650-4336, Donald.Larsen@wwu.edu
Program Manager: Kimberly Caulfield, Miller Hall 417A, 360-650-3708, Kimberly.Caulfield@wwu.edu

Program Goals

The Educational Administration program is designed to prepare elementary and secondary school teachers and ESAs to assume leadership roles as principals, vice principals, program and department leaders, or instructional technology specialists. Candidates receive a master's degree and/or are recommended for principal certification after completion of a year-long internship.

The Educational Administration program is offered at four sites — Bellingham, Bremerton, Seattle, and Tacoma.

Application Information

Prerequisite/Supporting Materials:

- Course background appropriate to level of specialization
- Three years of documented successful school-based instructional experience with students (e.g., teaching or ESA employment)
- Application for admission to Graduate School
- Candidate Information Form
- Photocopy of your valid Washington State teacher or ESA certificate. If submitting an ESA certificate, include a letter from your supervisor describing your assignment and service that supports successful school-based instructional experience with students
- A current résumé outlining your education and professional history
- Professional Reference forms (3): one each from two building-level administrators, and one from a district-level administrator
- Official transcript(s) showing all previous course work
- Satisfactory Graduate Record Exam (GRE) or Miller Analogies Test (MAT) scores
- Letter of application stating (a) why you want to become a school administrator, (b) how your understanding of diversity relates to improving learning for all students, and (c) defining your goals and objectives as an education leader
- Prerequisite Experience for a Principal's Certificate (Form SPI/CERT 4001F-C) if you are also pursuing your principal's certificate
- An interview with a program advisor may be required

Please submit the online application for admission to the Graduate School: www.wwu.edu/gradschool/

Program Requirements (52 credits)

Core courses: [20 credits]

- EDAD 501 - Introduction to Educational Research and Evaluation
- EDAD 512 - Policy Studies in Educational Administration
- EDAD 541 - Theory in Educational Administration
- EDAD 543 - Supervision in the Public Schools
- EDAD 552 - Planning for Curriculum Administration

Thesis: [9 credits]

- EDAD 690 - Thesis
- Electives selected under advisement, e.g., law, finance, personnel, staff/community relations, instructional technology [23 credits]

For further information, see the Educational Administration Program website at www.wce.wwu.edu/Depts/EDAD

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

Additional Information

Competency in Instructional Technology

Students admitted to programs in the Woodring College of Education are required to possess competence in the use of instructional technology in education prior to completion of their program and, when applicable, prior to being recommended for certification. Procedures for demonstrating or developing competence are available in Miller Hall 417A.

Second Master's Degree

Enrollment must be for a single MEd, MA or MIT program. Students who have earned an MEd or MIT may apply for admission to another MEd program but all requirements of the second program must be met (with possible allowance for some course work taken in the first program). However, all programs must be completed with the minimum number of required credits.

NOTE: Due to a review and revision process which may affect Woodring College of Education programs and courses, the information contained in the Education section of this catalog is subject to change.

Special Education, Non-Thesis, MEd (Endorsement Optional) (In Moratorium)

Department of Special Education
Miller Hall 201A, 360-650-3330

No new applications are being accepted at this time. As this program has been placed in moratorium, please contact the department or see the department website for updated information.

Graduate Faculty

Coulter, Gail, PhD.
Hyatt, Keith, EdD.
Kelley, Bridget, PhD.
Lambert, M. Charles, PhD.
Perzigian, Aaron, PhD.
Robinson, LeAnne, PhD.
Sasnett, Roger, PhD, NCSP
Thorndike, Tracy, PhD.

Goals

The program prepares special educators to become master teachers and consultants in specialized instruction.

Graduate studies in special education are generally designed for students who have met Washington state teacher certification requirements, and are seeking a master's degree in combination with an endorsement to teach special education, and for certificated special education teachers. Prospective students who hold a bachelor's degree and are seeking a first Washington state certification should refer to the Special Education Post-Baccalaureate Program as preparation for graduate admission.

Application Information

Candidates must meet the requirements of the Graduate School (see General Requirements in this section of the catalog) in addition to the following departmental requirements:

- Specific test requirements:
 - Miller Analogies Test or Graduate Record Exam, General Test.
- Supporting materials:
 - A résumé

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

- A statement of purpose for seeking the MEd, and SPED endorsement, if applicable, not to exceed one page
- Completion of Washington state residency certificate requirements
- Three current letters of reference
- An on-campus interview if requested by the department

In limited cases, students who do not meet departmental admission requirements may be granted provisional admission by the Graduate School.

Research Paper

The department requires students to submit a proposal for a research paper (691). This proposal must be approved by the student's committee prior to registering for SPED 691. In SPED 691 students will design and carry out independent research under the direction of a faculty committee. Two faculty are required for the committee directing the research paper (691).

Comprehensive Assessment

Student achievement of the program competencies will be assessed by faculty during the final two quarters of the program through one of two methods:

- Research paper (SPED 691)
- Qualifying examination - the qualifying exam is required by the end of the third quarter of enrollment, after completing SPED 501 with a grade of B- or better. Passage of the qualifying exam is required prior to registering for SPED 691 credits.

Courses (52 credits)

NOTE: curriculum undergoing revision

Options including a special education teaching endorsement (52 credits)

- Core requirements:
 - SPED 501 - Research in Special Education
 - SPED 503 - Instructional Design for Diverse Learners
 - SPED 567 - Advanced Issues in Special Education *
- SPED course work:
 - SPED 466 - Assessment, Evaluation and IEP
 - SPED 474 - Students With Complex Needs
 - SPED 560 - Literacy Instruction for Students With Special Needs
 - SPED 562 - Learning Problems
 - SPED 563 - Curriculum and Methods in Special Education
 - SPED 564 - Social Skills
 - SPED 565 - Communication and Collaboration in Special Education
 - SPED 568 - Curriculum-Based Evaluation and Decision Making
- Research paper requirement:
 - SPED 691 - Research Seminar

A one quarter student teaching internship may be required to earn the P-12 special education endorsement.

Options not including a special education teaching endorsement (52 credits)

- Core requirements:
 - SPED 501 - Research in Special Education
 - SPED 503 - Instructional Design for Diverse Learners
 - SPED 567 - Advanced Issues in Special Education *
- SPED course work:
 - A minimum of 10 hours in Special Education and others by advisement
- Research paper requirement:

SPED 691 - Research Seminar
*Repeatable - 6 credits required.

Special Education, Thesis, MEd (Endorsement Optional) (In Moratorium)

Sample Careers

Superintendent or District Office

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Application and Declaration Process):

All applicants must complete the Graduate School online application. This secure process includes credit card payment of a \$100 application fee and instructions for providing the following materials:

1. Unofficial transcripts from the institution that awarded your master's degree. If you are a current or former Western Washington University student, please generate an unofficial WWU transcript through Web4U to upload. Official transcripts will be required of candidates upon acceptance of an offer of admission.
2. Letter of intent stating (a) your goals and objectives as a district-level leader and (b) how your understanding of diversity relates to improving learning for all students.
3. Résumé outlining your education and professional history.
4. Letter of recommendation from your prospective mentoring superintendent supporting your application and indicating his/her willingness to serve as your mentor.
5. One copy of valid Washington State certificate (teacher, ESA, principal, or program administrator).

Prior to submitting an application, interested applicants to this program should contact the educational administration office, Miller Hall 417A.

Program Requirements

Eligibility

1. Master's degree or higher from a regionally accredited college or university.
2. Valid teacher, educational staff associate (ESA), program administrator, or principal certificate.
3. At least 45 credit hours (30 semester credit hours) of post-baccalaureate or graduate-level course work in education.

Internship

1. Washington State Requirement: All candidates for the initial superintendent's certificate must complete a six-credit, six-quarter field experience.
2. Mentor Supervision: The intern shall be under the supervision of a mentoring superintendent with a minimum of three years of professional experience in the role they are supervising. Candidates are to discuss leadership goals and administrative career aspirations with the mentoring administrator before, or commensurate with, application to the program.
3. District & University Approval: In addition to getting University approval for a specified internship, candidates must initiate and satisfy any internship approval procedures required by their district.
4. University Credit: 540 hours of field experience (EDAD 692) translates to (6) credit hours across six quarters of (1) credit each.

Admission to the internship is separate from admission to the certificate program and is based on an individual evaluation of the candidate's preparation and experience.

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

Additional Information

Note: Evidence of good moral character and personal fitness is required if the candidate does not hold a valid Washington educator certificate at the time of recommendation for the administrator certificate. Instructions and forms are available through the certification office:

www.wce.wvu.edu/Resources/Certification/CFReq/Overview.shtml

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Residency Administrator Certificate (Principal)

48 credits

(36 credits of coursework plus a 12 credit, year-long field experience)

See wce.wvu.edu/edad/residency-administrator-certificate-principal for specific details.

Introduction

Designed for educators who hold a master's degree, or are currently enrolled in a master's program. Candidates earn the Washington State residency administrator certificate (principal).

How to Declare (Admission and Declaration Process):

All applicants must complete the Graduate School online application. This secure process includes credit card payment of a \$100 application fee and instructions for providing the following materials:

1. Transcripts: from the institution that awarded your master's degree. If you previously attended WWU, please upload your academic history with your online application.
2. Letter of intent stating a) why you want to become a school administrator, b) how your understanding of diversity relates to improving learning for all students, and c) your goals and objectives as an education leader.
3. Résumé outlining your education and professional history.
4. One copy of valid Washington State certificate (teacher or educational staff associate). If submitting an ESA certificate, you must include a letter from your supervisor describing your assignment and three years of service that supports successful school-based instructional experience with students.
5. Prerequisite Experience for a Principal's Certificate (Form SPI/CERT 4001F-C) Professional Reference Forms (3): One each from two building-level administrators, and one from a district-level administrator.
6. Candidate Information Form

Prior to submitting an application, interested applicants to this program should contact the educational administration office, Miller Hall 417A.

Application Deadlines

To receive full consideration for admission to this program, applicants must submit all application materials by the following deadlines:

Fall Quarter: August 1
Winter Quarter: October 1
Spring Quarter: February 1
Summer Quarter: May 1

Program Requirements

Eligibility

1. Master's degree or higher from a regionally accredited college or university.
2. Valid Washington State teacher or educational staff associate (ESA) certificate.
3. Three years demonstrated successful school-based experience.

Internship

- Washington State Requirement: All candidates for the residency principal's certificate must spend 540 hours in a full school-year field experience, of which at least one half shall be when students and staff are present.
- Mentor Supervision: The intern shall be under the supervision of a mentoring principal or vice principal certificated at the appropriate level with a minimum one year experience in the role.
- District & University Approval: In addition to getting University approval on all internship arrangements, candidates must initiate and satisfy any internship approval procedures required by their district.
- University Credit: 540 hours of field experience (EDAD 592) translates to (12) credit hours in one academic year; i.e., three consecutive quarters of (4) credits each.

Admission to the internship is separate from admission to the certificate program and is based on an individual evaluation of the candidate's preparation and experience.

Additional Information

NOTE: Evidence of good moral character and personal fitness is required if the candidate does not hold a valid Washington educator certificate at the time of recommendation for the administrator certificate. Instructions and forms are available through the certification office:

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Compass to Campus Courses

C2C 201 - Compass to Campus: Youth Mentoring I

Introduction to service-learning mentoring through a campus wide mentoring initiative designed to encourage under-represented, low-income, first generation, and diverse 5th -12th grade students to graduate from high school and consider post-secondary education.

Credits: 3
Grade Mode: Letter

C2C 202 - Compass to Campus: Youth Mentoring II

Service learning through a campus wide mentoring initiative designed to encourage under-represented, low-income, first generation, and diverse 5th -12th grade students to graduate from high school and consider post-secondary education. Second in series. Repeatable up to 12 credits, including original course.

Prerequisites & Notes: C2C 201 or EDUC 201 or

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

EDUC 297A.

Credits: 3

Grade Mode: Letter

C2C 203 - Compass 2 Campus: Youth Mentoring Toward Social Justice

Introduction to critical and cultural issues in education through service learning in local participating school districts. Required field work experiences are integrated into academic studies that connect multi-cultural civic engagement to structure their research, reflection and discussion. This integrated service learning approach promotes the development of new social perspectives and broadens students' world views.

Credits: 0 or 5

Grade Mode: Letter

GUR Attributes: BCGM

Educational Administration Courses

EDAD 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

EDAD 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

EDAD 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not

eligible for tuition waiver.

Credits: 1-15

EDAD 501 - Introduction to Educational Research and Evaluation

Introduction to fundamental concepts and procedures of educational research and evaluation. Interpreting research and evaluation literature and assessing appropriateness of methodology and application of research and evaluation models; utilization of databases for K-12 application in curriculum and instruction decision making.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4

Grade Mode: Letter

EDAD 512 - Policy Studies in Educational Administration

Introduction to philosophical, ethical, moral and legal bases of educational administration, policy decision-making, and formulation. Study of selected policy development and implementation models in relation to above perspectives.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4

Grade Mode: Letter

EDAD 518 - Current Issues in Education

Examination and discussion of several current and controversial issues in education. Repeatable with no maximum.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 1-5

Grade Mode: Letter

EDAD 538 - Case Studies in School Administration

Studies to assist students in understanding school administration.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4

Grade Mode: Letter

EDAD 539 - Educational Leadership

Roles and responsibilities of persons serving as members of the leadership team in public schools.

Prerequisites & Notes: Teaching experience or instructor permission.

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

Credits: 4
Grade Mode: Letter

EDAD 540 - Political and Economic Forces Shaping Education

A study of major forces and groups at the federal, local and state level which impact education through political and economic means.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4
Grade Mode: Letter

EDAD 541 - Theory in Educational Administration

The study of major administrative theories and the impact of management, leadership and decision making for school administrators.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4
Grade Mode: Letter

EDAD 542 - Public School Organization and Administration

Problems and potentials of the principalship.

Credits: 4
Grade Mode: Letter

EDAD 543 - Supervision in the Public Schools

Supervision as educational leadership in continuous evaluation and improvement of school practice.

Credits: 4
Grade Mode: Letter

EDAD 544 - Collective Bargaining in the Public Schools

Technical structure and protocol of collective bargaining as well as issues and practices.

Credits: 4
Grade Mode: Letter

EDAD 546 - Administrative Research Topics

Identification, study and evaluation of research topics appropriate for building level administrators. Repeatable to a maximum of 6 credits.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 2-3
Grade Mode: Letter

EDAD 547 - Readings in School Administration

Supervised study focusing on one or more selected topics.

Prerequisites & Notes: Graduate status or instructor permission.

Credits: 4
Grade Mode: Letter

EDAD 548 - School Law

Legal principles underlying statutes and court decisions related to the schools.

Credits: 4
Grade Mode: Letter

EDAD 549 - Seminar in School Personnel Administration

Professional relationships among certified employees and other school personnel; development and implementation of policies.

Prerequisites & Notes: Permission of instructor.

Credits: 4
Grade Mode: Letter

EDAD 550 - Developing Staff and Community Relations

Models for planning, implementing and evaluating professional development and school/community relations programs.

Prerequisites & Notes: Graduate status or permission of instructor.

Credits: 4
Grade Mode: Letter

EDAD 551 - Systems Approach and Educational Management

The systems approach as related to educational project planning and management.

Credits: 4
Grade Mode: Letter

EDAD 552 - Planning for Curriculum Administration

Planning and decision-making process as related to development and administration of educational curriculum and innovations.

Prerequisites & Notes: Graduate status or

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

permission of instructor.

Credits: 4

Grade Mode: Letter

EDAD 553 - Administering Elementary and Secondary Schools

Program articulation between elementary and secondary schools as well as unique aspects of these schools.

Prerequisites & Notes: Permission of instructor.

Credits: 4

Grade Mode: Letter

EDAD 554 - Administration and the International School

An examination of the structure, organization and principles by which Western European schools are financed, staffed and administered. Repeatable to a maximum of 6 credits.

Prerequisites & Notes: instructor permission

Credits: 2-6

Grade Mode: Letter

EDAD 555 - Seminar in Effective School Practices

Review and analysis of research findings related to effective school practices.

Credits: 4

Grade Mode: Letter

EDAD 556 - Field Study in Educational Administration

Design, implementation and evaluation of a field project (6 credits maximum/minimum).

Prerequisites & Notes: Advancement to candidacy, permission of instructor and submission of outline indicating scope of project.

Credits: 2-3

Grade Mode: Letter

EDAD 592 - Field Experience in Administration for the Principal

Applicants for the Washington State Administrative Certificate. Repeatable with no maximum. S/U grading.

Prerequisites & Notes: Permission of instructor.

Credits: 2-6

Grade Mode: S/U

EDAD 594 - Practicum in Action Research

Field-based studies by entire school building staffs

to resolve persistent and significant school problems. Course requirements include the development of an approved proposal for action research. May be repeated with different content. Repeatable to a maximum of 9 credits. S/U grading.

Prerequisites & Notes: Teaching experience, permission of instructor.

Credits: 3

Grade Mode: S/U

EDAD 640 - Current Topics in Education

Studies of current topics in educational administration, personnel administration, interprogram topics. Repeatable with no maximum.

Prerequisites & Notes: Master's degree; permission of instructor.

Credits: 1-5

Grade Mode: Letter

EDAD 641 - Improving Student Learning

Systematic examination of curriculum and instruction policy development, implementation and maintenance of curriculum models, and development of guidelines for curriculum governance.

Prerequisites & Notes: Master's degree; EDAD 552 or equivalent.

Credits: 4

Grade Mode: Letter

EDAD 642 - Effective School System Management

Examination of important school system management theories and models. Development of strategies for management models implementation, evaluation and maintenance.

Prerequisites & Notes: Master's degree; permission of instructor.

Credits: 5

Grade Mode: Letter

EDAD 643 - Advanced Leadership Theory

Examination of important leadership theories and governance styles as they relate to the role of the K-12 school superintendent. Key focus upon the ethics and fairness of reasoned decision making as a leader.

Prerequisites & Notes: Master's degree.

Credits: 5

Grade Mode: Letter

EDAD 644 - Public Policy Formulation and Practice

Exploration of research-based approaches to the development and implementation of public policy. Examines successful approaches to implementation and dissemination.

Prerequisites & Notes: Master's degree.
Credits: 4
Grade Mode: Letter

EDAD 646 - Field Project in Educational Administration

Repeatable to a maximum of 8 credits.

Prerequisites & Notes: Master's degree, permission of instructor and submission of a one-page outline indicating scope of proposed project.
Credits: 2-5
Grade Mode: Letter

EDAD 647 - Seminar for School District Leaders

Current problems and issues facing school administrators.

Prerequisites & Notes: Master's degree; applicant for Washington State Superintendent's Certificate; and/or instructor permission.
Credits: 4
Grade Mode: Letter

EDAD 690 - Thesis

Research study under the direction of a faculty committee. Repeatable to a maximum of 9 credits. S/U grading.

Prerequisites & Notes: Advancement to candidacy; approval of student's graduate committee.
Credits: 1-9
Grade Mode: S/U

EDAD 691 - Research Seminar

Research study under the direction of a faculty committee. Repeatable to a maximum of 6 credits. S/U grading.

Prerequisites & Notes: Advancement to candidacy; approval of student's graduate committee/program advisor.
Credits: 1-6
Grade Mode: S/U

EDAD 692 - Field Experience in Administration for the Superintendent

Applicants for the Washington State Administrative Certificate. Repeatable with no maximum. S/U grading.

Prerequisites & Notes: Master's degree and written permission of instructor.
Credits: 1-6
Grade Mode: S/U

Special Education Courses

SPED 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SPED 301 - Educational Psychology I: Development and Individual Differences

Principles of human development and individual differences as they relate to both academic and non-academic functioning. Emphasis on implications for P-12 classrooms.

Prerequisites & Notes: Admission to Woodring College of Education or permission of department chair.
Credits: 4
Grade Mode: Letter

SPED 302 - Educational Psychology II: Motivation, Learning and Assessment

Principles of human motivation and learning and their implications for P-12 classrooms; basic statistical and applied concepts used in assessment of student performance.

Prerequisites & Notes: SPED 301 or EDUC 301.
Credits: 4
Grade Mode: Letter

SPED 310 - Education, Culture, and Equity

Issues of culture and social justice as they impact education, schools, and teaching. Includes a service learning component.

Prerequisites & Notes: Admission to Woodring College of Education or permission of instructor or department chair.

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

Credits: 4

Grade Mode: Letter

SPED 360 - Introduction to Special Education

An introduction to characteristics and categories of exceptionality, and the rules and regulations concerning provision of special education and related services. Includes federal and Washington state legislation pertinent to special education from preschool through high school. A minimum of 15 hours of practicum experience required during the quarter.

Credits: 4

Grade Mode: Letter

SPED 363 - Secondary Students With Special Needs

Introduction to the characteristics and needs of secondary students with special needs; pertinent federal and state laws; curricular and behavior management adaptations in the regular classroom; assessment of learning problems; instructional techniques; behavior management strategies.

Prerequisites & Notes: Admission to Woodring College of Education or permission of instructor.

Credits: 4

Grade Mode: Letter

SPED 364 - Teaching Each Student

Introduction to impact of disability and English language acquisition on access to the general education curriculum. Research-based practices in instructional planning to provide access to all elementary students.

Prerequisites & Notes: Admission to the Woodring College of Education.

Credits: 4

Grade Mode: Letter

SPED 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SPED 410 - Supportive Learning Environments

Course provides an overview of classroom

management, positive behavior intervention support, and strategies for responding to challenging behavior. Includes instruction in lesson design, with an emphasis on effectively using direct instruction and applying universal design for learning principles.

Prerequisites & Notes: Admission to Woodring College of Education.

Credits: 4

Grade Mode: Letter

SPED 420 - Effective Teaching

Research-based recommended practices in the design, delivery and evaluation of instruction for diverse learners.

Prerequisites & Notes: Admission to Woodring College of Education or permission of instructor and concurrent enrollment in SPED 440 and SPED 460.

Credits: 4

Grade Mode: Letter

SPED 430 - Problem Solving for Diverse Needs

Legal issues and inclusive practices for diverse populations. A collaborative, problem-solving approach to best practices, with an emphasis on school-based services for students with academic, behavioral, and linguistic needs.

Prerequisites & Notes: SPED 364; concurrent enrollment in ELED 471

Credits: 3

Grade Mode: Letter

SPED 440 - Practicum I - General Education

Practicum experience in school setting designed to provide opportunities to demonstrate effective teaching and behavior management practices.

Prerequisites & Notes: Admission to Woodring College of Education; SPED 420 and SPED 460 concurrent.

Credits: 1-4

Grade Mode: Letter

SPED 441 - Analysis and Strategies of Teaching

Systematic study of teaching; observation; analysis and development of teaching skills and strategies; individual projects. Repeatable to a maximum of 10 credits. S/U grading.

Prerequisites & Notes: One course from educational psychology or foundations area, or permission of instructor.

Credits: 1-5
Grade Mode: S/U

SPED 442 - Clinical Practicum

Practicum experience in community settings. Designed to provide experience in the community and with agencies that serve persons with disabilities. (S/U, 1 – 5 credits, repeatable up to 10 credits).

Prerequisites & Notes: Admission to the Exceptionality and Disability, BAE and/or permission of the instructor

Credits: 1-5
Grade Mode: S/U

SPED 443 - Early Development Variations

Typical sequences and patterns of development and interrelationships across all areas from prenatal to age eight, and implications of developmental delays and disabilities.

Prerequisites & Notes: SPED 360 or SPED 364; or permission of instructor.

Credits: 4
Grade Mode: Letter

SPED 444 - Assessment and Intervention in Early Childhood Special Education

Issues and resources related to developmental assessment, intervention, and monitoring of infants, toddlers, and preschoolers with delays and/or disabilities. Emphasizes family-centered services, cross-cultural competence, activity-based strategies and teaming.

Prerequisites & Notes: SPED 360 or SPED 364; SPED 420 or ELED 370; or permission of instructor.

Credits: 4
Grade Mode: Letter

SPED 460 - Interventions for Classroom Management

Universal and targeted strategies for classroom management including behavioral, social, and cognitive interventions.

Prerequisites & Notes: SPED 360; co-requisites: SPED 420, SPED 440; or permission of instructor.

Credits: 4
Grade Mode: Letter

SPED 464 - Disability Law and IEP

This course will provide a foundational framework regarding disability law, specifically Section 504 of the Rehabilitation Act of 1974, the Americans with

Disabilities Act, and the Individuals with Disabilities Education Act. Eligibility, referral, and legal guidelines regarding development of the IEP will be investigated. Federal and Washington State regulations regarding provision of special education services will be covered.

Prerequisites & Notes: SPED 360 and SPED 420 or permission of instructor. Co-requisites: SPED 465 and SPED 467.

Credits: 4
Grade Mode: Letter

SPED 465 - Assessment for Special Education and General Education Teachers

This course will provide students with information regarding a variety of assessment processes and practices. Course content will include information regarding assessment skills, descriptive statistics and measurement, types of assessment instruments, data literacy, and issues pertaining to the assessment of students with disabilities and/or from diverse ethnic and linguistic backgrounds. Additionally, students will gain experience administering, scoring, interpreting the results of a variety of norm-referenced test instruments, and report writing.

Prerequisites & Notes: SPED 360 and SPED 420 or permission of instructor. Co-requisites: SPED 464 and SPED 467.

Credits: 4
Grade Mode: Letter

SPED 466 - Assessment, Evaluation and IEP

Referral and assessment for special education eligibility, norm-referenced and teacher-developed assessments, legal and procedural issues in IEP development, and strategies for assessing students from culturally and linguistically diverse backgrounds.

Prerequisites & Notes: SPED 360; SPED 420; SPED 440; SPED 460; EDUC 302 or SPED 302; or instructor permission.

Credits: 4
Grade Mode: Letter

SPED 467 - Curriculum-Based Evaluation

Curriculum-based procedures and formative evaluation. Determining present levels of educational performance, developing associated goals and objectives and monitoring progress. Guidelines for implementation of comprehensive Response to Intervention (RtI) procedures.

Prerequisites & Notes: SPED 360; SPED 420; SPED 440; SPED 460; SPED 302 or EDUC 302; or instructor permission.

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

Credits: 4

Grade Mode: Letter

SPED 468 - Effective Collaboration with Families, Professionals and Community

Provides students with knowledge and skills for developing and sustaining effective collaborative partnerships with other professionals, paraeducators, family members, and community members. Focus is on effective communication, problem solving, and cultural competence skills necessary for sustaining collaborative relationships within a diverse society.

Prerequisites & Notes: SPED 360.

Credits: 4

Grade Mode: Letter

SPED 470 - Violent and Aggressive Youth

This course is designed to present information on the problem of violent and/or aggressive youth in school. The class will stress an educative approach by focusing on what educators can do to prevent, respond to and follow up on acts of violence. S/U grading.

Credits: 3

Grade Mode: S/U

SPED 471 - Interventions for Learning and Achievement in a Diverse Classroom

The class focuses on the attention, motivation and self-monitoring skills of students in a diverse classroom. Primary content of the course is on teaching the task-related skills and strategies needed for students to learn efficiently and effectively. Includes a focus on strategy instruction, academic vocabulary and current best practice in designing and delivering interventions for learning. An emphasis is placed on understanding the interaction between one's mindset, beliefs and dispositions, especially in relation to culture, disability, and ethnicity, on potential student learning outcomes.

Prerequisites & Notes: SPED 360, SPED 420, SPED 460.

Credits: 4

Grade Mode: Letter

SPED 472 - Behavior Assessment and Intervention

Assessment and intervention for students with intensive behavioral needs including functional behavior assessment, positive behavior supports, crisis management, and applied behavior analysis.

Prerequisites & Notes: SPED 460, SPED 467; or

permission of instructor.

Credits: 4

Grade Mode: Letter

SPED 473 - Promoting Resiliency in Vulnerable Students

Exploration of characteristics, identification and special needs of students who are at risk for academic and/or social failure in school due to chemical dependence issues, bilingualism, poverty, dysfunctional family situations or other factors that may interfere with a student's ability to succeed. Analyzes strategies that combine the skills of special and regular education teachers.

Prerequisites & Notes: Admission to Woodring College of Education or instructor permission.

Credits: 3

Grade Mode: Letter

SPED 474 - Students With Complex Needs

History, philosophy, characteristics and services for students with low incidence disabilities. Empirically-based design of instruction and monitoring of functional curricula for people who need some level of continual support.

Prerequisites & Notes: SPED 420, SPED 360 or permission of instructor.

Credits: 4

Grade Mode: Letter

SPED 475 - Seminar in Autism

Seminar in Autism will focus on educational and therapeutic interventions for clients with autism. There is a lab component to this course which requires hands-on intervention with clients with autism

Prerequisites & Notes: SPED 467 or instructor permission.

Credits: 3

Grade Mode: Letter

SPED 476 - Practicum II - Service Delivery Models

This practicum course will provide students with an opportunity to observe and familiarize themselves with numerous school and community based placement options for individuals with disabilities. Practicum will include preschool through postsecondary transition experiences with students exhibiting a variety of disabilities. S/U grading.

Prerequisites & Notes: SPED 467 or instructor permission; Co-requisite: SPED 474.

Credits: 1

Grade Mode: S/U

SPED 477 - Practicum IV - Behavior Assessment and Intervention

This practicum course will provide students with an opportunity to practice behavioral observation techniques with diverse populations in school-based settings. Practicum will include a variety of observation sites, including elementary, middle school, secondary, and/or post-secondary placements. S/U grading.

Prerequisites & Notes: SPED 474 or instructor permission; Co-requisite: SPED 472.

Credits: 1

Grade Mode: S/U

SPED 478 - Complex Needs II

This course focuses on daily living skills for students with disabilities and builds upon concepts presented in SPED 474 Complex Needs. Topics include: vocational education, community based-education, developing leisure and recreation skills, communication skills, motor and medical needs, and assistive technology appropriate for persons with complex needs. The course emphasizes the transition of students with significant needs into post-secondary environments.

Prerequisites & Notes: SPED 474.

Credits: 4

Grade Mode: Letter

SPED 480 - Practicum III - Individual/Group Intervention, Reading

Practicum experience in school/community settings. Designed to provide opportunities for students to develop, implement, and monitor literacy intervention programs for individuals or small groups of students.

Prerequisites & Notes: SPED 467 or instructor permission; co-requisite: SPED 483

Credits: 1-3

Grade Mode: Letter

SPED 481 - Practicum VI - Individual/Group Intervention, Written Expression

Practicum experience in school/community settings. Designed to provide opportunities for students to develop, implement, and monitor instructional intervention programs in literacy for small and large groups.

Prerequisites & Notes: Special education majors or permission of instructor.

Credits: 1-3

Grade Mode: Letter

SPED 482 - Practicum VII - Individual/Group Intervention, Math

Practicum experience in school/community settings. Designed to provide opportunities for students to develop, implement, and monitor instructional intervention programs in Math for small and large groups.

Prerequisites & Notes: Special education majors or permission of instructor.

Credits: 1-3

Grade Mode: Letter

SPED 483 - Reading Instruction for Students With Special Needs

Basic reading instruction for K-12 students in inclusive classrooms; emergent literacy, instructional methods, curriculum and materials; accommodating for individual differences.

Prerequisites & Notes: SPED 467 and LING 201 or permission of instructor; co-requisite: SPED 480.

Credits: 4

Grade Mode: Letter

SPED 484 - Designing Written Expression Interventions

Written expression decision-making and instruction strategies within the context of Response to Intervention. Aligning instructional strategies to student need through the application of problem-solving, progress monitoring and decision making. Focus on topics such as emergent writing skills, mechanics, sentence fluency, and the writing process.

Prerequisites & Notes: SPED 467, SPED 483; co-requisites: SPED 481, SPED 482, SPED 485, SPED 486

Credits: 4

Grade Mode: Letter

SPED 485 - Designing Math Interventions

Math decision-making and instruction strategies within the context of Response to Intervention. Aligning instructional strategies to student need through the application of problem-solving, progress monitoring and decision making. Focus on emergent numeracy, computation, problem solving, algebra and functional applications of measurement, time and money.

Prerequisites & Notes: MATH 381 and SPED 467; or instructor permission; co-requisites: SPED 481, SPED 482, SPED 484, SPED 486

Credits: 4

Grade Mode: Letter

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

SPED 486 - Case Study Applications in Special Education

Uses the case study method to present situations frequently encountered in special education settings, in review of special education course content and application in preparation for student teaching internships.

Prerequisites & Notes: Co-requisite: SPED 484 or permission of instructor.

Credits: 3

Grade Mode: Letter

SPED 490 - Teaching Laboratory

Diagnosis of students, lesson preparation, videotaped peer teaching, analysis of teaching, lesson redesign.

Credits: 4

Grade Mode: Letter

SPED 494 - Internship - Elementary

Supervised general education teaching experience to develop and demonstrate teaching competence at the primary and/or intermediate grade levels. S/U grading.

Prerequisites & Notes: Admission to a Woodring Teacher Education Program and permission of the department.

Credits: 15

Grade Mode: S/U

SPED 495 - Clinical Internship

Clinical Internship provides students extended experience in community settings that meet the needs of persons with disabilities. Students undertake a variety of duties that prepare them to interact in professional situations across community, organizations, and agencies. Repeatable up to 3 times including original course. S/U grading.

Prerequisites & Notes: Admission into the Exceptionality and Disability, BAE and permission of the instructor.

Credits: 1-16

Grade Mode: S/U

SPED 496 - Internship - Exceptional Children/Early Childhood

Supervised teaching experience to develop and demonstrate teaching competence for exceptional children. Repeatable to 24 cr. S/U grading.

Prerequisites & Notes: Recommendation for supervised teaching.

Credits: 2-18

Grade Mode: S/U

SPED 498 - Internship - Special Education

Supervised teaching experience to develop and demonstrate teaching competence for children and youth with disabilities. S/U grading.

Prerequisites & Notes: Recommendation for supervised teaching.

Credits: 15

Grade Mode: S/U

SPED 499 - Internship - Exceptional Children/Secondary

Supervised teaching experience to develop and demonstrate teaching competence for exceptional children. Repeatable to 24 cr. S/U grading.

Prerequisites & Notes: Recommendation for supervised teaching.

Credits: 2-18

Grade Mode: S/U

SPED 500 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

SPED 501 - Research in Special Education

Introduction to the concepts and procedures of contemporary research within special education. Reviewing, analyzing and interpreting research literature applicable to special education. Planning research with exceptional populations including defining research problems, developing relevant hypotheses, and selecting appropriate research designs (including quantitative and qualitative approaches).

Prerequisites & Notes: Admission to Graduate school

Credits: 4

Grade Mode: Letter

SPED 503 - Instructional Design for Diverse Learners

Systematic analysis, design, development and evaluation of instructional systems and practices for diverse learners. Application of instructional

design principles and supporting technologies in P-12 and transitional settings, within decision making frameworks and Response to Intervention.

Prerequisites & Notes: IT 443 or equivalent; Graduate status; SPED 501 or instructor permission

Credits: 4

Grade Mode: Letter

SPED 510 - Secondary Students With Special Needs

Rules, regulations, and related funding categories within special education. Includes specialized instruction and evaluation procedures for use in general education settings.

Prerequisites & Notes: Admission to Secondary MIT or instructor permission

Credits: 4

Grade Mode: Letter

SPED 518 - Current Issues in Education: Special Education

Examination and discussion of current issues in special education. Repeatable to a maximum of 10 cr.

Credits: 1-5

Grade Mode: Letter

SPED 542 - Issues in Inclusive Early Education

Current issues and best practices in early childhood program design and implementation. Emphasis on family-centered, play-based interagency models that serve children of all abilities. Applied research focus.

Prerequisites & Notes: Admission to Graduate School or permission of instructor.

Credits: 3

Grade Mode: Letter

SPED 543 - Assessment of Young Children (Birth to 8 Years)

Issues and resources for accurate and appropriate assessment of young children. Current best practices in instructionally relevant assessment, monitoring child progress and evaluating overall program success. Alternative strategies for assessing the very young child, family needs and special populations. Emphasis on critical evaluation of instruments, psychometric adequacy and technical aspects of test development.

Prerequisites & Notes: Admission to Graduate School or permission of instructor

Credits: 4

Grade Mode: Letter

SPED 544 - Inclusive Curriculum in Early Childhood

Curriculum development and adaptation for infants, toddlers and preschool children. Includes available resources, best practices with the developmentally young and play-based curricula. Focus on model program curricular approaches, the use of daily routines and parent-child interaction as a context and content for curriculum, and peer-mediated learning strategies. Emphasis on efficacy research and the impact of various curricular models.

Prerequisites & Notes: Admission to Graduate School or permission of instructor

Credits: 3

Grade Mode: Letter

SPED 560 - Literacy Instruction for Students With Special Needs

Advanced study of literacy instruction for K-12 students in inclusive classrooms; emphasis on supportive learning environments including computers, adaptive equipment, peer-mediated learning strategies, and accommodation for individual differences; includes theories of literacy acquisition, research-based instructional methods, curriculum and material, related disabilities, and assessment and evaluation.

Prerequisites & Notes: SPED 480, SPED 483; or equivalent; or permission of instructor.

Credits: 4

Grade Mode: Letter

SPED 562 - Learning Problems

Information processing and learning theory as it applies to students with mild disabilities. Discusses assessment and evaluation of cognitive strategies and their application to academic and social skill development.

Prerequisites & Notes: Admission to graduate program or permission of instructor.

Credits: 4

Grade Mode: Letter

SPED 563 - Curriculum and Methods in Special Education

Analysis and application of curricular design, research-based instructional models, and assistive technology with discussions of universal design and legal mandates.

SPECIAL EDUCATION AND EDUCATION LEADERSHIP

Credits: 4

Grade Mode: Letter

SPED 564 - Social Skills

Applied behavior analysis for children with learning and behavioral problems. Emphasis on functional assessment, single-subject research design and the teaching of social skills.

Prerequisites & Notes: Admission to graduate program or permission of instructor

Credits: 4

Grade Mode: Letter

SPED 565 - Communication and Collaboration in Special Education

The collaborating teacher's role in providing special education services to children in integrated settings. Emphasizes instructional and communication skills needed to achieve that role.

Prerequisites & Notes: SPED 468; or equivalent; or permission of instructor

Credits: 4

Grade Mode: Letter

SPED 567 - Advanced Issues in Special Education

Intensive study of legal, intervention and ethical issues in special education. Repeatable to a maximum of 6 credits.

Credits: 2

Grade Mode: Letter

SPED 568 - Curriculum-Based Evaluation and Decision Making

Advanced evaluation and decision-making processes. Focus on curriculum-based procedures, formative evaluation, and educational decision making. Emphasis on generating present levels of educational performance and associated goals and objectives.

Credits: 4

Grade Mode: Letter

SPED 570 - Violent and Aggressive Youth

This course is designed to present information on the problem of violent and/or aggressive youth in school. The class will stress an educative approach by focusing on what educators can do to prevent, respond to and follow up on acts of violence. S/U grading.

Credits: 3

Grade Mode: S/U

SPED 590 - Seminar in Demonstration Teaching and Supervision

Advanced studies in the principles of supervision; utilization of instructional resources and the evaluation and improvement of teaching.

Prerequisites & Notes: ELED 442.

Credits: 3

Grade Mode: Letter

SPED 598 - Residency in Special Education

Full-time residency placement in a special education environment in the public schools. Repeatable to a maximum of 16 cr.

Credits: 4-16

Grade Mode: Letter

SPED 599 - Internship: Exceptional Children

Full-time teaching placement in a special education environment for ME. certification students. Not applicable to graduate plans of study. Repeatable to 24 credits. S/U grading.

Credits: 8-16

Grade Mode: S/U

SPED 690 - Thesis

Research study under the direction of a faculty committee. Repeatable to a maximum of 9 cr. S/U grading.

Prerequisites & Notes: Approval of student's graduate committee and successful completion of the qualifying exam.

Credits: 1-9

Grade Mode: S/U

SPED 691 - Research Seminar

Graduate research under the direction of a program advisor/committee. Repeatable to a maximum of 6 credits. S/U grading.

Prerequisites & Notes: Approval of student's graduate committee and successful completion of the qualifying exam.

Credits: 1-6

Grade Mode: S/U

Teacher Education Outreach Programs

Teacher Education Outreach Programs

Teacher Education Outreach Programs offers professional education programs that lead to recommendation to the Office of the Superintendent of Public Instruction for residency teacher certification in the state of Washington. These programs integrate studies in Elementary Education, Special Education, and across eight additional disciplines, including math, science, health, and physical education.

The course work for undergraduate and post-baccalaureate programs is offered in a prescribed sequence with evening classes, and daytime practicum work. Upon completion of the major (undergraduates), the professional studies core, the endorsement course work and internship, students will receive a teaching certificate with an endorsement in elementary education. Students may choose to complete a second internship to earn an additional endorsement in special education.

The programs, designed to prepare thoughtful, knowledgeable, and effective educators for a diverse society, offer courses and certification sequences at Western Washington University program sites in Bremerton, Everett, and Seattle. Prospective students are encouraged to contact the site office closest to them for information on program offerings that meet their individual needs.

Information

Individuals interested in Teacher Education Outreach Programs can obtain general information from the website, wce.wvu.edu/teop/teacher-education-outreach-programs.

Inquiries should be directed to the site you wish to attend. Bremerton, 360-475-7272; Everett, 425-405-1646; Seattle, 206-934-6052.

Teacher Education Outreach Programs

- BA in Education (Special Education major) leading to a teacher certificate endorsed in Elementary Education
- Post-Baccalaureate teacher certification with Elementary Education endorsement
- Special Education (P-12) additional endorsement (certificated teachers only)
- Elementary Education additional endorsement (certificated teachers only)
- The No Child Left Behind (NCLB) "highly qualified teacher" requirement may impact

eligibility for certain middle school teaching assignments in a core academic subject(s). Students are responsible for consulting with an advisor for further information on NCLB.

Certification

The Washington Administrative Code specifies the requirements for earning a Washington state teacher certificate. State-approved preparation programs and certification requirements align with Washington State K-12 Learning Standards, and require candidates to demonstrate that they have made a positive impact on student learning. First-level residency certification programs are designed around the standards of effective teaching, professional development, and teaching as a profession. Second-level professional certification requirements are designed around the standards of effective teaching, professional development, and professional contributions. State requirements for teacher certification at the time of completion of a student's program will supersede those outlined in this catalog. These changes may affect the time that it takes a student to complete the teacher education program.

Residency Teacher Certification

The first-level residency certificate is awarded to new teachers upon the completion of these general requirements:

- A baccalaureate or higher-level degree from a regionally accredited college or university
- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodology, and an internship
- Evidence of good moral character and personal fitness

Candidates for residency certification must pass a tested content knowledge to earn an endorsement. WWU requires submission of a passing score for each endorsement to be earned, before commencement of the student teaching internship. For current information on test requirements, registration, fees, and test dates and locations, refer to the Content Test Resource website, wce.wvu.edu/cert/content-test-resource-site. Candidates for residency certification must also complete the state of Washington edTeacher Performance Assessment (edTPA) during the student teaching internship.

Application for the residency certificate is made to the Woodring Certification Office, Teacher Education Student Services, Miller Hall 150, phone 360-650-4930, no later than three months prior to the start of the internship. Candidates will be

TEACHER EDUCATION OUTREACH PROGRAMS

contacted by the program site or certification supervisor with required application materials.

The first-issue residency certificate has no defined expiration date. It is valid until the teacher completes 1.5 FTE years of successful teaching experience accumulated over a minimum of two years in a state-approved public, private or state operated education program. A three year residency certificate is then issued by the state. The timeline for earning a second level professional certificate begins with the reissued residency certificate.

Professional Teacher Certification

The second-level professional certificate is awarded to experienced teachers who hold a valid residency certificate and who pass the Washington ProTeach Portfolio assessment or earn national board certification through the National Board of Professional Teaching Standards. For further information on professional certification requirements, contact the Woodring College of Education certification officer at 360-650-4630, Miller Hall 150.

Endorsements

An endorsement identifies the subject matter in which a teacher is prepared and authorized by the state to teach. One qualifying endorsement is required for residency certification. Courses required for a teaching endorsement and the professional education sequence must be completed with a grade of C (2.0) or better. For information on additional endorsement programs offered throughout the University, contact the Woodring College of Education certification officer at 360-650-4630, Miller Hall 150.

Approved Academic Majors

Post-baccalaureate students seeking teacher certification and an endorsement in elementary education through Teacher Education Outreach programs must have completed an approved academic major in anthropology, art, communication, English, environmental studies, foreign language, general science, geography, geology (earth science), history, humanities, elementary education studies, mathematics, music, psychology (human development), social studies, sociology, special education or student/faculty designed major. For further information on the applicability of a particular major, contact any Teacher Education Outreach Programs site.

Program Length

The sequence of study for teacher certification is designed for students who hold a transferable

Associate of Arts degree (DTA) from a Washington State community college, or have satisfied Western's General University Requirements, or have a bachelor's degree with an approved major and are seeking certification. Students begin their program in the fall at all sites and move through their programs as a cohort.

- Students earning a BA in Education attend class for 11 quarters, including the internship, or 12 quarters if earning the Special Education endorsement.
- Post-Baccalaureate students attend classes for 7 quarters, including the internship.

Admission Requirements

All applicants to undergraduate and post-baccalaureate teacher certification programs must be formally admitted to both Western Washington University and the applicable program. Admission occurs once a year in the fall.

The requirements listed below are minimum application criteria. Enrollment restrictions apply to all teacher education programs. Meeting the following requirements makes the applicant eligible for admission consideration but does not guarantee admission. Students who meet all criteria are further evaluated to determine the most qualified applicants. Students will be evaluated on all information provided with the application, including required copies of transcripts from all prior colleges.

Application criteria:

- Transferable associates degree from a Washington State community college or satisfaction of the Western Washington University general education requirements (undergraduate program only).
- Bachelor's degree in an approved academic major (post-baccalaureate program only).
- Cumulative grade point average of 2.75 or higher overall college-level course work or over the last 45 credits.
- Meet the basic skills requirement. This may be met by: a) Taking the West-B exam, b) SAT minimum scores, c) ACT minimum scores. See the Woodring admissions website: wce.wvu.edu/admissions/west-b-requirement and the West-B website: www.west.nesinc.com.
- Completion of an English composition course with a grade of B- (2.7) or higher.
- Three letters of recommendation and a reflective essay.

Advisement and Orientation

Upon acceptance to the Woodring College of Education, each student is assigned an advisor. At all Teacher Education Outreach Program sites, the advisor is the academic program director. Additionally, all accepted students must attend a required orientation. Students may be dropped from their program for failing to attend the orientation.

Program Continuation

Students admitted to the Woodring College of Education must meet specified requirements throughout the course of their teacher education program in order to remain in the program.

Requirements upon Program Admission

- Institutional Application for a Teacher's Certificate and Character and Fitness Supplement, and background checks as described below under Character and Fitness
- Woodring College of Education Professionalism Orientation
- Woodring College of Education Prevention of Sexual Harassment Training
- Woodring College of Education Blood-Borne Pathogens Training

Character and Fitness

The Washington Administrative Code requires applicants for teacher certification to give evidence of "good moral character and personal fitness." Students provide evidence of character and fitness through two separate but related processes:

- An Institutional Application for a Teacher's Certificate and Character and Fitness Supplement, provided to students upon acceptance into the program. The application for certification requires candidates to answer questions regarding professional fitness, criminal history and personal conduct. Students with "yes" responses must contact the certification officer at 360-650-4630 and gain character and fitness clearance before registering for classes
- Washington State Patrol and FBI background checks through a fingerprinting process. Procedures and fee information are provided to students upon acceptance into the program.

No student in a teacher education program may participate in a University-sponsored activity in the public schools until cleared by the Washington State Patrol, or in some cases, investigated and

then cleared by the Washington State Office of Superintendent of Public Instruction. Clearances are valid for specified time frames. Students must maintain character and fitness clearance until they have been recommended for a residency teacher certificate following completion of the teacher education program.

In addition to the Washington state character and fitness requirements noted above, students must abide by the Woodring College of Education conduct policies acknowledged in the Student Conduct Requirements and Agreement, which is submitted with program application materials.

General Retention Requirements

- Students must maintain at least a 2.75 GPA, beginning with the quarter they are notified of admission. This requirement applies even to quarters where no education courses are being taken. Students who fail to meet this standard will receive a letter advising them that they have been dropped from the program.
- Students must earn a grade of C (2.0) or better in both the professional education sequence and in all courses required for the endorsement
- Students must understand and demonstrate a high level of competence in the English language. Those who have difficulty in their verbal and/or written communications should expect to seek remediation before beginning the internship
- Students who interrupt enrollment in a teacher education program for more than two consecutive quarters (summer quarter not included) must meet all program admission, completion and certification requirements in place for the quarter in which they expect to return.

Program Completion

To qualify for program completion and recommendation for state of Washington residency certification, students must complete the following requirements and assessments:

- A baccalaureate or higher-level degree from a regionally accredited college or university
- A state-approved, performance-based teacher preparation program that includes preparation in an endorsable subject area, teaching methodology, and an internship
- Evidence of good moral character and personal fitness
- Minimum scores set by the state of Washington on a state required content

TEACHER EDUCATION OUTREACH PROGRAMS

- knowledge test for the qualifying endorsement area(s)
- Completion of the Washington Pre Service Teacher Performance Assessment
- Successful completion of the student teaching internship as shown by performance on the WWU Intern Development and Evaluation System (IDES) and passing scores on the Teacher Performance Assessment

Other Departmental Information

Internship

An important experience for teacher certification candidates is the student teaching internship. Students spend two quarters taking final classes in the program along with time in their assigned classroom preparing for quarter three when they are full-time teaching under the direct supervision of a certificated teacher in a school setting. This internship involves intensive practice in integrating methods, content area knowledge, and classroom organizational strategies.

Students will be able to work part time during two quarters of the three quarter internship. Candidates are advised not to work during the full-time internship so they may gain maximum benefit from the experience and perform at their highest ability.

The Office of Field Experiences (OFE) is the service agency of the Woodring College of Education that seeks placement for prospective interns. Students apply for their internship around January prior to a fall internship start quarter, or April prior to a winter or spring internship start quarter. Specific dates for informational meetings and application deadlines are published on the OFE Website, wce.wwu.edu/ofe/office-field-experiences.

Before commencement of the internship, passing scores on the state-required content knowledge test for each endorsement must be submitted, all educational endorsement course work and practica must be completed, and fingerprint/character and fitness clearance must be valid. Students who interrupt enrollment for a quarter or more must meet the deadline for filing a returning student application.

OFE does not guarantee placements. Placement in a school is contingent upon:

- Fulfillment of all program requirements (satisfactory academic work, education and endorsement program course work and training, practica, and faculty recommendations)

- Submission of passing scores on the state-required content knowledge test for each endorsement
- Availability of placements and supervision in specific subjects and grade levels
- Acceptance by P-12 school personnel
- Fingerprint/character and fitness clearance through the point of certification

Students are required to interview with the public school teacher to whom they will be assigned, for final approval of placement. OFE will make every effort to arrange up to three initial interviews but does not guarantee an interview.

Any subsequent placement after a voluntary or non-voluntary withdrawal from an internship will be granted only by faculty recommendation following a case conference.

For further information, contact the Woodring College Office of Field Experiences, Student Services, phone 360-650-3310, Miller Hall 150.

University Interdisciplinary Programs

Minor

Sustainability Studies Minor

University Interdisciplinary Programs

24-29 credits

Introduction

Created by the Sustainability Academy and approved by the Sustainability Curriculum Committee, this Sustainability Studies Minor draws across all the colleges at WWU, and is administered by an academic program director and advisers within the student's major. The Minor is appropriate for students who wish to complement their undergraduate curricula and to further gain knowledge about the social, economic, and environmental aspects of sustainability in both their academic and professional growth. The minor is highly cross-disciplinary in an effort to provide a diverse foundation for becoming engaged citizens.

Contact Information

Academic Program Director

Dr. Grace Wang
Arnzten Hall 212
360-650-3278
Grace.Wang@wwu.edu

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

To apply for the minor, applicants must first have completed ENVS 116 (Sustainability Literacy I), declared a major, and present a plan of study to the Academic Program Director (Dr. Grace Wang, Environmental Studies). The proposed plan of study must be approved by both the student's major faculty adviser and the Program Director. Students may apply toward the minor no more than approximately eight credits (or two courses) from their major requirements. A grade of C or higher is required for all courses in the minor, and a GPA of 2.7 is required.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Program Requirements

Literacy Sequence

- ENG 371 - Introduction to Rhetorical Analysis
- ENVS 116 - Sustainability Literacy I
- ENVS 471 - Campus Sustainability Planning Studio

Sustainability Design Literacy

- Choose one from the following:
 - DSGN 111 - Design View
 - DSGN 211 - Foundations of Visual Communication
 - ID 130 - History of Industrial Design

UNIVERSITY INTERDISCIPLINARY PROGRAMS

Sustainability Competencies

Select one course from each of the 3 competencies below:

A. People: Society & Social Justice

A/HI 316 - Land and Landscape
ANTH 490 - Senior Seminar in Anthropology
ENVS 303 - Human Ecology and Sustainability
ENVS 304 - Environment and Resource Policy
ENVS 343 - Urbanization: Processes and Patterns
ENVS 361 - Introduction to Planning
ENVS 370 - History of Planning
ENVS 373 - Transportation Systems and Planning
FAIR 335N - Visioning Sustainable Futures
FAIR 393B - Rights, Liberties and Justice in America
HIST 475 - Topics in American Indian History
PLSC 420 - Environmental Politics
SOC 341 - Sociology of Social Movements
SOC 348 - Global Health
(additional courses under advisement)

B. Planet: Environment and Nature

BIOL 325 - Ecology
BIOL 326 - Ecology Laboratory
ENVS 326 - Climatology
ENVS 327 - The Soil Environment
ESCI 302 - Environmental Pollution
ESCI 310 - Environmental Systems
ESCI 325 - Fundamentals of Ecology
FAIR 330D - Natural History and Environmental Issues of NW Washington
FAIR 330E - Ethnobotany
FAIR 336N - Topics in Science
HIST 354 - Energy in American History
HIST 380 - Food & Environment in America
HIST 450 - Climate and Culture in America
(additional courses under advisement)

C. Prosperity: Economic Values

ECON 343 - Population, Environment, and World Agriculture
ECON 380 - Urban Economics
ECON 383 - Environmental Economics
ECON 384 - Energy Economics
ECON 482 - Advanced Topics in Environmental Economics
ECON 483 - Resource Economics
ECON 493 - Senior Seminar: Economics, the Environment and Natural Resources
MGMT 359 - Greening Business Policy and Practice
MGMT 466 - Greening Business Applications
(additional courses under advisement)

American Cultural Studies

Introduction

American cultural studies allows students to concentrate on the Americanization process, American character, American cultural institutions and/or American cultural values, particularly as these shape our concepts and choices of vocation.

The program in American Cultural Studies is interdisciplinary and serves those students and faculty who are interested in the study of such questions but find that important aspects of cultural institutions, cultural artifacts and cultural values are not fully revealed by the course of study within a single department or college. The program allows students the opportunity to study issues especially arising from the cultural diversity in American society. Whenever possible, the program takes advantage of the rich curricular offerings of the various departments and colleges of the University.

Students who want a liberal arts education of breadth and depth will find that, because of its flexibility, the program adapts well to their needs. It offers suitable undergraduate background for advanced study in law, domestic social services, public service, government service or education, and for graduate work in American studies, ethnic studies and the social sciences. It also offers unique ways to combine the study of the humanities and social sciences.

For further information and advisement about the program contact the director of the program, Dr. Lawrence J. Estrada, Fairhaven College 330.

Faculty

LARRY J. ESTRADA, Fairhaven College. Director, American Cultural Studies program. Race and ethnicity in America; Chicana-Hispano studies; urban multicultural education; U.S.-Mexican relations/Caribbean Studies.

JEANNE ARMSTRONG, Wilson Library. Research strategies, gender studies, postcolonial theory and comparative cultural and literary studies.

JOANNE DEMARK, Student Life. Leadership; social justice; queer studies.

RAINE DOZIER (2008) Assistant Professor. BA, State University of New York; MA, PhD, University of Washington.

JOHN FEODOROV, Fairhaven College. New genre art, Native American Art, Art and Society

MARIA TIMMONS FLORES (2008) Assistant Professor. MED, Western Washington University; PhD, University of Colorado Boulder.

KRISTEN FRENCH, Woodring College of Education. Educational pluralism.

CHRIS FRIDAY, History. Asian American and Native American studies; immigration, labor, Pacific Northwest and U.S. West studies.

CAROL GUESS, English. Fiction, creative nonfiction, poetry writing, queer studies.

KAREN J. HOELSCHER (1992) Professor. BS, Bemidji State University; MS, Mankato State University; EdD, Harvard University.

STEVE HOFFMAN, American Cultural Studies. American Judaism and Jewish religious practices.

VERNON JOHNSON, Political Science. Culture and politics of African societies; African American studies; the civil rights movement in America.

ROSANNE KANHAI-BRUNTON, English. Feminist literary theory; postcolonial literatures; African American literature; imaginative literature by women of color.

KEVIN LEONARD, History. History of Latino and African Americans in the United States.

JAMES LOUCKY, Anthropology. Immigration policy, Native American cultures, Latin and Latin American cultures, United States-Mexico border policy.

BILL LYNE, English. African American literature, cultural studies, cultural theory.

MARY JANELL METZGER, English. Critical Theory; women's literature; Shakespeare and his contemporaries and English studies methodologies.

KATE MILLER, Women Studies. Women studies, comparative racial and ethnic studies, multiracial identity, GLBT studies.

DAVE OREIRO, Northwest Indian College. American Indian experience; contemporary American Indian issues; American Indian higher education

TARA PERRY, Communication. Communication cultural/critical studies; students with disabilities in higher education; service learning; issues of diversity in teaching and learning.

JOHN PURDY, English. Native American literature; ethnic perspectives on literary theory.

MARSHA RIDDLE-BULY, Woodring College of Education. Literacy and historically marginalized students; English as a Second Language; bilingual education.

LYSA RIVERA, English. Chicano and Chicana Literatures and African American Literatures.

DAN FIRST SCOUT ROWE, Fairhaven College. American Indian studies, veterans studies.

RAE LYNN SCHWARTZ-DUPRE, Communication. Communication cultural/ critical studies; rhetorical theory and criticism; visual rhetoric; feminist postcolonial theory and criticism.

TANIS S'EILTIN, Fairhaven. Art and creativity; American Indian art forms; American Indian issues.

TAMARA SPIRA (2014) Assistant Professor. Queer Studies.

MART STEWART, History. African American history; cultural history of science and the environment.

MIDORI TAKAGI, Fairhaven. United States

AMERICAN CULTURAL STUDIES

History; African American History; comparative racial and ethnic studies.

NING YU, English. Asian American literature;

Asian mythology; 19th century American literature and science.

Bachelor of Arts

American Cultural Studies, BA

American Cultural Studies Program, University Interdisciplinary Programs

70 Credits

Introduction

American Cultural Studies allows students and faculty to address issues such as race/ethnicity, educational equity, social and cultural theory, socio-economic class, as well as gender and sexual orientation while analyzing the formation of identities in societies. The program in American Cultural Studies concentrates on the Americanization process, American character, American cultural institutions and/or cultural values, particularly as these shape our concepts and society. ACS serves those students and faculty who are interested in the study of such questions, but find that important aspects of cultural theory, artifacts and values are not fully revealed by the course of study within a single department or college. The program allows students the opportunity to study issues arising specifically from the cultural diversity in American society. Whenever possible, the program takes advantages of the rich curricular offerings of the various departments and colleges within the university.

Why Consider an American Cultural Studies Major?

Students who want a liberal arts education of breadth and depth will find that, because of its flexibility, the program adapts well to their needs. The ACS major combines the social sciences with humanities to prepare students with a rich undergraduate background for advanced study in law, domestic social services, public service, government service, education, and graduate work in American studies, ethnic studies and the social sciences.

Sample Careers

Attorney | Public Administration | Higher Education | Social Worker | Marketing Specialist | Firefighter | Teaching English as a Second Language | Consumer Advisor | Community Relations Director | Human Resource Coordinator | Police Officer | Non-Profit Agency Administrator | Public School Teacher

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

A formal program of study is initially designed by the student in consultation with a member of the American Cultural Studies faculty. The program is then approved by the Director of American Cultural Studies. No program of study may substantially duplicate an existing departmental or college program. Ordinarily, final approval of the course of study must be granted before senior status is reached.

The student may propose a broad, general program in American Cultural Studies, social science or education concentrations, or focus on one major aspect, for example: ethnic studies, sexuality, myth and folklore or Pacific Northwest studies. In any case, the proposed program must include substantial upper-division work in at least two curricular units of the University. These may include Fairhaven or Huxley colleges.

The faculty recommends that students use a minor to develop special career interests or foci (see, for example, the Asian American Studies minor), or to develop additional depth in one of the traditional academic disciplines or programs of the University.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Core Courses: 46-50 credits

- One course from:
 - AMST 301 - Comparative Cultural Studies
 - FAIR 366E - Comparative Cultural Studies
- One course from:
 - AMST 499 - Research and Writing
 - LIBR 499 - Special Problems
- Choose a total of three courses from the following options:
 - AMST 206 - The Jewish-American Experience
 - AMST 242 - The Lesbian, Gay, Bisexual, Transgendered Experience
- One course from:
 - AMST 202 - The American Indian Experience
 - FAIR 263B - The American Indian Experience
- One course from:
 - AMST 203 - The Hispano/a-American Experience
 - FAIR 218C - The Hispano/A-American Experience
- One course from:
 - AMST 204 - The African-American Experience
 - FAIR 219D - The African-American Experience
- One course from:
 - AMST 205 - The Asian-American Experience
 - FAIR 215F - The Asian-American Experience
- Two courses from the social sciences, selected under advisement from:
 - AMST 314 - Contemporary Latino/A Issues
 - AMST 316 - Contemporary African American Issues
 - ENVS 204 - Human Geography
 - FAIR 212E - Coast to Coast on a Piece of Toast: Hoboism and the Great Depression
 - FAIR 374B - The Cultural Creation of Identity
 - PLSC 101 - Government and Politics in the Modern World
 - PLSC 250 - The American Political System

- DNC 232 - Movement and Culture
- FAIR 451X - Resistance Art of the Indigena
- MUS 202 - Jazz: Genesis and Evolution
- MUS 205 - Survey of World Musical Cultures

Other Requirements

Individualized Program of Study 20-24 credits (selected under advisement)

A formal program of study is initially designed by the student in consultation with a member of the American Cultural Studies faculty. The program is then approved by the Director of American Cultural Studies. No program of study may substantially duplicate an existing departmental or college program. Ordinarily, final approval of the course of study must be granted before senior status is reached.

The student may propose a broad, general program in American Cultural Studies, social science or education concentrations, or focus on one major aspect, for example: ethnic studies, sexuality, myth and folklore or Pacific Northwest studies. In any case, the proposed program must include substantial upper-division work in at least two curricular units of the University. These may include Fairhaven or Huxley colleges.

The faculty recommends that students use a minor to develop special career interests or foci (see, for example, the Asian American Studies minor), or to develop additional depth in one of the traditional academic disciplines or programs of the University.

Minor

African American Studies Minor

American Cultural Studies Program, University Interdisciplinary Programs

22-28 credits

Introduction

The program in African American studies provides students with an interdisciplinary approach to the history, culture, and politics of peoples of African descent. In addition, this program offers a closer examination of Black leaders, activists, feminists, writers, artists, and scholars and their contributions to the development of the United States.

Courses range from in-depth studies on specific African American topics to classes on comparative political and cultural issues that give context to the Black experience in America. This minor program can be combined with many major designations.

For more information, contact Dr. Bill Lyne, coordinator of the African American Studies minor concentration or Dr. Lawrence J. Estrada, Director of American Cultural Studies.

Why Consider an African American Studies Minor?

The African American Studies Minor is for students wanting an interdisciplinary approach to the history, culture and politics of peoples of African descent. In addition, this program offers a closer examination of Black leaders, activists, feminists, writers, artists and scholars and their contributions to the development of the United States.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingmajor.shtml

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Core Courses: 12 credits

☐ One course from:

AMST 301 - Comparative Cultural Studies
FAIR 366E - Comparative Cultural Studies

☐ One course from:

AMST 204 - The African-American Experience
FAIR 219D - The African-American Experience

☐ AMST 316 - Contemporary African American Issues

Elective courses: Choose from the following lists any number of courses totaling 10 or more credits; as some of these courses do not focus entirely or prominently on African American culture and issues, students must consult with the minor coordinator to receive approval **and** devote their major paper or quarter project to an aspect of African American studies within the discipline of the course. Under advisement of the African American studies minor coordinator, students can choose a course or frame an ISP course that is not contained within the electives listing.

☐ Preferred Electives:

ENG 234 - African-American Literature
HIST 263 - African Americans Since 1865
PLSC 347 - Race, Politics and Public Policy

☐ Additional Elective Options:

ENG 310 - Seminar in Literature & Culture: The Long 19th Century *under advisement only
ENG 311 - Seminar in Literature & Culture: The 20-21st Century *under advisement only
ENG 335 - Literary and Creative Expressions Across Asia, Africa, the Middle East, and Latin America

*under advisement only

FAIR 213D - Slave Narratives and Other Testimonies of the Old South
FAIR 216B - Testimonies of the New South
FAIR 261E - Race In/To the Movies I: Race Relations on Film 1900-1950
FAIR 361E - Race In/To the Movies II: Race Relations on Film: 1950-1980
HIST 286 - African History, 1800-present
LBRL 276 - Humanities of Africa
MUS 202 - Jazz: Genesis and Evolution
SOC 269 - Race and Ethnic Relations
SOC 369 - Sociology of Race and Ethnicity

American Indian Studies Minor

American Cultural Studies Program, University Interdisciplinary Programs

26 credits

Introduction

The minor in American Indian studies is designed to provide students with in-depth study of the cultures and traditions, histories, and arts of indigenous peoples of the Western Hemisphere. The minor is recommended for students who plan to collaborate with American Indians in research, educational, environmental, creative, and political projects. The concentration is interdisciplinary and allows students to combine it with many major designations.

For more information, contact Tanis S'eiltin, coordinator of the American Indian Studies minor concentration, or Dr. Lawrence J. Estrada, director of the American Cultural Studies program.

Why Consider an American Indian Studies Minor?

Asian American Studies Minor

American Cultural Studies Program, University Interdisciplinary Programs

27 credits

Introduction

The program in Asian American Studies provides for a coherent, integrated and concentrated investigation of peoples of Asian heritage in North America. It also examines separate experiences of Asian Americans and their positions as ethnic minorities in American society and politics. This is accomplished through concentration on Asian American history and its place in North America, situating the literatures and other cultural publications of Asian Americans in a broad context, and engaging contemporary issues with appropriate analytical tools.

AMERICAN CULTURAL STUDIES

For more information contact Dr. Midori Takagi, coordinator of the Asian American Studies minor concentration, or Dr. Lawrence J. Estrada, Director of American Cultural Studies.

Raza Latina Studies Minor

American Cultural Studies Program, University Interdisciplinary Programs

25-27 credits

Introduction

The program for Raza Latina Studies is designed to educate students about Chicano/Latino cultures and community. It will provide in-depth study of the history, culture, traditions, politics and experiences. This program is recommended for students interested in working with/learning about the Chicano/Latino community. The minor requires 23-27 credits, of which 16 will be required and the remainder, elective. It is recommended that the electives come from the social science, history, literature and language offerings below, though other courses may be chosen under advisement of the Raza Latina Studies minor coordinator. Students also have the option of framing an Independent Study Project with the approval of the minor coordinator.

For more information, contact Dr. Lysa Rivera, coordinator of the Raza Latina Studies minor, or Dr. Lawrence Estrada, Director of American Cultural Studies

Why Consider a Raza Latina Studies Minor?

The Raza Latina Studies Minor is for students interested in working with/learning about the growing Chicano/Latino community in the U.S. It provides an in-depth study of the history, culture, traditions, politics, diaspora and experiences of diverse peoples.

American Cultural Studies Courses

AMST 202 - The American Indian Experience

The social and cultural evolution of the first peoples of the Americas. Focus on such aspects as education, self-determination, health issues and urbanization as they impact native indigenous populations. Also listed as FAIR 263B on an S/U grading basis.

Credits: 4

Grade Mode: Letter

GUR Attributes: BCGM

AMST 203 - The Hispano/a-American Experience

The development of the Hispano/a-American community, with emphasis on its history, its social and political institutions, and the effects of education, continuing immigration and economic stratification. Also offered as FAIR 218C.

Credits: 4

Grade Mode: Letter

GUR Attributes: BCGM

AMST 204 - The African-American Experience

An overview of African-American history from an interdisciplinary perspective. Emphasis is on the struggle for social and political equality in a developing capitalist economy. The contemporary

social, economic and political life of African Americans also will be examined. Also offered as FAIR 219D.

Credits: 4
Grade Mode: Letter
GUR Attributes: BCGM

AMST 205 - The Asian-American Experience

The history of Asians in the United States, the development of communities and the effects of the encounter between Asian cultures and the developing American cultural context. Also offered as FAIR 215F.

Credits: 4
Grade Mode: Letter
GUR Attributes: BCGM

AMST 206 - The Jewish-American Experience

An overview of the Jewish experience in America, past and present Jewish American marginalization, encounters with anti-Semitism and impact on the national scene. Study of Jewish Americans as a secular community, a community of faith, and an American minority ethnic group.

Credits: 4
Grade Mode: Letter
GUR Attributes: BCGM

AMST 242 - The Lesbian, Gay, Bisexual, Transgendered Experience

The development of the lesbian, gay, bisexual transgendered community in the United States, with emphasis on identity formation, historical and sociological influences and the effects of encounters between gay cultures and the larger American cultural context.

Credits: 4
Grade Mode: Letter
GUR Attributes: BCGM

AMST 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

AMST 301 - Comparative Cultural Studies

The interaction of immigrant and indigenous cultures with the developing American cultural patterns. Emphasis upon models and concepts of interaction, especially related to African Americans, Native Americans, Asian Americans and Latinos. Also offered as FAIR 366E.

Prerequisites & Notes: Introductory-level course: HIST, SOC, ANTH or equivalent;
Credits: 4
Grade Mode: Letter
GUR Attributes: BCGM

AMST 314 - Contemporary Latino/A Issues

The course will familiarize students with theoretical approaches, empirical research, and policy issues relating to the social and historical conditions of Latino/as. By examining the conditions of adaptation, and particularly the implications of exclusion or inclusion, the course critically assesses the close ties that Latino/as have with the multiple dimensions of immigration and borders of many kinds.

Prerequisites & Notes: AMST 203 or FAIR 218C or AMST 301 or FAIR 366E.
Credits: 4
Grade Mode: Letter

AMST 315 - Contemporary American Indian Issues

A historical and cultural overview of issues in Indian/White relations. Emphasis on issues of sovereignty, land claims, water rights, treaty rights, education, women, economic development, religious freedom, and cultural appropriation. Also offered as FAIR 399B.

Prerequisites & Notes: AMST 202 or FAIR 263B or HIST 275.
Credits: 4
Grade Mode: Letter

AMST 316 - Contemporary African American Issues

This course is an interdisciplinary examination of contemporary African American issues from the 1970s to the present. The focus will be on the various social, political, and economic issues that affect the African American community including education, economic development, affirmative action, reparations, interracial relations, criminal justice, racial discrimination, and political empowerment among others.

Prerequisites & Notes: AMST 204 or FAIR 219D or AMST 301 or FAIR 366E.
Credits: 4
Grade Mode: Letter

AMERICAN CULTURAL STUDIES

AMST 317 - Contemporary Queer Issues

This course will examine historical and contemporary formations of queerness(es) in relationship to institutions, histories and global technologies of power. These include racialization, colonization, the law, the state, markets, imperialism and the production of knowledge defining "queerness" itself. Through a varied, interdisciplinary archive that includes theory, poetry, fiction, film and activist writings, students will be asked to explore how categories of queerness and sexuality more broadly relate to questions of power, desire and justice in the construction of our social worlds.

Prerequisites & Notes: AMST 242; and AMST 301 or FAIR 366E; or instructor permission.
Credits: 4
Grade Mode: Letter

AMST 344 - Asian-American Psychology

This course examines the current psychological research on Asian-American individuals and the community, with an emphasis on social psychological research. Topics will include the model minority myth, stereotypes of unassimilation, multicultural identities, perceived exemplary family values, and stigma and mental health. Also offered as FAIR 344P

Prerequisites & Notes: AMST 205 or FAIR 215F or PSY 101.
Credits: 4
Grade Mode: Letter
GUR Attributes: BCGM

AMST 362 - Asian-American History

Contributions Asian Americans have made to the development of the United States, with emphasis on immigration, adaptation, settlement and their struggle for justice and equality. Also taught as HIST 362.

Prerequisites & Notes: Junior standing.
Credits: 5
Grade Mode: Letter
GUR Attributes: BCGM

AMST 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

AMST 412 - Seminar in Educational Equity

This course has been designed to develop a critical understanding of current issues of educational equity and social justice within the U.S. context. Through research based discussions and participation in symposia, workshops, seminars, and film viewings students will engage and grapple with their own development of critical consciousness and the implications for educators. Also offered as EDUC 412.

Prerequisites & Notes: Junior standing or permission of instructor. Preference to students in the Education and Social Justice Minor.
Credits: 4
Grade Mode: Letter

AMST 413 - Bridging Barriers with Migrant Youth

Course explores the barriers migrant students face in graduating from high school and going on to higher education. Course combines theoretical study with a service learning experience focused on supporting migrant youth to overcome the educational challenges they face. All students will take leadership roles in planning, implementing, and evaluating the effectiveness of the Migrant Youth Leadership Conference and outreach efforts with Migrant partner programs. Repeatable up to a maximum of 8 credits, including original course. Also offered as EDUC 413.

Prerequisites & Notes: Admission to Minor in Education for Social Justice, or permission of instructor.
Credits: 4
Grade Mode: Letter

AMST 451 - The 'Primitive' in Modern Art

This class will provide students with an alternative understanding of art and art history beginning in the modern era late in the nineteenth century and continuing forward to the 21st century. The study of Primitivism will work to introduce students to early Western concepts of race, art and identity. The investigation of methods with which Indigenous artists and scholars challenge these notions will provide a new lens for understanding the history of colonization, the politics of representation, and various definitions of race and art. Also offered as FAIR 451Y.

Prerequisites & Notes: FAIR 202A or AMST 301 or instructor permission.
Credits: 4
Grade Mode: Letter

AMST 464 - Multicultural Education for Teachers

Preparation for teaching in a multicultural society. Participants will learn how to design a curriculum that reflects diversity and an instructional methodology that promotes the learning of diverse students. Also offered as ELED 464.

Credits: 4

Grade Mode: Letter

AMST 499 - Research and Writing

Designed to introduce students to primary and secondary sources associated with American cultural studies. Assignments include one major research/writing project and several smaller ones. Also taught as LIBR 499.

Prerequisites & Notes: AMST 301 or FAIR 366E; senior status or instructor approval.

Credits: 4

Grade Mode: Letter

Canadian-American Studies

Introduction

The Canadian-American Studies major and minor are designed to expand knowledge of Canada and understanding of Canadian-American issues and problems.

The Canadian-American studies curriculum prepares students for positions in education, businesses, government, communications and international organizations in the U.S., Canada and other areas of the world. Canadian-American Studies combines well with other majors and minors to add depth and international expertise. Examples include combining Canadian-American Studies with: environmental science and policy, international business, geography, anthropology, political science, marketing, communications, history and foreign languages.

Opportunities for study in Alberta, British Columbia, Ontario, and Québec are available.

For program advisement, contact Chuck Hart, program manager, phone 360-650-3728, fax 360-650-3995, e-mail: Chuck.Hart@wwu.edu.

Participating Canadian-American Studies Faculty

DAVID ROSSITER, Director, Center for Canadian-American Studies. Environmental Studies. Canadian geography, environmental history and natural resource management.

AMIR ABEDI, Political Science. Comparative politics, European politics.

TROY ABEL, Environmental Studies. Environmental policy and resolutions.

DONALD ALPER, Professor Emeritus, Political Science. Canadian politics/government.

BIDISHA BISWAS, Political Science. Security and counterterrorism.

DANIEL BOXBERGER, Anthropology. First Nations, Native Peoples and natural resources.

PATRICK BUCKLEY, Geography. Transborder economic modeling and GIS.

SARAH CAMPBELL, Anthropology. Pre-history of

the Northwest coast.

SARAH CLARK-LANGAGER, Western Gallery Director.

STEVEN GLOBERMAN, Kaiser Professor of International Business and Director of the Center for International Business. Canadian economy.

LEE GULYAS, English. Canadian Literature.

VICKI HAMBLIN, French. French literature.

CÉCILE HANANIA, French. Twentieth century French literature and literary theory and Québec culture.

CAROL JANSON, Art. Art history.

T.H. KAMENA, Political Science. Canadian politics/government.

CHRISTINA KEPPIE, French. Acadian culture.

KEVIN LEONARD, History. Pacific Northwest history.

ROBERT LOPRESTI, Wilson Library. Canadian government information.

JAMES LOUCKY, Anthropology. North American borderlands.

JEAN MELIOUS, Environmental Studies. Canadian environmental policy and law.

ROBERT MONAHAN, Professor Emeritus, Geography. Canadian geography.

EDWARD OUSSELIN, French. French cultural studies and film studies.

NANCY PAGH, English. Canadian literature.

THOMAS ROEHL, Management. International business and management.

CHRISTOPHER SANDS, Management. Ross Distinguished Professorship of Canada/U.S. Business and Economic Relations.

SARA SINGLETON, Political Science. Public policy and environmental politics.

Named Professorships

Ross Distinguished Professorship of Canada/U.S. Business and Economic Relations (position is in the College of Business and Economics).

Study Abroad

The Center for Canadian-American Studies encourages students to spend one or more quarters in a study abroad program in Canada. We offer a number of exchange opportunities with universities across Canada. For more information, please contact Chuck Hart, program manager, phone 360-650-3728 or send e-mail to Chuck.Hart@wwu.edu.

Bachelor of Arts

Canadian-American Studies, BA

Canadian-American Studies Program, University Interdisciplinary Programs

50 credits

Introduction

Canada and the United States are the two most interdependent countries in the world. Virtually all the Fortune 500 companies do business with Canada, as do all large government agencies. Additionally, as the two countries share a continent and its ecosystems, most U.S. environmental organizations have a Canadian presence and interests. The Canadian-American Studies major provides a comprehensive and accessible international experience focusing on Canada and Canada-US relations.

Students pursue areas of study such as Canada-US environmental policy, political and security ties between Canada and the United States, and economic relations between the two nations. The study of the Canada-US relationship also provides a lens through which critical issues facing the global community are examined.

Why Consider a Canadian-American Studies Major?

The interdisciplinary program encourages students to problem solve and think of big-picture solutions to international issues. Students gain a unique understanding of different intellectual traditions and how to bridge gaps in understanding. This training prepares graduates to take leadership roles in diverse settings that require critical thinking and societal problem solving.

Recent Western graduates have found fulfilling careers working for the Canadian Department of Foreign Affairs and International Trade, directing internet marketing for a Canada-US import/export firm, serving as a US federal government liaison to a municipality for emergency preparedness, working for Google in their map division and coordinating border and emergency management programs for the cross-border Pacific Northwest Economic Region.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admissions and Declaration Process):

To declare the major, contact the Center for Canadian-American Studies undergraduate advisor, Chuck Hart.

Advising Tips: A formal program of study is initially designed by the student in consultation with the Canadian-American Studies Department undergraduate advisor, Chuck Hart.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

Track 1 - Canadian-American studies with French language

- C/AM 200 - Introduction to Canadian Studies
- C/AM 401 - Research Problem Identification and Development
- C/AM 402 - Research Analysis and Writing
- Five upper-division ENG credits under advisement
- FREN 201 - Intermediate French
- FREN 202 - Intermediate French

CANADIAN-AMERICAN STUDIES

- FREN 203 - Intermediate French (or equivalent)
- HIST 277 - Canada: A Historical Survey
- PLSC 406 - Canadian Government and Politics
- One course from:
 - ENVS 331 - Canada: Society and Environment
 - ENVS 430 - Borderlands: Resource Management
- Select additional credits from the following to complete the major:
 - ANTH 361 - Native Peoples of North America
 - ANTH 411 - Archaeology of Northwestern North America
 - ANTH 462 - Native Peoples of the Northwest
 - ANTH 476 - Borderlands
 - A/HI 490 - Seminar: Exhibition Theory and Practice
 - C/AM 400 - Directed Independent Study
 - C/AM 410 - Study Canada Summer Institute
 - ECON 364 - Topics in Canadian Economic History
 - ECON 365 - The Canadian Economy
 - ENVS 452 - International Environmental Policy
 - FREN 332 - Civilisation et Culture du Canada Francophone
 - FREN 401 - Elements De Stylistique
 - HIST 376 - French Colonial Canada: 1534-1763
 - HIST 499 - Historical Research (under advisement)
 - JOUR 460 - Special Reporting Project
 - PLSC 301 - The British Parliamentary System
 - SOC 390 - Globalization and Families

Track 2 (50 credits) - Canadian-American studies with area of concentration

- C/AM 200 - Introduction to Canadian Studies
- C/AM 401 - Research Problem Identification and Development
- C/AM 402 - Research Analysis and Writing
- Five upper-division ENG credits under advisement
- HIST 277 - Canada: A Historical Survey
- PLSC 406 - Canadian Government and Politics
- One course from:
 - ENVS 331 - Canada: Society and Environment
 - ENVS 430 - Borderlands: Resource Management
- Plus 2 upper-division courses in an area of specialization (in consultation with Canadian-American)
- Select additional credits from the following to complete the major:
 - ANTH 361 - Native Peoples of North America
 - ANTH 411 - Archaeology of Northwestern North America
 - ANTH 462 - Native Peoples of the Northwest
 - ANTH 476 - Borderlands
 - A/HI 490 - Seminar: Exhibition Theory and Practice
 - C/AM 400 - Directed Independent Study
 - C/AM 410 - Study Canada Summer Institute
 - ECON 364 - Topics in Canadian Economic History
 - ECON 365 - The Canadian Economy
 - ENVS 452 - International Environmental Policy
 - FREN 101 - Elementary French
 - FREN 102 - Elementary French
 - FREN 103 - Elementary French
 - FREN 201 - Intermediate French
 - FREN 202 - Intermediate French
 - FREN 203 - Intermediate French
 - FREN 332 - Civilisation et Culture du Canada Francophone
 - FREN 401 - Elements De Stylistique
 - HIST 376 - French Colonial Canada: 1534-1763
 - HIST 499 - Historical Research
 - JOUR 460 - Special Reporting Project
 - PLSC 301 - The British Parliamentary System

SOC 390 - Globalization and Families

Minor

Canadian-American Studies Minor

Canadian-American Studies Program, University Interdisciplinary Programs

30 credits

Introduction

Canada and the United States are the two most interdependent countries in the world. Virtually all the Fortune 500 companies do business with Canada, as do all large government agencies. Additionally, as the two countries share a continent and its ecosystems, most U.S. environmental organizations have a Canadian presence and interests. The Canadian-American Studies minor provides an overview of Canada and Canada-U.S. relations that will add depth to students' major programs.

Why Consider a Canadian-American Studies Minor?

The Canadian-American Studies minor combines well with other majors and minors to add depth and international expertise. Examples include combining Canadian-American Studies with: environmental science and policy, international business, geography, anthropology, political science, marketing, communications, history and foreign languages.

Canadian/American Studies Courses

C/AM 200 - Introduction to Canadian Studies

A basic interdisciplinary course of studies covering the major physical, historical and sociopolitical aspects of Canada.

Credits: 5

Grade Mode: Letter

GUR Attributes: SSC

C/AM 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

C/AM 325 - Quebec Politics and Quebec-US Relations

This course offers an introduction to Québec politics and Québec-U.S. Relations. Part I uses a historical-institutionalist approach to present the main conceptual and theoretical elements on

Québec politics and offers an overview of recent evolution in Québec's political life. Part II discusses three crucial themes in contemporary Québec politics: the evolution of Québec's identity; the future of Québec's independence movement; and the road ahead for Québec's international relations. Part III shows how Québec and the United States are integrated and offers an overview of the actors and issues in Québec-U.S. relations. Also offered as PLSC 325.

Prerequisites & Notes: C/AM 200 or PLSC 101 or permission of instructor.

Credits: 4

Grade Mode: Letter

C/AM 331 - Canada: Society and the Environment

This course explores relationships between people and the environment in the territory that has come to be known as Canada; emphasis is placed upon the history of such relationships. Topics include: physical geography, Aboriginal geographies, Native-Newcomer interactions, evolving and contested political boundaries, resource use and ecological crisis, and urban development. Also offered as ENVS 331.

Prerequisites & Notes: ENVS 203 or ENVS 204 or ENVS 240 or HIST 277 or C/AM 200 or instructor permission.

Credits: 3

Grade Mode: Letter

C/AM 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

C/AM 401 - Research Problem Identification and Development

Directed research on a problem or in an area of interest.

Prerequisites & Notes: C/AM 200, 15 credits of core courses.

Credits: 3

Grade Mode: Letter

C/AM 402 - Research Analysis and Writing

Analysis and writing on the research findings in C/AM 401. A writing proficiency course.

Prerequisites & Notes: C/AM 401

Credits: 3

Grade Mode: Letter

C/AM 410 - Study Canada Summer Institute

Intensive survey course featuring expert instruction from WWU faculty and distinguished speakers from Canada and the US. Topics include: Canadian history, geography, government, culture, free trade and environmental issues, First Nations and Canada-US relations. Participants are introduced to a variety of curriculum materials, visit Canada, experience its culture, and develop a curriculum project that meets national standards and expands their personal teaching portfolios. Repeatable to a maximum of 9 credits.

Credits: 3

Grade Mode: Letter

C/AM 430 - Borderlands: Resource Management

Geographic investigation of cross-border resource management and other issues associated with the growing importance of the United States cross-border regions, especially our northern border with Canada; selected trans-border environmental, resource management, sustainability, economic, and urban topics. Also offered as ENVS 430.

Prerequisites & Notes: One from: C/AM 200, ENVS 304, ENVS 330, ENVS 331, ENVS 332, ENVS

341, ENVS 342, ENVS 343, ENVS 350, ESCI 330 or Huxley senior status or instructor permission.

Credits: 4

Grade Mode: Letter

C/AM 441 - Society, Space, and Natural Resources

This course explores natural resource valuation and management across a variety of political, economic, and cultural spaces in North America; Emphasis is placed on the interaction of social and natural processes in producing management regimes. Also offered as ENVS 441.

Prerequisites & Notes: One of: C/AM 331, ENVS 308, ENVS 330, ENVS 331, ENVS 341, ENVS 342, ENVS 343 or instructor permission.

Credits: 4

Grade Mode: Letter

C/AM 442 - Colonial Landscapes in the Pacific Northwest

This course provides description and analysis of the impact of European imperialism on the development of Pacific Northwest landscapes; the focus is on Indigenous, British, American, and Canadian geographical actions and territorial claims. Also offered as ENVS 444.

Prerequisites & Notes: One of: C/AM 331, ENVS 308, ENVS 330, ENVS 331, ENVS 332, HIST 391 or instructor permission.

Credits: 4

Grade Mode: Letter

C/AM 444 - Canadian Studies Internship

Work as research and/or management assistant with a local, state or federal government body or private organization. No more than 10 credits in internship may be counted towards the major without permission of the chair. Repeatable up to 15 credits, including original course.

Prerequisites & Notes: Completion of 3 of six core classes: C/AM 200; HIST 277; ENVS 331 or ENVS 430; ENG 415 or PLSC 406.

Credits: 3-10

Grade Mode: Letter

C/AM 489 - Managing An International Ecosystem

A research seminar that examines how economic, environmental, social and political agendas affect the shared international ecosystem - Georgia Basin/Puget Sound. Course focuses on the interests of various stakeholders and the efforts taken to manage the cross-border environmental issues. The course involves cross-border travel and

CANADIAN-AMERICAN STUDIES

field work and thus participants require a passport. In some years, the course will involve collaborations with students and faculty from Canadian Universities. Also offered as ESTU 489 and PLSC 489.

Prerequisites & Notes: Junior Status or Permission of Instructor.

Credits: 5

Grade Mode: Letter

Energy Studies

Introduction

Dr. Joel N. Swisher, PE, Director

The Institute for Energy Studies at Western Washington University (WWU) is a unique, multi-college collaboration. Our programs are designed to meet growing demand, from students and Washington's clean energy economy, for interdisciplinary education related to the science, technology, policy and business aspects of human production and use of energy.

Energy technology and policy is always at the nexus of our most daunting economic, environmental and security problems, where solutions require a fundamental understanding and system-level thinking. While energy use drives these problems, understanding the technology and economics of energy use enables powerful solutions in new technologies and policies to improve energy efficiency throughout the economy, reducing costs and emissions.

On the supply side, the electricity industry is evolving from a static, centralized structure toward dynamic, distributed models that meet the challenges of integrating and balancing resources as diverse as solar, wind, hydro, bio- and fossil-fuel energy with smart grids, smart buildings and plug-in vehicles. Technologies to make fossil fuels cleaner and substitute biofuels are in development. Our graduates will find opportunities to develop innovative ideas, from advanced technology to new business models, that transform the energy system toward a more sustainable path.

The energy programs at WWU are designed to be interdisciplinary in a way that provides both breadth and depth, with a practical toolkit of technical and analytic tools in a context of system-level thinking and understanding. We offer a BA in Energy Policy and Management, minors in Energy Science and Energy Policy, and an energy concentration in the Electrical Engineering, BS. As we develop new programs to complete the energy curriculum, students also have an option to design independent programs to suit their interests and abilities, in consultation with faculty and advising staff.

We expect that students will acquire the appropriate foundation in math and science underlying energy processes and systems, in a context of environmental science and greenhouse gas management. They will also learn applied energy economics and have the opportunity to build management or entrepreneurial skills and analytic tools in the key fields of electric power,

energy efficiency and building science. We take a practical approach, using the campus and community as our laboratory and collaborating with leading utilities and energy firms in the region.

Graduates will acquire a strong blend of analytical and communication skills, along with energy-related expertise that energy experts have identified as essential to the workforce needs in Washington's growing clean energy economy. At the same time, the program will integrate core strengths of WWU, including collaboration, practical innovation, community engagement, a global perspective and a sustainability focus, while advancing energy literacy at all levels of instruction.

Mission

The Institute for Energy Studies integrates rigorous educational programs, applied research and community service to meet the growing demand for interdisciplinary education and training related to the science, technology, policy and business aspects of human production and use of energy.

Vision

The Institute for Energy Studies is a regional and national leader in providing practical and innovative education of future energy experts and decision makers.

Faculty

CHARLES BARNHART (2014) Assistant Professor. BS (physics and astronomy), University of Washington-Seattle; PhD (planetary geophysics), University of California-Santa Cruz.

ANDREW BUNN (2006) Professor and Founding Director, Institute for Energy Studies. BS (zoology) The Evergreen State College; MEM (resource ecology) Duke University; PhD (environmental science), Montana State University-Bozeman.

MARK BUSSELL (1990) Director and Professor. BA, Reed College; PhD, University of California-Berkeley.

REID DORSEY-PALMATEER (2015) Assistant Professor. BA (Economics), Pomona College; MA, PhD (Economics), University of Michigan.

DANIEL HAGEN (1988) Professor. BA, MA, PhD, University of California-Berkeley.

STEVE HOLLENHORST (2012) Professor and Dean, Huxley College of the Environment. BS, University of Oregon; MS, University of Oregon; PhD, Ohio State University.

XICHEN JIANG (2016) Assistant Professor. BA, University of Illinois; MS, University of Illinois; PhD, University of Illinois (electrical engineering).

ENERGY STUDIES

BRAD JOHNSON (1997) Professor and Associate Dean, College of Science and Engineering. BS, University of Colorado, MS, University of Colorado, PhD, University of Colorado.

TIMOTHY KOWALCZYK (2014) Assistant Professor. BS (chemistry and mathematics), University of Southern California; PhD (physical chemistry), Massachusetts Institute of Technology.

TODD MORTON (1988) Professor. BSEE, MSEE, University of Washington.

DAVID PATRICK (1996) Professor. BS, University of California-Davis; PhD, University of Utah.

JENNIFER SELTZ (2012) Assistant Professor. BA, Brown University; MA, PhD, University of Washington.

ART SHERWOOD (2014), Professor and Director, IDEA Institute. BA, University of Wisconsin; MBA, Indiana University; MS, Indiana University; PhD, Indiana University.

SHARON SHEWMAKE (2013) Assistant Professor. BA, Duke University; PhD, University of California-Davis.

PETE STELLING (2011) Assistant Professor. BA, Western State College, Colorado; PhD, University of Alaska-Fairbanks.

JOEL N. SWISHER, PE (2014) Professor and Director, Institute for Energy Studies. BS (civil engineering), Stanford University; MS (mechanical engineering), Stanford University; PhD (civil engineering: energy and environmental planning),

Stanford University.

PHILIP THOMPSON (2009) Associate Professor. BA, Kent State University; PhD, University of Arizona.

Other Departmental Information

Advising and Declaration Process:

Students must have confirmed admission to Western Washington University and met the grade and course requirements listed below. Students who wish to register for an Energy Studies major or minor should contact the Institute for Energy Studies office (Arntzen Hall 303). Students interested in the electrical engineering major with the energy concentration should contact the Engineering Technology program coordinator/pre-major advisor.

Grade Requirements:

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors. A GPA of 3.00 or above is required in courses for energy programs.

Bachelor of Arts

Energy Policy and Management, BA

Department of Energy Studies, University Interdisciplinary Programs

109-127 credits

Introduction

The goal of the program is to give students knowledge and analytic skills in the policy and management aspects of today's diverse energy business, along with broad exposure to the science, environmental, business and policy aspects of the energy system that drive the formation and analysis of energy-related policies.

Why Consider an Energy Policy and Management Major?

The B.A. in Energy Policy and Management is an interdisciplinary program that gives students knowledge and skills concerning energy policy and the energy business through courses in economics, environmental studies, environmental science, and various business disciplines, while also providing a solid background in basic energy science concepts.

While building a strong blend of analytic and communication skills, students will gain energy-related expertise that industry experts have identified as essential to the workforce needs in the growing clean energy economy. Graduates will be well prepared to enter the workforce, equipped with the knowledge, skills and applied expertise demanded by entrepreneurship or employment in the energy field.

The program will also integrate core strengths of WWU, including collaboration, practical innovation, community engagement, a global perspective and a sustainability focus. The participating departments are

recognized for their outstanding educational programs and demonstrated excellence. This program will foster interdisciplinary thinking, learning and problem solving.

 PLSC 436 - Managing Environmental Commons
 PLSC 489 - Managing An International Ecosystem

Minor

Energy Policy Minor

Department of Energy Studies, University Interdisciplinary Programs

28 Credits

Introduction

The goal of the program is to give students a good understanding of the basic science, environmental, and economic issues associated with the formation and analysis of energy-related policies.

Why Consider an Energy Policy Minor?

The minor in Energy Policy is an interdisciplinary program designed to meet the needs of a rapidly expanding green-energy economy. Graduates will be well prepared to enter the workforce as leaders, equipped with the knowledge, skills and applied expertise demanded by this dynamic and evolving sector of the global economy. The participating departments are recognized for their outstanding educational programs and demonstrated excellence. This program will support interdisciplinary learning while fostering an approach to problem solving that encourages cross-discipline thinking.

 - ENRG 380 - Energy and Environment
or ESCI 380 - Energy and Environment
 - Additionally, three courses from the following:
 - ECON 383 - Environmental Economics
 - ENRG 270 - Energy Science I **
 - ENRG 284 - The Business of Energy *
 - ENRG 360 - Energy Efficient and Carbon Neutral Design
or ESCI 360 - Energy Efficient and Carbon Neutral Design
 - ENRG 386 - The Economics of Electricity Markets
or ECON 386 - The Economics of Electricity Markets
 - ENRG 449 - Energy Systems Transitions
 - ENRG 459 - Advanced Energy Policy
 - ENRG 480 - Applications in Energy Production **
or ESCI 480 - Applications in Energy Production
 - HIST 354 - Energy in American History *
- *Students may count only one of these courses toward the minor
**Students may count only one of these courses toward the minor

Energy Science Minor

Department of Energy Studies, University Interdisciplinary Programs

20-22 credits

Introduction

The goal of the program is to give students broad exposure to the science, environmental, business and policy aspects of the energy system while ensuring core competency in energy science.

Why Consider a Minor in Energy Science?

The Energy Science minor is an interdisciplinary program providing broad exposure to the science, business and policy of energy while ensuring core competency in energy science. The extensive scientific prerequisites for the minor make this program a good fit for science and engineering majors who wish to complement a deeper understanding of energy science with a working knowledge of energy policy and business. Graduates will be well prepared to enter the workforce as leaders, equipped with the knowledge, skills and applied expertise demanded by the rapidly-expanding clean energy economy. The participating departments are recognized for their outstanding educational programs and demonstrated excellence. This program will foster interdisciplinary thinking, learning and problem solving.

Gail.Cowan@wwu.edu

Sample Careers

This minor will be particularly valuable for individuals who pursue technical career tracks, in either physical sciences or engineering, that involve energy resource production, conversion or use.

Major/Career Resources

http://www.wwu.edu/careers/students_choosingamajor.shtml

How to Declare (Admission and Declaration Process):

Students who wish to register for this minor should contact the Institute for Energy Studies Program Coordinator.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Program Requirements

- Choose one from:
 - ENRG 101 - Energy and Society
 - ENRG 380 - Energy and Environment
 - ESCI 380 - Energy and Environment
- ENRG 270 - Energy Science I
- ENRG 284 - The Business of Energy
- ENRG 370 - Energy Science II
- ENRG 350 - Energy Policy and Politics
 - Or ENVS 350 - Energy Policy and Politics

Choose one from

BIOL 416 - Ecosystem Ecology and Global Change
 BIOL 433 - Quaternary Biogeography
 CHEM 425R - Surface Chemistry
 ENGR 170 - Introduction to Materials Science and Engineering
 ENGR 225 - Mechanics of Materials
 ENRG 360 - Energy Efficient and Carbon Neutral Design
 or ESCI 360 - Energy Efficient and Carbon Neutral Design
 ENRG 366 - Life Cycle and Net Energy Analysis
 or ESCI 366 - Life Cycle and Net Energy Analysis
 ENRG 372 - Electrical Power and Electromechanical Devices
 or EE 372 - Electrical Power and Electromechanical Devices
 ENRG 374 - Energy Processing
 or EE 374 - Energy Processing
 ENRG 378 - Smart and Renewable Power
 or EE 378 - Smart and Renewable Power
 ENRG 384 - Energy Economics
 or ECON 384 - Energy Economics
 ENRG 386 - The Economics of Electricity Markets
 or ECON 386 - The Economics of Electricity Markets
 ENRG 480 - Applications in Energy Production
 or ESCI 480 - Applications in Energy Production
 GEOL 311 - Earth Materials
 GEOL 314 - Engineering Geology
 GEOL 315 - Minerals, Energy and Society

ENERGY STUDIES

GEOL 352 - Introduction to Geophysics
HIST 354 - Energy in American History
MSCI 201 - Introduction to Materials Science and Engineering
PHYS 350 - Engineering Thermodynamics
PHYS 476 - Physics of Solids and Materials II

Energy Courses

ENRG 101 - Energy and Society

Modern society is completely dependent on vast amounts of cheap energy, but the costs are high. Will we have enough usable energy for a planet of nine billion people? How do our choices in energy production impact the global and local environment? We will address these and other questions surrounding human energy use and try to understand the science, technology, and policy of energy use in the 21st century.

Credits: 3

Grade Mode: Letter

GUR Attributes: SCI

ENRG 270 - Energy Science I

Introduction to energy resources and processes within a unified physical framework. Overview of traditional and renewable resources including fossil fuels, nuclear, wind, solar, hydroelectric, geothermal, and biofuels. Energy processes covered include electricity generation and energy storage in batteries and fuel cells. System level issues such as efficiency, transmission, and reliability are also covered.

Prerequisites & Notes: MATH 125; PHYS 162; CHEM 121

Credits: 3

Grade Mode: Letter

ENRG 284 - The Business of Energy

Energy is an important sector in national and the world economies. This course will examine private and government-owned energy resource and service providers and will include a brief history of the energy business and differences in characteristics across a variety of energy markets: fossil fuels, nuclear, renewables, and efficiency measures. The impact of government regulatory and tax and subsidy policies on industry and corporate structure and behavior will be examined.

Prerequisites & Notes: ECON 206 or HNRS 209.

Credits: 4

Grade Mode: Letter

ENRG 300 - Directed Independent Study

An individualized course of study not available

through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ENRG 350 - Energy Policy and Politics

This course will allow students to understand the history of energy policy within the US; gain an understanding of the major actors in energy policy; and explore the implications for energy policy from local to global levels. A specific focus will be placed on energy issues as they pertain to the Pacific Northwest. Also offered as ENV5 350.

Credits: Letter

Grade Mode: 4

ENRG 360 - Energy Efficient and Carbon Neutral Design

Introduction to energy use in buildings and the concept of energy efficiency as a resource. Provides a quantitative but accessible approach to the analysis, design and evaluation of measures to improve energy efficiency and pursue net-zero and/or carbon neutral design. Topics covered include building heating and cooling loads, HVAC system efficiency, solar energy resources and sun angles, passive solar design and rooftop photovoltaic sizing, energy efficient and zero-carbon design for buildings, vehicles, appliances, hot water and HVAC. Also offered as ESCI 360.

Prerequisites & Notes: MATH 115; ENRG 101 or ENRG 380 or ESCI 380 or instructor permission.

Credits: 4

Grade Mode: Letter

ENRG 366 - Life Cycle and Net Energy Analysis

Life cycle analysis (LCA) is a powerful tool for assessing the environmental impact associated with all the stages of a product's life from cradle-to-grave (i.e. from raw material extraction through materials processing, manufacture, distribution, use, repair and maintenance, and disposal or recycling). This large picture view helps avoid a narrow outlook on environmental concerns and is an excellent method of comparing two potential

products to see which has less impact on the environment. This course will focus on the energetic costs and carbon emissions associated with energy resources and technologies. Also offered as ESCI 366.

Prerequisites & Notes: CHEM 121 and MATH 124.

Credits: 4

Grade Mode: Letter

ENRG 370 - Energy Science II

Introduction to energy resources and processes within a unified physical framework. Overview of traditional and renewable resources including fossil fuels, nuclear, wind, solar, hydroelectric, geothermal, and biofuels. Energy processes covered include electricity generation and energy storage in batteries and fuel cells. Systems-level issues such as efficiency, transmission, and reliability are also analyzed.

Prerequisites & Notes: CHEM 123; ENRG 270.

Credits: 3

Grade Mode: Letter

ENRG 372 - Electrical Power and Electromechanical Devices

A study of electrical power concepts and electromechanical devices' theory, operation and analysis. Topics covered include circuit analysis review, basic electromagnetic theory, three phase power systems, dc machines, synchronous generators, power transformers and induction machines. Also offered as EE 372.

Prerequisites & Notes: EE 210

Credits: 4

Grade Mode: Letter

ENRG 374 - Energy Processing

A study of power electronics devices and circuits applied to power conditioning. Topics covered include switching characteristics of power semiconductor devices, power converter topologies, control techniques in power converters and practical applications of power electronics converters in motor drives. Also offered as EE 374.

Prerequisites & Notes: EE 372 or ENRG 372; and EE 320.

Credits: 4

Grade Mode: Letter

ENRG 378 - Smart and Renewable Power

A study of smart grid and renewable energy technologies. Topics covered include basics of power system operation, smart grid objectives and

main features, alternative energy technologies and interface to utility grid, storage systems technology, Plug-in Hybrid Electric vehicle technology, demand response and demand side management and smart grid monitoring. Also offered as EE 378.

Prerequisites & Notes: EE 372 or ENRG 372; EE 374 or ENRG 374; ENRG 270; and EE 360.

Credits: 4

Grade Mode: Letter

ENRG 380 - Energy and Environment

How do our choices in energy production impact the global and local environment? What does the future hold in terms of human use of energy? This class emphasizes the physical principles behind energy and the effects of energy on the environment. We will explore the interdependence of world economies and environment as well as look at individual opinions and choices on energy related issues. Also offered as ESCI 380.

Prerequisites & Notes: CHEM 121, MATH 114.

Credits: 3

Grade Mode: Letter

ENRG 381 - Biofuels

An examination of current and emerging biofuel technologies including an understanding of the processes for biomass conversion to fuel and other factors associated with commercial biofuel production. Also offered as CHEM 381.

Prerequisites & Notes: CHEM 251 or CHEM 351.

Credits: 3

Grade Mode: Letter

ENRG 384 - Energy Economics

The role of energy in the economy and key aspects of energy supply and demand. Topics include the interrelationships among energy use, economic growth, and the environment; conservation; solar and 'unconventional' energy sources; world oil markets; regulation of gas and electric utilities; and U.S. energy policy. Also offered as ECON 384.

Prerequisites & Notes: ECON 206 or HNRS 209.

Credits: 4

Grade Mode: Letter

ENRG 386 - The Economics of Electricity Markets

Electricity markets have become more complex in recent years because of new energy production and usage technologies, regulatory changes, and increased environmental concerns. This course will look at demand and supply aspects of electricity

ENERGY STUDIES

markets, including the impact of government economic and environmental regulation. Emphasis will be on the U.S. electricity market. Also offered as ECON 386.

Prerequisites & Notes: ECON 206 or HNRS 209.

Credits: 4

Grade Mode: Letter

ENRG 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

ENRG 440 - Public and Stakeholder Engagement in Energy, Climate, and Environmental Policymaking

We examine different types of civic engagement in public policymaking about energy, climate, and environment through the lens of deliberative democracy. Students will learn to think critically and creatively about how the public, business, and organized interest groups can be effectively involved in policymaking. Also offered as ENVS 440.

Prerequisites & Notes: ENVS 304, or permission of instructor.

Credits: 4

Grade Mode: Letter

ENRG 449 - Energy Systems Transitions

This course explores the social and technological changes underway to transition from a fossil fuel based energy system to a low-carbon system. We study the technology involved with existing and evolving electricity, transportation, food, and building energy systems and then interrogate the social, economic, and political structures that substantiate the existing system or promote change to a low carbon future.

Prerequisites & Notes: ENVS 304 or ENRG 350 or ENVS 350 or permission of instructor.

Credits: 4

Grade Mode: Letter

ENRG 459 - Advanced Energy Policy

The goal of this course is to explore policy making and policy implementation in the context of energy technologies. Using case studies we will reveal the

multidimensionality and tensions implicit in policy debates. We will assemble a toolbox that enables us to innovate, assess, and promote policy options. Focus will be placed on policy solutions such as common pool resource management, community-based social marketing, civic dialogue, and analytic-deliberation. Also offered as ENVS 459.

Prerequisites & Notes: ENVS 350 or ENRG 350 or permission of instructor.

Credits: 4

Grade Mode: Letter

ENRG 471 - Energy Project Proposal

This is the first of three courses for the interdisciplinary culminating project in the electrical engineering – energy option. Students define objectives, perform research, and prepare project proposals for ENRG 472 and ENRG 473. Also offered as EE 471.

Prerequisites & Notes: EE 378 or ENRG 378; and EE 480.

Credits: 2

Grade Mode: Letter

ENRG 472 - Energy Project Research and Development

This is the second of three courses for the interdisciplinary energy project. Students complete the research and develop design concepts based on the constraints defined in EE/ENRG 471. Also offered as EE 472.

Prerequisites & Notes: EE 471 or ENRG 471

Credits: 4

Grade Mode: Letter

ENRG 473 - Energy Project Implementation

This is the third of three courses for the interdisciplinary energy project. Students complete the implementation of an energy related project as defined in EE 471/ENRG 471 and EE 472/ENRG 472. Also offered as EE 473.

Prerequisites & Notes: EE 472 or ENRG 472

Credits: 4

Grade Mode: Letter

ENRG 480 - Applications in Energy Production

This class is designed to bring students into contact with the industries where energy is produced. In this field-based class we will visit conventional and alternative energy facilities and learn how energy is produced and delivered to consumers. We will pay particular attention to the basic physics, chemistry and biology of energy systems as well as their impacts on the

environment. Also offered as ESCI 480.

Prerequisites & Notes: ESCI 380 or ESCI 329 or ENRG 380.

Credits: 4

Grade Mode: Letter

ENRG 484 - Economics of Alternative Energy

Explores the economics of renewable energy and conservation. The economic history of renewable energy and the existing institutional framework are examined. Considers economic motivations for the expansion of renewable energy and conservation. Existing and prospective policies are analyzed. Examines the challenges associated with integrating renewable sources into existing energy systems. Various quantitative techniques are reviewed and practiced. Also offered as ECON 484.

Prerequisites & Notes: ENRG 384 or ECON 384

Credits: 4

Grade Mode: Letter

ENRG 490 - Energy Capstone: Energy System Synthesis

Students will work with each other, faculty members, and professionals in the energy field to solve a real-world energy related problem. Students will analyze the problem and craft a solution using the knowledge and skills accumulated through prior coursework in the degree program. The course fosters interdisciplinary partnerships between Western students and faculty and professionals and organizations in the industry and government.

Prerequisites & Notes: Senior status; Energy Policy and Management majors only.

Credits: 4

Grade Mode: Letter

ENRG 495 - Internship

Supervised work experience relevant to Energy studies and practical application of academic curriculum. Eligibility outlined in departmental internship guide. Variable credits 1-4; Repeatable to a maximum of 4 credits. S/U grading.

Prerequisites & Notes: Declared Energy Policy and Management, BA, student.

Credits: 1-4

Grade Mode: S/U

Entrepreneurship and Innovation

Introduction

Dr. Art Sherwood, Director

The IDEA Institute at Western Washington University (WWU) promotes multi-purpose, interdisciplinary entrepreneurship and innovation. Any student from any college can receive a minor in entrepreneurship and combine it with the focus of their studies here at Western. At the IDEA Institute, entrepreneurship is for everyone. Whether you focus on social justice, environment, arts, education, business, humanities, engineering or any other subject, this interdisciplinary program is designed to provide the knowledge, skills and abilities to successfully engage in entrepreneurial and innovative behaviors in new and existing organizations.

In our programs, students learn how to recognize opportunities and needs, and link them to innovative approaches while bringing resources and people together to make change happen. We explore organizational contexts with varied economic and non-economic purposes and possible ways to effect desired change. Students have the opportunity to gain increasingly deep experience in entrepreneurship and innovation related to their field of study. They will experience a combination of online modules and in-class laboratory learning opportunities with increasing levels of knowledge, experience and practice. Classes are designed to support, connect, challenge and engage participants with further opportunities and engagement experiences both on and off campus.

These programs facilitate experiential growth, community networking and personal application. We seek students and instructors with diverse interests, expertise and experiences to help create a unique culture of leaders, innovators and changemakers.

The Entrepreneurship and Innovation Minor that IDEA offers is multi-purpose, interdisciplinary training which means entrepreneurship is for Everyone so along with students previously studying business, students interested in social entrepreneurship, intrapreneurship or any kind of innovation related to their field of study are encouraged to apply.

Students on the minor track will take 3 courses twice (for a total of 6 classes) throughout their time at Western.

ENTR 246 - Introduction to Entrepreneurship and Innovation: This course lays the foundations for the theory and practice of entrepreneurship and innovation knowledge, skills and abilities. In the context of new and existing organizations with varied economic and non-economic purposes, students will examine opportunity and how to bring innovation to bear on these through bringing together resources and people to effect desired change. Repeatable up to 8 credits, including original course.

ENTR 346 - Intermediate Entrepreneurship and Innovation: This course builds upon the Entrepreneurship Foundations (ENTR 246) course and provides additional student entrepreneurial knowledge, skills and abilities through increasingly deep and complex experiences in and out of the classroom. Students will engage in creation and development of their own ventures, engage with ongoing ventures and will provide coaching/mentoring to earlier stage entrepreneurship students. Repeatable up to 8 credits, including original course.

ENTR 446 - Advanced Entrepreneurship and Innovation: This advanced course builds upon Entrepreneurship Foundations (ENTR 246) and Intermediate Entrepreneurship Experience (ENTR 346) to provide an outwardly focused, deeply experiential and complex set of entrepreneurial learning opportunities. Students will spend significant time applying the knowledge and skills attained to increase their entrepreneurial abilities through multiple, custom built, highly integrated projects and ventures in real-life contexts. Repeatable up to 8 credits, including original course.

Mission

Our mission is to create more social impact, more on-purpose living, more leadership, more innovation and more community grounded in changemaking and innovation.

Vision

We envision a community of changemakers. We see a better tomorrow driven by the collaborative work of people today. We envision a dynamic culture where it is the norm to see and understand opportunities and challenges, are connected to a network of enthusiastic, knowledgeable and skilled people from around the world, and are able to access and bring to bear resources to grasp opportunities that meet challenges in innovative and scalable ways.

Faculty

ARTHUR L. SHERWOOD (2014) Assistant Professor. BBA, University of Wisconsin-Madison; MBA, MS, PhD, Indiana University-Bloomington.

Other Departmental Information

Advising and Declaration Process:

Students must have confirmed admission to Western Washington University and have met the grade requirements below. Students who wish to register for an Entrepreneurship and Innovation

course should contact the IDEA Institute Director. Students interested in social entrepreneurship, intrapreneurship or any kind of entrepreneurship or innovation related to their field of study are encouraged to apply.

Grade Requirements:

Students must complete eight credits of ENTR 246 (2 courses) with an average of B or higher to complete the Entrepreneurship and Innovation Minor application form.

Minor

Entrepreneurship and Innovation Minor

Department of Entrepreneurship and Innovation, University Interdisciplinary Programs

24 credits

Introduction

The Entrepreneurship and Innovation Minor is an interdisciplinary program designed to provide the knowledge, skills and capabilities to successfully engage in entrepreneurship and innovation behaviors in new and existing organizations having varied purposes (economic and non-economic). Students will learn how to recognize opportunities/needs and link them to innovative approaches while bringing resources and people together in an organizational context to effect desired change. Students will learn about organizational contexts with both economic and non-economic purposes and have the opportunity to gain increasingly deep experiences in entrepreneurship and innovation related to their major field of study.

Why Consider an Entrepreneurship and Innovation Minor?

The Entrepreneurship and Innovation Minor provides Western's diverse student population the opportunity to gain related knowledge and skills and then experientially apply them in a variety of domestic and international classroom and real-world contexts. The minor takes the perspective that this knowledge and skills can be taught to everybody willing to learn, rather than those born with some special traits. While the minor is highly useful for those desiring to start and grow their own ventures, it is also valuable for those who desire to be entrepreneurs and drive innovative change inside existing organizations. The minor will allow students the opportunity to link entrepreneurship and innovation to their major areas of study, creating a powerful combination for success in the professional world.

How to Declare (Admission and Declaration Process):

Students must complete eight credits of ENTR 246 with an average grade of 2.50 or higher, and fill out the Entrepreneurship and Innovation Minor application form. Open to all WWU students.

Grade Requirements

A GPA of 2.50 or above is required in courses for the minor.

Requirements

- ENTR 246 - Entrepreneurship and Innovation Foundations (8 credits)
- ENTR 346 - Intermediate Entrepreneurship and Innovation Experience (8 credits)
- ENTR 446 - Advanced Entrepreneurship and Innovation Experience (8 credits)

Entrepreneurship Courses

ENTR 246 - Entrepreneurship and Innovation Foundations

This course lays the foundations for the theory and practice of entrepreneurship and innovation knowledge, skills and capabilities in the context of new and existing organizations with varied economic and non-economic purposes. Students will examine opportunities and how to bring innovations to bear on these through bringing together resources and people to effect desired change. Repeatable up to 8 credits, including original course.

Credits: 4

Grade Mode: Letter

ENTR 346 - Intermediate Entrepreneurship and Innovation Experience

This course builds upon the Entrepreneurship and Innovation Foundations (ENTR 246) course and provides additional student entrepreneurial knowledge, skills and abilities through increasingly deep and complex experiences in and out of the classroom. Students will engage in creation and development of their own ventures, engage with ongoing ventures and will provide coaching/mentoring to earlier stage entrepreneurship students. Repeatable up to 8 credits, including original course.

Prerequisites & Notes: 8 credits of ENTR 246; Admission to the minor or instructor permission.

Credits: 4

Grade Mode: Letter

ENTR 446 - Advanced Entrepreneurship and Innovation Experience

This advanced course builds upon Entrepreneurship and Innovation Foundations (ENTR 246) and Intermediate Entrepreneurship and Innovation Experience (ENTR 346) to provide an outwardly focused, deeply experiential and complex set of entrepreneurial learning opportunities. Students will spend significant time applying the knowledge and skills attained to increase their entrepreneurial abilities through multiple, custom built, highly integrated projects and ventures in real-life contexts. Repeatable up to 8 credits, including original course.

Prerequisites & Notes: 8 credits of ENTR 346; Admission to the minor or instructor permission.

Credits: 4

Grade Mode: Letter

Honors

Honors Program

Introduction

Western's Honors Program allows students to combine the best of a private liberal arts college experience (small classes, interaction with professors and other students, and the opportunity to work on research and creative activities with faculty) with the advantages of a much larger public institution, including a wide variety of majors, outstanding academic facilities, and numerous extra-curricular options.

The program is structured in a way that provides a graduated, on-going experience for students as they engage in increasingly sophisticated work while moving through Honors.

Admission is selective-- students apply to join the Program through a supplemental application accessed from the Honors Program website. Transfer students or students already enrolled in the university may apply to the Program on the bases of academic record, a writing sample, and the recommendation of a university or other faculty member.

Students in the Honors Program are eligible for HNRS courses and have the opportunity to undertake extended Honors independent study projects in their major fields.

Students interested in the Honors program should contact the Honors Office, College Hall 07, 360-650-3034, or visit the Honors website, www.wvu.edu/honors, for more information.

Why Consider an Honors Program Major?

Suggested especially for students seeking a challenging academic experience.

Contact Information

Carla Pederson
College Hall 07
360-650-3034
Carla.Pederson@wvu.edu

Major/Career Resources

http://www.wvu.edu/careers/students_choosingamajor.shtml

Grade Requirements

Students must maintain a 3.50 grade point average for the last 90 graded credits of university work.

Requirements for Graduation through the Honors Program

Classes in the first and second year apply to the student's General University Requirements. Classes may be applied to the GUR area indicated for each class.

First-Year Honors:

- HNRS 103 - Major Cultural Traditions I (Humanities)
- HNRS 104 - Major Cultural Traditions II (Humanities)
- HNRS 105 - Major Cultural Traditions III (ACGM)

or

- HNRS 106 - Major Cultural Traditions IV (BCGM)

Freshmen with science and mathematics interests are encouraged to consider enrollment in one or more of the following Honors Classes:

MATH 134 - Calculus I Honors
MATH 135 - Calculus II Honors
MATH 138 - Accelerated Calculus
CHEM 125 - General Chemistry I, Honors
CHEM 126 - General Chemistry II, Honors

HONORS

CHEM 225 - General Chemistry III, Honors

Lower Division Honors Colloquia:

□ Two Honors Colloquia. Classes are at the 200-level, and a variety is offered each year in areas such as psychology, philosophy, anthropology, and economics. One colloquium is waived for students with credit in one or more of the following courses: MATH 134, MATH 135, MATH 138; CHEM 125, CHEM 126, CHEM 225.

Upper Division Honors Seminars:

□ A minimum of two Honors seminars. Seminars are offered in a broad array of fields each year, and offerings change from year to year. Classes are numbered 350 and above.

In some cases, students may apply HNRS seminars to their majors or their GURs, with permission of the Honors Program director or the Honors advising staff, and the department concerned.

Honors Capstone Project:

□ Senior Project is concentrated work in the student's major field, though in exceptional cases work may be done in an allied area. It is not unusual for a student to be engaged in Senior Project work before the final year, especially in the natural sciences. Students may take HNRS 490, Senior Project, as well as research classes in their major department to meet this requirement.

Requirements for already enrolled Western students and transfer students:

- Four Honors seminars
- Senior Project

Additional requirements for graduation through the Honors Program:

A cumulative grade point average of at least 3.50 for the last 90 graded credits of University-level work

Honors Courses

HNRS 101 - HNRS 101: The Big Picture

The Big Picture is a common intellectual experience for all new students in the WWU Honors Program. It is a lecture series grounded in Big History, a young transdisciplinary field in which scholars weave together the sum of evidentiary knowledge from all human academic disciplines into a metanarrative that frames human existence in a cosmological context. This course will take a deep look at that story, with engaging lectures by top scholars from across the university.

Prerequisites & Notes: Co-requisite: HNRS 103.

Credits: 1

Grade Mode: Letter

HNRS 103 - Major Cultural Traditions I

Analysis, interpretation, and discussion of a wide range of texts from ancient times to the 5th century, with emphasis on the Western traditions.

Credits: 4

Grade Mode: Letter

GUR Attributes: HUM

HNRS 104 - Major Cultural Traditions II

Analysis, interpretation, and discussion of a wide range of texts from the 6th to the close of the 19th century, with emphasis on the Western traditions.

Credits: 4

Grade Mode: Letter

GUR Attributes: HUM

HNRS 105 - Major Cultural Traditions III

Analysis, interpretation, and discussion of a wide range of sources from the contemporary world with major emphasis on a culture outside North America.

Credits: 4

Grade Mode: Letter

GUR Attributes: ACGM

HNRS 106 - Major Cultural Traditions IV

Analysis, interpretation, and discussion of a wide range of sources from the contemporary world with a major emphasis on a North American culture.

Credits: 4

Grade Mode: Letter

GUR Attributes: BCGM

HNRS 201 - Colloquium in Philosophy

An introduction to philosophical methods and to the branches of philosophical inquiry. The class will concentrate on a specific subject or topic in each colloquium, and the area of emphasis will therefore vary from year to year.

Prerequisites & Notes: Admission to Honors program.

Credits: 4
Grade Mode: Letter
GUR Attributes: HUM

HNRS 203 - Colloquium in Anthropology

Introduction to the concepts, methods and practical application of cultural anthropology. The focus is on explanations for social and cultural variation around the world and over time and the significance of holistic and comparative understanding. Class will concentrate on discussion and also will provide students with an opportunity to explore one or more areas of the discipline in some depth.

Credits: 4
Grade Mode: Letter
GUR Attributes: SSC

HNRS 204 - Colloquium in Psychology

An introduction to the basic concepts and methods of the discipline of psychology utilizing the results of research investigations. Students will have an opportunity to perform independent work.

Credits: 4
Grade Mode: Letter
GUR Attributes: SSC

HNRS 205 - Colloquium in History

The study of history as a discipline, including an introduction to primary sources, source criticism, basic techniques of historical research, and historical writing. Students will study a specific historical issue or event in some depth.

Prerequisites & Notes: Admission to Honors Program.
Credits: 4
Grade Mode: Letter
GUR Attributes: HUM

HNRS 206 - Colloquium in Political Science

An introduction of the concept of politics and the types of governments and political issues in the contemporary world, with an emphasis on the comparative study of political ideas and systems. The class will focus on discussion and students will have an opportunity to study one or more areas in depth.

Credits: 4
Grade Mode: Letter
GUR Attributes: SSC

HNRS 209 - Colloquium in Microeconomics

An introduction to the principles of

microeconomics, including the role of the market in allocating scarce resources, the decision making of economic agents, market and regulatory failures, strategic thinking, and behavioral responses. Students will have the opportunity for extensive discussion and to explore one or more areas of the discipline.

Prerequisites & Notes: MATH 112 or higher or equivalent.
Credits: 4
Grade Mode: Letter
GUR Attributes: SSC

HNRS 211 - Colloquium in Physics

An introduction to the basic concepts and practice of physics, including the laws of motion, conservation of energy and momentum, gravitation, electricity and magnetism, sound and light waves, radioactivity, and fission and fusion. The class includes a lab, and students will have an opportunity to study an area of interest in depth.

Prerequisites & Notes: MATH 107 or equivalent or higher.
Credits: 4
Grade Mode: Letter
GUR Attributes: LSCI

HNRS 212 - Colloquium in Geology

Study of the earth including its origins, composition, and evolution of its continents and ocean basins through time. Processes such as plate tectonics, rock formation, climate change, and mountain building, and their effects on surface and subsurface evolution will be studied. The interplay between these Earth processes and human activity is also examined, in topics such as volcanology, earthquakes and flooding. The class includes a laboratory in which identification of minerals and rocks, as well as interpretation of landforms and maps is emphasized. Students will have the opportunity to study a particular area of geology in depth.

Prerequisites & Notes: MATH 114 or equivalent or higher.
Credits: 4
Grade Mode: Letter
GUR Attributes: LSCI

HNRS 213 - Colloquium in Biology

An introduction to the study of biology, including molecular and evolutionary processes, the energetics of living systems with emphasis on photosynthesis and respiration in relation to the first and second laws of thermodynamics, and the study of the physical structure of DNA and its involvement in the information flow in the cell. The

HONORS

class includes a laboratory, and students will have an opportunity to explore a specific, selected area of inquiry.

Prerequisites & Notes: MATH 106 or equivalent or higher.

Credits: 4

Grade Mode: Letter

GUR Attributes: LSCI

HNRS 218 - Colloquium in Women, Gender, and Sexuality Studies

An introduction to central concepts and methods in women, gender, and sexuality studies. Course may include thematic focus on: postcolonialism, the body and culture, aesthetics, science, state/nation, among other topics.

Prerequisites & Notes: First-year Honors sequence recommended.

Credits: 4

Grade Mode: Letter

GUR Attributes: BCGM

HNRS 221 - Interdisciplinary Colloquium in Science and Social Science

An examination of the relationship between science and technology and the social and cultural milieu in which they are actually done. Individual classes may center on a single science or deal with a number of case studies dealing with different sciences.

Prerequisites & Notes: Admission to the Honors Program.

Credits: 4

Grade Mode: Letter

GUR Attributes: SSC

HNRS 252 - Colloquium in Sociology

An introduction to the principles of sociology, including the study of social change, social institutions, and social organizations. The class will also provide an opportunity for concentrated study in one or more areas of the discipline.

Credits: 4

Grade Mode: Letter

GUR Attributes: SSC

HNRS 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not

eligible for tuition waiver.

Credits: 1-15

HNRS 350 - Seminar

Repeatable with various topics.

International Studies

Introduction

International Studies takes an interdisciplinary approach to learning about world issues. The International Studies curriculum focuses on comparative perspectives, histories, and approaches to global citizenship, inter-cultural knowledge, and universal respect.

Department Mission

The Institute for Global Engagement serves Washington State by providing internationally-

focused educational experiences that prepare students to be global citizens and by supporting faculty and staff who are engaged inter-culturally.

Declaration Process

Advisement for the minor can be secured through the Executive Director for the Institute for Global Engagement, Professor Vicki Hamblin, Miller Hall 215B, 360-650-4859.

Additional Information

Additional information regarding international education opportunities at Western can be found at: international.wvu.edu/.

Minor

International Studies Minor

International Studies Program, University Interdisciplinary Programs

28 credits

Introduction

The International Studies Minor provides a global perspective in an interdisciplinary course of study.

The Minor is designed to provide students with the knowledge, perspectives and skills that are critical for global citizenship and careers in an increasingly interrelated world. The Minor consists of (1) completion of an approved international study, exchange, internship, or service-learning program, (2) International Studies courses, (3) the study of a second language, and (4) course work in related fields. Students completing this minor will be well prepared for a variety of professional opportunities.

Advisement for the minor can be secured through the Executive Director for the Institute for Global Engagement, Professor Vicki Hamblin, Miller Hall 215B, 360-650-4859.

Why Consider an International Studies Minor?

The International Studies Minor can make major coursework more applicable to a particular part of the world, can enhance a major's relevancy to real-world issues, and can instill the principles needed to effectively evaluate experiences from outside one's own borders.

How to Declare (Admission and Declaration Process):

Advisement for the minor can be secured through the Executive Director for the Institute for Global Engagement, Professor Vicki Hamblin, Miller Hall 215B, 360-650-4859.

Grade Requirements

A grade of C- or better is required for a student's major or minor courses, and supporting courses for majors and minors.

Requirements

- INTL 201 - Introduction to Global Studies
- INTL 401 - Global Issues
- 4-8 credits from an approved international study, exchange, internship, or service learning program.
- 4-5 credits in a modern language at 202 level or above; or, 4-5 credits at 103 level or above for less commonly taught languages.
- Three upper-division elective courses from the following list or other intercultural content courses with approval by the faculty advisor for International Studies; at least two courses to be completed on campus.
 - INTL 302 - Global Citizenship
 - INTL 312 - Globalizations since 1870
 - INTL 334 - International Law
 - INTL 335 - Human Trafficking and Smuggling
 - INTL 336 - The Holocaust
 - INTL 338 - Holocaust Film
 - INTL 361 - Introduction to International Economics and Business
 - INTL 412 - Global Justice
 - ENG 335 - Literary and Creative Expressions Across Asia, Africa, the Middle East, and Latin America
 - FAIR 312D - Issues in International Studies
 - FAIR 334B - Transitional Justice
 - FAIR 334C - International Human Rights
 - FAIR 371E - Nations and Nationalism
 - FAIR 413A - International Childhood
 - HIST 369 - Women, Gender, & Sexuality in African History
 - HIST 385 - West African History

International Studies Courses**INTL 105 - Education Abroad**

Credit through international exchanges, academic programs offered through universities or consortia, cosponsored programs. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 106 - Education Abroad: Direct Exchange 1

Credit through international exchanges. Direct Exchange 1 – Direct Exchange Two Semesters or Three Quarters. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 107 - Education Abroad: Direct Exchange 2

Credit through international exchanges. Direct Exchange 2 – Direct Exchange Semester. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 108 - Education Abroad: Direct Exchange 3

Credit through international exchanges. Direct Exchange Plan 3 – Direct Exchange Asia University. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

INTERNATIONAL STUDIES

Credits: 1-30
Grade Mode: S/U

INTL 109 - Education Abroad: AHA

Credits earned through academic programs offered by faculty teaching for AHA International or a similar consortium. Repeatable to a maximum of 30 credits, including original course. S/U grading.

Credits: 1-30
Grade Mode: S/U

INTL 115 - Global Internship/Field Study

International internships, independent research projects, work experience approved by departments or colleges. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.
Credits: 1-30
Grade Mode: S/U

INTL 130 - Education Abroad: ISEP 1

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortium of universities. ISEP 1 – Fall Quarter Only. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.
Credits: 0-30
Grade Mode: S/U

INTL 131 - Education Abroad: ISEP 2

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortia of universities. ISEP 2 - Two Semesters or Three quarters. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.
Credits: 1-30
Grade Mode: S/U

INTL 132 - Education Abroad: ISEP 3

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortium of universities. ISEP 3 – Winter/Spring Quarter Only. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.
Credits: 0-30
Grade Mode: S/U

INTL 201 - Introduction to Global Studies

Introduction to contemporary global issues, drawing on the integrated knowledge and methodologies of multiple disciplines.

Credits: 5
Grade Mode: Letter
GUR Attributes: ACGM

INTL 205 - Education Abroad

Credit through international exchanges, academic programs offered through universities or consortia, cosponsored programs. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.
Credits: 0-30
Grade Mode: S/U

INTL 206 - Education Abroad: Direct Exchange 1

Credit through international exchanges. Direct Exchange 1 – Direct Exchange Two Semesters or Three Quarters. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.
Credits: 0-30
Grade Mode: S/U

INTL 207 - Education Abroad: Direct Exchange 2

Credit through international exchanges. Direct Exchange 2 – Direct Exchange Semester. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.
Credits: 0-30
Grade Mode: S/U

INTL 208 - Education Abroad: Direct Exchange 3

Credit through international exchanges. Direct Exchange 3 – Direct Exchange Asia University. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.
Credits: 0-30
Grade Mode: S/U

INTL 209 - Education Abroad: AHA

Credits earned through academic programs offered by faculty teaching for AHA International or for a similar consortium of universities. Repeatable to a maximum of 30 credits, including original course. S/U grading.

Credits: 1-30
Grade Mode: S/U

INTL 215 - Global Internship/Field Study

International internships, independent research projects, work experience approved by departments or colleges. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30
Grade Mode: S/U

INTL 230 - Education Abroad: ISEP 1

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortium of universities. ISEP 1 – Fall Quarter Only. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 0-30
Grade Mode: S/U

INTL 231 - Education Abroad: ISEP 2

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortia of universities. ISEP 2 - Two Semesters or Three quarters. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30
Grade Mode: S/U

INTL 232 - Education Abroad: ISEP 3

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortium of universities. ISEP 3 – Winter/Spring Quarter Only. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 0-30
Grade Mode: S/U

INTL 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

INTL 301 - Global Principles

Pre-departure orientation, ethics and intercultural communication issues for study, service work or internships abroad. S/U grading.

Credits: 1
Grade Mode: S/U

INTL 302 - Global Citizenship

This class examines the ethical and practical questions raised by traveling, working, studying, reporting, and volunteering internationally. By exploring the social, cultural, historical, political, and economic contexts in which international engagement takes place, students will develop a critical lens with which to evaluate their own place in an increasingly interdependent world.

Prerequisites & Notes: INTL 201 or permission of instructor.

Credits: 5
Grade Mode: Letter

INTL 305 - Education Abroad

Credit through international exchanges, academic programs offered through universities or consortia, cosponsored programs. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 0-30
Grade Mode: S/U

INTL 306 - Education Abroad: Direct Exchange 1

Credit through international exchanges. Direct Exchange 1 – Direct Exchange Two Semesters or Three Quarters. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30
Grade Mode: S/U

INTL 307 - Education Abroad: Direct Exchange 2

Credit through international exchanges. Direct Exchange 2 – Direct Exchange Semester. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30
Grade Mode: S/U

INTERNATIONAL STUDIES

INTL 308 - Education Abroad: Direct Exchange 3

Credit through international exchanges. Direct Exchange 3 – Direct Exchange Asia University. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 309 - Education Abroad: AHA

Credits earned through academic programs offered by faculty teaching for AHA International or for a similar consortium of universities. Repeatable to a maximum of 30 credits, including original course. S/U grading.

Credits: 1-30

Grade Mode: S/U

INTL 312 - Globalizations since 1870

Overview of the global political economy and the expansions of the capitalist system from the late nineteenth century to the early twenty-first, from the era of globalization before World War I to our current era of globalization since 1973, via Two World Wars, the Great Depression, decolonization, and the Cold War. Examines facets of the history, politics, economics, sociology, and culture of globalization, the increased mobility of goods, people, capital, and ideas around the world. Also offered as FAIR 312F.

Prerequisites & Notes: INTL 201; ECON 206 or HNRS 209 recommended.

Credits: 5

Grade Mode: Letter

GUR Attributes: SSC

INTL 315 - Global Internship/Field Study

International internships, independent research projects, work experience approved by departments or colleges. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 330 - Education Abroad: ISEP 1

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortia of universities. ISEP 1 – Fall Quarter Only. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education

Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 331 - Education Abroad: ISEP 2

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortia of universities. ISEP 2 – Two Semesters or Three Quarters. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 0-30

Grade Mode: S/U

INTL 332 - Education Abroad: ISEP 3

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortia of universities. ISEP 3 – Winter/Spring Quarter Only. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 334 - International Law

This course is an introduction to public international law, which governs the relations of States and increasingly, other non-State actors, including individuals and organizations. The course will cover the basic doctrines of public international law and the international legal system. Topics to be covered include the law of treaties, international organizations, international courts and dispute settlement, international law and the use of force. Other topics include issues of self-determination, environmental protection, international human rights and international criminal law. These principles will be applied to contemporary issues of international law as it continues to evolve. Also offered as FAIR 334F.

Prerequisites & Notes: FAIR 203A or INTL 201 or permission of instructor.

Credits: 4-5

Grade Mode: Letter

INTL 335 - Human Trafficking and Smuggling

Interdisciplinary examination of the various manifestations of human trafficking and human smuggling: human trafficking, bonded labor, forced labor, worst forms of child labor, organ trafficking, prostitution and sexual slavery. Examines the rise and growth, and the cross-sectoral consequences of trafficking and smuggling. Examines the challenges of addressing human trafficking and human smuggling, and the appropriate policy

responses to the problem by State and non-State actors around the world. Also offered as FAIR 334K.

Prerequisites & Notes: FAIR 203A or INTL 201.

Credits: 4

Grade Mode: Letter

GUR Attributes: ACGM

INTL 336 - The Holocaust

Interdisciplinary examination of the origins, course, and aftermath of the Nazi Holocaust. Situates the Holocaust within the multiple genocides around the world in the twentieth century. Examines the responses of targeted groups, survivor accounts (including the impact on children of the victims and perpetrators), and issues of memorialization, politicization, representation, and sacralization of the Nazi Holocaust. Also offered as FAIR 334L.

Prerequisites & Notes: FAIR 203A or INTL 201.

Credits: 4

Grade Mode: Letter

GUR Attributes: BCGM

INTL 338 - Holocaust Film

Focuses on cinematic treatments and complex issues surrounding the representation of the Holocaust. Highlights the representation in films of how the victims attempted to hide; how the Germans rounded them up, took them to camps and killed them, as well acts of courage and resistance by victims, perpetrators and bystanders. Examines how cinematic 'kitsch' and the voyeurism of uninformed audiences around the world have adulterated public memory of the Holocaust. Also offered as FAIR 334S.

Prerequisites & Notes: FAIR 201A or ENG 101 or INTL 201.

Credits: 5

Grade Mode: Letter

GUR Attributes: HUM

INTL 361 - Introduction to International Economics and Business

This course provides an overview of the world economy and of the role of businesses in international trade and investment. Students will learn about the causes of globalization and examine its consequences for individuals, nations and businesses. The focus of the course will be on examining the impact of international trade and business on economic well-being. Also offered as ECON 361.

Prerequisites & Notes: ECON 101 or ECON 206 or HNRS 209.

Credits: 4

Grade Mode: Letter

INTL 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

INTL 401 - Global Issues

A capstone course in which globally-focused themes, issues, or actions are engaged from various approaches and perspectives. Students will develop an individual project through several stages of research and revisions then present the results publicly. Students will also participate in co-curricular activities and report on them to the class.

Prerequisites & Notes: INTL 201 and junior status.

Credits: 5

Grade Mode: Letter

INTL 405 - Education Abroad

Credit through international exchanges, academic programs offered through universities or consortia, cosponsored programs. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 406 - Education Abroad: Direct Exchange 1

Credit through international exchanges. Direct Exchange 1 – Direct Exchange Two Semesters or Three Quarters. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 407 - Education Abroad: Direct Exchange 2

Credit through international exchanges. Direct Exchange 2 – Direct Exchange Semester. Repeatable. S/U grading.

INTERNATIONAL STUDIES

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 408 - Education Abroad: Direct Exchange 3

Credit through international exchanges. Direct Exchange 3 – Direct Exchange Asia University. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 409 - Education Abroad: AHA

Credits earned through academic programs offered by faculty teaching for AHA International or for a similar consortium. Repeatable to a maximum of 30 credits, including original course. S/U grading.

Credits: 1-30

Grade Mode: S/U

INTL 412 - Global Justice

Examination of the question of justice in a globally interconnected world, including the moral duties we as individuals, societies and governments have to those disadvantaged by world economy and global institutions. Also offered as FAIR 412D.

Prerequisites & Notes: INTL 201 or FAIR 203A or FAIR 210A.

Credits: 5

Grade Mode: Letter

INTL 415 - Global Internship/Field Study

International internships, independent research projects, work experience approved by departments or colleges. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 430 - Education Abroad: ISEP 1

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortia of universities. ISEP 1 – Fall Quarter Only. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 431 - Education Abroad: ISEP 2

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortia of universities. ISEP 2 – Two Semesters or Three Quarters. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 432 - Education Abroad: ISEP 3

Credit for an international exchange through the International Student Exchange Program (ISEP), a consortia of universities. ISEP 3 – Winter/Spring Quarter Only. Repeatable. S/U grading.

Prerequisites & Notes: Approval from Education Abroad.

Credits: 1-30

Grade Mode: S/U

INTL 505 - Education Abroad

Credit through international exchanges, academic programs offered through universities or consortia, cosponsored programs. Repeatable to 24 credits, including original course. S/U grading.

Prerequisites & Notes: Graduate status and prior approval by the Graduate School are required.

Credits: 1-24

Grade Mode: S/U

INTL 506 - Education Abroad: Direct 1

Credit through international exchanges. Direct Exchange 1 – Direct Exchange Two Semesters or Three Quarters. Repeatable up to 24 credits, including original course. S/U grading.

Prerequisites & Notes: Graduate status and prior approval by the Graduate School are required.

Credits: 1-24

Grade Mode: S/U

INTL 507 - Education Abroad: Direct 2

Credit through international exchanges. Direct Exchange 2 – Direct Exchange Semester. Repeatable to 24 credits, including original course. S/U grading.

Prerequisites & Notes: Graduate status and prior approval by the Graduate School are required.

Credits: 1-24

Grade Mode: S/U

INTL 515 - Global Internship/Field Study

International internships, international independent study projects, international work experience approved by departments or colleges. Repeatable up to 24 credits, including original course. S/U grading.

Prerequisites & Notes: Graduate status and prior approval by the Graduate School are required.

Credits: 1-24

Grade Mode: S/U

Leadership Studies

Introduction

The Leadership Studies program engages students in the formal study of leadership as a phenomenon that students observe, reflect on, and participate in. Through Leadership Studies, students become familiar with the practice and consequences of leadership in a variety of cultural and historical contexts. Empirical research, reflective inquiry, critical thinking, and the analysis of leadership theory, research, and practice are integral to the Leadership Studies program. While Leadership Studies are based in the social sciences, curricular initiatives will include interdisciplinary contributions from the arts, humanities, sciences, and applied and professional studies.

Program Objectives

Students in Leadership Studies will develop knowledge in the following areas of study:

- the definition of and impact of leadership

Leadership Studies Minor

Leadership Studies Program, University Interdisciplinary Programs

24 credits

Introduction

The Leadership Minor provides a focused course of study and reflective practice in leadership that enables students to combine formal learning of leadership foundations and leadership skills. The Minor enables students to develop knowledge, skills and experience in leadership that are transferable to a wide range of civic and career settings.

Why Consider a Leadership Studies Minor?

The Leadership Minor provides a focused course of study and reflective practice in leadership that enables students to combine formal learning of leadership foundations and leadership skills. The minor enables students to develop knowledge, skills and experience in leadership that are transferable to a wide range of civic and career settings.

- the cultural and contextual forces that influence leadership processes and outcomes
- theories of leadership and their implications for leadership practice and development
- the relationship between leadership and power in social relations
- the connection between leadership style and team effectiveness
- the role of leadership in creating and managing change
- the ethical issues and consequences of leadership action
- the process of leadership development

How to Declare (Admission and Declaration Process):

Dependent upon completion of LDST 101 with a grade of B or greater and completion of the Leadership Minor plan of study form.

Grade Requirements

A grade of C- or better is required for a student's minor courses, and supporting courses for the minor with the exception of LDST 101 which has a requirement of a grade of B or better.

Requirements

- LDST 101 - Introduction to Leadership Studies
- At least one Foundation Course from the following:
 - COMM 224 - Small Group Processes
 - COMM 225 - Communication, Diversity and Controversy
 - COMM 228 - Organizational Communication
 - COMM 325 - Intercultural Communication
 - LDST 420 - Foundations of Student Leadership
 - LBRL 281 - Representations of Otherness
 - MGMT 311 - Introduction to Management and Organizational Behavior
 - PSY 240 - Social Psychology
 - SOC 340 - Sociology of Organizations
- At least one Applied Course from the following:
 - COMM 331 - Advanced Public Speaking
 - LDST 340 - Peer Leadership Education
 - LDST 341 - Practicum in Applied Leadership
 - LDST 450 - Leadership and Pedagogy
 - MGMT 414 - Leadership Practicum
 - THTR 314 - Stage Management
- Elective course(s) under advisement by faculty advisors for Leadership Studies
- LDST 495 - Leadership Reflection and Development
- The minor may include no more than 4 credits from the following:
 - LDST 300 - Directed Independent Study
 - LDST 341 - Practicum in Applied Leadership
 - LDST 400 - Directed Independent Study

Leadership Studies Courses

LDST 100 - Leading Responsibly

Introduction to and critical examination of select virtues and character strengths associated with leading responsibly. Topics studied in class will be applied in a service learning experience.

Prerequisites & Notes: Exclusively required of students admitted to WWU as a Western Leadership Scholarship recipient.

Credits: 2

Grade Mode: Letter

GUR Attributes: SSC

LDST 101 - Introduction to Leadership Studies

An introduction to leadership theory, research and practice in small groups, organizational and

societal contexts.

Credits: 5

Grade Mode: Letter

GUR Attributes: SSC

LDST 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

LDST 340 - Peer Leadership Education

Learn peer leadership training methodology from trainee/group needs assessment to module

LEADERSHIP STUDIES

design/delivery and post-module evaluation. In pairs or teams, design a student leadership training module for an existing student group or team, deliver and evaluate effectiveness of that training module. Deepen leadership knowledge and skills.

Prerequisites & Notes: Sophomore, junior or senior status and instructor's permission.

Credits: 3

Grade Mode: Letter

LDST 341 - Practicum in Applied Leadership

Supervised work in leadership with an educational program or institution, public agency, private enterprise, or non-governmental organization. Meetings, written reports, and a paper related to the Practicum are required. Repeatable up to 6 credits including original course. A maximum of 4 credits may be applied to the LDST minor.

Prerequisites & Notes: Sophomore, junior or senior status and instructor permission.

Credits: 2-6

Grade Mode: Letter

LDST 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

LDST 420 - Foundations of Student Leadership

Introduces leadership theories and facilitates student understanding of their leadership styles and strategies as emerging leaders.

Prerequisites & Notes: Recommendation for enrollment by faculty/staff.

Credits: 3

Grade Mode: Letter

LDST 450 - Leadership and Pedagogy

Serve as discussion section leader for students taking Introduction to Leadership Studies. Learn instructional methods, gain further mastery of leadership course content and personal leadership skills. Lead discussions, and provide feedback for students enrolled in Introduction to Leadership Studies.

Prerequisites & Notes: LDST 101 and instructor permission.

Credits: 5

Grade Mode: Letter

LDST 495 - Leadership Reflection and Development

Integration and development of leadership skills through reflective practice.

Prerequisites & Notes: Instructor's permission; Completion of LDST 101 with a minimum grade of B; 20 credits toward the Minor in Leadership Studies.

Credits: 2

Grade Mode: Letter

Seminar

Seminar Courses and the FIG Program

The First-Year Interest Group (FIG) program offers entering students a chance to satisfy General University Requirements (GURs) at the same time that they participate in a learning community for freshmen only. FIG students co-enroll in two designated GUR classes and a small seminar (SMNR 101). FIG clusters are limited to first-year students and are available fall quarter only. While the GUR courses in a FIG cluster will usually be large, the attached SMNR 101 is limited to 25 students.

The FIG seminar provides first-year students with access to resources that can help with their transition to Western. The program emphasizes faculty-student and student-student interaction as well as deeper learning.

The FIG seminar uses the context from the linked GUR lecture courses as a context for fostering critical thinking and building academic competencies.

For more information, contact the FIG Director, Steven VanderStaay, Old Main 480B, 360-650-3004, or via e-mail at Steven.Vanderstaay@wwu.edu.

Seminar Courses

SMNR 101 - Seminar in the Liberal Arts and Sciences for First-Year Students

An introductory seminar offering an exploration of academic content and essential questions within the liberal arts and sciences tradition. Includes embedded instruction in academic skills and use of campus resources pertinent to exploration of the FIG cluster theme. Concludes in a formal paper or academic presentation. FIG seminars are linked to FIG clusters or GUR strands. Repeatable under different topics.

Prerequisites & Notes: First-year students only.

Credits: 2

Grade Mode: Letter

GUR Attributes: FIG

Western Libraries

Western Libraries, with its Learning Commons partners, offers an array of resources, programs, and services designed to advance student learning and scholarship. Curricular offerings include credit-bearing courses on information literacy and special topics. Co-curricular services include tours and orientation sessions as well as opportunities for structured dialogue with faculty, staff, and community members. Curricular-embedded programming provides research and writing assistance for students in courses across disciplines through integrated research and writing workshops. In all its offerings, the Libraries helps students develop intellectual and practical skills for success while at Western and long after they graduate.

Library Faculty

MARK GREENBERG (2013) Dean of Libraries and Professor. BA, University of Toronto; MA, University of Western Ontario; PhD, University of Florida; MLS, University of South Florida.

JEANNE ARMSTRONG (1997) Professor. BA, University of Dayton; MLS, Dominican University; PhD, University of Arizona.

MARGARET FAST (1997) Associate Professor. BA, Mills College; MA, University of British Columbia; MLS, State University of New York at Albany.

J. GABRIEL GOSSETT (2009) Associate Professor. Extended Education and Human Services Librarian, BA, University Wisconsin-Milwaukee; MLS, University Wisconsin-Madison.

ELIZABETH JOFFRION (2012) Associate Professor. Director of Heritage Resources; BA, Louisiana State University; MA, University of New Orleans; MLS, University of Maryland.

ROBERT LOPRESTI (1987) Professor. BA, Juniata College; MLS, Rutgers, The State University.

REBECCA MARRALL (2010) Associate Professor. Discovery Services Librarian; BS, Portland State University; MLS, University of Hawaii.

JENNY OLEEN (2014) Assistant Professor. Scholarly Communications Librarian; BS, Kansas State University; BS, University of Arizona; MLS, Indiana University.

MIKE OLSON (2014) Associate Professor. Director of Scholarly Resources and Collection Services; BA, University of Washington; MA, UCLA; PhD, UCLA; MLS, UCLA.

ANDREA PETERSON (1999) Associate Dean of Libraries. BA, University of Utah; MLS, Indiana University.

PAUL PIPER (1997) Professor. BS, MFA, University of Montana; MLIS, University of Hawaii.

JEFF PURDUE (1999) Associate Professor. BA, MA, University of Illinois at Chicago; MLIS, Dominican University.

MARIAN A. RITTER (1969) Associate Professor. BME, MLS, University of Portland.

PETER A. SMITH (1990) Associate Professor. BA, MA, MLS, Wayne State University.

ELIZABETH STEPHAN (2008) Associate Professor. BA, NW Missouri State University; MLS, University of Wisconsin-Madison

SYLVIA TAG (1997) Associate Professor. BA, The Colorado College; MLIS, University of Iowa.

Library Courses

LIBR 201 - Introduction to Research Strategies

Introduction to the nature of research and the interpretation of information. Emphasizes information literacy, including: carrying out inquiry, locating both print and online resources, analyzing and interpreting a variety of sources for authority and authenticity, and incorporating material from sources into writing.

Prerequisites & Notes: ENG 101 or equivalent.

Credits: 4

Grade Mode: Letter

GUR Attributes: CCOM

LIBR 300 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

LIBR 302 - Research Paper Tutorial

This course is intended to be linked with upper-level writing intensive courses. The purpose of this course is to familiarize students with the methods of identifying the relevant body of knowledge in a discipline and the library research methods that will enable them to utilize this knowledge in successfully writing assigned research papers. Includes developing a research strategy and collecting resources for an annotated bibliography to accompany an assigned research paper in a linked 300-level course.

Prerequisites & Notes: concurrent enrollment in 300-level writing intensive course

Credits: 1-4

Grade Mode: Letter

LIBR 302A - Research Paper Tutorial

This course is intended to be linked with upper-level writing intensive courses. The purpose of this course is to familiarize students with the methods of identifying the relevant body of knowledge in a discipline and the library research methods that will enable them to utilize this knowledge in successfully writing assigned research papers. Includes developing a research strategy and collecting resources for an annotated bibliography to accompany an assigned research paper in a linked 300-level course.

Prerequisites & Notes: coreq: EAST 302, HIST 499

Credits: 1 to 4

Grade Mode: L

LIBR 320 - Topics in Information Studies

Varying topics and information studies including emerging technologies and trends in scholarly research. Repeatable to a maximum of 6 credits.

Credits: 1-3

Grade Mode: Letter

LIBR 339 - Practicum in Academic Literacies: Research-Writing Emphasis

Through individualized learning plans developed in consultation with the instructor, students will gain and apply research, reading, and writing strategies for completing their coursework. LIBR 339 should be paired with GUR or upper division coursework. Repeatable to a maximum of 6 credits including the original course. S/U grading.

Prerequisites & Notes: Instructor permission.

Credits: 1-3

Grade Mode: S/U

LIBR 340 - Practicum in Academic Literacies: Speaking-Listening Emphasis

Through participation in Western's Teaching-Learning Academy, students gain and apply concepts and strategies for facilitating civil discourse in an academic setting. Informed by reading selected articles on the nature of civil discourse, practicum students facilitate small dialogue groups and do midterm and final reflective commentaries on what they have learned about speaking and listening in an academic context regarding teaching and learning issues. With approval from the instructor, practicum students may choose to earn additional practicum credit by participating in follow-up TLA-related projects. Repeatable up to 12 credits including original course. S/U grading.

Prerequisites & Notes: Instructor permission.

Credits: 1-3

Grade Mode: S/U

LIBR 400 - Directed Independent Study

An individualized course of study not available through or replacing existing curriculum, to be arranged between one matriculating student and sponsoring faculty member. All academic policies and registration deadlines apply. Directed Independent Study courses cannot substitute for General University Requirements and are not eligible for tuition waiver.

Credits: 1-15

LIBR 402 - Research Tutorial

Examines library resources, research processes, and scholarly discourse for upper-division students in a particular discipline. An upper-division library course intended to support advanced research methodologies for students in a particular major. Not repeatable. Letter graded. Equivalent to LIBR 403. Cannot take both LIBR 402 and 403 for credit.

Prerequisites & Notes: Junior or Senior status or permission of instructor.

Credits: 1-4

Grade Mode: Letter

LIBR 403 - Research Tutorial

Examines library resources, research processes, and scholarly discourse for upper-division students in a particular discipline. An upper-division library course intended to support advanced research methodologies for students in a particular major. Not repeatable. S/U grading. Equivalent to LIBR 402. Cannot take both LIBR 402 and 403 for credit.

Prerequisites & Notes: Junior or Senior status or permission of instructor.

Credits: 1-4

Grade Mode: S/U

LIBR 439 - Practicum in Academic Literacies: Research-Writing Emphasis

Through individualized learning plans developed in consultation with the instructor, students will gain and apply research, reading, and writing strategies for completing their coursework. LIBR 439 should be paired with 400-level coursework or above. Repeatable to a maximum of 6 credits including the original course. S/U grading.

Prerequisites & Notes: Instructor permission.

Credits: 1-3

Grade Mode: S/U

WESTERN LIBRARIES

LIBR 473 - Methods for Writing Assistants

Study and practice in theories and strategies for guiding writers, in groups or one-to-one, online or face-to-face. Repeatable up to 6 credits, including original course. S/U grading.

Prerequisites & Notes: Selection as a Writing Center Assistant.

Credits: 1-3

Grade Mode: S/U

LIBR 499 - Special Problems

Research designed to demonstrate the student's competence in working with the tools of the discipline. Also offered as AMST 499.

Prerequisites & Notes: AMST 301

Credits: 4

Grade Mode: Letter

All-University Programs

Western Washington University is organized into seven colleges and a Graduate School. This organization not only accommodates Western's size and complexity, but also enables flexibility and innovation in Western's curriculum.

Some programs at Western are available through one department or college; some are interdisciplinary, involving several academic units; and some, the All-University Programs listed below, involve all or most of Western's departments and colleges.

Institute for Global Engagement

360-650-7544
international.wwu.edu

The Institute for Global Engagement (IGE) serves Washington State by providing internationally-focused educational experiences that prepare students to be global citizens and by supporting faculty and staff who are engaged inter-culturally.

The International Studies Minor is housed in IGE, with the executive director of the institute serving as academic advisor and the International Studies Curriculum Committee advising on the minor's content and focus. The institute also coordinates Western's international partnerships with institutions around the world and works with faculty on internationalization initiatives at Western.

The Education Abroad office and International Student and Scholar Services are both located in IGE.

Education Abroad

The Education Abroad office (EdAbroad) administers and cooperates in more than 100 international education programs in Asia, Europe, Latin America, Middle East, Oceania and Africa. A variety of international study, exchange and internship options are available for a quarter, semester, or academic year. Qualified students for all international study and exchange programs are concurrently enrolled at the University and in the international study program or institution; they earn WWU credit while maintaining WWU student status, financial aid eligibility and residency.

For more information, contact the Education Abroad office, Miller Hall 208, 360-650-3298, EdAbroad@wwu.edu; studyabroad.wwu.edu.

Global Learning Programs

Global Learning Programs are courses designed by WWU faculty within their departments that are discipline-specific or interdisciplinary, and often apply to a student's major or minor. Courses may include field studies and service learning. Global Learning Programs are led by WWU faculty throughout the year to different countries around the world.

For more information, contact the Education Abroad office in Miller Hall 208, 360-650-3298, EdAbroad@wwu.edu; studyabroad.wwu.edu.

International Student and Scholar Services

The ISSS Office serves international students, faculty and scholars at Western by providing orientation sessions, advising, and co-curricular activities as well as preparation and maintenance of immigration records. In coordination with other university offices and community resources, ISSS also assists with resolving financial, personal, academic, and employment issues for Western's international population.

For more information, contact International Student and Scholar Services, Miller Hall 212, 360-650-6517; www.wwu.edu/iss.

Center for Service-Learning

360-650-7542
www.wwu.edu/csl

Service-learning is an experiential learning method in which students learn through active participation in meaningful service experiences that meet community needs. Service-learning offers students the opportunity to learn outside the classroom, explore the richness and diversity of their community, and examine social justice issues while applying classroom theory in a community setting.

The Center for Service-Learning provides resources, including training and program support, to students, faculty, and community partner organizations.

Western offers many courses that include service-learning; look for the SL designation on Classfinder or contact the Center to learn more.

Field Experience Programs

Western Washington University recognizes that work experience outside of the classroom can enhance student learning by providing opportunities to put theory into practice. To this

ALL-UNIVERSITY PROGRAMS

end, the University works closely with a wide variety of businesses and community and governmental agencies which offer internship opportunities, and many academic departments require or make academic credit available for field experience.

Students interested in exploring field experience opportunities should contact the Career Services Center, Old Main 280.

Pre-Professional Pathways

Admission to graduate professional schools requires a baccalaureate degree and is competitive. Early consultation with the relevant advisor and excellent academic work are crucial to success.

Chiropractic

Currently, there are 15 programs and institutions accredited by the Council on Chiropractic Education. Students commonly prepare for entry to a Doctor of Chiropractic (DC) program by obtaining a baccalaureate degree along with completing requirements as specified by targeted programs: prerequisite course work and obtaining observational, volunteer, and/or clinical experience under the direction of a chiropractor.

Students may complete undergraduate degrees in any area; no specific major is preferred or encouraged. Admission requirements are highly variable with many schools allowing for completion of set quarter hours accumulated across life and physical sciences disciplines rather than mandating specific courses to complete. Common requirements include courses and related lab work in biology, inorganic chemistry, organic chemistry, and physics, along with a breath of Humanities and Social Science (GUR) studies.

Information about the field can be obtained from the American Chiropractic Association website, www.acatoday.org. Most programs base their requirements for admission on prerequisites established by the Council on Chiropractic Education (CCE). Access to accredited schools and their admission requirements are featured on its website at cce-usa.org. Students should review programs they wish to qualify for early in their academic planning in order to guide their development of a plan of study, including selection of GUR coursework.

Students are encouraged to seek advisement from the pre-healthcare professions advisors. Early and ongoing consultation with the advisors is strongly recommended to discuss matters such as selection of a major, course sequences, shadowing,

graduation requirements, application procedures, and other pertinent information.

Typical freshman year curriculum:

- CHEM 121, 122, 123 (begin 121 as soon as possible)
- BIOL 204, 205 (continues into second year)
- ENG 101
- MATH (level depends upon chosen major)
- General University Requirements (to include Psychology, Communication)

Pre-chiropractic students should also seek advising in their major department.

Advisors: Dr. George Kriz, Director of Advising for Pre-Healthcare Professions, George.Kriz@wwu.edu; Renée Murray and Anna Tognazzini, Graduate and Pre-Professional Programs Advisors, Renee.Murray@wwu.edu, Anna.Tognazzini@wwu.edu; Old Main 280, 360-650-4240; www.wwu.edu/careers/peacehealth.shtml.

Dentistry

Admission to dental schools is highly selective and includes evaluation of GPA, letters of recommendation, scores from the Dental Admission Test (DAT), and an interview, as well as demonstrated dental knowledge, manual dexterity, and community service.

Course requirements for entry into a dental program afford each applicant an opportunity to pursue any area of interest as a major field of study and still acquire the background necessary to prepare for the DAT and to pursue a dental curriculum. The DAT must be taken at least one full year prior to admission to dental school; normally it is taken in the junior year.

Early consultation with the pre-healthcare professions advisors is strongly recommended. Students will find it valuable to engage in early and regular discussions of matters such as selection of a major, course sequences community service, shadowing, and graduation requirements at Western, as well as dental school entrance requirements, application procedures, the DAT, mock interview, and other pertinent information.

Typical freshman year curriculum:

- CHEM 121, 122, 123 (begin 121 as soon as possible)
- BIOL 204, 205, 206 (continues into second year)
- ENG 101

- MATH (pre-calculus or calculus, depending upon major)
- General University Requirements

Pre-dentistry students should also seek advising in their major department.

Advisors: Dr. George Kriz, Director of Advising for Pre-Healthcare Professions, George.Kriz@wwu.edu; Renée Murray and Anna Tognazzini, Graduate and Pre-Professional Programs Advisors, Renee.Murray@wwu.edu, Anna.Tognazzini@wwu.edu; Old Main 280, 360-650-4240; www.wwu.edu/careers/prehealth_dentistry.shtml.

Law

Law schools require a baccalaureate degree. They do not require a specific undergraduate major, but do seek students who are broadly educated. Admission is selective based primarily on GPA, LSAT scores and letters of recommendation. Law schools want students who excel in oral and written communication; understand economic, political and social institutions; and have well-developed objective and critical thinking skills. Western's General University Requirements are intended to aid students in honing these skills.

The Law School Admission Test (LSAT), normally required of applicants to American and Canadian law schools, is offered on the Western campus several times each year. Applications and test schedule information may be obtained from the Testing Center and the Department of Political Science. Students should plan to take the LSAT late in their junior year or early in their senior year.

Students are encouraged to explore academic and extracurricular opportunities provided by Fairhaven College's Center for Law, Diversity and Justice (CLDJ). All WWU students are eligible to apply to join the Law, Diversity and Justice minor, and Fairhaven students are eligible to pursue a Law, Diversity and Justice concentration (major). For more information on the Center for Law, Diversity and Justice and the LDJ curriculum, contact Prof. Julie A. Helling, Fairhaven College of Interdisciplinary Studies.

Advisors: Dr. Paul Chen, Department of Political Science, Arntzen Hall 436, 360-650-4876, Paul.Chen@wwu.edu; Julie A. Helling, Fairhaven College, FA 311, 360-650-4907, Julie.Helling@wwu.edu.

Medicine

The faculties of the School of Medicine at the University of Washington and other medical and

osteopathic schools in the U.S. believe that the appropriate level of scholarly achievement and preparation for medicine can best be developed in a liberal arts program with the emphasis on a discipline selected by the student.

In recognition of the diverse opportunities afforded the graduate in medicine, specified entrance requirements are purposely kept to a minimum. This enables each student to pursue, as a major field of study, almost any area of interest — the arts, humanities, social sciences, biological or physical sciences — and still acquire the background necessary to prepare for the Medical College Admission Test (MCAT) and to pursue a medical curriculum. The MCAT must be taken at least one full year prior to admission to medical school; normally it is taken in the junior year.

Early consultation with the pre-healthcare professions advisors is strongly recommended. Students will find it valuable to engage in early and regular discussions of matters such as selection of a major, course sequences, community service, physician shadowing, and graduation requirements at Western, as well as medical school entrance requirements, application procedures, the MCAT, mock interview, and other pertinent information.

Typical freshman year curriculum:

- CHEM 121, 122, 123 (begin 121 as soon as possible)
- BIOL 204, 205, 206 (continues into second year)
- ENG 101
- MATH (pre-calculus or calculus, depending upon major)
- PSY 101
- General University Requirements

Premed students should also seek advising in their major department.

Advisors: Dr. George Kriz, Director of Advising for Pre-Healthcare Professions, George.Kriz@wwu.edu; Renée Murray and Anna Tognazzini, Graduate and Pre-Professional Programs Advisors, Renee.Murray@wwu.edu, Anna.Tognazzini@wwu.edu; Old Main 280, 360-650-4240; www.wwu.edu/careers/prehealth.shtml.

Nursing

Many Western students enter nursing programs by transferring to a nursing program or by entering a nursing program after graduation. Registered Nurse (R.N.) credentials are obtained after successfully completing a state board examination following completion of a certified nursing program at the community college Associate of Science in Nursing (ASN), also known as an Associate Degree

ALL-UNIVERSITY PROGRAMS

in Nursing (ADN), a four-year university (BSN) or direct-entry Masters of Science (MSN) program. (A 'direct entry masters' is a master's degree that accepts students who have a bachelor's degree, but do not have a RN credential. Some MSN programs, such as University of Washington's are only for students who already are RNs). To be eligible for a nursing education program, students must complete a specified set of prerequisites and obtain volunteer or paid health care experience. Students may work on completing the prerequisites at WWU and apply for entry into the ASN or BSN program, with or without a degree at WWU. Completion of a degree is required for the direct-entry MSN program. Western offers an RN-to-BSN program for nurses who have already obtained RN credentials, and subsequently wish to obtain a Bachelor's degree in nursing (BSN). Information on Western's RN-to-BSN program is available at the Woodring College of Education website: wce.wwu.edu/bsn/rn-bsn-program.

Information on nursing education programs can be obtained from: the Accreditation Commission for Education in Nursing, www.acenursing.org, the American Association of Colleges of Nursing, www.aacn.nche.edu/students, and www.allnursingschools.com.

Pre-Nursing is not a major at WWU. Examples of Western majors that cover some or all of the prerequisites include: Biology-Anthropology, Biology, Community Health, and Kinesiology/Pre-Healthcare Professions.

Volunteer work: It is recommended that students obtain minimally 200 hours of volunteer or paid health care experience. It is also recommended that students consider obtaining the Certified Nursing Assistant license via a local technical or community college.

Courses which are common to many prerequisite requirements for nursing programs:

- BIOL 101 or 204, 205
- BIOL 245 or 345, 346
- BIOL 348, 349
- CHEM 121, 251
- ENG 101, 202
- PSY 101, 230
- HLED 350
- ANTH 201, 424
- Statistics

Advisors: Dr. George Kriz, Director of Advising for Pre-healthcare Professions, George.Kriz@wwu.edu; Renee Murray and Anna Tognazzini, Graduate and Pre-Professional Programs Advisors, Renee.Murray@wwu.edu; Anna.Tognazzini@wwu.edu; OM 280, 360-650-4240; www.wwu.edu/careers/prehealth.shtml.

Nutrition

The Commission on Accreditation for Dietetics Education (CADE) is the American Dietetic Association (ADA) accrediting agency for education programs preparing students for careers as registered dietitians or dietetic technicians, registered. Only graduates of CADE-accredited programs are eligible to take the exam to become a Registered Dietitian or Dietetic Technician, Registered. Individuals who only have degrees in nutrition, dietetics or other related areas from programs that are not CADE-accredited are not eligible to take the exam to become a Registered Dietitian (RD) or Dietetic Technician, Registered. If a person is not a RD, they are not eligible for many jobs in the nutrition field. WWU is not CADE-accredited. WWU students wishing to become nutritionist must continue their education at a CADE-accredited program at another school.

CADE accredited programs, and other information on becoming a RD can be obtained at: www.eatright.org/students/education/accreditedprograms.aspx.

Courses which are common to many prerequisite requirements for nutrition programs:

- BIOL 204, 205, 245
- BIOL 348, 349
- CHEM 121, 122, 123, 251, 375
- PSY 101
- HLED 350

Advisors: Dr. Gordon Chalmers, ET 275, 360-650-3113, Gordon.Chalmers@wwu.edu; Dr. Dave Suprak, CV 105, 360-650-2586, Dave.Suprak@wwu.edu

To schedule a meeting with an advisor contact: Health and Human Development General Office (BH 103, Sherena.Gearity@wwu.edu, 360-650-3505) and she will assign you to an advisor. Then you should contact your assigned advisor to schedule an appointment.

Pre-nutrition advising webpage: www.wwu.edu/alliedhealth/Pre-Chiropractic.shtml.

Occupational Therapy

Students prepare for entry to a graduate program in occupational therapy by obtaining a baccalaureate degree, completing the prerequisite course work for entry into specific programs, and by obtaining a broad variety of volunteer clinical experience under the direction of an occupational therapist. Students may complete undergraduate degrees in any area. Most programs require

submission of scores for the Graduate Record Exam (GRE - general test only).

Specific information on each occupational therapy program can be obtained from the American Occupational Therapy Association at www.aota.org/Educate/Schools.aspx. Students are encouraged to review prerequisite courses early in their academic planning and to develop a plan of study within the first quarter of entry to Western.

Pre-Occupational Therapy is not a major at WWU. Examples of Western majors that cover some or all of the prerequisites include: Biology-Anthropology, Community Health and Kinesiology/Pre-Healthcare Professions.

Courses which are common prerequisites to many occupational therapy programs:

- PSY 101, 230, 250
- BIOL 204, 205
- BIOL 348, 349
- CHEM 121, 122
- PHYSICS 101
- MATH 240, KIN 307 or BIOL 340

Advisors: Dr. Gordon Chalmers, ET 275, 360-650-3113, Gordon.Chalmers@wwu.edu; Dr. Dave Suprak, CV 105, 360-650-2586, Dave.Suprak@wwu.edu

To schedule a meeting with an advisor contact: Health and Human Development General Office (BH 103, Sherena.Geariety@wwu.edu, 360-650-3505) and she will assign you to an advisor. Then you should contact your assigned advisor to schedule an appointment.

Pre-occupational therapy advising webpage: www.wwu.edu/alliedhealth/Pre-Occupational%20Therapy.shtml.

Optometry

Twenty-one accredited optometry programs in the U.S. offer the Doctor of Optometry (OD). Admission into an optometry program is highly selective and includes evaluation of GPA, letters of recommendation, scores from the Optometry Admission Test (OAT), an interview, and demonstrated exposure to the profession. Specific schools and their requirements may be accessed from the Association of Schools & Colleges of Optometry (ASCO), www.opted.org.

A strong and broad undergraduate academic background in Chemistry, Biology, Mathematics, Physics, English and Psychology is emphasized yet no specific major is preferred. Students may pursue a major of any area of interest while still acquiring the background necessary to prepare for

the Optometry Admission Test (OAT) and to pursue an optometry curriculum. The OAT must be taken at least one full year prior to admission to optometry school; normally it is taken in the junior year.

Early consultation with the pre-healthcare professions advisors is strongly recommended. Students will find it valuable to engage in early and regular discussions of matters such as selection of a major, course sequences, community service, shadowing, and graduation requirements at Western, as well as optometry school entrance requirements, application procedures, the OAT, mock interview, and other pertinent information.

Typical freshman year curriculum:

- CHEM 121, 122, 123 (begin 121 as soon as possible)
- BIOL 204, 205, 206 (continues into the second year)
- ENG 101
- MATH 124
- PSY 101
- General University Requirements (including public speaking)

Pre-optometry students should also seek advising in their major department.

Advisors: Dr. George Kriz, Director of Advising for Pre-Healthcare Professions, George.Kriz@wwu.edu; Renée Murray and Anna Tognazzini, Graduate and Pre-Professional Programs Advisors, Renee.Murray@wwu.edu, Anna.Tognazzini@wwu.edu; OM 280, 360-650-4240; www.wwu.edu/careers/prehealth.shtml.

Pharmacy

Programs at Washington State University, University of Washington, and other institutions lead to a Doctor of Pharmacy degree. Western provides courses that prepare students for admission to these and other programs. Admission into a pharmacy program is highly selective and includes evaluation of GPA, letters of recommendation, scores from the Pharmacy College Admissions Test (PCAT) or Graduate Record Examination (GRE), and an interview.

Students can pursue almost any area of interest as a major field of study and still acquire the background necessary to prepare for the PCAT (or GRE) and pursue a pharmacy curriculum. The PCAT, required by about 2/3 of pharmacy schools, (or GRE) must be taken prior to admission to pharmacy school; normally it is taken in the junior year.

ALL-UNIVERSITY PROGRAMS

Because admission requirements at pharmacy programs are highly variable, students are strongly encouraged to seek advisement from the pre-healthcare professions advisors. Students will find it valuable to engage in early and regular discussions of matters such as selection of a major, course sequences, GUR courses, community service, shadowing, and graduation requirements at Western, as well as pharmacy school entrance requirements, application procedures, the PCAT and GRE, mock interview, and other pertinent information.

Typical freshman year curriculum:

- CHEM 121, 122, 123 (begin 121 as soon as possible)
- BIOL 204, 205, 206 (continues into the second year)
- ENG 101
- MATH 124
- PSY 101
- General University Requirements (including public speaking, microeconomics, and logic or ethics)

Pre-Pharmacy students should also seek advising in their major department.

Advisors: Dr. George Kriz, Director of Advising for Pre-Healthcare Professions, George.Kriz@wwu.edu; Renée Murray and Anna Tognazzini, Graduate and Pre-Professional Programs Advisors, Renee.Murray@wwu.edu, Anna.Tognazzini@wwu.edu; OM 280, 360-650-4240; www.wwu.edu/careers/prehealth.shtml.

Physical Therapy

Admission to a graduate program in physical therapy is highly selective. Students prepare for entry by obtaining a baccalaureate degree, completing the prerequisite course work for entry into each specific program, and by obtaining volunteer clinical experience. Students may complete undergraduate degrees in any area. Most physical therapy programs are three-year programs offered at the doctoral level.

Admission requirements for entry into a physical therapy program include the completion of a required prerequisite set of courses, three letters of recommendation and the completion of an internship under the direction of a physical therapist (200 to 500 hours). Most programs require submission of scores from the Graduate Record Exam (GRE — general test only) and some require a minimum score on the two sections of the GRE. The GRE should be taken in the fall quarter of the application year.

Specific information on each program can be obtained from the PT Education link on the American Physical Therapy Association home page at www.apta.org. Program prerequisites, statistics, and curriculums are presented by geographic location. Students are encouraged to review prerequisite courses early in their academic planning and to develop a plan of study within the first quarter of entry to Western.

Courses which are common to many prerequisite requirements for physical therapy programs:

- BIOL 204, 205
- BIOL 348, 349
- CHEM 121, 122, 123
- PHYS 114, 115, 116
- PSY 101, 230 or 250
- Statistics

Advisors: Dr. Gordon Chalmers, ET 275, 360-650-3113, Gordon.Chalmers@wwu.edu; Dr. Dave Suprak, CV 105, 360-650-2586, Dave.Suprak@wwu.edu

To schedule a meeting with an advisor contact: Health and Human Development General Office (BH 103, Sherena.Gearity@wwu.edu, 360-650-3505) and she will assign you to an advisor. Then you should contact your assigned advisor to schedule an appointment.

Pre-physical therapy advising webpage: www.wwu.edu/alliedhealth/Pre-Physical%20Therapy.shtml.

Physician Assistant

Students prepare for entry to a physician assistant program by obtaining a baccalaureate degree, completing the prerequisite course work for entry into specific programs, and by obtaining a broad variety of volunteer clinical experience. Students may complete undergraduate degrees in any area.

Information about the field can be obtained from the American Academy of Physician Assistants website www.aapa.org/. Specific information on each physician assistant program can be obtained from listings of entry level PA programs at www.arc-pa.org/acc_programs/ and www.paeaonline.org/index.php?ht=d/ContentDir/pid/255.

Courses which are common to many prerequisite requirements for physician assistant programs:

- BIOL 204, 205
- BIOL 245 or 345, 346
- BIOL 348, 349
- CHEM 121, 122, 123

- CHEM 251 or 351, 352, 353
- CHEM 375
- PSY 101, 230 and/or 250
- Statistics

Advisors: Dr. George Kriz, Director of Advising for Pre-healthcare Professions, George.Kriz@wwu.edu; Renee Murray and Anna Tognazzini, Graduate and Pre-Professional Programs Advisors, Renee.Murray@wwu.edu; Anna.Tognazzini@wwu.edu; OM 280, 360-650-4240; www.wwu.edu/careers/prehealth.shtml.

Veterinary Medicine

Washington State University and 29 other U.S. veterinary medical colleges offer the Doctor of Veterinary Medicine (DVM). Admission into a veterinary medicine program is highly selective and includes evaluation of GPA, Graduate Record Exam (GRE), extracurricular and community service, volunteer experience within the field, letters of recommendation and an interview. Western offers coursework that will satisfy the pre-requisites of most DVM programs.

Students can pursue almost any area of interest as a major field of study and still acquire the background necessary to prepare for the GRE and pursue a veterinary medicine curriculum. The GRE must be taken at least one full year prior to admission to veterinary medical school; normally it is taken in the junior year.

Because admission requirements at veterinary medical schools are highly variable students are strongly encouraged to seek advisement from the pre-healthcare professions advisors. Early and ongoing consultation with the advisors is strongly recommended to discuss matters such as selection of a major, course sequences, community service, shadowing, graduation requirements, application procedures, the GRE, mock interview, and other pertinent information.

Typical freshman year curriculum:

- CHEM 121, 122, 123 (begin 121 as soon as possible)
- BIOL 204, 205, 206 (continues into second year)
- ENG 101
- MATH 124
- General University Requirements (Public speaking beneficial for approximately 1/2 of the Veterinary Medicine schools).

Pre-veterinary students should also seek advising in their major department.

Advisors: Dr. George Kriz, Director of Advising for Pre-Healthcare Professions, George.Kriz@wwu.edu; Renée Murray and Anna Tognazzini, Graduate and Pre-Professional Programs Advisors, Renee.Murray@wwu.edu, Anna.Tognazzini@wwu.edu; OM 280, 360-650-3268; www.wwu.edu/careers/prehealth.shtml.

Professional Transfer Programs

Students who plan to complete a baccalaureate program at another institution should seek advice from that institution for curriculum planning, test requirements and information on application procedures.

The institution to which the student is transferring determines admission to the program and makes decisions regarding the transferability of credit.

Programs undergo constant revision. The student, therefore, must bear responsibility for continued contact with the transfer institution.

Extended Education

Dr. Earl Gibbons

Vice Provost, Extended Education

College Hall 131, 360-650-3308

www.wvu.edu/ee/

Extended Education

Extended Education (EE) supports and delivers Western programs to students and community members within and beyond the borders of Bellingham campus.

EE at Western had its beginnings in 1912 when the first home study courses were created for teachers. Fast forward to the 21st century where EE has expanded and diversified WWU offerings in Bellingham and throughout the Puget Sound region, emphasizing community college partnerships in Seattle, Everett, Port Angeles, Mount Vernon, Bremerton, and Poulsbo to deliver degree and learning options for all ages.

EE supports undergraduate, graduate, certificate/endorsement, and online programs. Individual distance learning courses are offered via Term-Based online and Self-Paced independent learning online for degree completion and professional development purposes. EE also facilitates Western's Summer Session.

EE connects diverse learners to the Western Experience by collaborating with colleges, departments and the community, linking university resources with educational needs and opportunities both on and off campus, including international education opportunities. EE reaches out to the public with academic workshops and summer programs for Youth, non-credit enrichment courses for lifelong learners, and professional development for those seeking career advancement. In addition, EE facilitates conferences for groups and organizations, both on and off campus.

All of Western's extension programs, courses, and degrees meet the same requirements and standards as set by the institution unless otherwise noted.

Most programs and courses offered through EE are self-sustaining (not funded by legislative appropriation). Tuition and fees are charged per credit at extension rates and are subject to change.

Mission

Extended Education connects learners of all ages to the Western Experience. Extended Education

collaborates with colleges, departments, and the community, linking university resources with educational needs and opportunities both on and off campus.

Vision Statement

Extended Education will share the Western Experience with students of all ages through learning opportunities across time and place by expanding partnerships – campus and beyond – to build a stronger Washington.

Statement of Quality

Extended Education is committed to the same high standards of quality for which Western is well known. Programs and courses are designed and/or revised with the assistance of university faculty, aided by industry and community experts and are reviewed and approved by Western Washington University colleges, departments, and academic committees.

Degree programs

Lois Longwood, Director

360-650-6854

www.wvu.edu/ee/main/locations.shtml

The following academic programs are offered through the College of Business and Economics, College of Humanities and Social Sciences, College of Science and Engineering, Huxley College of the Environment, Woodring College of Education, and the Graduate School. For program information, visit the appropriate website listed below.

Many of these programs are self-sustaining and are contingent upon sufficient enrollment and available University resources.

Western on the Peninsulas

Candice Merrill, Director

360-394-2761

www.wwu.edu/peninsulas

For over 20 years, Western has offered degree, professional, and certificate programs to students on the Kitsap and Olympic Peninsulas. As part of Western's commitment to serve the citizens of Washington, Western collaborated with Olympic College in 2013 to establish the Western Washington University Center at Olympic College, Poulsbo to better serve the community and businesses on the Peninsulas. Western on the Peninsulas strives to meet the growing demand of the community by offering degree programs from the College of Business and Economics, College of Humanities and Social Sciences, College of Science and Engineering, Huxley College of the Environment, and Woodring College of Education.

Western Online

Andrew Blick

360-650-2841

WesternOnline@wwu.edu

www.wwu.edu/ee/westernonline/

Departments across campus, in conjunction with EE, offer alternatives for completing university course work, including General University Requirements (GURs), upper-division writing proficiency requirements, electives, and courses required for Western majors and minors. Many of the courses offered through WesternOnline are open to anyone - both Western students and the public may enroll. Degree seeking students should verify requirements for degree/major with the academic department.

Western Online:

www.wwu.edu/ee/westernonline/

Andrew Blick, 360-650-2841,

WesternOnline@wwu.edu

Online Term-Based

Online Term-Based courses begin and end with Western's quarterly schedule. Students may access the course 24 hours, seven days a week and work at the pace designated by the instructor. Current course offerings, registration information, and tuition details for Term-Based online courses can be found on the WesternOnline website at: www.wwu.edu/ee/westernonline/.

Self-Paced (formerly Independent Learning or Correspondence)

Kris Lewis, 360-650-3650, iLearn@wwu.edu

Self-Paced courses enable students to start anytime while following a course guide developed for the Self-Paced student. Students will have six months from the month of registration to complete their course. Registration information and current offerings can be found on the WesternOnline website at: www.wwu.edu/ee/westernonline/.

Language and Culture Programs

Dr. Frederick O'Connor, Director

360-650-3755

www.wwu.edu/ee/lcp

Asia University America Program

Dr. Dean Hagin, Director

360-650-3922

www.wwu.edu/auap

WWU-Asia University America Program (AUAP) is an English language and cultural orientation program that has been developed cooperatively with Asia University (Tokyo, Japan), Central Washington University, and Eastern Washington University. During this five-month study-abroad program, students from Asia University attend AUAP courses at Western in English as a Second Language, American Cultural Studies, and Global Issues. AUAP students earn credit from Asia University and are not matriculated to Western. Approximately 130 AUAP students come to Western each year, with sessions running from September to mid-February, and late February through late July.

AUAP offers a number of opportunities to the Western community:

- Language and cultural exchange opportunities to Western students and community residents through the Campus Friends, Community Friends, and Classroom Volunteer programs; these programs provide intercultural contacts both within and beyond the classroom.
- Informational programming about Japanese culture in various Western classes and residence-hall groups; in addition, AUAP staff facilitates exchanges with AUAP and regular Western classes.
- Interaction with Japanese students on a daily basis with Western students who share residence halls and dining rooms with AUAP students.
- Cultural-exchange services to the community, including programming in Bellingham public schools which introduces local elementary school children to Japanese language and culture and, most importantly, to international friendship.
- Participation by Western faculty and students in research opportunities through AUAP; faculty and students from the communications, foreign languages, psychology, business, and anthropology departments have conducted studies based on linguistic or attitudinal surveys.
- Paid leadership positions for Western students, such as international peer advisors and curriculum assistants; these positions give valuable experience in an intercultural context, provide opportunities to develop international friendships, and assist in financing their education.

Intensive English Program
Dr. Frederick O'Connor, Director
 360-650-3755
www.wvu.edu/ee/lcp/iep/

The Intensive English Program (IEP) provides a variety of English language courses designed to prepare international students for academic study at American colleges and universities. IEP classes, which are mostly noncredit, focus on preparing students for these academic experiences, as well as helping them to adapt socially and culturally to living in the U.S. The program emphasizes creating opportunities for Western students and IEP students to interact, both in the classroom and through informal conversational situations.

IEP, in cooperation with the Office of Admissions, manages the conditional admissions process, in which international students, as admitted undergraduates, enroll in a combination of regular academic classes and advanced English-language classes. Conditional admission functions as a bridging process from ESL to university coursework

and is designed to better prepare international students for study in degree programs.

Other academic collaboration areas of the University include the following:

- IEP works with Western faculty to facilitate intercultural experiences for current Western students in communications, management, psychology, anthropology, education, and world languages courses by arranging joint classes, projects and other interactions with IEP students.
- IEP is closely linked to Western's TESOL certificate program by providing practicum experience, tutoring experience, and employment opportunities for TESOL students.
- IEP provides opportunities for Western faculty who have professional relationships in other countries to bring students, individually or in groups, to campus for language and content-area study or for eventual matriculation into Western.

Bridge Program
Maggie Burnett
 360-650-4073
www.wvu.edu/ee/lcp/bridge/

Western Washington University's Bridge Program is an optional program designed to help international students make a successful transition into Western classes.

First-year or transfer international students experience a customized quarter of classes that provides extra support from Western faculty as students take credit-bearing coursework. Bridge students also benefit from activities and curriculum that explores language, culture, and transitioning into an American university.

Academy for Lifelong Learning

Lois Longwood, Director
 360-650-6854
www.wvu.edu/ee/all/

Academy for Lifelong Learning (A.L.L.) offers a diverse spectrum of academic and cultural courses and excursions to adults, regardless of age or educational background. Offerings are noncredit and are taught by Western faculty, faculty emeritus, and experts in various fields and professions.

EXTENDED EDUCATION

Professional Studies and Continuing Education

Lois Longwood, Director

360-650-6854

www.wvu.edu/ee/profdev/index.shtml

Professional enrichment opportunities are available for individuals interested in broadening their professional skills, exploring new careers, or seeking additional endorsements or courses for career enhancement. Offerings include:

- **Certificate Programs** offer in-depth study in professional and specialized areas resulting in a certificate of completion when the program is successfully completed. Courses are designed to meet the busy schedules of adults. Contact: 360-650-3717.
- **Credit Option/Clock Hour partnerships** with professional organizations provide Western credit or clock hours to partnership offerings. Course work must meet University academic standards. Contact: 360-650-7780.

Summer Programs

Marlene Harlan, Director

360-650-7221

Summer Session is a self-support quarter that offers over 500 academic credit and professional development courses. In addition to the traditional 6- and 9-week courses, offerings include short term, online, field courses, and faculty-led global learning programs. 360-650-3308, www.wvu.edu/ee/summersession/

Conference Services helps in facilitating and planning professional conferences and workshops for groups and organizations year-round. Services include fiscal management, registration, marketing, web development, hospitality, printing, media equipment, and general support. 360-650-6821, www.wvu.edu/ee/conference/

Viking Launch offers incoming freshmen a strong, focused start up to college life at Western. Students will arrive on campus seven days early for an intensive week of study and preparation for a successful Western Experience. 360-650-3308, www.wvu.edu/ee/youth/v_launch/

Youth Programs are designed for the academic pursuits and leadership development of youth in elementary, middle and high school. Participants live on campus or commute while they explore the arts, humanities, technology, science, outdoor

challenges and more. 360-650-6820, www.wvu.edu/ee/youth/

- **College Quest** (Grades 10-12) www.wvu.edu/ee/youth/collegequest/index.shtml
Through this summer college prep program, students complete a real college course, gain valuable "success in college" information, and form extraordinary social connections that come with life in a residence hall. College Quest bridges the gap between high school and college and put students on a path to personal, educational, and career success.
- **Early Release Program** (Grades K-5)
In this program, students spend an afternoon discovering and exploring exciting topics in science and arts during the academic year.
- **Girls in Engineering, Math and Science (GEMS)** (Various Ages and Grades)
Western's GEMS provides an empowering forum for girls to learn and excel in the fields of Engineering, Math and Science and explore STEM innovation and careers with faculty, professionals, college students, and peers that share similar interests.

Programs include GEMS Academy, GEMS Fair, and GEMS Night Out.
- **Global Connections** (Grades 4-6) www.wvu.edu/ee/youth/global-connections/index.shtml
This summer program provides opportunities for youth from diverse cultures to build connections through academic enrichment and recreational activities emphasizing the development of cross-cultural relationships.
- **Grandparents U** (Youth, Ages 7-14, and Grandparents) www.wvu.edu/ee/youth/grandparents/index.shtml
This intergenerational summer program is designed for grandparents and grandchildren. Participants choose from exciting classes taught by Western faculty. Each class provides opportunities to learn, have fun, and create lifelong memories.
- **International Youth Programs** (Grades 4-11)
WVU Youth Programs hosts several groups of students from South Korea in the summer. Cheongju Youth participates in Odyssey of Science and Arts, JLS Academy participates in Global Connections, and

Korea High School Program participates in a customized STEM program. In addition to their content classes, ESL/American Culture classes are customized for each group.

- **Kids Night Out @ Western (KNOW)** (Grades 1-5)
Youth experience a combination of academic and recreational enrichment on a Friday evening during the academic year. Students explore hands-on science activities in the Science Resource Center in SMATE and end the evening at the swimming pool in the Wade King Student Recreation Center.
- **Odyssey of Science and Arts** (Grades 4-7)
www.wvu.edu/ee/youth/odyssey/index.shtml
Western faculty, instructors, and staff create summer academic enrichment offerings for students that offer a quality and uniqueness that is hard to find elsewhere. The resulting signature courses spotlight areas of expertise and take advantage of Western's campus. Students attend classes, participate in field trips, work on projects in specialized labs, and engage in a wide range of other hands-on activities that make learning interactive and fun.
- **Western Kids Camp** (Grades K-6)
Youth participate in morning academic enrichment activities and programmed afternoon recreation based on a weekly theme. Theme-inspired summer sessions include nature, science, culture study, the arts, and more. Students utilize college classrooms, labs, equipment, playing fields, and the award-winning Wade King Student Recreation Center (WKSRC). Campers are divided into groups according to age and participate in age appropriate activities.

Western Kids Camp is offered in partnership with EE and Campus Recreation.

- **Youth Programs in Anacortes** (Various Ages and Grades)
WWU Youth Programs offers programming in Anacortes in partnership with the Anacortes School District and Western's Shannon Point Marine Center.

Programs include Early Release Enrichment, Ocean STEM After School, Odyssey of Science and Arts, Grandparents U.
- **Youth Programs in Poulsbo** (Various Ages and Grades)
In addition to programming in Bellingham and Anacortes, Western's signature Youth

Programs, Western Kids Camp, and Odyssey of Science and Arts are available in Poulsbo, Washington, through a partnership with Olympic College, SEA Discovery Center, and Poulsbo Parks and Recreation.

Partnership Youth Programs are developed by Western colleges and departments. These programs are offered in conjunction with EE. 360-650-6820, www.wvu.edu/ee/youth/

- **WWU Lakewood Jr. Sailing Camp** (Ages 11-18)
This summer sailing program for youth is the oldest (since 1981) and most comprehensive sailing program in Whatcom County. Offered by Western's Viking Union/Lakewood Water Sport Facility, young sailors and windsurfers master skills in a natural environment at Lakewood Water Sport Facility, which is one of the premier facilities in the Northwest and located on the South shore of Lake Whatcom.
- **Suzuki Violin** (Ages 4-7)
Offered through the College of Fine and Performing Arts (CFPA), Suzuki Violin provides a nurturing environment that fosters your child's love of music.
- **Summer Youth Theatre Institute (SYTI)** (Grades K-12)
SYTI courses are taught in professional theatre spaces, allowing access to the costume shop and performance venues on Western's campus. Each institute culminates in an original showcase produced on the stage of Old Main Theater.
- **Summerwinds** (Grades 6-12)
Presented by Western's College of Fine and Performing Arts (CFPA), Summerwinds is a chamber music day camp for woodwind (flute, oboe, clarinet, and bassoon) players who have had at least two years of experience on their instruments.

Facing the Future

www.facingthefuture.org
Phone: 844-284-2151

Facing the Future is an international leader whose mission is to create curriculum for educators that equip and motivate students to develop critical thinking skills, build global awareness, and engage in positive solutions for a sustainable future.

Testing Center

Maggie Barklind, Director

Student, Course Services, and Testing
Phone: 360-650-2117

Kathy Murray, Manager

www.wvu.edu/assess
Phone: 360-650-3080

The Testing Center is a National College Testing Association (NCTA) Certified Test Center and adheres to the standards and guidelines of NCTA and the Consortium of College Testing Centers (CCTC). The mission of the Testing Center is to provide high quality and secure testing services for students, graduates, professionals and those from the local and regional community. Other functions of the testing center include:

- Administers and proctors make-up exams and exams for independent study courses.
- Provides distance learning exams for both Western students and students attending other universities.
- Provides information on national testing programs.
- Maintains records of entrance test scores.

Kathleen Culver, BA

Administrative Assistant to the Vice President for University Advancement

Lori Samborski, CMT

Presidents of the Faculty Senate

2016-17

Kristen Larson

2015-16

Molly Ware

2014-15

Spencer Anthony-Cahill

2013-14

Johann Neem

2011-13	Karen Stout (2 terms)
2010-11	Scott Pearce
2009-10	Daniel Larner
2008-09	Matthew Liao-Troth
2007-08	Jeff Newcomer
2006-07	Ira Hyman
2005-06	William Lyne
2004-05	Jim Stewart
2003-04	James Loucky
2002-03	John Purdy
2001-02	Kathleen Kennedy
2000-01, 1989-90	Christopher A. Suczek
1999-00	Mark Bussell
1998-99	E. Leroy Plumlee
1997-98	James W. Hearne
1996-97	George T. Cvetkovich
1995-96	Kenneth Hoover
1994-95	Kris A. Bulcroft
1993-94	Kathleen M. Knutzen
1991-93	John Mason (2 terms)
1990-91	Richard W. Thompson
1987-89	George E. Mariz (2 terms)
1986-87	Harry Jackson
1985-86	Robert M. Thorndike

University Presidents Emeritus

KAREN W. MORSE

President Emeritus. BS, Denison University; MA, PhD, University of Michigan.

PAUL J. OLSCAMP

President Emeritus. BA, MA, University of Western Ontario; PhD, University of Rochester.

CHARLES J. FLORA

President Emeritus. BS, Purdue University; MEd, EdD, University of Florida.

KENNETH P. MORTIMER

President Emeritus. AB, MBA, University of Pennsylvania; PhD, University of California-Berkeley.

Dean Emeritus

LAWRENCE M. MARRS

Dean Emeritus of Woodring College of Education, BS, MS, University of Utah; PhD, University of Texas, Austin.

ROGER GILMAN

Dean Emeritus of Fairhaven College of Interdisciplinary Studies, BA, Fairhaven College/Western Washington University; MA, PhD, University of Chicago.

DENNIS R. MURPHY

Dean Emeritus of College of Business and Economics, BA, MA, Western Washington University; PhD, Indiana University (Bloomington).

UNIVERSITY PERSONNEL

ARLAN NORMAN

Dean Emeritus of College of Sciences and Technology, BS, University of North Dakota, PhD, Indiana University.

BRADLEY SMITH

Dean Emeritus of Huxley College of the Environment, BA, MA, Western Michigan University; PhD, University of Michigan.

Distinguished Service Professor of Western Washington University

PETER J. ELICH

Distinguished Service Professor Emeritus of the University. BA, University of Washington; MEd, Western Washington College of Education; PhD, University of Oregon.

PAUL J. OLSCAMP

Distinguished Service Professor Emeritus of the University. BA, MA, University of Western Ontario; PhD, University of Rochester.

JOSEPH E. TRIMBLE

Distinguished Service Professor of the University. BA, Waynesburg College; MA, University of New Hampshire; PhD, University of Oklahoma

Retired Faculty - Emeritus

A

MARIAN ALEXANDER

Associate Professor Emeritus of Western Libraries. BA, Occidental College; MLS, University of California, Los Angeles.

DONALD ALPER

Professor Emeritus of Political Science. BA, MA, California State University – Long Beach; PhD, University of British Columbia.

EVELYN AMES

Professor Emeritus of Physical Education, Health and Recreation. BS, University of Nevada; MS, Washington State University; PhD, University of Maryland.

DARREL AMUNDSEN

Professor Emeritus of Modern and Classical Languages. BA, Western Washington State College; MA, University of Washington; PhD, University of British Columbia.

KATHRYN L. ANDERSON

Professor Emeritus of Fairhaven. BA, MA, University of Iowa; PhD, University of Washington.

SHARRON ANTHOLT

Professor Emeritus of Art. BFA, California State University; MFA, San Francisco Art Institute.

M. CHAPPELLE ARNETT

Professor Emeritus of Physical Education. BS, Centenary College; MS, Purdue University; EdD, University of Missouri.

DAVID AUER

Senior Instructor Emeritus of Decision Sciences. BA, University of Washington, BA, MA, MS, Western Washington University.

B

RANDALL S. BABCOCK

Professor Emeritus of Geology. AB, Dartmouth College; MS, PhD, University of Washington.

LOUIS BARRETT

Professor Emeritus of Physics and Astronomy. PhD, University of Washington.

BONNIE J. BARTHOLD

Professor Emeritus of English. BA, University of Arizona; MA, Ohio State University; PhD, University of Arizona.

MYRL E. BECK, JR.

Professor Emeritus of Geology. BA, MS, Stanford University; PhD, University of California – Riverside.

EDMOND BEREAL

Professor Emeritus of Art. BA, Chouinard Art Institute.

RICHARD BERG

Professor Emeritus of Geology. BS, MS, University of Washington; PhD, Oregon State University.

JOSEPH D. BETTIS

Professor Emeritus of Fairhaven. BA, Southern Methodist University; BD, Drew University; MA, PhD, Princeton University.

LESLIE BLACKWELL

Professor Emeritus of Education. BA, Washington State University; MEd, EdD, University of Washington.

HENRICH BROCKHAUS

Associate Professor Emeritus of Modern and Classical Languages, BA, MA, University of British Columbia, PhD, University of Washington.

EDWIN H. BROWN

Professor Emeritus of Geology. AB, Dartmouth College; MSC, University of Otago, New Zealand; PhD, University of California – Berkeley.

HERBERT A. BROWN

Professor Emeritus of Biology. BA, University of California – Los Angeles; PhD, University of California – Riverside.

WILLIAM C. BUDD

Professor Emeritus of Psychology. BA, Hamline University; BS, MA, PhD, University of Minnesota.

WILLIAM A. BULTMANN

Professor Emeritus of History. AB, PhD, University of California – Los Angeles.

MICHAEL J. BURNETT

Associate Professor Emeritus of Fairhaven College. BA, University of Illinois; MA, PhD, Claremont Graduate School.

C

DONALD J. CALL

Associate Professor Emeritus of Sociology. BA, MA, PhD, University of Oregon.

STEPHEN CARMEAN

Professor Emeritus of Psychology. BA, MA, PhD, University of Illinois.

NITA CLOTHIER

Assistant Professor Emeritus of Liberal Studies. BA, MEd, Western Washington State College.

ROY A. CLUMPNER

Professor Emeritus of Physical Education, Health and Recreation. BS, University of Wisconsin – Lacrosse; MA, California State University – San Jose; PhD, University of Alberta.

LESLIE CONTON

Professor Emeritus of Fairhaven College. BA, Oberlin College; MA, PhD, University of Oregon.

KEITH J. CRASWELL

Associate Professor Emeritus of Mathematics. BS, MS, PhD, University of Washington.

LOWELL T. CROW

Professor Emeritus of Psychology. BS, MA, University of South Carolina; PhD, University of Illinois.

DAVID CURLEY

Professor Emeritus of Liberal Studies. BA, MA, PhD, University of Chicago.

GEORGE T. CVETKOVICH

Professor Emeritus of Psychology. BA, Youngstown State University; MA, Akron State University; PhD, Kansas State University.

D

SANDRA DAFFRON

Associate Professor Emeritus of Human Services & Rehabilitation. BS, Eastern Illinois University; MS, Southern Illinois University; EdD, Northern Illinois University.

CAROLYN DALE

Associate Professor Emeritus of Journalism. BA, MA, University of Washington.

CECILIA DANYSK

Associate Professor Emeritus of History. BA, Concordia University; MA, PhD, McGill University.

HELEN F. DARROW

Professor Emeritus of Educational Curriculum and Instruction. BS, Wilson Teachers College; MA, Northwestern University; MA, University of California – Los Angeles; EdD, Teachers College, Columbia University.

MELVIN G. DAVIDSON

Professor Emeritus of Physics and Astronomy. AB, Whitman College; PhD, Rensselaer Polytechnic Institute.

STEVEN H. DILLMAN

Professor Emeritus of Engineering Technology. BS, Rice University; PhD, University of Washington.

WILLIAM J. DITTRICH

Associate Professor Emeritus of Physics and Astronomy. BS, MS, University of Washington.

MARJORIE J. DONKER

Professor Emeritus of English. BA, Western Washington State College; MA, PhD, University of Washington.

THOMAS E. DOWNING

Associate Professor Emeritus of Philosophy. BA, Wayne State University; PhD, Stanford University.

JAMES E. DUEMMEL

Associate Professor Emeritus of Mathematics. BA, MA, PhD, Ohio State University.

E

DONALD J. EASTERBROOK

Professor Emeritus of Geology. BS, MS, PhD, University of Washington.

MARIE EATON

Professor Emeritus of Fairhaven College. BA, Pomona College; MEd, PhD, University of Washington.

ANNA L. EBLEN

Professor Emeritus of Communication. BA, Duke University; MA, University of West Florida; PhD, University of Oregon.

DONALD K. EKLUND

Associate Professor Emeritus of History. BA, University of New Mexico; MA, Colorado State University; PhD, University of Colorado.

PETER ELICH

Professor Emeritus of Psychology. BA, University of Washington. MEd, Western Washington University. PhD, University of Oregon.

ROBERT EMBREY

Professor Emeritus of Art. BA, MEd, MFA, University of Oregon.

DAVID ENGBRETSON

Professor Emeritus of Geology. AA, AS, Olympic Community College; BA, Western Washington University; MS, PhD, Stanford University.

HOWARD M. EVANS

Associate Professor Emeritus of Educational Curriculum and Instruction. BS, Eastern Oregon College; MA, EdD, University of Illinois.

F

CONSTANCE P. FAULKNER

Professor Emeritus of Fairhaven College. BS, PhD, University of Utah.

RICHARD FEINBERG

Associate Professor Emeritus of Physics and Astronomy. BS, State University of New York; MS, PhD, Stanford University.

UNIVERSITY PERSONNEL

FLORA FENNIMORE

Professor Emeritus of Educational Foundations. BS, Mt. Angel Women's College; MA, EdD, Washington State University.

RICHARD F. FERINGER

Professor Emeritus of Educational Administration and Foundations. BS, University of Minnesota; EdD, University of California – Los Angeles.

DAVID FEWINGS

Associate Professor Emeritus of Finance and Marketing. BS, University of Manitoba; MBA, PhD, University of Toronto.

MAURICE H. FOISY

Associate Professor Emeritus of Political Science. BA, Gonzaga University; MA, Georgetown University; PhD, University of Oregon.

BÉLA FOLTIN, JR

Professor Emeritus of Western Libraries. BM, MM, MLS, University of Illinois.

RICHARD W. FONDA

Professor Emeritus of Biology. BA, Duke University; MS, PhD, University of Illinois.

PAUL M. FORD

Professor Emeritus of Educational Administration and Foundations. AB, Dartmouth College; MEd, EdD, Harvard University.

DEBRA FORGAYS

Professor Emeritus of Psychology. BA, MEd, PhD, University of Vermont.

RICHARD J. FOWLER

Professor Emeritus of Technology. BA, MS, Washington State University; EdD, Texas A&M University.

SHEILA L. FOX

Professor Emeritus of Special Education. Associate Dean, Woodring College of Education. BA, Western Washington State College; MEd, PhD, University of Washington.

RICHARD L. FRANCIS

Professor Emeritus of English. AB, Kenyon College; MA, Duke University; PhD, Yale University.

G

GEORGE A. GERHOLD

Professor Emeritus of Chemistry. BS, University of Illinois; PhD, University of Washington.

ROGER GERMAIN

Associate Professor Emeritus of Theatre Arts. BA, Western Washington State College.

ROGER GILMAN

Dean and Professor Emeritus of Fairhaven. BA, Fairhaven College, Western Washington University; MA, PhD, University of Chicago.

MADGE G. GLEESON

Professor Emeritus of Art. BA, MAT, Brown University; MFA, Washington State University.

THOMAS K. GRADY

Associate Professor Emeritus of Engineering Technology. BA, BS, MSEE, University of Colorado.

NEIL R. GRAY

Associate Professor Emeritus of Mathematics. BA,

San Francisco State College; MA, PhD, University of Washington.

FREDERICK GROTE

Associate Professor Emeritus of Psychology. AB, Dartmouth College; PhD, University of North Carolina – Chapel Hill.

BURTON L. GROVER

Associate Professor Emeritus of Educational Administration and Foundations. BS, MA, PhD, University of Minnesota.

H

DANIEL HAGEN

Professor Emeritus of Economics. BA, PhD, University of California – Berkeley.

JULIA HANSEN

Professor Emeritus of Economics. BA, University of Vermont; MA, PhD, University of California – Berkeley.

K. PETER HARDER

Professor Emeritus of Economics. BA, University of Puget Sound; MA, PhD, University of Nebraska.

JOHN T. (JACK) HARDY

Professor Emeritus of Environmental Sciences. BA, University of California – Santa Barbara; MS, Oregon State University; PhD, University of Washington.

F. DAVID HARRIS

Professor Emeritus of Engineering Technology. BS, Newark College of Engineering; MAT, Rhode Island College; MS, Rensselaer Polytechnic Institute.

LYLE HARRIS

Professor Emeritus of Journalism. BA, MA, University of Montana; PhD, University of Missouri.

SUSANNA A. HAYES

Associate Professor Emeritus of Psychology. BA, Loyola University; MEd, University of Arizona; PhD, University of Michigan.

LEONARD M. HELFGOTT

Professor Emeritus of History. BA, MA, PhD, University of Maryland.

MICHAEL L. HENNIGER

Professor Emeritus of Elementary Education. Associate Dean, Woodring College of Education. BA, MA, Whitman College; PhD, University of Texas.

FRANCIS H. HILDEBRAND

Professor Emeritus of Mathematics. BA, Kent State University, MS, University of Illinois; PhD, Michigan State University.

CLAUDE E. HILL

Professor Emeritus of Technology. BA, MEd, University of Washington.

FORD D. HILL

Associate Professor Emeritus of Music. AB, Wisconsin State University; MMus, Indiana University.

JAMES J. HITCHMAN

Professor Emeritus of History. BA, Willamette University; MA, PhD, University of California – Berkeley.

KAREN HOELSCHER

Professor Emeritus of Elementary Education. BS, Bemidji State University; MS, Mankato State University; EdD, Harvard University Graduate School of Education.

KENNETH HOWELL

Professor Emeritus of Special Education. BA, MA, Arizona State University; PhD, University of Oregon.

I

JAMES INVERARITY

Professor Emeritus of Sociology. BA, University of Michigan - Ann Arbor; PhD, Stanford University.

J

DANA JACK

Professor Emeritus of Fairhaven College. BA, Mount Holyoke College; MSW, University of Washington – Seattle; PhD, Harvard University.

RAND JACK

Professor Emeritus of Fairhaven College. BA, Princeton University; LLB, Yale University Law School.

CAROL JANSON

Professor Emeritus of Art. BA, BFA, MA, PhD, University of Minnesota.

R. ALLEN JENSEN

Associate Professor Emeritus of Art. BA, University of Washington; MA, Washington State University.

ROBERT I. JEWET

Professor Emeritus of Mathematics. BS, California Institute of Technology; MS, PhD, University of Oregon.

JERRY JOHNSON

Professor Emeritus of Mathematics. BA, Augsburg College; MS, California Institute of Technology; MA, University of California, Los Angeles; PhD, University of Washington.

THOMAS A. JOHNSTON

Professor Emeritus of Art. BA, San Diego State College; MFA, University of California – Santa Barbara.

ANTHONY A. JONGEJAN

Associate Professor Emeritus of Instructional Technology. BA, MS, Western Washington University; MS, PhD, University of Oregon.

DEBRA JUSAK

Associate Professor Emeritus of Computer Science. BA, State University of New York – Potsdam, MS, University of Connecticut; PhD, University of California – Irvine.

K

KENNETH S. KELEMAN

Professor Emeritus of Management. BA, MA, San Diego State University; PhD, University of Utah.

ROBERT H. KELLER

Professor Emeritus of Fairhaven. AB, University of Puget Sound; BD, MA, PhD, University of Chicago.

ROBERT HYUNG-CHAN KIM

Professor Emeritus of Educational Foundations. BA, Hanguk University of Foreign Studies; BA, MA, EdD, George Peabody College for Teachers.

LINDA KIMBALL

Professor Emeritus of Anthropology. BS, MA, PhD, Ohio State University.

SUSAN KINCAID

Assistant Professor Emeritus of Human Services and Rehabilitation. BA, MEd, Western Washington University; PhD, Walden University.

DONALD M. KING

Associate Professor Emeritus of Chemistry. BS, Washington State University; PhD, California Institute of Technology.

MARVIN L. KLEIN

Professor Emeritus of Educational Administration. BS, MS, Southern Illinois University; PhD, University of Wisconsin.

RONALD A. KLEINKNECHT

Professor Emeritus of Psychology. BA, MS, PhD, Washington State University.

KATHLEEN KNUTZEN

Professor Emeritus of Physical Education, Health and Recreation. BEd, MEd, Western Washington University; PhD, University of Oregon.

HUBERTUS E. KOHN

Professor Emeritus of Biology. PhD, University of Innsbruck, Austria.

MILTON KRIEGER

Professor Emeritus of Liberal Studies. BA, Reed College; PhD, University of Toronto.

GEORGE KRIZ

Professor Emeritus of Chemistry. BS, University of California, Berkeley, PHD, Indiana University.

SUSANNE KROGH

Professor Emeritus of Elementary Education. BA, Florida State University; MEd, University of Maryland; PhD, University of Oregon.

L

GEORGE S. LAMB

Professor Emeritus of Educational Curriculum and Instruction. BA, Macalester College; MA, University of Washington; PhD, University of Minnesota.

GARY M. LAMPMAN

Professor Emeritus of Chemistry. BS, University of California, Los Angeles; PhD, University of Washington.

DANIEL LARNER

Professor Emeritus of Fairhaven College. AB, Harvard University; MS, PhD, University of Wisconsin – Madison.

LAWRENCE L. LEE

Professor Emeritus of English. BA, MA, PhD, University of Utah.

ARLEEN LEWIS

Professor Emeritus of Psychology. BA, Utah State University; PhD, University of Nebraska.

L. LEWIS

Professor Emeritus of Decision Sciences. BA,

UNIVERSITY PERSONNEL

California State University - Long Beach; MS, San Jose State University; PhD, University of Louisville.

MERRILL E. LEWIS

Professor Emeritus of English. BA, MA, University of Oregon; PhD, University of Utah.

MATTHEW LIAO-TROTH

Professor Emeritus of Management. PhD, University of Arizona.

NORMAN F. LINDQUIST

Associate Professor Emeritus of Mathematics. BA, Linfield College; PhD, Oregon State University.

RICHARD H. LINDSAY

Professor Emeritus of Physics and Astronomy. BS, University of Portland; MS, Stanford University; PhD, Washington State University.

BILLIE J. LINDSEY

Associate Professor Emeritus of PEHR. BS, University of Texas; MA, EdD, University of Northern Colorado.

LOUIS G. LIPPMAN

Professor Emeritus of Psychology. BA, Stanford University; MA, PhD, Michigan State University.

MARCIA LIPPMAN

Associate Professor Emeritus of Psychology. BA, MA, Michigan State University; PhD, University of British Columbia.

WALTER J. LONNER

Professor Emeritus of Psychology. BA, MA, University of Montana; PhD, University of Minnesota.

M

WILLIAM R. MACKAY

Associate Professor Emeritus of Psychology. BA, Brown University; MA, PhD, University of California – Berkeley.

ELIZABETH MADSEN

Associate Professor of Western Libraries. BA, Western Washington University; MA, University of Hawaii – Manoa; MA, Stanford University.

SUSAN K. MANCUSO

Professor of Student Affairs. BA, University of California; MA, EdD, University of Washington.

GEORGE MARIZ

Professor Emeritus of History. BA, MA, PhD, University of Missouri – Columbia.

LAWRENCE W. MARRS

Dean and Professor Emeritus of Education. BS, MS, University of Utah; PhD, University of Texas – Austin.

DAVID MARSH

Professor Emeritus of Art. BA, Central Washington College; MS, University of Oregon.

ROBERT MARSHALL

Professor Emeritus of Anthropology. BA, Youngstown State University; PhD, University of Pittsburgh.

LEAANN MARTIN

Professor Emeritus of Health and Human Development. Dean Emeritus of the College of Humanities and Social Sciences. BS, Missouri State

University; MS, University of Arizona – Tucson; PhD, University of Texas – Austin.

BARBARA MATHERS-SCHMIDT

Professor Emeritus of Communication Sciences and Disorders. BA, Lewis and Clark College; MS, Portland State University; PhD, University of Washington.

J. RICHARD MAYER

Professor Emeritus of Environmental Science. BS, Union College; MA, Columbia University; PhD, Yale University.

ROBERT A. McCRACKEN

Professor Emeritus of Educational Curriculum and Instruction. BA, MA, PhD, Syracuse University.

FLOYD J. McKAY

Professor Emeritus of Journalism. BA, Linfield College; MA, University of Maryland; PhD, University of Washington.

CAROL C. McRANDLE

Professor Emeritus of Communication Sciences and Disorders. BS, University of Minnesota; MS, PhD, Purdue University.

ROBERT D. MEADE

Professor Emeritus of Psychology. BA, Indiana University; MA, PhD, University of Pennsylvania.

ROBERT C. MEIER

Professor Emeritus of Finance, Marketing and Decision Sciences. BA, Indiana University; MA, PhD, University of Minnesota.

LARRY D. MENNINGA

Associate Professor Emeritus of Computer Science. BA, University of Iowa; MA, MS, PhD, University of Washington.

JOHN MILES

Professor Emeritus of Environmental Studies. BA, Dartmouth College; MA, University of Oregon; PhD, The Union Institute.

VLADIMIR MILICIC

Professor Emeritus of Foreign Languages and Literatures. Certificate of Baccalaureate, Gymnasium for Boys, Belgrade; MA, University of Chicago.

JOHN A. MILLER

Professor Emeritus of Chemistry. BS, Oregon State University; PhD, Iowa State University.

RALPH E. MINER

Professor Emeritus of Political Science. BA, San Jose State University; MA, PhD, University of Oregon.

KURT W. MOERSCHNER

Associate Professor Emeritus of Foreign Languages and Literatures. BComm, BA, Sir George Williams University; MA (Psychology), MA (German), PhD, University of Colorado.

ROBERT L. MONAHAN

Professor Emeritus of Geography and Environmental Social Sciences. BA, University of Washington; MA, University of Michigan; PhD, McGill University.

PHILLIP T. MONTAGUE

Professor Emeritus of Philosophy. BS, Loyola University; PhD, Stanford University.

DEBNATH MOOKHERJEE

Professor Emeritus of Environmental Studies. BS, MS, University of Calcutta; PhD, University of Florida.

THEODORE A. MORK

Professor Emeritus of Educational Curriculum and Instruction. BA, MEd, Western Washington State College; PhD, Syracuse University.

JACK MORRIS

Associate Professor Emeritus of Music. BA, Brigham Young University; MM, Indiana University

JOSEPH G. MORSE

Professor Emeritus of Chemistry. BS, South Dakota State College; MS, PhD, University of Michigan.

KAREN MORSE

Professor Emeritus of Chemistry. BA, Denison University; MS, PhD, University of Michigan – Flint.

SANDRA MOTTNER

Professor Emeritus of Finance and Marketing. BA, Mary Baldwin College; MBA, College of William and Mary; PhD, Old Dominion University.

GEORGE M. MULDROW

Professor Emeritus of English. BA, MA, University of Missouri; PhD, Stanford University.

N**GEORGE "PINKY" NELSON**

Professor Emeritus of Physics and Astronomy. Director, Science, Math and Technology Education. BS, Harvey Mudd College; MS, PhD, University of Washington.

EDWARD F. NEUZIL

Professor Emeritus of Chemistry. BS, North Dakota State College; MS, Purdue University; PhD, University of Washington.

ALDEN NICKELSON

Professor Emeritus of Educational Curriculum and Instruction. BS, MA, PhD, University of Washington.

ARLAN NORMAN

Professor Emeritus of Chemistry and Dean Emeritus of College of Sciences and Technology. BS, University of North Dakota; PhD, Indiana University.

O**THOMAS OLNEY**

Associate Professor Emeritus of Finance and Marketing. AB, Cornell University; MBA, MPhil, PhD, Columbia University.

MAUREEN E. O'REILLY

Professor Emeritus of Theatre Arts. BA, Whitman College; MA, University of Washington; MFA, University of Cincinnati.

MARTIN OSBORNE

Professor Emeritus of Computer Science. BA, Hamilton College; MA, University of Oregon; PhD, Oregon State University.

JOANN OTTO

Professor Emeritus of Biology. AB, AM, Mount Holyoke College; PhD, University of California – Irvine.

P**JAL S. PARAKH**

Professor Emeritus of Biology. BA, Osmania University; MS, University of Florida; PhD, Cornell University.

DOUGLAS PARK

Professor Emeritus of English. AB, Hamilton College; PhD, Cornell University.

DIANE C. PARKER

Professor Emeritus. BA, University of California, Berkeley; MLS, University of Washington.

INGEBORG L.E. PAULUS

Associate Professor Emeritus of Sociology. BA, MA, University of British Columbia; PhD, University of London, England.

DONALD L. PAVIA

Professor Emeritus of Chemistry. AB, Reed College; MS, PhD, Yale University.

RODNEY J. PAYTON

Professor Emeritus of Liberal Studies. BA, MA, Washington State University; PhD, University of Chicago.

LOIS E. PETERSEN

Associate Professor Emeritus of Management. BA, Wartburg College; EdM, Oregon State University; EdD, University of North Dakota.

TIM PILGRIM

Associate Professor Emeritus of Journalism. BA, Western Montana College; MA, University of Montana; MA, PhD, University of Washington.

ROBERT H. PINNEY

Associate Professor Emeritus of Secondary Education. BA, University of Washington; EdD, Stanford University.

E. LEROY PLUMLEE

Professor Emeritus of Management. BBA, Texas Tech University; MS, Northern Illinois University; PhD, Texas Tech University.

SAM R. PORTER

Professor Emeritus of Technology. BA, Iowa State Teachers College; MA, Teachers College, Columbia University; EdD, University of Missouri.

MERLE M. PRIM

Professor Emeritus of Psychology. BA, University of Washington; MS, San Diego State College; PhD, Washington State University.

MARY ANN PULTZ

Associate Professor Emeritus of Biology. BA, PhD, Indiana University.

JOHN PURDY

Professor Emeritus of English. BA, Western Oregon University; MA, University of Idaho; PhD, Arizona State University.

RICHARD L. PURTILL

Professor Emeritus of Philosophy. BA, MA, PhD, University of Chicago.

R**ROBERT A. RAUDEBAUGH**

Professor Emeritus of Engineering Technology. BS, MA, Northern Arizona University; EdD, Arizona State University.

UNIVERSITY PERSONNEL

JOHN R. REAY

Professor Emeritus of Mathematics. BA, Pacific Lutheran University; MS, University of Idaho; PhD, University of Washington.

MARY ANN REYNOLDS

Professor Emeritus of Accounting. BS, Brigham Young University; PhD, University of Utah.

JOHN RICHARDSON

Professor Emeritus of Sociology. BA, University of the Pacific; PhD, University of California – Davis.

LARRY S. RICHARDSON

Associate Professor Emeritus of Communication. BA, Western Washington State College; MEd, Central Washington State College; MA, PhD, Washington State University.

RON RIGGINS

Professor Emeritus of Fairhaven College. BA, La Verne College; MS, ReD, Indiana University.

HARRY RITTER

Professor Emeritus of History. BA, University of Arizona; MA, PhD, University of Virginia.

LYNN A. ROBBINS

Professor Emeritus of Environmental Studies. BA, University of Utah; MA, PhD, University of Oregon.

WALTER L. ROBINSON

Professor Emeritus of Foreign Languages and Literatures. BA, MA, PhD, University of Texas.

ROSALIE ROMANO

Associate Professor Emeritus of Secondary Education. BA, PhD, University of Washington.

AJIT S. RUPAAL

Professor Emeritus of Physics and Astronomy. BS, MS, Panjab University; PhD, University of British Columbia.

SALVATORE S. RUSSO

Professor Emeritus of Chemistry. BA, Wesleyan University; PhD, Northwestern University.

CARLA RUTSCHMAN

Professor Emeritus of Music. BA, University of Northern Colorado; MM, Arizona State University; PhD, University of Washington.

EDWARD R. RUTSCHMAN

Professor Emeritus of Music. BMus, University of Northern Colorado; MMus, Arizona State University; PhD, University of Washington.

DAVID RYSTROM

Associate Professor Emeritus of Finance and Marketing. BS, University of California – Los Angeles; MS, California State University – Northridge; PhD, University of Oregon.

S

WILLIAM M. SAILORS

Associate Professor Emeritus of Accounting. BA, University of Illinois; MS, MBA, University of Southern California.

RONALD N. SAVEY

Associate Professor Emeritus of Accounting. BA, Western State College of Colorado; MBA, University of Denver.

ROBERT L. SCANDRETT

Professor Emeritus of Music. BA, Seattle Pacific College; MA, PhD, University of Washington.

DAVID E. SCHNEIDER

Professor Emeritus of Biology. BS, Bates College; PhD, Duke University.

HENRY G. SCHWARZ

Professor Emeritus of History/East Asian Studies. BA, MA, PhD, University of Wisconsin.

SY SCHWARTZ

Associate Professor Emeritus of Educational Administration and Foundations. BS, MS, EdD, Wayne State University.

DONALD J. SCHWEMMIN

Associate Professor Emeritus of Biology. BS, MS, PhD, University of Michigan.

MICHAEL R. SEAL

Professor Emeritus of Engineering. BEd, University of British Columbia; MEd, Western Washington State College; DEd, Texas A&M University.

MICHAEL T. SEILO

Professor Emeritus of Communication Sciences and Disorders. BS, Northern Michigan University; MA, University of Arizona; PhD, Ohio University.

STEPHEN SENGE

Professor Emeritus of Accounting. BA, Western State University; MA, PhD, Kent State University.

CLYDE M. SENGER

Professor Emeritus of Biology. BA, Reed College; MS, Purdue University; PhD, Utah State University.

ALBERT C. SHAW

Professor Emeritus of Music. BMusEd, Wheaton College; MMusEd, Drake University; DMusEd, Indiana University.

SHELBY SHEPPARD

Associate Professor Emeritus of Secondary Education. BGS, MA, PhD, Simon Fraser University.

KNUTE SKINNER

Professor Emeritus of English. BA, University of Northern Colorado; MA, Middlebury College; PhD, University of Iowa.

ALAN G. SLEEMAN

Associate Professor of Economics. BSc, London School of Economics; PhD, Simon Fraser University.

KRISTINE SLENTZ

Professor of Emeritus of Special Education. BA, State University of New York; MA, PhD, University of Oregon.

LINDA E. SMEINS

Professor Emeritus of Art. BFA, University of Denver; MA, California State University; PhD, University of British Columbia.

ALDEN C. SMITH

Associate Professor Emeritus of Communication. BS, Florida Southern; MS, Syracuse University; PhD, University of Illinois.

BRADLEY F. SMITH

Dean and Professor Emeritus of Huxley College of the Environment. BA, MA, Western Michigan University; PhD, University of Michigan.

WILLIAM E. SMITH

Professor Emeritus of English. BA, MA, Appalachian State University; PhD, University of Utah.

R.E. "TED" STANNARD JR.

Associate Professor Emeritus of Journalism. BA, University of Washington; MA, Cornell University.

JAMES STEWART

Professor Emeritus of Physics and Astronomy. BA, BS, University of North Dakota; MS, PhD, University of New Mexico.

WILLIAM STOEVER

Professor Emeritus of Liberal Studies. BA, Pomona College; MDiv, Yale Divinity School; MPhil, PhD, Yale University.

DAVID W. SUE

Professor Emeritus of Psychology. BS, University of Oregon; MS, PhD, Washington State University.

WALTER SUESS

Associate Professor Emeritus of Modern and Classical Languages. BA, Ruhr – Universitat; MA (English), MA (German), California State University – San Francisco; PhD, University of California – Davis.

STEPHEN SULKIN

Professor Emeritus of Biology. AB, Miami University; MS, PhD, Duke University.

CHARLES SYLVESTER

Professor Emeritus of Health and Human Development. BS, MA, University of Maryland; PhD, University of Oregon.

KENNETH M. SYMES

Professor Emeritus of English. BS, MS, Utah State University; PhD, University of New Mexico.

T**JAMES L. TALBOT**

Professor Emeritus of Geology. BA, University of Cambridge; MA, University of California – Berkeley; PhD, University of Adelaide.

DAVID E. TEMPLETON

Professor Emeritus of Art. BFA, MA, University of Illinois; PhD, University of Minnesota.

THOMAS A. TERICH

Professor Emeritus of Environmental Studies. BA, MA, California State University, Los Angeles; PhD, Oregon State University.

HUBERT N. THORESON

Associate Professor Emeritus of Management. BS, Valley City State College; MEd, EdD, University of North Dakota.

ROBERT M. THORNDIKE

Professor Emeritus of Psychology. BA, Wesleyan University; PhD, University of Minnesota.

KATHLEEN M. TOMLONOVIC

Professor Emeritus of Modern and Classical Languages. BA, Marycrest College; MEd, Fordham University; MA, University of Iowa; PhD, University of Washington.

MARIAN J. TONJES

Professor Emeritus of Educational Curriculum and Instruction. BA, MA, University of New Mexico; EdD, University of Miami.

JOHN TOWNER

Professor Emeritus of Elementary Education. BS, MS, University of Wisconsin; PhD, University of Minnesota.

LOUIS W. TRUSCHEL

Associate Professor Emeritus of History. BA, Pacific Lutheran University; MA, PhD, Northwestern University.

U**JOHN UNDERWOOD**

Professor Emeritus of Modern and Classical Languages. BA, Arizona State University; MS Georgetown University; PhD, University of California – Los Angeles.

SAIM URAL

Professor of Computer Science. BSc, MSc, PhD, Middle East Technical University – Turkey.

ROBERTA. URSO

Professor Emeritus of Art. BA, MA, University of Notre Dame.

V**RICHARD VAWTER**

Associate Professor Emeritus of Physics and Astronomy. BS, Texas Technological University; MS, State University of Iowa; PhD, State University of New York.

RALPH A. VERNACCHIA

Professor Emeritus of Physical Education, Health, and Recreation. BE, Montclair State University; MS, Ohio University; PhD, University of Utah.

RICHARD F. VOGEL

Associate Professor Emeritus of Engineering Technology. BA, MAT, Washington State University; DEd, Texas A&M University.

W**DAVID J. WALLACE**

Professor Emeritus of Music. BM, University of Michigan; MM, University of Wisconsin; DMA, University of Rochester.

WILLIAM L. WALLACE

Associate Professor Emeritus of Liberal Studies. BS, Appalachian State University; MA, PhD, Ohio University.

HERBERT H. WEBBER

Professor Emeritus of Geography and Environmental Social Sciences. BSc, PhD, University of British Columbia.

RUDOLF WEISS

Professor Emeritus of Modern and Classical Languages. BA, BEd, Western Washington State College; MA, PhD, University of Colorado.

JOHN A. WEYH

Professor Emeritus of Chemistry. BA, College of Great Falls; MS, PhD, Washington State University.

DONALD W. WHISENHUNT

Professor Emeritus of History. BA, McMurry College; MA, PhD, Texas Tech University.

UNIVERSITY PERSONNEL

JOHN C. WHITMER

Professor Emeritus of Chemistry. BS, University of Rochester; MS, PhD, University of Michigan.

MARK WICHOLAS

Professor Emeritus of Chemistry. AB, Boston University; MS, Michigan State University; PhD, University of Illinois – Urbana.

DON C. WILLIAMS

Professor Emeritus of Biology. BA, Chico State College; MA, PhD, University of California, Davis.

TERRELL G. WILLIAMS

Professor Emeritus of Finance and Marketing. BS, MS, University of Wyoming; PhD, University of Arizona.

JOHN W. WOLL

Professor Emeritus of Mathematics. BS, Haverford College; PhD, Princeton University.

RAYMOND WOLPOW

Professor Emeritus of Secondary Education. BA, Wagner College; MA, Teachers College, Columbia University; PhD, Pennsylvania State University School of Education.

BRUCE D. WONDER

Associate Professor Emeritus of Management. BS, University of California, Berkeley; MS, San Francisco State University; PhD, University of Washington.

EVELYN C. WRIGHT

Associate Professor Emeritus of English. BS, Illinois

State University; MA, PhD, Northwestern University.

Y

MING-HO YU

Professor Emeritus of Huxley College. BS, National Taiwan University; MS, PhD, Utah State University.

Z

LINA ZEINE

Professor Emeritus of Communication Sciences and Disorders. BA, American University of Beirut – Lebanon; MA, University of Colorado; PhD, University of Kansas.

DAVID W. ZIEGLER

Associate Professor Emeritus of Political Science. BA, Oberlin College; MA, PhD, Harvard University.

EUGENE ZORO

Professor Emeritus of Music. BA, MM, University of Rochester.

LINDA A. ZURFLUH

Professor Emeritus of Educational Administration. BA, MA, Pacific Lutheran University; PhD, University of Washington.

Faculty

A

Abedi, Amir / Political Science

Abel, Troy / Environmental Studies

Acevedo-Gutierrez, Alejandro / Biology

Ahmed, Shameem / Computer Science

Airth, Paula / Design

Akinrinade, Babafemi / Fairhaven

Alfers, Sandra / Modern and Classical Languages

Aller, Warren / Educational Administration

Alqudah, Sura / Engineering and Design

Amiran, Edoh Y. / Mathematics

Amos, Colin / Geology

Amundson, Garth / Art and Art History

Anderson, Amy / Mathematics

Charles, Anderson / History

Anderson, Kristin L. / Sociology

Anderson, Roger A. / Biology

Antil, Laurence / Teacher Education Outreach Programs

Antholt, Charles / Economics

Anthony-Cahill, Spencer J. / Chemistry

Antos, John / Chemistry

Aranda, Blanca / Modern and Classical Languages

Armstrong, Jeanne / Library

Arthur-Cameselle, Jessyca / Health and Human Development

Askari, Kaveh / English

B

Bach, Andrew J. / Environmental Studies

Bajuk, Mike / Theatre and Dance

Bajwa, Deepinder / Decision Sciences

Baker-Sennett, Jacquelyn / Health and Community Studies

Barnhart, Charles / Environmental Sciences

Bauman, Jenise / Environmental Sciences

Beasley, Bruce H. / English

Benedetti, Dina / Teacher Education Outreach Programs

Benson, Earl D. / Finance and Marketing

Benyi, Arpad / Mathematics

Berardi, Gigi / Environmental Studies

Berger, Robert / Chemistry

Berget, Andrew / Mathematics

Berzal de Dios, Javier / Art and Art History

Bianco, Christopher / Music

Bingham, Brian L. / Environmental Sciences

Biswas, Bidisha / Political Science

Bodensteiner, Leo R. / Environmental Sciences

Boland, Elizabeth / Health and Community Studies

Bone, Amber / Music

Borda, Emily / Chemistry

Bordoloi, Samit / Health and Community Studies

Boudreaux, Andrew / Physics and Astronomy

Bourne, Patricia / Music

Bover, David / Computer Science

Bowe, Brian / Journalism

Bower, John L. / Fairhaven

Boxberger, Daniel L. / Anthropology
 Bradley, Karen / Sociology
 Brand, Rob / Elementary Education
 Brickham, Dana / Health and Community Studies
 Briggs, Roger D. / Music
 Brilla, Lorraine / Health and Human Development
 Broadhagen, Marion / Biology
 Brown, Andrew / Fairhaven
 Brown, Nicole / English
 Brown, Richard / Theatre and Dance
 Bruce, Tim / Educational Administration
 Bruna-Lewis, Sean / Anthropology
 Bryan, April / Engineering and Design
 Buckley, Patrick H. / Environmental Studies
 Buddhadev, Harsh / Health and Human Development
 Bulcroft, Richard / Sociology
 Bunn, Andrew / Environmental Sciences
 Bunn, Rebecca / Environmental Sciences
 Burgess, Donald / Secondary Education
 Burtz, Randall / Health and Human Development
 Bussell, Mark E. / Chemistry
 Byrne, Christina A. / Psychology

C

Calderon, Dolores / Fairhaven
 Califf, Christopher / Decision Sciences
 Camacho, Gustavo / Music
 Camlin, Cynthia / Art and Art History
 Campbell, Gerard / Management
 Campbell, Sarah K. / Anthropology
 Caplan-Auerbach, Jacqueline / Geology
 Carnell, Cher / Theatre and Dance
 Carney, Joanne / Instructional Technology and Elementary Education
 Carroll, David / Elementary Education
 Carroll, Jeff / Psychology

MARK GREENBERG (2013) Dean of Libraries and Professor. BA, University of Toronto; MA, University of Western Ontario; PhD, University of Florida; MLS, University of South Florida.
JEANNE ARMSTRONG (1997) Professor. BA, University of Dayton; MLS, Dominican University; PhD, University of Arizona.
MARGARET FAST (1997) Associate Professor. BA, Mills College; MA, University of British Columbia; MLS, State University of New York-Albany.
J. GABRIEL GOSSETT (2009) Associate Professor. BA, University Wisconsin-Milwaukee; MLIS, University Wisconsin-Madison
ELIZABETH JOFFRION (2012) Associate Professor. BA, Louisiana State University; MA, University of New Orleans; MLIS, University of Maryland.
ROBERT LOPRESTI (1987) Professor. BA, Juniata College; MLS, Rutgers, The State University.
REBECCA MARRALL (2010) Associate Professor. BS, Portland State University; MLIS, University of Hawaii at Manoa.
JENNY OLEEN (2014) Assistant Professor. Scholarly Communications Librarian. BS, Kansas State University; BS, University of Arizona; MLS, Indiana University.
MICHAEL OLSON (2014) Associate Professor. BA, University of Washington; MA & PhD, UCLA; MLS, UCLA Graduate School of Library and Information Science.
ANDREA PETERSON (1999) Associate Dean of Libraries. BA, University of Utah; MLS, Indiana University.
PAUL PIPER (1997) Professor. BS, MFA, University of Montana; MLIS, University of Hawaii.
JEFF PURDUE (1999) Associate Professor. BA, MA, University of Illinois at Chicago; MLS, Dominican University, River Forest, Illinois.
MARIAN A. RITTER (1969) Associate Professor. BME, MLS, University of Portland.
PETER A. SMITH (1990) Associate Professor. BA, MA, MLS, Wayne State University.
ELIZABETH A. STEPHAN (2008) Associate Professor. BA, Northwest Missouri State University; MLS, University of Wisconsin-Madison.
SYLVIA TAG (1997) Associate Professor. BA, Colorado College; MLIS, University of Iowa.
BOB THOMAS (2006) Associate Professor. BS, University of the State of New York; MLIS, University of Washington.

Degrees and Certificates

Degrees granted from August 2014 to June 2015, inclusive:

Master of Education	50
Master of Arts	70
Master of Science	59
Master of Music	3
Master of Business Administration	28
Master in Teaching	47
Master of Professional Accounting	4
Master of Fine Arts	6
Bachelor of Arts in Education	194
Bachelor of Arts	2,021
Bachelor of Science	912
Bachelor of Fine Arts	33

UNIVERSITY PERSONNEL

Bachelor of Music	26
Bachelor of Science in Nursing	24
Total (undergraduate)	3,210
Recommended for certification to the State Superintendent for Public Instruction — August 2014 to August 2015, inclusive:	
Residency Teacher Certificate	311

Appendix C - Student Rights and Responsibilities Code

WAC (Washington Administrative Code) sections:

[WAC 516-21-010 Introduction](#)

Western Washington University students enjoy the same basic rights, privileges, and freedoms granted to all members of society. At the same time, acceptance of admission to the university carries with it an obligation to fulfill certain responsibilities and expectations as a member of the Western Washington University community.

As a condition of enrollment at Western, students must assume responsibility for their own actions and maintain an environment conducive to the academic success, safety, and well-being of others. In addition, they are expected to be truthful, respect the rights of others, and abide by all university policies and procedures, as well as all applicable local, state, and federal laws and regulations. All students are responsible for understanding and complying with the responsibilities and expectations set forth in this code.

The student conduct process at Western is designed to be a learning process that promotes an understanding of students' responsibilities as members of the university community. The objectives of the student conduct system, as set forth in this code, are twofold: to ensure that students act in a manner consistent with high standards of scholarship and behavior, and to maintain the safety and well-being of all members of the university community.

Appendix D - Academic Honesty Policy and Procedure

1. Policy

All Western Washington University students have an obligation to fulfill the responsibilities of their particular roles as members of an academic community. Honesty is essential to learning. Without it, fair evaluation for all is impossible. Academic integrity is demanded, and academic dishonesty at Western Washington University is a serious infraction dealt with severely. No student shall claim as his or her own, the achievements, work or arguments of others, nor shall he or she be a party to such claims. It is the instructor's responsibility to confront a student and to take appropriate action if such academic dishonesty, in the instructor's judgment, has occurred.

For help and guidance with the academic honesty procedures, students and faculty should contact the Secretary to the Academic Honesty Board at AcademicHonestyBoard@wwu.edu or (360) 650-3480. The Student Life Office does not participate in the process, but can direct students to the appropriate office, and can be reached at student.life@wwu.edu for additional support.

Students who do not meet the deadlines given in the procedures shall be deemed to have waived their right to appeal. If any officer of the University or the Academic Honesty Board fails to meet the deadlines or procedures established in this policy, then the student or faculty member may appeal to the next level in the process based on procedural grounds. The deadlines are set to provide a rapid resolution of the incident. However, unforeseen circumstances such as illness or absence from the campus may result in an extension of a deadline. Such extensions shall be recorded in writing by the unit head (the Chair or Director of the department where the faculty member resides), or the Dean of the appropriate college, or secretary to the Academic Honesty Board, as appropriate. If the end of fall or winter quarter is reached during the steps of the academic honesty procedure, the remaining parts of the process will be considered at the start of the next academic quarter. If an appeal has not moved all the way through the process before the end of spring quarter, and if all parties are not available and willing to proceed during the summer, then the clock "stops" until the start of fall term. An effort will be made to resolve the issues as soon as possible when there are extenuating circumstances (e.g., a student is graduating).

2. Academic Dishonesty

Academic dishonesty is not qualitatively different from other types of dishonesty. It consists of misrepresentation by deception or by other fraudulent means. Academic dishonesty compromises the instructor's ability to fairly evaluate any student's work or achievement. It includes, but is not limited to, the following:

- a. Giving, taking, or receiving unauthorized information to/from another person during any type of assignment or test.
- b. Obtaining or providing without authorization questions or answers prior to the time of an assignment or test.
- c. Using unauthorized sources for answers during any assignment or test.
- d. Taking part in or arranging for another person to complete an assignment or to take a test in place of another.
- e. Giving or receiving answers by use of signals or electronic communication during a test.
- f. Altering answers on a scored test and submitting it for a higher grade.
- g. Collaborating with others in a required assignment without the approval of the instructor.
- h. Stealing class assignments or portions of assignments, including electronic files, and submitting them as one's own.
- i. Not crediting participants for their part in a group project or claiming credit for work not done on a group project.
- j. Plagiarism, which is presenting as one's own in whole or in part the argument, language, creations, conclusions, or scientific data of another without explicit acknowledgment. Examples include, but are not limited to:
 1. Using another person's written or spoken words without complete and proper citation.
 2. Using information from a Website, CD-ROM or other electronic source without complete and proper citation.
 3. Using statistics, graphs, charts and facts without acknowledging their source.
 4. Submitting a paper purchased from a term-paper service.

APPENDIX D

5. Paraphrasing, which is imitating someone else's argument using other words without acknowledging the source.
6. Claiming credit for someone else's artistic work, such as a drawing, script, musical composition or arrangement.
7. Using someone else's lab report as a source of data or results.
8. Using one's own or substantially similar work, produced in connection with one course, to fulfill a requirement in another course without prior permission. A student may use the same or substantially the same work for assignments in two or more courses only with written permission from the instructors of all the classes involved.
9. Submitting the results of a machine translation program as one's own work.

3. Procedures

Although instructors should make every effort to ensure that all students are aware of the policies for academic dishonesty, it is the responsibility of each student to read, understand, and uphold the standards of academic honesty.

An instructor suspecting an act of academic dishonesty shall discuss the matter thoroughly with the student involved. Arrangements for this discussion shall be made by the instructor within ten (10) working days after discovering the alleged violation. If the incident occurs at the end of the quarter, or in the event the student is absent from campus, the instructor shall attempt to contact the student via email and in writing at the most recent permanent address available in the Registrar's Office.

Should the instructor be unable to arrange a meeting with the student to discuss the incident in question before final grades are due, the instructor shall leave the grade blank and send a note to the Registrar. The Registrar shall in turn inform the student of his/her responsibility to contact the instructor. Should the student not respond to the faculty member by the 10th working day of the next academic quarter, not including summer, the grade will be changed to an F or where appropriate to "U" or "NP" as in the case of S/U grading or Pass/No Pass grading.

During the discussion between the instructor and the student, the student may be asked to explain his or her thought process and the sources of the information, ideas, data, or calculations presented in the work under dispute. Failure to give an adequate explanation can influence the instructor's decision.

Following this discussion, the instructor shall determine whether or not an act of academic dishonesty has occurred and determine an appropriate penalty. Within ten (10) working days of this discussion and the decision by the instructor that an act of dishonesty has occurred, the instructor will submit the Report of Academic Dishonesty Incident form summarizing the incident and include copies of all evidence. This form will be sent to the Vice President for Academic Affairs, the Registrar, the Dean's office, the Unit Head where the course resides (the program chair or, in the case of colleges without department chairs, the Dean), and the student. A record of the violation is maintained in the Office of the Vice President for Academic Affairs and the Registrar's Office. If the reported violation is the student's first offense, the student is required to complete a self-paced workshop on Academic Integrity maintained in the Testing Center.

If the reported violation is the student's second offense, the student is required to appear before the Academic Honesty Board, which will provide a recommendation for punishment commensurate with the severity of the second offense. Typical punishments will range from temporary suspension (length to be determined by Hearing Board based on the severity of the offense), to permanent expulsion from Western Washington University. Documentation of a third offense is likely to result in expulsion, although the Hearing Board has discretion in determining the severity of the punishment, based on the severity of the offense.

No student shall be allowed to withdraw from a course or from the University to avoid the consequences of academic dishonesty.

Appeal: A student accused of academic dishonesty and who feels the finding to be in error has recourse to an appeals process. Within five (5) working days of the finding of academic dishonesty the student may appeal to the unit head. The unit head shall make a ruling on the case within ten (10) working days of the appeal.

After learning of the unit head's ruling, either the student accused or the faculty member who initiated the charge may within five (5) working days appeal to the Dean of the college in which the course resides. In the

case where a faculty member is teaching for an all-university program not under the purview of a college dean, the appeal will go to the dean of the college where the faculty member's appointment resides. The dean shall make a ruling on the case as to whether 1) the student in question committed an act of academic dishonesty; and if so 2) whether the sanction was appropriate, within ten (10) working days of appeal.

Either the student or the faculty member who initiated the charge may appeal the findings of the Dean to the Academic Honesty Board within five (5) working days.

The Academic Honesty Board shall consist of two faculty members and two students to be selected from a pool of students and faculty. The Provost shall select the board members and appoint the chairperson. It is recommended that the students and faculty members appointed come from the college involved in the incident, as specified above. The board's findings are restricted to determining whether the student in question committed an act of academic dishonesty. A hearing shall be called within fifteen (15) working days of the filing of the appeal to the Academic Honesty Board unless both parties agree to a delay. Both the student and the instructor may be accompanied by one person, but that person may not speak on behalf of the student or the instructor. Both the student and the faculty member will be asked to present evidence, make oral arguments, and call witnesses, all of which shall be restricted to the issues under consideration and matters already in the record. Members of the board may question either party.

If the faculty member is on leave or is no longer employed by Western, the unit head shall appear in lieu of the faculty member. If the faculty member is available, but does not appear at the hearing, the form that he or she submitted will be considered to be his or her statement. If the student does not attend the hearing, the student's appeal shall be considered withdrawn, and the original finding of the faculty member shall be considered final. At the conclusion of the hearing, the board shall, in writing, a) find that there is insufficient cause to overrule the dean's decision, or b) find that there is sufficient cause to modify or overrule the dean's decision. The Academic Honesty Board shall send a written copy of its decision to the student, the faculty member, the unit head, the Dean, the Registrar, and the Provost.

Within five (5) working days of the ruling of the Academic Honesty Board, either side may appeal all findings to the Vice President for Academic Affairs, whose decision is final. The Vice President for Academic Affairs will meet with the board chairperson if (s)he intends to overrule or modify the decision of the board. Finally, all participants will be notified in writing by the Office of the Provost, as to the final decision.

Appendix E - Student Records

WAC (Washington Administrative Code) sections:

[516-26-010 Preamble](#)

The purpose of this student records policy is to establish rules and procedures that appropriately implement the Family Educational Rights and Privacy Act of 1974 (FERPA), 20 USC 123g. Western Washington University is committed to safeguarding appropriate access to student education records as well as maintaining individual student privacy. The University records officer works to ensure that information contained in student records is treated responsibly with due regard to its personal nature, and for the students', University's and community's needs. Questions regarding this policy should be addressed to the University records officer.

1. Generally, students have the right to review and copy their education records. Students also have the right to challenge the content of, release of, or denial of access to their education records.
2. The University will normally not permit access to the public without a student's permission; some exceptions exist as detailed in this policy.
3. The University may release directory information concerning a student unless the student requests in writing that it not be released.

Please read below for a complete description of the policy.

Appendix F - Academic Grievance and Appeal Policy and Procedures

1. Policy

Students have protection, through orderly procedures, against arbitrary or capricious actions or decisions by their instructors; students also have protection against erroneous actions or decisions by academic units. At the same time, students are responsible for achieving and maintaining the standards of academic performance and excellence which are established by their instructors and for complying with all relevant policies, standards, rules and requirements which are formulated by the University and the University's academic units. A student wishing to pursue an academic grievance or appeal must use the following grievance procedure once having received notice of the action or decision which gives rise to the grievance. The emphasis of the grievance procedures is on informal resolution of the grievance. Grievances which involve hearings before the Student Academic Grievance Board should be rare. For help and guidance with the grievance procedures, students should contact the Dean of Students Office. www.wvu.edu/dos/office/

Students who do not meet the deadlines given in the procedures shall be deemed to have waived their right to appeal. If any officer of the University or the Board fails to meet the deadlines established, the student may continue to the next level in the procedures. The deadlines are set to provide a rapid resolution of the grievance. However, unforeseen circumstances such as illness or absence from the campus may result in an extension of a deadline. Such extensions shall be recorded in writing by the unit head, dean or secretary to the Board, as appropriate. If the end of the quarter is reached during the process of following the grievance procedure, the remaining parts of the process will be considered at the start of the next academic quarter, not including summer session.

2. Academic Grievances

Academic grievances are limited to the following:

1. A claim by the student that an assigned grade is the result of arbitrary or capricious application of otherwise valid standards of academic evaluation, or
2. A claim by the student that the standards for evaluation are arbitrary or capricious, or
3. A claim by the student that the instructor has taken an arbitrary or capricious action which adversely affected the student's academic progress, or
4. A claim by the student that an academic unit has reached a decision not in keeping with University policy or taken an erroneous action which adversely affects the student's academic standing or academic career.

NOTE: Where an action is claimed to be in violation of affirmative action, a separate set of procedures are used (see Appendix A - WWU Policies on Equal Opportunity/Nondiscrimination, Affirmative Action, Sexual Harassment, Reasonable Accommodation).

3. Procedures

1. Resolution and Appeals

A student with an academic grievance against an individual instructor shall first thoroughly discuss the matter with the instructor involved. The student must meet with the instructor within ten (10) days of receiving written notification of the action or decision which gives rise to the grievance or 10 days from the grade posting deadline. In the case of absence from the campus of either of the parties, the student shall inform the academic unit head, in writing, of the existence of the grievance and the unit head shall arrange for consultation between the parties concerned at the earliest possible opportunity. Should the faculty member be on extended leave, or have resigned from the University, the unit head shall act for the instructor.

The instructor and the student should make a good faith effort to resolve the grievance. Grievances resolved at this stage do not require a written record unless the resolution involves a grade change. The instructor will send a memo to the Registrar indicating the grade change. A copy will be sent to the student.

APPENDIX F

If a resolution is not achieved between the student and the instructor within five (5) days after the first meeting between the student and instructor, the student has five (5) days to ask the academic unit head, or designee, to attempt to informally resolve the issue. The unit head, or designee, will meet with both parties to clarify the issues and attempt to resolve them. If the issue is resolved within five (5) days after the student has sought the assistance of the unit head, the unit head, or designee, shall prepare an informal agreement, in writing, for both sides to sign. No reasons need be given. Such an agreement, once signed by both parties, may not be appealed.

If an agreement cannot be reached within the five-day review period, and the student still wishes to pursue the grievance, the student shall request the unit head or designee to present the case to the dean of the college in which the academic unit resides. In the case where a faculty member from one college is teaching a course in another college, the appeal will go to the dean of the college where the course resides. In the case where a faculty member is teaching for an all-university program not under the purview of a college dean, such as Honors or Women Studies, the appeal will go to the dean of the college where the faculty member resides. The unit head has five (5) days to present the material to the dean. The material presented should include all of the documents relevant to the case and an analysis of the issues. The dean shall continue the process of seeking an informal resolution and collect more material as necessary. If a resolution can be reached, the dean shall prepare an informal agreement as above. Such an agreement, once signed by both parties, may not be appealed.

If the student has a grievance against an academic unit, the student shall first thoroughly discuss the matter with the unit head. The student must meet with the unit head within ten (10) days of receiving notification of the action or decision of the unit which gives rise to the grievance. If the grievance is not resolved within ten (10) days of the initial meeting between the student and the unit head, the student may request, in writing, further review by the dean of the college in which the academic unit resides, following the procedures for grievance.

If the grievance against a faculty member or academic unit is not resolved at this stage, the appropriate dean, as specified above, shall make a decision based on the merits of the case. The reasons for the decision shall be in writing and shall be given to both the student and the instructor and unit head. The dean's decision must be rendered and given to all parties within five (5) days of receiving the material. The written decision of the dean will include: (1) a statement of the grievance, (2) a statement of the efforts made to resolve the issue and (3) a statement of action, with reasons.

If the grievance does not involve a graduate student, either side may appeal a decision of the college dean to the Student Academic Grievance Board. The appeal must be filed within five (5) days after the receipt of the dean's written decision. Either party may appeal to the Academic Grievance Board in writing to the executive secretary of the academic grievance board. The appeal must be received within five (5) days after receiving the decision of the college dean. If the grievance involves a graduate student, either side may appeal a decision of the dean to the dean of the graduate school. The appeal must be filed within five (5) days after the receipt of the college dean's written decision. The graduate dean shall make a decision based on the merits of the case. The reasons for the decision shall be in writing and shall be given to the student, the instructor, unit head and the appropriate dean, as specified above. The graduate dean's decision must be rendered and given to all parties within five (5) days of receiving the material. The written decision of the graduate dean will include: (1) a statement of the grievance, (2) a statement of the efforts made to resolve the issue and (3) a statement of action, with reasons. Either side may appeal a decision of the dean of the graduate school to the Student Academic Grievance Board. The appeal must be filed within five (5) days after the receipt of the graduate dean's written decision. The party appealing to the Academic Grievance Board will inform the executive secretary of the academic grievance board.

2. Appeal to the Board

1. Composition of the Board. The Student Academic Grievance Board shall consist of six (6) members: three students and three faculty. An administrator appointed by the Vice President for Student Affairs will serve as executive secretary to the board and will be responsible for the arranging of meetings and the collection and maintenance of necessary documents. The board, for any hearing, will be selected in the following manner:
 - a. The pool of board members shall consist of six (6) faculty appointed by the Faculty Senate for three-year terms; six (6) undergraduate students and six (6) graduate students appointed by the Associated Students board for one-year terms.

- b. Each party to the grievance shall have the right to reject two faculty and two students from the list of the pool of board members.
- c. From the remaining members, the Vice President for Academic Affairs or designee shall select the board members for the hearing, and shall appoint the chairperson. If the grievance involves a graduate student, at least two of the board members must be graduate students.

2. Appeal Procedures

- 1. Lodging appeal. The party appealing to the board shall present the appeal to the executive secretary of the board within five (5) days after issuance of the dean's written decision. The letter of appeal shall state the basis of the appeal. The secretary will send a copy of the appeal to the second party to the grievance, who may respond in writing. All materials used at any stage of the grievance shall be made available to both parties, the unit head, and to the dean.
- 2. Mediation. If both parties agree to mediation, a mediator will be appointed by the Vice President for Academic Affairs or designee from a list of four persons previously appointed by the Faculty Senate. Each party to the grievance shall have the right to reject one mediator from the list of four. The mediator has five (5) days from the time of appointment to attempt to resolve the issue to the satisfaction of both parties. If the issue is resolved, the mediator shall prepare an informal agreement, in writing, for both sides to sign. No reasons need be given. Such an agreement, once signed by both parties, may not be appealed. If the issue is not resolved the appeal proceeds to a hearing.
- 3. Hearing. A hearing shall be called within fifteen (15) days of the filing of the appeal unless both parties agree to a delay, or unless the grievance is resolved through mediation.

A quorum is four (4) members of the board. Both the student and the instructor may be accompanied by an advocate (although not a legal professional).

Both the student and the faculty member shall be invited to present oral arguments which shall be restricted to matters already in the record. New causes for grievance may not be raised at the hearing. Members of the board may question either party.

No testimony may be taken by the board unless both parties are present, or have waived their right to be present.

At the conclusion of the hearing, the board shall, in writing,

- a. Request additional information, to be considered at a future hearing, or
- b. Find that there is insufficient cause to overrule the dean's decision and recommend to the Vice President for Academic Affairs that it be upheld, or
- c. Find that there is sufficient cause to modify or overrule the dean's decision and recommend appropriate action to the Vice President for Academic Affairs.

3. Appeal to the Vice President for Academic Affairs

Either party may appeal to the Vice President for Academic Affairs from a decision by the board. Such appeal shall be made, in writing, within five (5) days after the issuance of the board's written decision. The board chairperson has the right to make a written response to the appeal within five (5) days of filing the appeal. The vice president may overrule or modify the decision of the board only if that decision was arbitrary, capricious, based on insufficient information, or was beyond the scope of these procedures as defined in Section 2. The Vice President for Academic Affairs will meet with the board chairperson if (s)he intends to overrule or modify the decision of the board. The decision of the Vice President for Academic Affairs is final. Copies of the Vice President's decision will be sent to the student, faculty member, unit head, dean of the college in which the unit resides, dean of the graduate school if a graduate student is involved, chairperson and secretary of the board.

4. Maintenance of Records

All written statements and testimony considered in the grievance process and a copy of the final written decision of the board or academic vice president shall be retained on file in the academic vice president's office for a period of one (1) year following final disposition of the grievance.

APPENDIX F

Where a solution or decision results in a grade change, the instructor shall inform the registrar of the grade change.

4. Definitions

These definitions are for the purposes of these procedures only:

1. "Academic unit" is Fairhaven College of Interdisciplinary Studies or a department within the Colleges of Business and Economics, Fine and Performing Arts, Humanities and Social Sciences, Sciences and Technology, Huxley College of the Environment, or Woodring College of Education.
2. "Unit head" is the department chairperson, or, in the case of Fairhaven college, the chairperson of the college personnel committee and the program director in the case of academic programs.
3. The unit head "designee" can be any faculty member or administrator from the academic unit. Appointment of the designee shall be in writing and sent to the Vice President for Academic Affairs.
4. "Dean" is the dean or dean's designee of the college in which the academic unit resides, unless specified otherwise. Appointment of the designee shall be in writing and sent to the Vice President for Academic Affairs
5. Reference to "days" means "school days" and includes the registration period and the week in which exams are scheduled.
6. WWU's Academic Year begins on the first day of instruction every fall term, and concludes at the end of final examination week every spring term (see academic calendar for exact dates). Summer Session is an exception to the Academic Year and grievances not resolved before Summer Session will be continued during the coming fall term.

Appendix G - Code of Ethics for the Faculty of WWU

This Code of Ethics was adopted by vote of the faculty of Western Washington University on May 14, 1993, and was endorsed for inclusion in the Faculty Handbook by the Board of Trustees on July 8, 1993.

[Code of Faculty Ethics for the Faculty of Western Washington University](#)

Appendix H - WWU Administrative Procedures

Western Washington University is required to develop and implement procedures that ensure equal opportunity; and to effectively address situations that violate its policies regarding equal opportunity and nondiscrimination, and sex discrimination, and accommodating people with disabilities. The following section outlines the University's internal procedures for handling complaints of illegal discrimination and making requests for reasonable accommodation.

[\(PRO-U1600.02A\) Discrimination Complaint Procedure](#)

B. Process for Requesting Reasonable Accommodation

Employing officials, search committee chairs, supervisors, program directors, deans, faculty and department chairs may all receive requests for accommodation from persons with disabilities. Such requests may be submitted by employees, students, applicants for employment, individuals seeking admission to the University or its academic programs, and persons wishing to use University services or participate in University activities and events. The appropriate University contact varies, depending on whether the person requesting the accommodation is a student, employee, applicant, or a member of the general public.

It is the obligation of an individual with a disability who needs a reasonable accommodation to request that from an appropriate University contact, and to provide documentation of the disability if needed.

1. **Students.** Students with documented disabilities who are enrolled at the University are encouraged to seek accommodations and services through disAbility Resources for Students (DRS): Old Main Room 120; (360) 650-3083 (voice) or (360) 650-7175 (VP); drs@wwu.edu; www.wwu.edu/depts/drs.
2. **Employees.** Employees with disabilities are encouraged to inquire about reasonable accommodations to perform the essential functions of their job, meet performance and conduct standards, and enjoy equal benefits and privileges of employment. The process for requesting a reasonable accommodation can be found on Western's Human Resources website under Disability Services or by contacting Human Resources Disability Services at (360) 650-3771 or 711 (Washington Relay).
3. **Job Applicants.** Job applicants with disabilities are encouraged to inquire about reasonable accommodations if needed for the application and employment screening process. The policy and procedures for requesting a reasonable accommodation can be found on Western's Human Resources website. See contact information above.
4. **Applicants for Admission.** Applicants may request accommodation during the application process from the Admissions Office at (360) 650-3440 or disAbility Resources for Students (contact information above).
5. **Members of the General Public.** Persons with disabilities from the general public needing a reasonable accommodation to participate in a University activity, service or event open to the public are encouraged to contact either the program coordinator for that activity, service or event or the Vice Provost for Equal Opportunity and Employment Diversity: Old Main 345; (360) 650-3307 or 711 (Washington Relay); eoo@wwu.edu.

The Vice Provost for Equal Opportunity and Employment Diversity is the University's ADA Coordinator and may be reached in Old Main 345 or at (360) 650-3307, 711 (Washington Relay), or eoo@wwu.edu. The ADA Coordinator is responsible for ensuring that requests for accommodation are considered on a case-by-case basis in accordance with state and federal regulations, and that appropriate University officials are involved in evaluating the request, identifying funds and resources and implementing the accommodation.

Appendix I - Transportation Services

WWU is committed to supporting sustainable transportation options and reducing automobile-dependent transportation. All students, faculty, and staff are encouraged to utilize the variety of transportation options available and minimize the use of motor vehicles. The Sustainable Transportation Office offers information and assistance to help students find the transportation options that best fit their needs. WWU is bordered by residential neighborhoods within easy walking distance of downtown, and is well served by public transportation. For information, contact Western's Sustainable Transportation program at 360-650-7960, transportation@wwu.edu or go to www.wwu.edu/transportation.

Western Student Transportation

The student transportation program provides transportation resources for students including a Viking Xpress Bus Pass for each student*, Student Shuttle service, Zipcar, and a student Alternative Transportation Coordinator. The program is funded by a \$26.25 quarterly Student Transportation Fee. For more information, visit the student transportation website at www.wwu.edu/transportation.

*Students taking 6 or more credits are automatically assessed the \$26.25 Student Transportation Fee; students taking 1-5 credits can opt in to the student transportation program by paying the fee. Fee and eligibility do not apply to courses offered through Extended Education online or off-site classes or non-credit programs.

Student Bus Pass

The Student bus pass is valid for unlimited rides on all Whatcom Transportation Authority bus routes, including routes serving the Lincoln Creek Transportation Center and the 80X route serving Mount Vernon and Bellingham. Students must go to the Western Card office to have the bus pass encoded on their ID card for each academic year and summer quarter. Lost or damaged ID cards can be replaced at the Western Card office for a fee of \$8.00.

Student Shuttle

The WWU Student Shuttle is a late night bus service that operates during the academic year and is open only to Western students. A valid Western ID card is required to board. The shuttle system consists of two routes that serve WWU, Downtown Bellingham, Bill McDonald Parkway, Happy Valley, Lincoln Creek Transportation Center, and Lakeway Center. The shuttle stops at all WTA bus stops along its route. Map and schedule are available on buses, and at www.wwu.edu/transportation/westernstudentshuttle.shtml.

Walking

WWU is located within a mile of the Bellingham Central Business District and is surrounded by friendly residential neighborhoods. The campus is accessible via trails and an extensive sidewalk network through the neighborhoods. Walking is the cheapest way to go, and for trips of less than a mile, walking from door to door is usually just as fast as driving, parking and walking.

Bicycles

Bellingham is a featured bicycle destination, and the community supports bicycle transportation. With more than 900 bike racks adjacent to residence halls and academic buildings, you are encouraged to bring your bicycle to Western. There are some restrictions on bicycling in campus pedestrian areas during high-traffic times. The WWU Bicycle Commuting Guide and Washington state bicycle traffic laws are available at www.wwu.edu/transportation. Bicycles can be registered at no charge with University Police at the Campus Services Building. Register your bike to increase the chance of having your bike returned if it lost or stolen and then recovered. Bicycle locks, lights, parts and repair assistance are available at the Outdoor Center bike shop in the Viking Union.

APPENDIX I

Public transit

Whatcom Transportation Authority (WTA) provides safe, high-quality, cost-effective, and accessible public transportation. WTA offers WWU convenient service with multiple routes Monday-Sunday. Routes serving Western connect with other routes at the downtown Bellingham Transit Station including regional transit connections at Skagit Station in Mount Vernon. Evening service connects WWU with other Bellingham destinations until 10 p.m. seven days a week. Easy to use bike racks are installed on every WTA bus. For WTA route and schedule information, call 360-676-RIDE or visit www.ridewta.com.

Persons with disabilities service

All WTA buses (except emergency backup vehicles) are wheelchair accessible. Transit service is available for those unable to access or use fixed route buses through WTA Specialized Transportation by calling (360) 733-1144 (TTY call (360) 676-6844).

Zipcar

Western Washington University has partnered with Zipcar to bring self-service, on-demand car sharing to the campus, for convenient use of a car when needed. Cars are parked in the central campus, near the library and primary bus stops. Students 18 and older can apply for WWU Zipcar membership. Rates start at \$7.50/hour or \$69/day. Gas, insurance and maintenance are included in the hourly rate. Learn more at www.zipcar.com/universities/western-washington-university.

Park and Ride

The off-campus Lincoln Creek Transportation Center is convenient to Interstate 5 and a 10-minute bus ride to the center of campus. WTA routes serve the park and ride lot, providing a convenient alternative for parking on or near campus.

Parking Services

Parking Services is located in the Campus Services Building 2001 Bill McDonald Parkway, at the south end of campus. Parking Services hours are 7:15 a.m. to 4:30 p.m. Monday-Friday.

Parking space is limited and parking regulations are strictly enforced. Anyone using campus parking facilities are required to purchase and display a valid University parking permit on any motorized vehicle. Drivers are encouraged to become familiar with the University parking and traffic regulations.

Quarterly and Annual Parking Permits

Student parking permit applications for 2015/2016 will be available August 3, 2015. Check with www.wvu.edu/ps for application and deadlines. All Students must apply for parking to obtain a WWU Parking Permit.

Resident lot parking assignments are awarded by credits on file with WWU at the end of Spring quarter 2015.

Students living off campus are eligible to apply for and purchase C lot permits.

For those needing to drive occasionally a daily short-term parking permit may be purchased (see visitor parking below).

Parking for Persons with Disabilities

Parking access is available throughout the campus for those with state disability permits.

A WWU permit is also required. Students must apply for their Disability Parking Permit online (see above). Both permits must be displayed during business hours.

Accessibility guides to the WWU campus are available at www.wvu.edu/ps or at Parking Services. If you have questions feel free to contact the Parking Services Office at 360-650-2945 or email us at Parking@wvu.edu.

Parking for Visitors/Temporary Parking/Loading and Unloading

Visitors may purchase a permit online at www.wvu.edu/ps, at Parking Services, pay at a meter or use a pay station in lots 6V, 12A or C all hours of the day.

Pay stations in G lots are available at 4:30pm Monday through Friday and all hours on the weekend.

A 20 minute unloading/loading permit can be obtained at Parking Services at no charge.

For information on arranging guest parking visit www.wvu.edu/ps or contact Parking Services at 360-650-2945.

Daily and Hourly Parking	Per day/hour
Daily parking (7 a.m. to 4:30 p.m.)	\$2 per hour
All day parking	\$10 per day
Meter parking (all hours)	\$2 per hour
Motorcycle parking	\$2 per day
Pay box lots (7 a.m. to 4:30 p.m.)	\$2 per hour
Pay box lots (after 4:30 p.m.)	\$1 per hour

Evening/After Hours and Metered Parking

Permits are required in all lots all hours with the exception of lots C and 12A. Parking is available in the C and 12A gravel lots with no permit required Monday-Friday 4:30PM to 7AM and all day on weekends.

Lots are enforced as posted on the sign at the entrance to each lot.

You may obtain a permit at the pay stations located throughout the campus or pay to park in a metered space.

Disability accessible spaces always require a valid state disability permit.

Payment is always required at meters; permits are not valid for parking in a metered space.

Students with a valid bus pass may obtain an After-Hours permit at Parking Services.

2015/2016 Permits

2015/2016 Student Permit Quarterly Prices (subject to change). Academic and Annual permits also available. Summer permits are at a discounted rate.

Quarterly Parking permit fees	Quarterly total
Campus resident parking	\$91.27
Commuter Student C Lots (and Resident Overflow CR)	\$79.65
Carpool permit	\$59.43
Motorcycle parking	\$16.24
Disability Permit	\$79.65

Additional Information

For additional information regarding maps, regulations, visitor or event parking, fees, citations, or any parking questions please visit us at www.wvu.edu/ps, call 360-650-2945 or e-mail us at Parking@wvu.edu.

Appendix J - Satisfactory Academic Progress Policy for Financial Aid Recipients

Policies and Procedures

[\(POL-U7600.01\) Student Financial Aid: Satisfactory Academic Progress for Financial Aid Recipients](#)

Specific Requirements for Alternative Student Loan Recipients

All satisfactory academic progress requirements apply to the Alternative Student Loan program regardless of lender requirements.

Specific Requirements for Alaska Loan Recipients

Satisfactory academic progress requirements for continued receipt of Alaska Student and Alaska Family Education loans differ from those associated with Federal and Washington State aid programs. Full-time attendance is required for most Alaska Loan programs. The Alaska Supplemental Education Loan may allow for less than full-time attendance. Students considering this option are urged to consult the Alaska Commission on Postsecondary Education, as state residency and future loan eligibility may be jeopardized by such enrollment.

For more information, go to the [University's Policies and Procedures](#) website.
